Put forward by:	<input type="checkbox"/> Landowner(s) <input type="checkbox"/> Members of public		<input checked="" type="checkbox"/> Agent/Developers <input type="checkbox"/> Other
Site Description:	Large disused college building still in place which dominates the centre of the site. The area to the north of the building is hard-surfaced and used a car park, mostly flat with raised grassy edges to the north-west corner. A variety of metal and brick infrastructure remains in place in this area, ranging from streetlights to signage and handrails. Large playing fields form the southern half of the site with football goals still in place and a smaller 'tea room' building to the east of the college. The playing field area is very flat but notably lower than the car parked area with a reasonably hilly section between the two to the east of the college. Most of the boundary of the site is marked by light foliage and trees. Telephone cables run overhead connecting to the college building from the northern boundary.		
Current Use:	Education (unused), Recreational Open Space

Housing Development Potential

Suitable:

Unknown

Suitability Summary:

The site is located close to an existing residential area with good access to most basic services. The site does fall within the Metropolitan Green Belt and therefore the overall suitability of the site for development is unknown until a Green Belt assessment has been carried out.

Achievable:

Yes

Employment Development Potential

Suitable:

No

Suitability Summary:

The site is smaller than 0.25 and therefore fails to meet the minimum size threshold to be suitable for employment land. The site also falls within the Metropolitan Green Belt and is not located within or close to any town centres or existing employment areas.

Available:

Yes

Availability Summary:

The site has been put forward by the landowner for this purpose and no ownership, legal or physical constraints have been identified.

Available:

No

Availability Summary:

Submitted via landowner and has no identified ownership, legal or physical constraints. However, the landowner would not like the site to be developed for anything other than residential.

The site is located close to an existing residential area with good access to most basic services. The site does fall within the Metropolitan Green Belt and therefore the overall suitability of the site for development is unknown until a Green Belt assessment has been carried out.. Part of the site also falls within Flood Zones 2 and 3 which may impact on the suitability of those parts unless mitigation can be secured. The presence of electric pylons across the site may also reduce the net developable area for any residential development

Housing Development Potential

Suitable:

Yes

Suitability Summary:

The site previously had planning permission for residential development and therefore the site was suitable at a point in time. There are not considered to have been any significant changes in planning policy which mean this site is now considered unsuitable in the medium to long term. The site is sustainably located and is not subject to any significant development constraints, although the AQMA designation would need to be overcome.

Achievable:

Yes

Employment Development Potential

Suitable:

Yes

Suitability Summary:

The current use of the building is retail space, located within Rayleigh town centre. It is therefore considered that an employment use is suitable.

Available:

Yes

Availability Summary:

This site has previously been awarded planning permission which is considered to have now expired. In the absence of information to the contrary, this site is considered to remain available for development.
