Without providing clarification of the anticipated quantum of land required to accommodate the provision of housing and compensatory and new employment land, it is not possible to monitor the performance of policy GB1.

However, using the Council's figures in the table setting out the breakdown of the housing provision figures in Chapter 4 of the CSS (assuming that actual completions and extant permissions are all on previously developed land), setting aside the displacement of employment uses referred to above, approximately 42% of the required minimum housing provision target is capable of being accommodated on previously developed land (2,005 units from a total of 4,750). As such, the Council is required to provide at least 58% of the required minimum housing provision target on the Green Belt (2,745 units from a total of 4,750).

16256 Object

CHAPTER 8 Policy ENV9 - Code for Sustainable Homes

If these figures are adjusted to take account of the displacement of employment uses (assuming the provision of an equal quantity of land is required to compensate for the employment land that is redeveloped), this figure changes to 17.5% on previously developed land and 82.5% on Green Belt (828 and 3,922 units from a total of 4,750 respectively). Even allowing for the achievement of higher densities of employment on new developments, the figures above are unlikely to change significantly.

Furthermore, the table in Chapter 4 also confirms that no previously developed land will be available for development beyond 2021, or 2015 if account is taken of the displacement of the employment uses.

In light of this, not only does Chapter 6 fail to provide the necessary evidence base that will allow it to be monitored effectively, it is also necessary to consider whether it presents the most appropriate strategy for addressing the required release of Green Belt land to accommodate the defined housing and employment delivery targets to 2025 and beyond as necessary. Colonnade considers a more robust approach that is flexible and capable of being monitored, would be to clearly identify those sites capable of delivery in the short term, which for the avoidance of doubt includes those sites being promoted by Colonnade, with a reservoir of alternative sites set aside for future growth.

As set out in the representations to the Preferred Options Core Strategy, Colonnade considers that the inclusion of an affordable housing exception policy within the CSS will aid the delivery of community housing within rural areas. However, the CSS does not contain such a policy, or adequately address the issue of community housing within rural areas and the CSS is not considered to provide sufficient flexibility to allow for the delivery of essential rural housing.

f) Environmental Issues

Colonnade has concerns regarding the justification for and effectiveness of a number of the policies contained within the Environmental Issues chapter, as follows:

â€¢ Policy ENV1: The Council fails to identify how it will "maintain, restore and enhance" the sites of nature conservation importance that are identified, or how the performance of this policy will be monitored;

â€¢ Policy ENV3: In the context of the advice at paragraph 4.32 of PPS12 regarding the reformulation of national policies, Colonnade does not consider that this policy is required; and

â€¢ Policy ENV9: As set out in the representations to the Preferred Options Core Strategy, Colonnade does not consider that the necessary evidence base has been provided to justify a policy that seeks to go above and beyond the policy targets for the Code for Sustainable Homes as set out by Central Government.

g) Community Infrastructure, Leisure and Tourism

Policy CLT1 refers to the requirement for residential and employment development to contribute to the infrastructure identified in Appendix CLT1 through Standard Charges.

However, whilst the general principle of securing planning obligations through the application of standard charges is broadly accepted, the list of infrastructure requirements set out in Appendix CLT1 is not supported by sufficient evidence base to identify its robustness and credibility. As such, Colonnade does not consider either policy CLT1 or Appendix CLT1 is justified in the context of PPS12.

It is also noted that, despite the clarification sought by Colonnade at the Core Strategy Preferred Options stage, the CSS fails to confirm what information should be contained within Health Impact Assessments, which are required by policy CLT4. Once again, Colonnade requests further clarification of what is involved in the assessment and the expected outputs, which will provide greater clarity and will allow the policy to be monitored.

h) Transport

Policy T8 confirms that the Council will apply minimum parking standards. As set out in the representations to the Preferred Options Core Strategy, the guidance in Planning Policy Guidance Note 13: Transport (PPG13) is clear regarding the imposition of parking standards.

Paragraphs 52-56 of PPG13 confirm that the Local Planning Authorities should apply maximum not minimum parking standards. In order to satisfy the legal requirements set out in PPS12, the policy must reflect PPG13 to promote sustainable transport choices and further provide incentives for developers to locate further residential land closer to local service centres by requiring maximum parking standards for residential developments.

i) Economic Development

As set out in the representations to the Preferred Options Core Strategy, the land at Three Ashes Farm provides an excellent opportunity to deliver employment growth in the short term and may be a suitable site for the 'Eco-Innovation Centre' that is being promoted by the Council. Its identification as a suitable location for strategic employment growth, or the provision of an Eco-Innovation Centre, would accord with the general principles of the policies contained within Chapter 11.

Core Strategy Submission Document

O - 16256 - 9177 - Policy ENV9 - Code for Sustainable Homes - i

16256 Object

CHAPTER 8 Policy ENV9 - Code for Sustainable Homes

The identification of Purdeys Industrial Estate as fit for purpose (in paragraph 11.32 and the Council's 2008 Employment Land Study 2008) and therefore it should be maintained and if possible expanded, is welcomed and Colonnade considers that Three Ashes Farm could deliver this expansion, providing a natural extension to Purdeys Industrial Estate and being strategically located close to the Airport.

Three Ashes would address the negative impacts that the nearby residential area experiences from the existing Industrial Estate by providing a buffer between established uses and the residential area with less intensive employment activities. The highways analysis that has been carried out has suggested that it would not have an adverse impact on roads and congestion. Furthermore, there are very few opportunities for businesses to expand and Three Ashes could provide this opportunity.

j) Conclusions

Following the submission of representations to the Preferred Options Core Strategy, Colonnade is disappointed to note that the CSS fails to take account of the majority of the issues raised in their representations.

In addition, Colonnade considers the plan to be 'unsound' as the document consistently fails to meet the tests of soundness set out in the table following Paragraph 4.52 of PPS12 and respectfully requests that the Council notifies Icen, on behalf of Colonnade, of the future arrangements for the Examination of the Core Strategy. Furthermore, Colonnade wishes to take this opportunity to formally register a request to appear at all stages of the Examination in Public, including the pre-hearing meeting and any planned hearing sessions whereby issues raised in the context of this letter are to be discussed. Please confirm this request, and that the representations made to the Preferred Options Core Strategy will be taken into account alongside the current representations, by way of return to this letter.

Icen Projects, on behalf of Colonnade Land LLP trusts that the Council will find these representations to be constructive and helpful in taking forward the Core Strategy. Should you wish to discuss any aspect of these representations further, please do not hesitate to contact us.

Summary:

Policy ENV9: As set out in the representations to the Preferred Options Core Strategy, Colonnade does not consider that the necessary evidence base has been provided to justify a policy that seeks to go above and beyond the policy targets for the Code for Sustainable Homes as set out by Central Government.

1.0 Instruction and Introduction

1.1 Charles Planning Associates Limited (Chartered Town Planners) is Instructed by Swan Hill Homes Limited (Swan Hill) to prepare and submit representations on their behalf in respect of the Rochford District Local Development Framework: Core Strategy Submission (September 2009) Development Plan Document.

1.2 The comments refer to the relevant sections and policy designations in the Submission document, as appropriate.

1.3 The comments set out in this submission are intended to assist the District Council in taking forward its Local Development Framework. It is our intention to continue to be involved in the LDF preparation process and we look forward to the opportunity to comment further at the Examination to the Core Strategy.

1.4 If you have any queries regarding the content of this submission then please do not hesitate to contact:

Peter Kneen BSc (Hons) MSc MRTPI
Planner

2.0 Housing:
Policy H1 - The Efficient Use of Land for Housing

2.1 Swan Hill recognises the importance of seeking to concentrate new developments mainly in the existing urban areas, on previously developed land where possible, particularly in view of the Government seeking to ensure 60% of all such new developments are on previously development land (PDL).

2.2 However, given the character of the District, and the strategic housing requirement of the East of England Plan, Swan Hill supports the approach that the Council must also make provision for additional development on the edge of existing settlements on greenfield sites, particularly in the most sustainable locations. As such, Swan Hill supports that where feasible, the redevelopment of existing employment sites for residential/employment purposes can make a contribution towards the strategic housing requirement, provided that sufficient additional employment land is brought forward to ensure the stability of employment levels in the District, and to ensure employment growth meets the East of England Plan requirements.

2.3 Swan Hill considers that Policy H1 should include consideration that new extensions to existing settlements have regard to their potential impact on the wider characteristics and openness objectives of the Green Belt.

Policy H2 - Extensions to Residential Envelopes and Phasing

2.4 Swan Hill generally supports the approach taken by the Council in this policy. As set out above, Swan Hill consider the Council's acknowledgment that housing requirements should be met through the allocation of land on the edge of the existing settlements is the most suitable way forward to meeting the Council's strategic housing requirement and complies with the advice in PPS3.

2.5 The need for suitable greenfield urban extensions represents the best way forward for the Council to meet its strategic housing requirement, as set out in the East of England Plan. Swan Hill supports the recognition that the potential supply of alternative previously developed sites is limited, without detrimentally affecting the character of the District, and therefore the best way forward is the use of sustainable greenfield urban extensions to the existing settlements of the District.

2.6 However, Swan Hill consider that a fundamental consideration that the District Council should consider relates to the potential impact of the urban extensions on the Green Belt policy has been somewhat overlooked. The wider sustainability credentials of the settlements of the District should only be one of many key considerations for determining the level of expansion. In view of the proximity of Southend-on-Sea to all the main settlements of the District, and the influence this has on the likely location many people would travel for employment and leisure, sustainability of many of the settlements is not a key overarching factor, and greater weight should be placed on the potential impact on the openness of the Green Belt, as this cannot be remedied if development occurs in the wrong location.

2.7 As such, Swan Hill considers that determining the location of growth for the main settlements should be to identify

Core Strategy Submission Document

S - 16884 - 8329 - Policy ENV9 - Code for Sustainable Homes - None

16884 Support

CHAPTER 8 Policy ENV9 - Code for Sustainable Homes

those locations where the impact on the wider setting of the Green Belt can be minimised. Further justification for those general locations chosen should be identified in Policy H2. In this regard, Swan Hill has serious concerns regarding the removal of Land South West of Great Wakering as a viable option for the growth of the settlement. The development of this area of Great Wakering, in addition to the potential redevelopment of the Star Lane Industrial Estate could provide a more comprehensive development, whilst ensuring that the wider openness of the Green Belt is maintained. Land South West of Great Wakering is significantly better placed to limit the impact on the wider Green Belt than Land West of Great Wakering, and could contribute to the provision of an important amenity and wildlife site for the local community.

2.8 In addition, Swan Hill consider that the Council now has no reserve provision in the event that any of the existing employment sites set out in Policy H1 fail to come forward for development within the envisaged timescale. Further, Land West of Great Wakering has not been identified in the SHLAA as a deliverable site to help meet the strategic housing requirement, contrary to the requirement set out in PPS3.

2.9 As such, Swan Hill would support the provision of suitable sites which could be safeguarded for future development in the likelihood of a shortfall in supply.

Policy H3 - Extensions to Residential Envelopes Post 2021

2.10 As set out above, Swan Hill supports the overall approach the Council has taken towards the provision of sustainable urban extensions as a suitable means of meeting their strategic housing requirement. However, as set out for Policy H2 above, Swan Hill has serious concerns regarding the removal of several proposed sites set out in the October 2008 Preferred Options Core Strategy, without any guarantee of the ability to deliver those sites set out in Policy H1.

2.11 As also considered above, the inclusion of West of Great Wakering for 250 dwellings should not be included ahead of South West of Great Wakering, in view of the fact that the site is not identified in the SHLAA as available, suitable and achievable as required by PPS3, and thus is not supported by a robust and creditable evidence base for its inclusion as a strategic site for development.

2.12 Whilst Swan Hill acknowledge that alterations to Policy H1 has resulted in the removal of some locations for growth in Policy H3 (as set out in the Sustainability Appraisal), Swan Hill does not consider that the most appropriate locations have been chosen.

2.13 In addition to the matters raised above, the use of West of Great Wakering would also result in the loss of valuable agricultural land, which clearly in a Green Belt location, should be less suitable for development than other sites, such as South West of Great Wakering, which would have limited impact on the wider Green Belt policy, and not result in the loss of valuable agricultural land.

2.14 Finally, in respect of Policies H1, H2 and H3, all of the above comments are based on our interpretation of the Submission Version Core Strategy when compared to the October 2008 Version of the Core Strategy. Without the ability to undertake a detailed assessment of the Council's SHLAA, it is not possible to clarify the proposed Core Strategy position regarding the proposed direction of growth proposed for the settlements in the District. As such, Swan Hill reserves the right to make additional representations regarding the proposed Policies H1, H2 and H3 following the publication of the SHLAA in due course.

Policy H4 - Affordable Housing

2.15 In general terms, Swan Hill supports the approach taken by the Council towards the provision of affordable housing for new residential developments. The Policy accords with the advice of National Policy and is therefore considered sound by Swan Hill.

Policy H5 - Dwelling Types

2.16 Swan Hill supports the policy provision of H5, and considers that the approach taken by the Council for this policy represents a suitably flexible alternative to stipulating percentages of dwelling mix, sought by some local authorities. The Policy accords with the advice of National Policy and is therefore considered sound by Swan Hill.

Policy H6 - Lifetime Homes

2.17 In regard to this policy, Swan Hill objects to the Council's policy where all new dwellings should be provided to the Lifetime Homes Standard. Whilst it is acknowledged that the UK has an aging population, Swan Hill considers that seeking to provide Lifetime Homes on all sites is considered to be overly onerous for proposed developers, particularly when considering the requirement for all car parking spaces to be suitable for disabled users, which could result in more schemes becoming unviable. Therefore, the provision of a percentage of Lifetime Homes should be considered through negotiations with the Council at the planning application stage, and should be determined on a case-by-case basis.

3.0 Character of Place: Policy CP1 - Design

Core Strategy Submission Document

S - 16884 - 8329 - Policy ENV9 - Code for Sustainable Homes - None

16884 Support

CHAPTER 8 Policy ENV9 - Code for Sustainable Homes

3.1 The Town and Country Planning (General Development Procedure) Order 1995 (As Amended) makes the submission of a Design and Access Statement for most types of planning applications a Statutory requirement, and as such, the provision of a Design Brief represents a pre-requisite of all major planning applications.

3.2 Policy CP1 seeks to ensure the provision of good, high quality developments that reflect local characteristics and distinctiveness, this ideology is supported by Swan Hill.

4.0 The Green Belt:
Policy GB1 - Green Belt Protection

4.1 Following the amendments to the wording of the Policy since the October 2008 Preferred Options Core Strategy, Swan Hill is now generally supportive of Policy GB1 and its supporting text. However, as expressed above, it is important that where alterations to the Green Belt boundary occur as a result of the extension of the settlements to meet the strategic housing requirement, both the minimal amount of land is taken and where that land is taken for development, it represents the best available land which has a minimal impact of the wider openness characteristic of the Green Belt.

5.0 Environmental Issues:
Policy ENV3 - Flood Risk

5.1 Swan Hill generally supports the approach set out in Policy ENV3 regarding ensuring development accords with the sequential test of PPS25. The Policy accords with the advice of National Policy and is therefore considered sound by Swan Hill.

Policy ENV4 - Sustainable Drainage Systems (SUDS)

5.2 Following the revisions from the October 2008 Preferred Options Core Strategy, Swan Hill now generally supports the approach set out in Policy ENV4. The Policy accords with the advice of National Policy and is therefore considered sound by Swan Hill.

Policy ENV8 - On-site Renewable and Low Carbon Energy Generation

5.3 Whilst Swan Hill recognises the importance of reducing carbon emissions, particularly in new housing developments, and the role this can play in reducing the nations overall Greenhouse emissions. As such Swan Hill is generally supportive of Policy ENV8. It is noted that Policy ENG1 of the East of England Plan sets out a threshold of developments comprising 10 or more dwellings. Swan Hill consider it important for the District Council to justify the reduction in the threshold level.

5.4 Further, no assessment of Policy ENV8 has been set out in the Sustainability Appraisal which justifies the change in threshold from that of Policy ENG1 of the RSS.

Policy ENV9 - Code for Sustainable Homes

5.5 Following the revisions from the October 2008 Preferred Options Core Strategy, Swan Hill now generally supports the approach set out in Policy ENV9. The Policy accords with the advice of National Policy and is therefore considered sound by Swan Hill.

6.0 Community Infrastructure, Leisure and Tourism:
Policy CLT1 - Planning Obligations and Standard Charges

6.1 Swan Hill generally supports the overall approach the Council has taken in Policy CLT1. It is considered Policy CLT1 sets out a degree of flexibility to ensure that all sites are considered on a site-by-site basis, assessing the individual merits of each planning application, in order to ensure the levels of contributions applicable meet the five tests of Circular 05/05. The Policy accords with the advice of National Policy and is therefore considered sound by Swan Hill.

Policies CLT5 - Open Space;
CLT7 - Play Space;
CLT8 - Youth Facilities; and,
CLT10 - Playing Pitches

6.2 Swan Hill supports the need for new residential developments to incorporate a degree of new publicly accessible open space, children's play space, youth facilities and playing pitches, and as such, generally supports the policy approaches taken by the Council.

6.3 However, it is important that whilst the Council may seek to undertake an assessment of providing standard charges for new development, which, as set out in Policy CLT1, this should be based on thorough public consultation and consideration and sound justification. Swan Hill consider that within the provision of a standard charge, it is important that such provision allows for a degree of flexibility to ensure that each site is assessed individually and on its own merits. This is particularly important for those sites close to existing open spaces and facilities. As such, the levels of

Core Strategy Submission Document

S - 16884 - 8329 - Policy ENV9 - Code for Sustainable Homes - None

16884 Support

CHAPTER 8 Policy ENV9 - Code for Sustainable Homes

open space and recreation facilities required in the 'standard charge' should be based on an up-to-date PPG17 Open Space assessment, which should be used to form a key consideration in the levels of provision likely to be required in the standard charge system proposed.

7.0 Transport: Policy T1 - Highways

7.1 Swan Hill supports the overall objectives set out in Policy T1 requiring developments to be located and designed to reduce the reliance on the private car and to meet the infrastructure needs generated by development or seek to help achieve these needs is acceptable in principle.

7.2 Swan Hill recognises the importance of providing sufficient infrastructure provision to meet the requirements of development, and that where developments have insufficient consideration of impact on existing infrastructure, they should be considered unacceptable and contrary to National policy guidance. However, Swan Hill considers it important to emphasise that the developer's role should not be seen as a means to meet existing shortfalls in provision.

Policy T3 - Public Transport

7.3 Swan Hill is generally supportive of the policy approach set out in T3, however, as set out in paragraph 7.2 above, it is important that the District Council do not consider that it is the developer's responsibility to resolve existing shortfalls in provision of public transport, and any contribution towards additional public transportation provision should only be to mitigate against the additional level of demand likely from the development proposed.

Policy T5 - Cycling and Walking

7.4 Swan Hill supports the general approach to this policy, as Swan Hill recognises the importance of promoting the use of alternatives to the private car. The policy provision acknowledges the need to ensure relevant contributions in the event of additional travel demands generated by individual developments, whilst also setting out additional aspirations for the cycle network in the District.

7.5 As such, Swan Hill considers this policy accords with the advice of National Policy and is therefore considered sound by Swan Hill.

Policy T8 - Parking Standards

7.6 The Council has recently (January 2007) adopted SPD on the requirements for parking standards, and as such, Swan Hill generally supports the policy approach chosen by the Council. As set out in the SPD, whilst Swan Hill generally supports the approach taken by the District Council towards setting residential parking standards, in that the Council has recognised that in the suburban areas, even with some access to public transport, the majority of residents will rely on the use of private cars. However, Swan Hill has concerns over the failure of the District Council to comply with the provisions of PPG13: Transport (2001) which sets out that Local Planning Authorities should not set minimum standards for car parking. Whilst it is acknowledged that PPS3 sets out provision for the consideration of local circumstances, it is considered that the Council has not justified this deviation from PPG13's maximum standard.

7.7 Whilst it is acknowledged that such justification may become apparent through the work currently being undertaken by Essex County Council, until such time, the District Council should only seek to apply the maximum standards indicated in PPG13. However, Swan Hill recommends that the District Council make provisions in the wording of the Policy to allow for changes in the event that future policy on car parking standards need to reflect the County standard, following the completion of the County Council review.

8.0 Economic Development: Policies ED3 - Existing Employment Land ED4 - Future Employment Allocations

8.1 In respect of Policies ED3 and ED4, Swan Hill notes that they have changed considerably since the October 2008 Preferred Options document, in that they are site specific regarding the location of the proposed redevelopment of existing employment sites. These four sites are also identified in Policy H1 - Efficient Use of Land, and in general, Swan Hill supports the approach to the redevelopment of these sites (where feasible) based on the assessments of the sites set out in this version of the Core Strategy.

8.2 However, Swan Hill has concerns that these policies might not be considered suitably sound given that insufficient opportunity has been allocated for consultation on their redevelopment. Without the SHLAA being publically available prior to the consultation on this Core Strategy, an insufficient evidence base has been provided to corroborate that these sites are neither suitable or deliverable to meet the test of soundness requirements.

Summary: Policy ENV9 - Code for Sustainable Homes

5.5 Following the revisions from the October 2008 Preferred Options Core Strategy, Swan Hill now generally supports the approach set out in Policy ENV9. The Policy accords with the advice of National Policy and is therefore considered

Representations on the Core Strategy
Submission Document, November 2009
On behalf of Barratts Eastern Counties

Introduction

The requirements of Core Strategies are enshrined in the 2004 Planning and Compensation Act, the Town & Country Planning (Local Development) England (Regulations) 2004 and the 2008 policy guidance in PPS12. The requirements of Coe Strategies are clear. And they are legal requirements. The Core Strategy must comply with the Local Development Scheme, Statement of Community Involvement and the Regulations. The Core Strategy must be subject to a sustainability appraisal, have regard to national guidance, conform generally with the Regional Spatial Strategy and have regard to any Sustainable Community Strategy. A Core strategy must be sound - justified, effective and consistent with national policy. The following representations therefore focus on these legal requirements.

HOUSING

Paragraph 4.6 - Evidence Base

To meet the soundness test Submission Core Strategies (SCS) must be justified, that is to say it must be founded on robust and credible evidence base and comprise the most appropriate strategy when considered against reasonable alternatives. The housing strategy in as far as it identifies a need for Green belt sites is sound, however, there are other elements which are unsound.

Paragraph 4.6 notes that the Strategic Housing Land Availability Assessment (SHLAA) has examined the supply of housing. It is presumed that the Table at paragraph 4.6 is the outcome of this examination. Whilst the SHLAA has some legitimacy in that it identifies various sites that are apparently available, we are concerned that because the SHLAA was only published in November 2009 it post dates the SCS. This implies that the SCS is driving the SHLAA exercise rather than the other way round. Whilst this may have no real practical effect on the outcome of the SCS and the identified need for Green Belt sites, the Inspector will be mindful of the advice in paragraphs 33 and 54 of PPS3 that SCS draw on the evidence in SHLAA. It may be that the SCS should explain how the evidence base has been used to justify the strategy.

PPS12 explains at paragraph 4.37 that Core Strategies are based on thorough evidence. Since the SHLAA has only recently been published it is considered that the SCS is unsound as it is not justifiable. This, together with other comments on the SCS, indicates that the process should be delayed to ensure that a more robust document is placed in front of the EiP Inspector.

Table at Paragraph 4.6 - Evidence base

From our review of the available evidence it would appear that the housing land supply is insufficient and that Green Belt release are required. From the wider strategy being promoted we note that some of the sites that the District Council consider to be 'appropriate' are likely to relate to existing employment areas. As set out elsewhere in our representations, we maintain severe reservations that the redevelopment of existing employment sites for alternative uses and particularly the Eldon Way Industrial Estate is unsustainable. We will make reference to the effectiveness of this strategy in relation to sustainability, whether it is justified in the context of National Policy and the deliverability of such a strategy elsewhere.

In particular, paragraph 11.32 of the SCS refers to existing employment land and sites within the UCS. It does not refer the SHLAA and as such it appears that an evidence base to support the re-use of employment land for residential is not reported in the SCS.

Having reviewed the 2008 Annual Monitoring Report, as we did when commenting on the 2008 Preferred Options Core Strategy, we maintain severe doubts as to the appropriateness of some of the previously developed sites identified as potential housing sites and their expected housing yield. Whilst we cannot at this stage ascertain whether the SHLAA

Core Strategy Submission Document

16930 Object

CHAPTER 8 Policy ENV9 - Code for Sustainable Homes

sites referred to in this table correlate with the Annual Monitoring Report and indeed the 2007 Urban Capacity Study, it is our view that there will be some commonality and so the reliance on these sites is likely to be at odds with Government Policy. We shall elaborate on this objection in relation to the specific housing policy below.

We note that the last two rows in the Table at paragraph 4.6 set out figures with and without Green Belt releases. The text to this section of the Core Strategy should, for reasons of clarity, explain that Green belt review will be necessary in order to deliver the required housing.

Paragraph 4.9

The table on page 40, which sets out the settlement tiers, is supported. Rayleigh, Rochford/Ashingdon, Hockley/Hawkwell are clearly the largest settlements in the District and they benefit from good employment, housing, leisure, community and public transport provision. These settlements are the most sustainable ones with the greatest mix of uses. Consequently, it is sensible that the Core Strategy identifies these as top tier settlements and is able to target them with growth accordingly. This component of the strategy is justified by reference to sustainability data and is effective, since targeting development at these locations will ensure a more sustainable pattern of development.

Paragraph 4.14

We maintain that the strategy for redeveloping the Eldon Way Industrial Estate for housing and other alternative uses to employment is unsound. It is neither justified nor effective. The Industrial Land Availability Study 2006 sets out on page 7 strategic objectives. The 3rd objective seeks to Support town centre and industrial estate enhancement initiatives aimed at improving the environment ensuring the area is economically prosperous and competitive. Clearly the strategy as currently drafted envisages major changes to existing industrial estates, including alternative uses. This strategy is not consistent with other strategies and evidence based studies and so cannot be justified in the context of the tests set out in PPS12. It is also an ineffective strategy since the new employment locations that would free up the Eldon Way site for redevelopment relies on transport infrastructure that has no certainty of being delivered. Principally, the erosion of employment uses at Eldon Way could make the settlement of Hockley/Hawkwell less sustainable and thus conflict with the tiered approach on page 40, paragraph 4.9.

Policy H1

Prioritising the use of previously developed land ("pdl") is supported in principle. It is a justified strategy in the context of PPS3 and effective as sequential choices can be made by implementing the policy. However, the District Council is also promoting a strategy which seeks the redevelopment of existing employment locations to alternative uses and by consequence is identifying green field sites for new employment development elsewhere (Policy ED4 refers). This 'land swapping' is not considered consistent with PPS3, nor is it considered to be justified or effective in delivering the desired strategy. This is particularly the case as most of the existing employment sites are occupied and therefore unavailable for redevelopment. In addition, the new Greenfield sites are in an arguably less sustainable locations away from the top tier settlements identified on page 40 of the Submission Core Strategy. Clearly this element of the strategy is inconsistent with the wider strategy.

The Industrial Land Availability Study 2006 is included as an evidence base by the District Council. It includes an introductory section, which explains that the authority wishes to make Rochford the place of choice for new business. It includes several strategic objectives on page 7 including "Support town centre and industrial estate enhancement initiatives aimed at improving the environment ensuring the area is economically prosperous and competitive." It reviews existing employment areas and identifies vacant land, including land available from allocations. It does not include any assessment of new sites or potential opportunities for new sites that might have been expected to feed into the Core Strategy. The strategy for identifying Green Belt site employment allocation does not appear to be based on any evidence in this document and in that context cannot be justified. The strategy being promoted potentially conflicts with Government policy in PPG13, PPG2 and emerging PPS4.

The Employment Land Study 2008 is a much later document. It has a key recommendation on page ii "we recommend that Rochford District Council adopts strong policies to protect existing employment land." Furthermore under recommendations for existing sites on page iii-iv of that document it states "In our view, Hockley Trading Centre is a strategically well placed employment location. However, we recognise the ambitions of the Hockley Town Centre masterplan and that within this the Council should consider it to be allocated for other uses. However, we recommend that this reallocation happen only if provision is made within the masterplan for office use within Hockley Town Centre as part of a mixed use scheme." The view of the writers of this document is clear - the Eldon Way Industrial estate (Hockley Trading Centre) is a good employment site and that it is for other reasons that alternative uses are being considered and only then if office development is supported. This supports our representations that new future uses at the Eldon Way site should be employment dominated and that alternative uses should relate to the objectives of the Town Centre which is to enhance the shopping and leisure facilities. Residential is not an appropriate alternative.

This document recommends the use of land to the west of Rayleigh for employment and envisages Green belt release. However, the SCS does not explain through the evidence base why existing employment sites should be 'deallocated' and Green belt land unnecessarily used.

Core Strategy Submission Document

16930 Object

CHAPTER 8 Policy ENV9 - Code for Sustainable Homes

In addition to these key issues we have some specific concerns. As a consequence we maintain an objection to the second paragraph of Policy H1. This policy states that the Council will seek the redevelopment of various industrial estates including Eldon Way. The Policy says that alternative uses will be sought (presumably alternative to the existing employment offer) and that new land will be allocated elsewhere. This policy statement, in relation to Eldon Way in particular, is unsound for a number of reasons:

The emerging Hockley Area Action Plan consulted upon in 2008 states that the Eldon Way Industrial Estate is strategically well placed. In a sense this statement underplays the true importance of this highly sustainable employment location and only major employment area in Hockley/Hawkwell. The employment area is adjacent to the railway station and located a short distance from the main bus routes that run along Spa Road. Some of the residential areas of the town are also within walking distance of this commercial area, thus providing a potential for sustainable travel by employees. The Eldon Way Industrial Estate is therefore right at the heart of the settlement of Hockley/Hawkwell and provides an opportunity to meet sustainable transport objectives by reducing the need to travel by car. Consequently, this employment area should be highlighted as a premier employment site in sustainability terms, both in the context of PPG13, PPG4 and PPS6. To encourage alternative uses as set out in Policy H1 implies the removal of the majority of employment based activity at Hockley/Hawkwell and this would be contrary to National policy, would not be the most appropriate strategy when considered against alternatives and is therefore unsound.

Whilst it is acknowledged that improvement to the Eldon Way Industrial Estate can and should take place, the extent to which the mix of employment uses should be altered in favour of alternative land uses requires careful consideration. It is our view that a mix of existing or indeed new employment land uses with some Town Centre type uses should dominate the Eldon Way site. A mix of employment types between offices, light industry and other high technology industries should be encouraged as this will provide many locational advantages to the firms that agglomerate together. The Council says that the existing uses on this site are harmful to amenity. However, the site has operated for many years without any significant issues and if renewal for B1 type uses are encouraged then the employment area can be maintained without harm to amenity. Renewal of the employment stock can help develop and improve trade, improve the sustainability of businesses as a whole and make for a more flexible labour market as skill levels are varied. A singularly different use altogether or a variety of uses which excludes employment could undermine the long term sustainability of the area and Town Centre. As such Policy H1 is not an effective strategy and should be amended to acknowledge the importance of Eldon Way and the need to renew the employment stock to ensure that the site maintains its important role as a employment site, albeit with some ancillary alternative use development where appropriate.

The 2008 Retail Study notes that Hockley Town Centre is not strong and there is trade leakage. Eldon Way Industrial Estate provides a customer base for existing town centre uses. Weekday spending within town centres is an important contributor to the viability of many retail and leisure businesses either through expenditure by employees during the lunchtime trade or expenditure by employers, on necessary goods and services. This relationship helps sustain the critical mass of a centre and provides a platform for new retail and leisure growth. It is important to have a balanced centre with a variety of uses. Policy H1, as currently drafted, implies the removal of employment related development and this is likely to harm the vitality and viability of Hockley Town Centre. The Council has presented no evidence to suggest that this is not the case. Importantly, the 2008 Retail Study explains that there is a need for additional retail and office space. In principle we would support additional office and other B1 type uses plus retail but employment uses should always dominate for the sustainability reasons given above. Retail and office development are likely to present a viable alternative to some of the more industrial type uses.

Consequently, we do not support the phrasing of the third paragraph of Policy H1 and maintain that the most appropriate strategy is to seek renewal of the employment stock with employment based uses and with some new retail development. Removal of employment land uses completely as currently implied-which was the approach adopted in the emerging Hockley Area Action Plan - is not a justifiable strategy.

One of the key tests of a Core Strategy is consistency between policies in the emerging Plan and this strikes at the heart of demonstrating an effective strategy. Policy H1 implies alternative uses to employment and the relocation of Eldon Way to a site identified under Policy ED4. However, Policy RTC6 sets out a suite of policy criteria for Hockley Town Centre which includes employment and commercial activities. In addition Policy ED3 seeks the protection of sustainable employment sites (Eldon Way) and notes that some reallocation of existing employment sites will include a proportion of employment. It notes that in the case of Eldon Way employment development will form a component. The policies appear at odds with one another. The third paragraph of Policy H1 should be deleted as the second paragraph is sufficient to set a strategic context for delivering new housing development. The employment policies and Hockley specific policies should be left to consider the type and quantum of land uses appropriate in the area. If the third paragraph of H1 is to be retained then it should tie in more with Policy RTC6 and in our view explain that employment uses should dominate any redevelopment proposals for the Eldon Way site and that retail and leisure uses should be a supporting proportion.

Implementation, Monitoring and Delivery - page 132 onwards

One of the key tests of soundness is that the Core Strategy should be effective - it should be able to deliver its strategy. The Implementation strategy set out at page 132 onwards of the Core Strategy does not explain how Policy H1, RTC6 and the strategy for redeveloping Eldon Way (Policy ED2 and ED3) will be delivered. The comment at Policy ED3 on

16930 Object

CHAPTER 8 Policy ENV9 - Code for Sustainable Homes

page 161 identifies it as a potential risk and alludes to land assembly difficulties and the choices to be made by owner/occupiers. In order to deliver the strategy there should be a clear understanding as to whether the new land use values being promoted are sufficient to encourage relocation voluntarily. Secondly there is a need for more information to be gathered and presented to show that current occupiers and landowners are willing to relocate and the timescales likely for this. For example, do the building lease contracts enable early review or are there any break out clauses. There should be some commentary on whether the Council will engage in compulsory purchase orders to pursue their strategy should the 'encouragement' route fail. As currently drafted there is no clear path to deliver the strategy and the danger is that despite reallocation, the sites identified for redevelopment will not come forward in the plan period. In this regard, evidence to satisfy the test of soundness is not provided.

Policy H2 - General Locations

We support the strategy that new housing growth should be targeted at land South of Hawkwell. This area is suitably located to the urban area of Hockley/Hawkwell and to tie in with the settlement tiers on page 40 of the Submission Core Strategy the same terminology for settlement should be used. This ensures a consistency within the SCS. The choice of this location as a housing growth area is appropriate as it would not contribute to the coalescence of the urban area with Ashingdon (there is existing development between this identified housing area at Rectory Road and Ashingdon and moreover, Rectory Road can form a natural physical boundary for the new Green belt boundary. This area is also well located to the existing road network. Cherry Orchard Way has recently been improved and provides much better accessibility to the proposed housing growth area than any other location around Hockley/Hawkwell. The existing bus routes along Rectory Road also make this location sustainable and the additional housing proposed will help underpin the financial viability of bus routes in this area. Locally there are employment opportunities, including the small commercial estate off Main Road. The Eldon Way Industrial Estate adjacent to the Town Centre also provides the opportunity for employment locally. Extensive public open space, play pitches and built leisure facilities are located just to the north of this area and a community hall is located off Briar Close, nearby. The area to the south of Hockley/Hawkwell is close to local shops on the corner of Heycroft Road and Main Road and there are numerous footpath links between this area and the local community including links via Thorpe Road, Thorpe Close, Briar Close, Hawkwell Park and Park Gardens. The area therefore provides the opportunity to enhance existing links, including cycle links, and contribute towards community integration - more so than other sites on the south side of this settlement. The site is also in the control of one house builder and deliverable.

However, we find that the Policy is not fully consistent with national policy and furthermore needs to be reviewed in order to be justified and effective. We have concerns as to how the Green Belt review strategy set out at Policy H3 and in the Local Development Scheme integrates with this policy and feel that Green Belt review should be more explicit throughout the SCS. We note that it is only Policy H3 which indicates the need for Green Belt land review. In fact Policy H3 only pays lip service to the need for a Green Belt review and provides, at best, loose advice in this regard. It says that prior to 2021 Green Belt will be safeguarded save for the releases noted under Policy H2. Policy H3 then goes on to talk about land release for development after 2021 but no time period is set out to provide a framework for any Green Belt review in this latter period. In our view Policy H2 and certainly Policy H3 and Policy GB1 should explain fully the need for a Green Belt review and that such a review should take place for a defined period. That such a review has not taken place in advance of the SCS is a serious matter for the Inspector to consider in the context of soundness. That said, it is considered that any review of Green Belt should have regard to a period beyond 2021 as indicated by draft Policy H3. Paragraph 1.9 of the East of England Plan explains "this RSS covers the period to 2021 but sets a vision, objectives and core strategy for the longer term". 2026 is therefore considered a minimum suitable period that any Green Belt review must have regard to in order to meet the 5 year land supply requirements in PPS3 for the period after 2021. However, Policy SS7 of the East of England Plan talks about Green Belt reviews up to 2031. In view of this and the need to explore the circumstances of Rochford - that existing settlements cannot contain future housing growth; that Green Belt is necessary to provide housing; and that these provide exceptional reasons to vary the Green Belt locally (paragraph 2.6 to 2.7 of PPG2) the policies and strategy for the SCS should identify a Green Belt review covering the period to 2031 and set out why a review is necessary.

Policy H2 - Phasing and Quantum

The 2008 Preferred Core Strategy document indicated that the area south of Hawkwell should deliver 330 dwellings over a phasing period to post 2021 (see Policy H2 and H3 of that document). The SCS reduces the quantum of housing in this area to 175 but expects delivery by 2015. At a broader level the Preferred Options Core Strategy of 2008, (Policy H2) required 1,450 dwellings to 2015 and a further 1,050 by 2021. In the SCS the figures are now 775 and 1,010 respectively.

Since the SHLAA post dates the publication of the SCS, we are uncertain as to the reason why such a significant reduction in quantum of housing and extensions to the residential envelope is considered necessary. Presumably it is the 'new' strategy to redevelop existing employment areas within the settlements that has led to this change. Our representations on this strategy and specifically the Eldon Way Industrial Estate are included elsewhere within our representations. Previously we have commented on the Table at paragraph 4.6 of the Submission Core Strategy and the lack of evidence to underpin that table. It seems odd that in the space of a year the expected requirement for Greenfield sites has effectively halved on the basis of a SHLAA exercise. The community is therefore not able to effectively

16930 Object

CHAPTER 8 Policy ENV9 - Code for Sustainable Homes

comment on the housing land supply and at this stage the Submission Core Strategy is legally unsound.

That said, we are of the view that the quantum of housing envisaged south of Hockley/Hawkwell should be more than the 175 currently envisage. In coming to this view we have reviewed the Urban Capacity Study and the latest housing figures in the Annual Monitoring Report 2008. We conclude that the shortfall in housing land supply is such that 330 dwellings in this location is appropriate.

The recently published SHLAA is based upon the data obtained from the Urban Capacity Study 2007, a call for sites exercise and data from the Annual Monitoring Report 2008.

The 2007 Urban Capacity Study (UCS)

1. 2007 is widely recognised as being the peak level of house prices in the UK and it was acknowledged by Government and practitioners alike that 2007 house prices were at an unsustainable level. It is our view that utilising the 2007 UCS as an evidence base without reference to the market does not pick up the depressed demand that is likely to now exist. Recent corrections to the housing market now mean that housing land prices are at a much lower and arguably more affordable level than before. The implications are that some pdl may not be viable for housing development. Often brownfield sites have much higher development costs than Greenfield sites and so the yield from urban capacity will be much lower than anticipated in the 2007 study. One example is the employment allocation of the Adopted Local Plan located at 76-92 Main Road, Hawkwell. This site has been allocated for several years and has been available during the most recent rises in residential property prices during 2006-07. As a consequence the lack of progress on the site can only be described by its current occupancy and perhaps it comprises high value uses that do not encourage redevelopment. Despite this the site is identified as having high potential for alternative use and high potential demand. The SHLAA form notes that there is no information on legal constraints (e.g., tenancy agreements) As a consequence it is difficult to see how this could continue to be a potential site and as a consequence the allowance for green field releases should be increased.

2. There are considered to be other instances in the UCS and the recently published SHLAA where the assumptions and calculations would indicate that the 1301 urban capacity figure is over optimistic and the SHLAA assessment is limited. In the assessment of 'non-residential sites in appropriate locations' within the UCS assumptions are made as to the probability of sites coming forward for new housing. 68-72 West Street, Rochford is identified as a high probability site but we note that it has been subject to 7 refusals of planning permission/conservation consent. There is a significant gap between the urban capacity identified as being suitable by the Council and the capacity applied for by the owners. Given its alternate use value, it is debateable whether the two capacity figures can be reconciled. No 247 London Road is another example of a site allocated in the Local Plan but which hasn't come forward. This is now the subject of a proposal for a care home and if approved would further limit the scope for market/affordable housing capacity on the site. A striking example of how the urban capacity study has underestimated is also evidence by 2-4 Alderman's Hill, Hockley - described as a disused service station. There has been no residential development application on this site since 2004 and most recent applications have sought commercial use of the site. Rather than being evidence of housing land deliverability, this particular site evidences the need for commercial uses in the area. There are therefore deliverability doubts over these 'high probability' categories which amount to some 40 units.

3. In relation to the assessment in the UCS entitled 'intensification of existing residential uses' we note that the assessment is premised on an assessment of recent trends taking into account net completions between 2001-2006 and 2005-06. This is effectively an assessment of windfall trends and not an approach that PPS3 encourages. Importantly Table 3-12 in the urban capacity study seeks to project forward urban capacity from residential redevelopment - a period that benefited from high house prices and PPG3 guidance encouraging redevelopment. These two circumstances have markedly changed and so the assumptions and conclusions drawn would also have changed. Even taking into account the UCS discounting, the reliability of the 404 units from this source must be questioned and in our view the 1301 figure cannot be a sound basis for urban capacity and further Greenfield releases are necessary.

4. In the section of the UCS entitled 'subdivision of dwellings' and 'living above the shop' it is estimated that recent trends would result in 7 and 15 units. Our concerns with using trends as a basis for urban capacity are detailed above - PPS3 does not encourage this. Rather, local authorities are charged with surveying their areas, identifying which areas may yield urban capacity and how much and developing policies to achieve that. Government guidance does not encourage the estimation of windfalls in the way the UCS does.

5. Redevelopment of established employment land is a separate section within the UCS. At 1 above we identify the low probability of the Main Road residential allocation coming forward. This remaining section of the UCS considers 11 further employment sites which were first identified in the 2000 UCS. Three of these are considered to have a high probability of coming forward. We have looked at these three sites and can find no evidence that they are likely to come forward. In the 8 years between 2000 and 2008 the three identified high probability employment sites have not been developed and there is no reason to assume that the next 5-10 years will be any different. For example the Rawreth Industrial Estate is identified as being well used in the UCS and although it has some unneighbourly uses there is no indication that the site is available, suitable or deliverable for residential. Land between 39-69 Lower Lambricks, Rayleigh is identified as having a high probability of residential uses. Yet there is no

16930 Object

CHAPTER 8 Policy ENV9 - Code for Sustainable Homes

evidence of any pre-application advice or planning applications for this area. Stambridge Mills, Mill Lane, Stambridge is a further example. This site is separated from the urban area, in a flood risk zone and protected in the 2006 Replacement Local Plan by Policy EB9 which promotes B1 uses. Against this background there is only two relevant planning applications affecting this area both date from the early 1990's and relate to a plant room and loading bay. There is no evidence that this is likely to come forward for residential purposes in the next 5-10 years.

6. In the UCS extant permissions are identified as 856 dwellings. It is important to note that this figure needs to be continually reassessed so that from the point of adoption of the Core Strategy a 5 and 10 year housing land supply is available. The SHLAA notes extant permissions for 2009-14 being 106. As noted below extant permissions do not necessarily translate into deliverable sites. There is therefore a contingency that needs to be built in. Further allocations on greenfield land need to be increased and as such the quantum of housing in the area south of Hockley/Hawkwell should be increased to 330 dwellings in order to begin to meet the shortfall identified.

The District Council's 5 year housing supply assessment

7. The District Council's Annual Monitoring Report ("AMR") 2008 purports to demonstrate a 5 year housing land supply. The preamble to Table 4.10 in the AMR 2008 explains that Rochford District Council ("RDC") has included units under construction, units with full permission, units with outline permission, units with a resolution to grant, units subject to preapplication discussion/Urban Capacity Assessment and land allocations in its trajectory. The reader is referred to Appendix B which breaks down the sites in more detail. The recently published SHLAA also includes a table showing a potential 1273 dwellings deliverable. However, it refers to "appropriate brownfield sites." Since these 'appropriate sites' are do not benefit from an application or a planning permission it is difficult to programme them into the housing delivery trajectory.

8. In the full planning permission category of the AMR 2008 where work has not yet started there can be no guarantee that all these sites will be delivered in the 5 years. This comment relates to the one above in relation to the recently published SHLAA. It is not uncommon for permissions to be obtained to provide a means for valuing a site where the owner has no immediate plans to sell the site or develop housing. Delivery may also be hampered by funding constraints, or site assembly problems (where sites are in an alternative use or relocation constraints). Appendix B of the AMR 2008 does not set out the intentions of the landowner or whether the sites are truly achievable in the 5 year period as per PPS3 requirements. The SHLAA purports to show developer intentions at Appendix C but the assessment by the local authority into the legitimacy of some of the claims is not presented. The evidence base is not as full as it should be to demonstrate the robustness of Table 4.6 of the SCS. It is also unclear the extent to which this table is based on either the UCS 2007, AMR 2008, SHLAA 2009 or a combination of all three. This should be set out clearly.

9. In addition, to the 'non delivery' of a proportion of new homes in the AMR 2008, there is concern at the timings of delivery in that data set, for example, 10 units in 2008-2009 relates to outline planning permissions and it is doubtful whether reserved matters can be turned round quick enough to begin delivering housing in this year period. There could well be examples in that set of data where the delivery of units in the first year of the 5 is unlikely, thus delivery is reduced for that period and pushed back and this process is then compounded throughout the data set up to and beyond year 5. Statistical evidence from the Department of Communities and Local Government ("CLG") reveals that building starts are 43% down on the quarter to March 2009 compared with March 2008. It is not clear whether the recently published SHLAA has taken this into account and unless it does the data in the Table at 4.6 of the SCS cannot be relied upon, particularly given the current recessionary circumstances. In relation to the Table at Paragraph 4.6 a refinement is therefore needed to take into account this effect on phasing.

10. This problem is compounded for other units relied upon where permission has been granted but no start on site has been made; this accounts for a considerable number of sites in 2009-10 period (100 dwellings) which is (year 2 of the 5 year period). A delay in these will require more Greenfield sites to be identified in order to meet the shortfall.

11. Finally we note that the East of England Plan expresses its land supply requirement as a minimum. This strategy is not reflected in the

Core Strategy Submission Document

16930 Object

CHAPTER 8 Policy ENV9 - Code for Sustainable Homes

Submission version of the Core Strategy policy H2.

12. In summary since neither the UCS nor the Annual Monitoring Report form a SHLAA, reservations are maintained about the degree to which sufficient housing land has been identified.

Policy H3

In the Preferred Options Core Strategy 2008 more locations were identified for housing growth in the post 2021 phase. Whilst it is our view that land south of Hockley/Hawkwell should benefit from a greater number of dwellings than the 175 currently identified (330) in order to make the strategy effective. We are concerned at the significant change in strategy between the Preferred Option Core Strategy and the Submission version, which has significantly less housing growth on green field sites. This change in strategy is so significant that we would question whether it is appropriate in the context of soundness and the consultation processes that have taken place so far.

We also have concerns as to how the Green Belt review strategy set out at Policy H3 and in the Local Development Scheme integrates with other policies in the SCS and feel that Green Belt review should be more explicit throughout the SCS. As it currently stands there is a potential conflict with national policies and limited justification for the Green belt strategy. We note that in Policy H3, which indicates the need for Green Belt land review, the advice is limited and unclear. In fact Policy H3 only pays lip service to the need for a Green Belt review and provides, at best, loose advice in this regard. It says that prior to 2021 Green Belt will be safeguarded save for the releases noted under Policy H2. Policy H3 then goes on to talk about land release for development after 2021 but no time period is set out to provide a framework for any Green Belt review in this latter period. In our view Policy H3 and Policy GB1/H2 should explain fully the need for a Green Belt review and that such a review should take place for a defined period. That such a review has not taken place in advance of the SCS is a serious matter for the Inspector to consider in the context of soundness. That said, it is considered that any review of Green Belt should have regard to a period beyond 2021 as indicated by draft Policy H3. Paragraph 1.9 of the East of England Plan explains "this RSS covers the period to 2021 but sets a vision, objectives and core strategy for the longer term". 2026 is therefore considered a minimum suitable period that any Green Belt review must have regard to in order to meet the 5 year land supply requirements in PPS3 for the period after 2021. However, Policy SS7 of the East of England Plan talks about Green Belt reviews up to 2031. In view of this and the need to explore the circumstances of Rochford - that existing settlements cannot contain future housing growth; that Green Belt is necessary to provide housing; and that these provide exceptional reasons to vary the Green Belt locally (paragraph 2.6 to 2.7 of PPG2) the policies and strategy for the SCS should identify a Green Belt review covering the period to 2031 and set out why a review is necessary. Not to do so is unsound for justification and effectiveness reasons.

Policy H4 - Affordable Housing

As currently drafted we feel that the policy is not concise enough and that the policy does not reflect current guidance. The phrase 'at least' would indicate that in most cases affordable housing above 35% will be sought. Our understanding is that the 35% figure is recommended in the SHMA and that to provide a policy framework which seeks to go beyond that figure would potentially be unworkable as many sites could not financially bare the burden of over a third of the net developable area not yielding a value. The policy should be redrafted so that "a target of 35% affordable housing shall be provided on all developments of 15 or more units..."

The last policy paragraph provides some scope to relax this policy, if there are clear site constraints that make on site provision impossible. The policy, though, is not particularly clear on what would constitute exceptional circumstances. For example, physical site constraints, which unusually raise development costs, would be one such reason and this should be specified. There may be other reasons including the nature of housing needs in the part of the District the site is located which justify affordable housing below the 35% target. Design reasons may also have a bearing on how provision is made and in what form, particularly if the site is in an historic area where design might override housing need argument. It is therefore recommended that the policy expand on the type of circumstances where affordable housing may be relaxed and the type of information that will be sought of applicant's who have a need to invoke this part of the policy.

Policy H5

In support of the policy, it is advantageous that no percentages requiring a specific mix are included. This flexibility will enable developers and the Council to respond directly to changing circumstances in the local housing market. In the past some authorities have set out a percentage for the type of housing they require only to find that after a few years of strict implementation there is an oversupply of property of that type and no flexibility in the policy to address the problem.

Policy ED2 - London Southend Airport

It is considered that to grow non aviation related employment at a location north of Southend Airport where sustainable access from the rest of Rochford District requires careful consideration. Most Airports are serviced by aviation related employment development and as such a location close to the airport is sensible and sustainable. However, for surface access reasons it would be inappropriate to encourage travel from Rochford's main settlements to what essentially

Core Strategy Submission Document

16930 Object

CHAPTER 8 Policy ENV9 - Code for Sustainable Homes

would be a rural location for general employment uses. Whilst sustainable access would be improved by a railway station and better bus links, there is no evidence to suggest that a sustainable surface access strategy for non related employment development at the Airport can be achieved. Paragraph 11.22 explains the critical importance of a railway station to the delivery of the strategy yet the Transport Chapter and Implementation Chapter provide neither a policy nor an assessment of deliverability. It is also notable that the South Essex Rapid Transit Policy T4, as set out at paragraph 10.16, notes that Rochford is not proposed to be served but may be served in future phases. This uncertainty is no way to plan for a major employment land supply strategy in the District. In relation to PPS12, the ability to deliver sustainable green field employment sites away from the top tier settlements of Hockley/Hawkwell, Rochford and Rayleigh is unsound.

Policy ED3

We fully support the first sentence of the Policy and note the apparent contradiction with the statements in Policy H1 and elsewhere which seeks to develop on alternative uses at industrial estates such as Eldon Way.

This contradiction is evidence in the second paragraph of Policy ED3. In our representations on Policy H1 we have explained why it is not sound to diminish the employment stock at Eldon Way and the importance of maintaining a dominance of employment type uses at this estate. These arguments are not repeated here.

We note the sentiments of the third paragraph and in accordance with our representations elsewhere are of the view that this sentence should be revised to explain that Eldon Way will accommodate principally employment type uses. As noted elsewhere uses which are an alternative to employment would diminish this highly sustainable employment site and this is unsound when assessed against National Policy.

Policy ED4 - Future Employment Allocations

In part, the de-allocation strategy is not supported as it is considered unsound when set against sustainability criteria. In relation to the Eldon Way Industrial Estate it is considered critical to the ongoing sustainability of this settlement that employment uses are maintained at this location. It is close to the railway station, bus routes and local residential areas from which the opportunity exists for employees to walk or cycle to work. Its location adjacent to the Town Centre offers opportunity for some retail and leisure development to complement the centre and to maintain a supporting function. These sustainable benefits would not occur with the deallocation of Eldon Way or the significant erosion of its employment floorspace. Whilst redevelopment of the employment site to achieve new employment is supported, the dominant land use should continue to be employment use. As a consequence, the 18ha of land required for employment in this policy is considered to be excessive and the policy should be reviewed to explain that redevelopment of existing employment sites for primarily new employment development will be encouraged.

Policy T4

It is noted that the South Essex Rapid Transit policy, as elaborated upon at paragraph 10.16 notes that Rochford is not served but may be served in future phases. This uncertainty is contrary to the delivery principles of soundness and directly puts at issue the employment land supply strategy in the District which is founded on sustainable access to new sites. In relation to PPS12, the ability to deliver sustainable green field employment sites away from the top tier settlements of Hockley, Rochford and Rayleigh is unsound.

Appendix H1, CTL1 - Infrastructure

It is recognised that necessary infrastructure provision is an important part of creating a sustainable development and in that context appendix H1 is supported. The supporting text notes that the table at Appendix H1 is not exhaustive and in that context it is very important that the framework properly distinguishes between what should be provided as part of new development schemes and what shouldn't. It is therefore essential that the framework acknowledges the importance of Circular 05/05 and the tests which say that provision of infrastructure and/or contributions should be:

- * Relevant to planning
- * Necessary to make the proposed development acceptable in planning terms
- * Directly related to the proposed development
- * Fairly and reasonably related in scale and kind to the proposed development
- * Reasonable in all other respects

As is made clear (Paragraph B9 of Circular 5/05) contributions should not be used to make good existing deficiencies in infrastructure provision. Nor are they to be used to secure contributions to the achievement of wider planning objectives that are not necessary for consent to be granted. In that context the Core Strategy should set this out as its policy framework.

Policy GB1 - Green Belt

Core Strategy Submission Document

16930 Object

CHAPTER 8 Policy ENV9 - Code for Sustainable Homes

The objectives of this policy are supported, although as noted in other representations the SCS is unsound as it does not meet the tests in relation to justification, compliance with national policy or effectiveness of strategy.

Policy GB1 mentions the objective to allocate the minimum amount of Green Belt land necessary. The policy should link to the requirements of PPG2 and RSS which are discussed in relation to the representations on Policy H2 and H3. The policy should set out a timeframe for the review and why Rochford requires a Green Belt review (what the exceptional circumstances are in this District that justify a review of local boundaries. The policy should be amended to set out a 2031 time frame and this may require the SCS to have an extended life span beyond 2021.

We would recommend the deletion of the word character since Green Belt designation is not related to landscape character as currently drafted. For clarity we would also recommend that the Policy or its supporting text explain that a Green Belt review will take place in support of an allocations document (paragraph 6.6) in order to identify an appropriate new boundary. This is particularly necessary given the commitment to a Green belt review in the adopted Local Development Scheme.

Policy CLT1 - Planning Obligations and Standard Charges

In view of the need to test fully the basis on which standard charges are based it is important that any document produced is in a development plan document that enables an examination in public. The policy should explain this in order that when the document is produced it accords with Policy and is based on sound evidence.

ENV9 - Code for Sustainable Homes

Object. The advice from the Department of Communities and Local Government is that the new requirement to have a rating against the Code does not make it mandatory to build a Code home or to have each new home assessed against the Code. It does however mean that all buyers of new homes be given clear information about the sustainability of the new home. A house builder can do this in one of two ways:

- they can choose to build a Code home, have that home assessed against the Code and provide the home buyer with a Code certificate stating the star rating the home has achieved
- or, they can choose to build to current building regulations standards, not to pay for an assessment and instead download a nil-rated certificate of non-assessment (also referred to as a nil-rating) to provide to the home buyer.

As such the Rochford policy requirement that coding 3 be achieved by 2010 and Code 6 by 2013 is out of step with Government advice. The policy wording should explain that it is just the coding that is a requirement of new homes and not necessarily that new homes should be constructed to achieve a standard.

The current Government objectives are for the code to be introduced over a reasonable period with development to be code 3 by 2010, code level 4 by 2013 and code level 5 by 2016. In this regard the policy, as drafted, seeks to achieve code 6 by 2013 and consequently compresses the code requirements into a shorter time scale with the costs associated expected to be subsumed within the housing market through higher prices. This is not a realistic strategy for the delivery of sustainable homes and we consider that the policy should be revised to extend the period of compliance but to also make it more flexible based on local circumstances.

Research undertaken on behalf of the Housing Corporation and English Partnerships, published in February 2007 'A cost review of the code for sustainable homes' reveals that code 6 is unlikely to be unattainable given existing technologies and that achieving code 5 could result in a 12% to 20% increase in costs that would have to be passed onto the consumer. Given the variability of the housing market with peaks and troughs, it is unlikely that the housing market would be able to subsume this level of price increase.

The code system policy as currently drafted does not have regard to site circumstances and so many of the requirements could be difficult to meet. For example, micro electricity generation on site may be difficult to achieve where local circumstances deter the capture of wind or solar power. If more expensive technologies are required to generate power than is the norm then costs will rise. There may be other competing reasons why designs cannot include certain sustainability measures if housing sites are in sensitive landscape and historic locations. Alternatively there may be significant development costs associated with site specific circumstances and so viability of the site's development becomes a valid consideration. By insisting on the code for sustainable homes other policy objectives such as affordable housing at particular rates and other contributions may need to be reconsidered. Consequently, we are of the view that this policy should be drafted in a manner which enables site specific circumstances to be taken into account. As noted above the Government explains that the code is a certification requirement and does not necessarily mean that buildings are constructed in accordance with a code level.

It is also important to note that it is not the purpose of planning legislation to duplicate other legislation. In this regard, the policy should accept that the Building Regulations will be the main vehicle for implementing this policy and that unless the coding requires external development then there will be no need to specify what is to be carried out in a planning application.

CHAPTER 8 Policy ENV9 - Code for Sustainable Homes

Summary: ENV9 - Code for Sustainable Homes

Object. The advice from the Department of Communities and Local Government is that the new requirement to have a rating against the Code does not make it mandatory to build a Code home or to have each new home assessed against the Code. It does however mean that all buyers of new homes be given clear information about the sustainability of the new home. A house builder can do this in one of two ways:

- they can chose to build a Code home, have that home assessed against the Code and provide the home buyer with a Code certificate stating the star rating the home has achieved
- or, they can chose to build to current building regulations standards, not to pay for an assessment and instead download a nil-rated certificate of non-assessment (also referred to as a nil-rating) to provide to the home buyer.

As such the Rochford policy requirement that coding 3 be achieved by 2010 and Code 6 by 2013 is out of step with Government advice. The policy wording should explain that it is just the coding that is a requirement of new homes and not necessarily that new homes should be constructed to achieve a standard.

The current Government objectives are for the code to be introduced over a reasonable period with development to be code 3 by 2010, code level 4 by 2013 and code level by 2016. In this regard the policy, as drafted, seeks to achieve code 6 by 2013 and consequently compresses the code requirements into a shorter time scale with the costs associated expected to be subsumed within the housing market though higher prices. This is not a realistic strategy for the delivery of sustainable homes and we consider that the policy should be revised to extend the period of compliance but to also make it more flexible based on local circumstances.

Research undertaken on behalf of the Housing Corporation and English Partnerships, published in February 2007 'A cost review of the code for sustainable homes' reveals that code 6 is unlikely to be unattainable given existing technologies and that achieving code 5 could result in a 12% to 20% increase in costs that would have to be passed onto the consumer. Given the variability of the housing market with peaks and troughs, it is unlikely that the housing market would be able to subsume this level of price increase.

The code system policy as currently drafted does not have regard to site circumstances and so many of the requirements could be difficult to meet. For example, micro electricity generation on site may be difficult to achieve where local circumstances deter the capture of wind or solar power. If more expensive technologies are required to generate power than is the norm then costs will rise. There may be other competing reasons why designs cannot include certain sustainability measures if housing sites are in sensitive landscape and historic locations. Alternatively there may be significant development costs associated with site specific circumstances and so viability of the site's development becomes a valid consideration. By insisting on the code for sustainable homes other policy objectives such as affordable housing at particular rates and other contributions may need to be reconsidered. Consequently, we are of the view that this policy should be drafted in a manner which enables site specific circumstances to be taken into account. As noted above the Government explains that the code is a certification requirement and does not necessarily mean that buildings are constructed in accordance with a code level.

It is also important to note that it is not the purpose of planning legislation to duplicate other legislation. In this regard, the policy should accept that the Building Regulations will be the main vehicle for implementing this policy and that unless the coding requires external development then there will be no need to specify what is to be carried out in a planning application.

Full Text: Careful consideration needs to be given to accelerating the Code for Sustainable Homes (CSH) and BREEAM standards in advance of adopted policy. CSH is not a mandatory requirement and only the energy criteria (i.e. 25%) will become regulation through Building Regulations Part L from 2010 and further improvements at specified milestones thereafter.

In 'Building a Greener Future Policy' reference is made to building performance and local authorities would need to have regard to a number of considerations, including whether the proposed approach is consistent with securing the expected supply and pace of housing development shown in the housing trajectory required by Planning Policy Statement 3. Indeed, further consistent references are also referenced in PPS 1.

It goes on to state that national standards for reducing carbon emissions from homes should be set through building regulations, supported through the planning system. Indeed, given the level of ambition built into the national framework, CLG believe it would make it harder for industry to invest in supply chains with confidence or get the economies of scale to make new technologies cost effective. "It would also jeopardise our parallel commitment to increase the level of house building and deliver the affordable homes the country needs".

Given, these drivers it is considered that if levels for CSH and BREEAM are stipulated they are subject to review against national policy and importantly viability tests. Furthermore, the 'Core Strategy' would benefit from reflecting on the publication of the 'Definition of Zero Carbon Homes and Non-domestic Buildings' policy, and the soon to be published 2010 Code for Sustainable Homes consultation paper, and in addition the UK-GBC Consultation on a Code for Sustainable Buildings.

With regard to water conservation aspects, the setting of water standards through CSH is fraught with risks, for example the Approved Document G of the building regulations, 'Sanitation, Hot Water Safety and Water Efficiency' was published in May and was to take effect from October 2009; however this has now been put back to April 2010. The reason behind this is because under the Technical Standards Directive (98/34/EC), notification to the European Commission of the guidance contained in the draft Approved Document G was required.

Consequently on the 3rd September a "detailed opinion" was received from the Commission with a number of comments on the draft Approved Document. This resulted in a '3 month standstill' which prohibits introduction of the Approved Document before 2 December 2009. Accordingly, CLG have decided to delay its issue until 6 April 2010.

With regard to surface water run-off, category SUR1 of CSH is now subject to similar review by CLG Technical Advisory Group, because it has been found to be unreasonable in its intent and will result in significant technical problems and additional costs compared with current regulations.

Moreover, PPS 25 must be treated with caution as its interpretation is subject to variable outcomes at the sub-regionally level. For example, we support the principles of SuDs; however Highways Departments very often will not accept or adopt such measures.

Summary:

If levels for CSH and BREEAM are to be stipulated within the Core Strategy, wording must be inserted which states that levels/requirements are subject to review against national policy and, importantly, viability tests at the appropriate time.

Alternatively, no minimum target should be set within the Core Strategy, but words be inserted which state that the minimum levels/requirements will be set for an individual developments when the detailed scale and nature of a development scheme is known or defined (e.g. within a Design Brief or Master Plan, Concept Statement or Planning Application for a site).

Change to Plan

If levels for CSH and BREEAM are to be stipulated within the Core Strategy, wording must be inserted which states that levels/requirements are subject to review against national policy and, importantly, viability tests at the appropriate time.

Alternatively, no minimum target should be set, but words be inserted which state that the minimum levels/requirements will be set for an individual developments when the detailed scale and nature of a development scheme is known or defined (e.g. within a Design Brief or Master Plan, Concept Statement or Planning Application for a site) and will be set in accordance with national building regulations or other national policy at the time unless viability tests indicate that such levels/requirements would not be appropriate/would make a scheme unviable.

Full Text: Objection to Rochford Core Strategy, 175 houses in Hawkwell

Dear sirs, We wish to make plain our objections to the above strategy. The proposal is completely unsound. The infrastructure is not in place to meet the additional traffic that will have to use an already over loaded road. ie the B1013 .We cannot see an economical solution to this problem other than a new main road built, North of the village starting at the A130 running through to Thorpe Bay .Obviously this would cost millions of pounds and therefore could never happen. To keep loading an overcrowded main road running from Rayleigh to Rochford,with Hawkwell stuck in the in middle is madness.Not to mention the effect it would have on Rectory Road and Thorpe Road.Surely,as planners you can see this . Also, the schools and the Doctors facilities are not good enough already. Furthermore,I have lived in the Hockley/Hawkwell area for 45 years and do not want it turned into a town rather than the village that it is struggling to remain now.We cannot afford to lose these green belt areas and the wildlife.. Please lodge my objections

Full Text: ROCHFORD DISTRICT COUNCIL - LOCAL DEVELOPMENT FRAMEWORK CORE STRATEGY SUBMISSION
SEPTEMBER 2009

Icen Projects Ltd (Icen) has been instructed by Colonnade Land LLP (Colonnade) to submit representations to the Rochford Local Development Framework Core Strategy Submission (CSS).

a) Overview

It is our conclusion that the CSS is not justified, effective or consistent with national policy, as required by Planning Policy Statement 12: Creating Strong Safe and Prosperous Communities through Local Spatial Planning (PPS12) and is therefore vulnerable to being found unsound by an Inspector through the Examination in Public.

b) Background and Summary

These representations follow those made by Icen on behalf of Colonnade to the Preferred Options Core Strategy, submitted via letter dated 17 December 2008. In this regard, we would request that the Council confirms that the representations made to the Preferred Options Core Strategy will be taken into account alongside the current representations, particularly as there are a number of cross references between the two sets of representations.

It is not considered necessary to reiterate the content of the previous representations, as they were made at the appropriate stage and will be considered by the Planning Inspectorate in due course, but it is inevitable that certain elements will require restating where it is not clear that they have been taken into account in the production of the CSS. For clarity, therefore, Colonnade feel that it is appropriate to clarify the 'in-principle' issues that were raised in the representations to the Preferred Options Core Strategy, recognising that these issues were raised in the context of a wider and more coherent justification made within the representations:

- â€¢ Further cross-referencing of the recommendations made within the evidence base is required;
- â€¢ Greater focus should be placed on promoting Rochford as the principal settlement within the District;
- â€¢ Coombes Farm is the most logical location for residential development abutting the urban area of Rochford and as such warrants recognition as a general location for residential development;
- â€¢ The allocation of Three Ashes Farm for employment generating uses will be pursued;
- â€¢ Recognition that it is not realistic to expect residential allocations to be met mainly on Brownfield sites, nor should the intensification of smaller sites in residential areas be pursued;
- â€¢ Many of the sites identified as suitable for residential development will not be viable and will not come forward for development within the timescales anticipated;
- â€¢ The failure to provide the necessary justification for the proposed infrastructure improvements sought in Appendix H1;
- â€¢ The inclusion of an affordable housing exception policy was sought; and
- â€¢ The need to identify sites capable of delivering employment growth in the short term.

Following assessment of the CSS presented by the Council for consultation prior to submission to the Secretary of State, Colonnade considers the Plan to be 'unsound' as the document consistently fails to meet the tests of soundness set out in the table following Paragraph 4.52 of PPS12. For clarity, PPS12 confirms that to be 'sound' a Core Strategy should be JUSTIFIED, EFFECTIVE and consistent with NATIONAL POLICY and defines 'justified' as "founded on a robust and credible evidence base" and "the most appropriate strategy when considered against the reasonable alternatives" and 'effective' as "deliverable", "flexible" and "able to be monitored".

The rationale for the above is identified in the remainder of these representations, which are provided in the interests of ensuring the Council delivers a strong, robust and logical Core Strategy that guides the future development of the District in a justified and effective manner.

b) Colonnade

As the Council is aware from previous submissions to the Local Development Framework, Colonnade is a strategic land company with a particular interest in the future development of the District as a consequence of a number of sites that it controls, particularly around Rochford.

The Council will also be aware that Colonnade has recently submitted an outline planning application for the residential development of the land at Coombes Farm, Rochford to provide a sustainable urban extension comprising up to 326

Core Strategy Submission Document

16257 Object

CHAPTER 9 Policy CLT1 - Planning Obligations and Standard Charges

residential dwellings, with associated accesses and community uses. Whilst the planning application process is clearly separate from the Local Development Framework production process, Colonnade wishes to continue the promotion of the site as a suitable location for residential development.

Accordingly, these representations focus on the legal requirements and tests of soundness associated principally with the Housing and Employment chapters of the CSS, with reference where appropriate to the sites that are controlled by Colonnade, the outline planning application at Coombes Farm and other issues where relevant.

c) Housing

i. Date of Adoption

The CSS assumes an adoption date of 2010 and plans for the provision of housing to 2025.

Taking account of the potential delays to the adoption of the Plan, including the Examination process, it would be more appropriate for the CSS to provide sufficient flexibility to allow for delays in its adoption. Colonnade considers an adoption date of 2011 for the CSS is a more realistic target.

Taking account of the advice in Paragraph 4.13 of PPS12, which states that the time horizon for the Core Strategy should be "at least 15 years from the date of adoption" it would be appropriate for the CSS to plan for the provision of housing to 2026 at the earliest. As such, Colonnade does not consider the CSS to be 'flexible' in the context of the tests of soundness in the table following Paragraph 4.52 of PPS12.

ii. Housing Delivery

However, setting the above aside, the Housing Chapter identifies the minimum housing delivery target for the period 2001 to 2021 of 4,600 dwellings as set out in the East of England Plan, with the annual average requirement of 250 dwellings per annum to extend provision from 2021 to 2025. It also confirms that the residual target for the period 2006 to 2021 is 3,790 dwellings, taking account of the delivery of 810 dwellings in the period 2001 to 2006, and a further 618 dwellings have been completed between 2006 and 2008.

This leaves a residual housing provision target of a minimum of 3,172 dwellings in the period 2008 to 2021. Taking into account the required provision beyond 2021, the residual housing provision target in the period 2008 to 2025 is a minimum of 4,172 dwellings. The disparity between these figures and those provided within the CSS are explained by the rounding down of the annual average delivery requirement in the period 2006 to 2021 to 250 dwellings per annum, compared with the actual figure of 252.67.

The table at Paragraph 4.6 of the CSS identifies the source of housing provision that will meet the identified minimum requirements and includes figures for 'Extant Planning Permissions' and 'Existing allocations/other appropriate sites identified in Strategic Housing Land Availability Assessment'. These figures, along with the actual completions within the period are combined to produce the figure for the 'Total without Green Belt release' figure.

Setting aside the concern regarding under-provision associated with the rounding down of the annual average delivery requirement in the period 2006 to 2021, the CSS fails to identify the sites that will contribute to the 'Extant Planning Permissions' provision. The identification of the sites that will contribute to the 'Extant Planning Permissions' should be provided in the context of the findings of the Inspector in the appeal by Asprey Homes [APP/G5180/A/07/2043219/NWF] who determined that the reliance on a delivery rate of 100% is unsafe [IR287].

Furthermore, at the time of writing these representations, the Strategic Housing Land Availability Assessment 2009 has not been published. It is impossible therefore for a full assessment of the proposed housing provision to be undertaken to confirm whether the CSS is 'founded on a robust and credible evidence base' [test of soundness in the table following Paragraph 4.52 of PPS12].

iii. Redevelopment of Employment Sites

Paragraph 4.14 of the CSS refers to the identification of the four employment sites that are considered by the Council to be suitable for redevelopment to residential use. However, the failure to publish the Strategic Housing Land Availability Assessment 2009 either before or alongside the publication of the CSS means that the assumptions made by the Council as to the suitability, availability, viability and deliverability of the sites cannot be assessed.

It has been necessary, therefore, to review the assumptions made in the Rochford Urban Capacity Study 2007 (UCS) regarding the sites. Within the section of the UCS entitled 'Redevelopment of Established Employment Land' [pages 22 & 23] includes a list of those sites assessed, their indicative capacities and the probability of residential development coming forward at the sites within the plan period (identified elsewhere as 2001 - 2021). The list includes the four sites identified in the CSS of Eldon Way/Foundry Estate, Hockley; Rawreth Lane Industrial Estate, Rayleigh; Stambridge Mills; and Star Lane Industrial Estate, Great Wakering.

In total, the UCS identifies an indicative residential redevelopment capacity of 486 units on the four sites (118, 220, 60 and 88 respectively). Of these, it identifies the Rawreth Lane Industrial Estate and Stambridge Mills as having a 'high'

Core Strategy Submission Document

16257 Object

CHAPTER 9 Policy CLT1 - Planning Obligations and Standard Charges

probability of coming forward for development in the Plan period (2001 - 2021), which would deliver 280 residential dwellings using the Council's own figures. The Star Lane Industrial Estate (referred to in the UCS as the Star Lane Brickworks) is identified as having a 'medium' probability of coming forward for development in the Plan period, with capacity to deliver 88 residential dwellings. It is unclear, therefore, where the figure for 'Existing allocations/other appropriate sites identified in Strategic Housing Land Availability Assessment'.

Set against this is the identification of these four sites in the CSS as being capable of delivery for residential development within the Plan period, with 671 units delivered between 2006 and 2015 and a further 506 units between 2015 and 2021.

The UCS also states in the same section that:

"There are considerable areas of land in the district that are currently allocated for, and in use as, employment land. The redevelopment of such sites for residential use would reduce demand for residential development on greenfield sites, but would at the same time create a need for alternative sites to be found for employment. Such an approach, which would be likely to require the decontamination of existing employment land to make it fit for residential use, together with development of a greenfield site and implementation of additional infrastructure to serve the new employment area, may well be unsustainable." [our emphasis]

The UCS appears to confirm therefore, that not only would the redevelopment of the four sites listed in the CSS be unlikely within the Plan period, but also potentially unsustainable. In this regard, it is notable that the promoters of Stambridge Mills sought the Screening Opinion of the Council as to whether Environmental Impact Assessment of the planning application for the redevelopment of the site for residential use was required in 2007, but to date are yet to submit a planning application for the redevelopment of the site.

In light of this, Colonnade does not consider the CSS is 'the most appropriate strategy when considered against the reasonable alternatives' [test of soundness in the table following Paragraph 4.52 of PPS12], which include the provision of residential development in East Rochford.

iv. Strategic Housing Growth to the East of Rochford

Furthermore, whilst paragraph 2.62 of the CSS identifies concern relating to the identification of locations to the east of Rochford for development on the basis that 'vehicular movements would inevitably be directed through Rochford's historic core', the CSS later identifies Stambridge Mills as a suitable site for residential redevelopment.

In light of the evident conflicts between the evidence base provided in support of the CSS and the absence of other evidence, the CSS is not considered 'sound' in the context of the tests of soundness in the table following Paragraph 4.52 of PPS12.

v. Housing Trajectory

Paragraph 4.28 of the CSS confirms that policies H1, H2 and H3 of the CSS will deliver housing supply as illustrated in the Housing Trajectory at Appendix H2. This Housing Trajectory is transposed from the 2008 Annual Monitoring Report (AMR).

Whilst on the face of it, the Housing Trajectory appears to confirm that the Council can meet its requirement to identify a five year housing supply, many of the sites identified within the AMR do not conform to the guidance issued by CLG in August 2008, on the assessment of a five year land supply. The guidance identifies sites that can be included within the five year assessment of housing supply as:

"those that are allocated for housing in the Development Plan, sites that have planning permission (outline or full planning permission that has not been implemented) and specific, unallocated brownfield sites that have the potential to make a significant contribution to housing delivery during the 5 year period".

Table 4.10: Projected Net Completions of the AMR confirms that the five year housing land supply figure includes sites from 'other land allocated for residential purposes', which are based on land allocations outside existing settlements. However, it should be clarified that these land allocations are not currently allocated for housing development in an adopted Development Plan. As such, these unallocated greenfield sites that are yet to make significant progress through the planning system should be discounted and the five year housing land supply recalculated.

The table below has been prepared to confirm the extent of the shortfall should the sites from 'other land allocated for residential purposes' be removed from the calculation of the Rochford five year housing land supply, in accordance with the guidance issued by CLG:

Recalculated Five Year Housing Land Supply (2009 - 2014):

Year
1st April 2009 to 31st March 2010
Predicted Delivery (A)

Core Strategy Submission Document

16257 Object

CHAPTER 9 Policy CLT1 - Planning Obligations and Standard Charges

106 dwellings
Allocations on 'other land allocated for residential purposes' (B)
0
Residual delivery (A-B)
106 dwellings
Delivery Shortfall
0

Year
1st April 2010 to 31st March 2011
Predicted Delivery (A)
217 dwellings
Allocations on 'other land allocated for residential purposes' (B)
150
Residual delivery (A-B)
67 dwellings
Delivery Shortfall
150

Year
1st April 2011 to 31st March 2012
Predicted Delivery (A)
544 dwellings
Allocations on 'other land allocated for residential purposes' (B)
300
Residual delivery (A-B)
244 dwellings
Delivery Shortfall
300

Year
1st April 2012 to 31st March 2013
Predicted Delivery (A)
395 dwellings
Allocations on 'other land allocated for residential purposes' (B)
375
Residual delivery (A-B)
20 dwellings
Delivery Shortfall
375

Year
1st April 2013 to 31st March 2014
Predicted Delivery (A)
300 dwellings
Allocations on 'other land allocated for residential purposes' (B)
300
Residual delivery (A-B)
0 dwellings
Delivery Shortfall
300

TOTAL

Predicted Delivery (A)
1,562 dwellings

Allocations on 'other land allocated for residential purposes' (B)
1,125 dwellings

Residual delivery (A-B)
437 dwellings

Delivery Shortfall
1,125 dwellings

The above table confirms that the removal of the 'other land allocated for residential purposes' from the calculation of the Rochford five year housing land supply leaves the Council with a minimum net additional housing delivery of 437 dwellings, which equates to a supply of 1.7 years based on the adjusted annual delivery target of a minimum of 255 net

Core Strategy Submission Document

16257 Object

CHAPTER 9 Policy CLT1 - Planning Obligations and Standard Charges

additional dwellings per annum. As such, the Council is failing to meet its requirement to demonstrate a five year housing land supply in accordance with PPS3 and the supporting guidance provided by CLG. It is notable that the recent application by David Wilson Homes at Land between Main Road and Rectory Road and Clements Hall Way, Hawkwell identifies an even greater shortfall in the Council's five year housing land supply.

In addition to the above, the AMR does not include a commentary on how deliverability has been assessed against the requirements of paragraph 54 of PPS3.

Furthermore, the guidance from CLG confirms that the windfall sites cannot be relied upon in demonstrating a five year supply unless a Local Planning Authority can demonstrate genuine local circumstances exist to allow this exception. However, the second paragraph of the section entitled 'Housing Trajectory and Five Year Housing Supply' confirms that the estimated completions in the years 2008 to 2013 includes estimated yields through 'intensification' coming forward in future years. With reference to the definition of 'intensification' on page 13 of the AMR, it appears that the 'Housing Trajectory and Five Year Housing Supply' also includes provision for windfall sites. As such, the Council is required to demonstrate the 'genuine local circumstances exist to allow this exception'.

The pressures on delivery and need for additional sites are more acute when it is considered that an average delivery rate of 204 dwellings per annum was achieved during a strong period of housing market growth. In view of the current economic downturn, and significant problems faced within the housing market, the Council should seek to identify appropriate and deliverable sites to meet its regional housing target provision commitments. Suitable sites would include Coombes Farm, which has been positively promoted for development through the LDF process.

It may, therefore, be more appropriate for the Council not merely to allocate sufficient sites to meet the minimum targets set down by the East of England Plan, but to identify a reservoir of land capable of coming forward for development should the sites identified through the CSS and Allocations Development Plan Documents (DPD) fail to come forward for development within the anticipated timescales.

vi. Appendix H1

As set out in the representations to the Preferred Options Core Strategy, there is continuing concern that the list of improvements to infrastructure required in support of residential development as set out in Appendix H1 fails to provide the necessary justification for its inclusion. Whilst the preamble seeks to clarify why the infrastructure is sought, the inclusion of this list should be fully justified, otherwise it is of little value. Furthermore, it would be of benefit to provide further details of the existing community infrastructure provision and capacity within the evidence base.

The failure to provide the necessary justification for its inclusion means that the CSS will not be 'founded on a robust and credible evidence base' [test of soundness in the table following Paragraph 4.52 of PPS12].

d) Character of Place

As set out in the representations to the Preferred Options Core Strategy, Colonnade considers that, with respect to the requirement to produce and adhere to Development Briefs for large residential developments, as set out in Policy CP1, the Council should not seek to impose further demands on developers where existing regulations provide sufficient requirements regarding design. In this instance, Design and Access Statements provide sufficient design guidelines for developments and there is no additional information provided in the policy or supporting text that clearly sets out the justification for this requirement.

e) Green Belt

With reference to the comments regarding the redevelopment of employment sites under the 'Housing' section above and the requirement to allocate sufficient land to meet the minimum housing provision targets as required by the East of England Plan, Colonnade considers that the chapter on Green Belt, and policy GB1 in particular, fails to provide the necessary evidence base that will allow it to be monitored effectively.

It is inherent that the proposed redevelopment of previously developed employment sites for residential use in order to reduce the requirement to allocate previously undeveloped land for residential use will displace these employment uses. In turn, therefore, the separate allocation of previously undeveloped Green Belt to accommodate the compensatory employment provision is required. This is accepted in principle at paragraph 11.11 of the CSS.

Without providing clarification of the anticipated quantum of land required to accommodate the provision of housing and compensatory and new employment land, it is not possible to monitor the performance of policy GB1.

However, using the Council's figures in the table setting out the breakdown of the housing provision figures in Chapter 4 of the CSS (assuming that actual completions and extant permissions are all on previously developed land), setting aside the displacement of employment uses referred to above, approximately 42% of the required minimum housing provision target is capable of being accommodated on previously developed land (2,005 units from a total of 4,750). As such, the Council is required to provide at least 58% of the required minimum housing provision target on the Green Belt (2,745 units from a total of 4,750).

Core Strategy Submission Document

16257 Object

CHAPTER 9 Policy CLT1 - Planning Obligations and Standard Charges

If these figures are adjusted to take account of the displacement of employment uses (assuming the provision of an equal quantity of land is required to compensate for the employment land that is redeveloped), this figure changes to 17.5% on previously developed land and 82.5% on Green Belt (828 and 3,922 units from a total of 4,750 respectively). Even allowing for the achievement of higher densities of employment on new developments, the figures above are unlikely to change significantly.

Furthermore, the table in Chapter 4 also confirms that no previously developed land will be available for development beyond 2021, or 2015 if account is taken of the displacement of the employment uses.

In light of this, not only does Chapter 6 fail to provide the necessary evidence base that will allow it to be monitored effectively, it is also necessary to consider whether it presents the most appropriate strategy for addressing the required release of Green Belt land to accommodate the defined housing and employment delivery targets to 2025 and beyond as necessary. Colonnade considers a more robust approach that is flexible and capable of being monitored, would be to clearly identify those sites capable of delivery in the short term, which for the avoidance of doubt includes those sites being promoted by Colonnade, with a reservoir of alternative sites set aside for future growth.

As set out in the representations to the Preferred Options Core Strategy, Colonnade considers that the inclusion of an affordable housing exception policy within the CSS will aid the delivery of community housing within rural areas. However, the CSS does not contain such a policy, or adequately address the issue of community housing within rural areas and the CSS is not considered to provide sufficient flexibility to allow for the delivery of essential rural housing.

f) Environmental Issues

Colonnade has concerns regarding the justification for and effectiveness of a number of the policies contained within the Environmental Issues chapter, as follows:

â€¢ Policy ENV1: The Council fails to identify how it will "maintain, restore and enhance" the sites of nature conservation importance that are identified, or how the performance of this policy will be monitored;

â€¢ Policy ENV3: In the context of the advice at paragraph 4.32 of PPS12 regarding the reformulation of national policies, Colonnade does not consider that this policy is required; and

â€¢ Policy ENV9: As set out in the representations to the Preferred Options Core Strategy, Colonnade does not consider that the necessary evidence base has been provided to justify a policy that seeks to go above and beyond the policy targets for the Code for Sustainable Homes as set out by Central Government.

g) Community Infrastructure, Leisure and Tourism

Policy CLT1 refers to the requirement for residential and employment development to contribute to the infrastructure identified in Appendix CLT1 through Standard Charges.

However, whilst the general principle of securing planning obligations through the application of standard charges is broadly accepted, the list of infrastructure requirements set out in Appendix CLT1 is not supported by sufficient evidence base to identify its robustness and credibility. As such, Colonnade does not consider either policy CLT1 or Appendix CLT1 is justified in the context of PPS12.

It is also noted that, despite the clarification sought by Colonnade at the Core Strategy Preferred Options stage, the CSS fails to confirm what information should be contained within Health Impact Assessments, which are required by policy CLT4. Once again, Colonnade requests further clarification of what is involved in the assessment and the expected outputs, which will provide greater clarity and will allow the policy to be monitored.

h) Transport

Policy T8 confirms that the Council will apply minimum parking standards. As set out in the representations to the Preferred Options Core Strategy, the guidance in Planning Policy Guidance Note 13: Transport (PPG13) is clear regarding the imposition of parking standards.

Paragraphs 52-56 of PPG13 confirm that the Local Planning Authorities should apply maximum not minimum parking standards. In order to satisfy the legal requirements set out in PPS12, the policy must reflect PPG13 to promote sustainable transport choices and further provide incentives for developers to locate further residential land closer to local service centres by requiring maximum parking standards for residential developments.

i) Economic Development

As set out in the representations to the Preferred Options Core Strategy, the land at Three Ashes Farm provides an excellent opportunity to deliver employment growth in the short term and may be a suitable site for the 'Eco-Innovation Centre' that is being promoted by the Council. Its identification as a suitable location for strategic employment growth, or the provision of an Eco-Innovation Centre, would accord with the general principles of the policies contained within Chapter 11.

Core Strategy Submission Document

16257 Object

CHAPTER 9 Policy CLT1 - Planning Obligations and Standard Charges

The identification of Purdeys Industrial Estate as fit for purpose (in paragraph 11.32 and the Council's 2008 Employment Land Study 2008) and therefore it should be maintained and if possible expanded, is welcomed and Colonnade considers that Three Ashes Farm could deliver this expansion, providing a natural extension to Purdeys Industrial Estate and being strategically located close to the Airport.

Three Ashes would address the negative impacts that the nearby residential area experiences from the existing Industrial Estate by providing a buffer between established uses and the residential area with less intensive employment activities. The highways analysis that has been carried out has suggested that it would not have an adverse impact on roads and congestion. Furthermore, there are very few opportunities for businesses to expand and Three Ashes could provide this opportunity.

j) Conclusions

Following the submission of representations to the Preferred Options Core Strategy, Colonnade is disappointed to note that the CSS fails to take account of the majority of the issues raised in their representations.

In addition, Colonnade considers the plan to be 'unsound' as the document consistently fails to meet the tests of soundness set out in the table following Paragraph 4.52 of PPS12 and respectfully requests that the Council notifies Icen, on behalf of Colonnade, of the future arrangements for the Examination of the Core Strategy. Furthermore, Colonnade wishes to take this opportunity to formally register a request to appear at all stages of the Examination in Public, including the pre-hearing meeting and any planned hearing sessions whereby issues raised in the context of this letter are to be discussed. Please confirm this request, and that the representations made to the Preferred Options Core Strategy will be taken into account alongside the current representations, by way of return to this letter.

Icen Projects, on behalf of Colonnade Land LLP trusts that the Council will find these representations to be constructive and helpful in taking forward the Core Strategy. Should you wish to discuss any aspect of these representations further, please do not hesitate to contact us.

Summary:

Policy CLT1 refers to the requirement for residential and employment development to contribute to the infrastructure identified in Appendix CLT1 through Standard Charges.

However, whilst the general principle of securing planning obligations through the application of standard charges is broadly accepted, the list of infrastructure requirements set out in Appendix CLT1 is not supported by sufficient evidence base to identify its robustness and credibility. As such, Colonnade does not consider either policy CLT1 or Appendix CLT1 is justified in the context of PPS12.

It is also noted that, despite the clarification sought by Colonnade at the Core Strategy Preferred Options stage, the CSS fails to confirm what information should be contained within Health Impact Assessments, which are required by policy CLT4. Once again, Colonnade requests further clarification of what is involved in the assessment and the expected outputs, which will provide greater clarity and will allow the policy to be monitored.

Full Text:

The policy is unsound in that
- the first paragraph does not make it clear that the contributions will be directly related to the infrastructure needs arising from that development. As currently phrased, the policy is more open ended and not in accordance with Circular 05 / 00
- the third paragraph should state whether the "Document" will be a DPD or an SPD.

Amend Policy CLT1 as follows

- paragraph 1 "where a development gives rise to a need for additional or enhanced infrastructure, the Council will require the developer to enter into legal agreements to secure planning obligations ..." (rest of policy unchanged)
- paragraph 3 - Specify whether the "Document" is a DPD or an SPD.

It is considered that our participation at the oral part of the public examination would assist the Inspector for two main reasons

- Sellwood Planning has a detailed knowledge of the Rochford area, appeared at the last Local Plan Inquiry and was a participant at the RSS public examination. This direct knowledge of the local area and the statutory Development Plan may be of assistance to the Inspector
- Sellwood Planning has experience in promoting major schemes through Core Strategies (eg. 7,000 dwellings in Ashford, 5,750 dwellings in Dover, 2,500 dwellings in Horsham and 1,200 dwellings in Newmarket) and the emerging body of evidence of what constitutes a sound Core Strategy and what is unsound. Our experience indicates that, in a number of respects, the submitted Core Strategy is unsound in its present form.

Summary:

The policy is unsound in that
- the first paragraph does not make it clear that the contributions will be directly related to the infrastructure needs arising from that development. As currently phrased, the policy is more open ended and not in accordance with Circular 05 / 00
- the third paragraph should state whether the "Document" will be a DPD or an SPD.

CHAPTER 9 Policy CLT1 - Planning Obligations and Standard Charges

Respondent: Ms G Yeadell [7834]

6 Southend Road
Hockley
Essex
SS5 4QQ
01702 205450

Agent: N/A

Full Text: Para 4.8 States sustainability underlines any decisions on housing location, primarily: current and future deliverability of infrastructure, eg roads, services, public transport, health.

Policy H1

Para.4.14 Some employment sites are considered more suitable for other uses (eg housing) including Eldon Way/Foundry, Hockley. This is all open to question.

Hockley-re Eldon Way/Foundry

In CS Preferred Options 2008 policy H2 you discarded N.E.Hockley as a housing option - whilst close to centre, station, "impact on highway network from traffic heading through Hockley..along Ashingdon Road..renders location unviable". Clearly the same principle applied to Eldon Way/Foundry for the same reasons.

Response to C.S Preferred Options 2008 and HAAP 2009

June 2009 issue C S Submission issue says Eldon Way will be used for housing, whereas Sept.2009 issue says "alternative uses, including residential.." to be decided by HAAP (Issues consultation done, Pref.Options issue awaited, but judging from JAAP Pref.Options decision - namely biggest option chosen against overriding opposition, it will be housing).

Need to be logical and even-handed in proposals

Health services GP surgeries are full and a PCT health centre will not occur in the foreseeable economic climate.

Ch.10: Highways and Transport

Policy T1, T2 RDC proposes working with ECC Highways, developers, but admits it has no authority, responsibility here. RDC will seek developer contributions, but this is neither detailed nor costed in CS Submission nor HAAP, and contravenes PPS 12.3 para.4.93 which states "The infrastructure planning process should identify as far as possible infrastructure needs and costs". Idea of paying for road & transport improvements through Standard Charges is unproven and unsound.

Establish likely level of Standard Charges. Accept you cannot turn district into motorways with wholesale demolition.

In neither CS Submission nor HAAP is there any highways improvement, except idea to replace Spa roundabout with traffic lights and 1 way system up Southend Road and Hockley Rise.

Para.10.5 "..highway improvements serving new developments..in a timely manner..ensuring developments delivered alongside necessary infrastructure".

These improvements cannot possibly be delivered. It should be realised: B1013 (Southend Rd), Rectory Road Hawkwell, Ashingdon, West Rochford - all in area proposed for large new developments are former winding, narrow country roads, tarmacked over for motorised traffic. Large housing increments are unsustainable off these roads, which cannot be altered without much destruction.

Reply to CS Pref. Options 2008 & HAAP Issues/Options 2009

Policy T3, CLT1 Appendix CLT1 Public transport RDC admits this is in the private sector. In Hockley, operator has cut No7 service to 1 per hour from Ashingdon Schools, claiming it is unviable beyond. This is unlikely to change as Hockley is car dependant. No8 bus through Hawkwell is cut to 1 per hour to Rayleigh, for same reason as No7. Proposed planning agreements with developers can't run: eg, a community centre or classroom given by a developer remains once he has moved on - how can that apply for an on-going bus service?

Reply to Infrastructure Transport in CS Pref. Opts. 2008 and to HAAP Issues Opts. 2009.

Ch.11 Economic development

Policy ED3 Core Strategy preferred Options 2008 hinted at possible housing in Eldon Way site. June 2009 Submission version, without consultation, said Eldon Way would be housing (map included Foundry, not the text). September 2009 Submission said redevelopment would be in HAAP (which apart from the Issues/Options version, is unfinished. Judging from results of JAAP Preferred Options where biggest option is chosen, though most respondents were against it, site will be housing, without consultation.

Core Strategy Submission Document

16716 Object

CHAPTER 9 Policy CLT1 - Planning Obligations and Standard Charges

Para.1.25, Para.11.32 Note CH.1 Introduction to CS Submission 2009 para.1.25 East England Plan requires 3000 additional jobs, presumably to 2021. Revised Southend Airport is expected to drive Economic development. But at para. 11.32 Eldon Way-Foundry estate is planned to be more suitably utilized. "...alternative land will be required to accommodated employment uses so displaced" - ie jobs sent to eg new site near Southend Airport - not new jobs.

Reply to HAAP Issues Options 2009

Remove compulsory relocation

Policy ED4 Policy states Council will allocate 18ha of land to make up for de-allocations in ED3 - that proves point above.

Proposals for moving employment to out of town locations with no existing transport links are contrary to government policies PPG4, PPS1 and PPS4 and Core Strategy Policy T1.

Evidence Base is ignored by contravening Hockley Parish Plan 2007 and ignoring residents' views on HAAP Issues/Options. Next stage of HAAP Preferred Options is pre-empted and rendered irrelevant. Core Strategy plans to relocate Eldon Way Foundry estate to Greenfield site with no nearby bus or railway. RDC plans to upgrade the nearest road to dual carriageway, though the connecting B1013 (through Hockley) will stay single, said by ECC Highways statistics to be 72% capacity. Airport bosses and council cannot suggest there will be no traffic growth from JAAP and new industrial site.

Reply to Hockley Parish Plan 2007. HAAP Issues 2009

Move to new industrial site near airport contravenes PPS4:

- EC7.3C "out of centre sites, with preference given to sites...well served by choice of...transport and...close to centre and...high likelihood of forming links with centre". There is no current public transport and links with centres is unlikely".

- EC 7.5.1 "whether the site is or will be accessible and well served by choice of transport, public transport, walking and cycling, as well as by car...". Remote location, narrow busy B1013 makes the site unsuitable for access by cycle or on foot.

It also contravenes PPS1 (27vii)... "reduce need to travel, encourage accessible public transport provision to secure more sustainable patterns of transport...Planning should actively manage patterns of urban growth to make fullest use of public transport and focus development in existing centres, near to major public transport interchanges". Core Strategy undermines its own policy Transport and Highways policy T1 and is unsound.

Although shown on accompanying drawing in earlier versions, there was no prior textual mention of Foundry industrial estate (next to Eldon Way) for redevelopment until current CS 2009 Submission. This was stated to be a typing error, but does not inspire confidence in reliability of drafting.

Revise both 2009 Core Strategy and 2009 HAAP Issues/options

Chapter 12: Retail/Town centres

The Core Strategy misrepresents findings of the Retail and Leisure Study 2008.

Para.12.38 The Core Strategy states (para.12.38) "The Retail & Leisure Study indicates Hockley has great potential. Hockley has been identified as having a need for additional convenience floorspace."

Whereas the R&LS actually states:

1) (10.26) "the scale of need does not lend itself to a foodstore capable of retaining a significant proportion of main food shopping expenditure".

2) (10.28) "There is no immediate capacity for additional floorspace".

3) (10.29) "we recommend focus be maintained on developing Hockley's existing strengths, rather than retail expansion"

4) 10.31 "the current nature of Hockley does not lend itself to classification as a 'town centre' as defined by PPS6. Moreover, we have identified that it has a very small catchment population. Accordingly, the council may wish to consider reclassifying Hockley from a town centre to a district centre".

Defer whole of proposals for Hockley town centre to Hockley Area Action Plan.

The Council will work with landowners and its partners to deliver the HAAP.

Remove threat of compulsory purchase orders.

Core Strategy Submission Document

O - 16716 - 7834 - Policy CLT1 - Planning Obligations and Standard Charges - i

16716 Object

CHAPTER 9 Policy CLT1 - Planning Obligations and Standard Charges

One doesn't perceive impartiality when the Planning Director replies to local HAAP survey with "The affluent people of Hockley are entitled to famous name shops".

Chapter 5: Character of Place and Local Lists

Para.5.4 "Rochford district has unique character..stems from traditional buildings..still dominate towns and villages".

Para.5.17 "Council believes many buildings..are of local distinctiveness..part of..cherished local scene".

This only applies to favoured places: Rochford, Rayleigh, greenbelt villages. Many Hockley conservable items have been systemically removed for supposedly lucrative development in face of widespread protect. This is for supposed need for housing. In fact heritage items have been replaced by dwellings most cannot afford, and/or are hard to sell due to unsuitability of massing and siting. Many other homes are jeopardised by this practice.

HAAP issues 2009. Core Strategy 2006, 2007,2008, SCI.2006

Fewer 'vested interests', more even handedness. No more pressing people out of businesses, homes for expediency.

A CPRE Fieldwork issue extolled Local Lists, citing refusal of 16 flats to replace character house, not on local list. Inspector said house, facade made a contribution to area character, even if English heritage decided it didn't warrant listing. Council worked to get the house grade listed and even made adjacent area conservation one.

Hockley had one such on a "significant site" faced with 13 flats. Ward Member omitted house from refusal proposal, so house could be demolished. RDC dropped Local List ahead of appeal: "Government frowned on such Lists" (Other LAs, unaware of supposed directive retained theirs. After demolition RDC restored Local Lists, saying Government now support them. When Inspector queried the complaint, the then policy officer said "just politics, lot of local interest, nothing of character in the area[!]. (A dozen such items had been removed). Some "distinctive" Hockley buildings are still condemned (in Greensward Lane., others threatened (Spa Road). Whereas a modest hue and cry in Rayleigh will usually result in a building being saved.

Conclusion

Core Strategy Submission DPD is basically unsound in many respects

Incomplete information. Amongst others, it refers to Hockley AAP, the first stage of which is complete, but not other three. Rochford AAP first stage has been published in arrears of Core Strategy Submission. Rayleigh AAP is still awaited. Precise housing sites are absent, as Urban Capacity Study 2007 has been superseded by Strategic Housing Land Availability Assessment, not yet published. Traders, residents, are thus responding to Core Strategy Submission with incomplete information.

Lack of community involvement. Chapter 1, Introduction, para. 1.11 "Community involvement is an essential part of the plan making process".

In Statement of Community Involvement 2006 Rochford RDC "recognises need to enable people to have their voices heard".

Re Public Meetings: "Consideration will be had to timing and venue to ensure meeting is as accessible as possible".

Take Hockley Area Action Plan as an example of the opposite of all this:- Presentation of document was at Hullbridge, 7.30pm. It was also discussed with JAAP at Rochford Freight House (for traders only) at 7am, without publicity. Excuse made: HAAP on RDC website, which none will seek unless knowing it is there. Rochford District Matters newsheet had minute articles on p.3, half way through consultation period. Another excuse: a 2nd presentation by Hockley Residents Association with planning officer present: only because of complaints, and it is not the HRA's responsibility to RDC's job. Due to unavoidable haste of calling meeting, few knew and only 50 were present.

In Core Strategy Submission Hockley Parish Plan has been ignored. Proposals also ignore 95% rejection rate response to HAAP 2009, which included proposals for Eldon Way employment site.

Unfettered right of developers to carry on as if Core Strategy didn't exist. In PPS 12, Ch.4.6 states: "Core Strategies should be flexible and able to show how they handle contingencies". Several large planning applications have been submitted proposing developments outside the Core Strategy which does not indicate how such applications will be handled and does not comply with PPS 12.

Where are we? Finally, at Chapter 1, Introduction, para. 1.24: "the Core Strategy will have to be reviewed in the event of a new Local Area Agreement, post-2011, setting different priorities". So what purpose does all this work serve? So we have hardly finished this exercise, before it all starts again?

Summary:

Policy T3, CLT1 Appendix CLT1 Public transport RDC admits this is in the private sector. In Hockley, operator has cut No7 service to 1 per hour from Ashingdon Schools, claiming it is unviable beyond. This is unlikely to change as Hockley is car dependant. No8 bus through Hawkwell is cut to 1 per hour to Rayleigh, for same reason as No7. Proposed

Agent: N/A

Hockley Under Threat
None provided

Full Text:

Ch. 4 Housing; Ch.10 Transport, Highways; Ch.11 Economic Development; Ch.12 Retail/town centres; Ch.5 Character of place & Local Lists

Chapter 4: Housing

Para 4.8 States sustainability underlines any decisions on housing location, primarily: current and future deliverability of infrastructure, eg roads, services, public transport, health.

Policy H1, Para.4.14 Some employment sites are considered more suitable for other uses (eg housing) including Eldon Way/Foundry, Hockley. This is all open to question.

Hockley-re Eldon Way/Foundry

In CS Preferred Options 2008 policy H2

N.E.Hockley was discarded as a housing option - whilst close to centre, station, "impact on highway network from traffic heading through Hockley...along Ashingdon Road..renders location unviable". Clearly the same principle applied to Eldon Way/Foundry for the same reasons.

Need to be logical and even-handed in proposals

June 2009 issue C S Submission issue says Eldon Way will be used for housing, whereas Sept.2009 issue says "alternative uses, including residential.." to be decided by HAAP (Issues consultation done, Pref.Options issue awaited, but judging from JAAP Pref.Options decision - namely biggest option chosen against overriding opposition, it will be housing).

Policy H1, T1 Proposals for moving employment to out of town locations, at either end of the district, with no existing public transport links, are contrary to government policy PPG14 & PPS1. it also contravenes the Core Strategy's stated aims of reducing carbon emissions; reliance on car transport and providing "an integrated network of cycle paths",

The Core Strategy also contravenes its own policy T1 and is unsound.

Health services GP surgeries are full and a PCT health centre will not occur in the foreseeable economic climate.

Ch.10: Highways and Transport

Policy T1, T2 RDC proposes working with ECC Highways, developers, but admits it has no authority, responsibility here. RDC will seek developer contributions, but this is neither detailed nor costed in CS Submission nor HAAP, and contravenes PPS 12.3 para.4.93 which states "The infrastructure planning process should identify as far as possible infrastructure needs and costs". Idea of paying for road & transport improvements through Standard Charges is unproven and unsound.

Establish like motorways with wholesale demolition.

In neither CS Submission nor HAAP is there any highways improvement, except idea to replace Spa roundabout with traffic lights and 1 way system up Southend Road and Hockley Rise.

RDC are proposing to scatter housing across the district in around 12 or sites but no detailed consideration has been given to the implications for highways across the District. Many roads across the District are at or near capacity but no modelling has been undertaken to determine the impacts.

It is clear that (i) the combined impact of scattering houses across the District and (ii) relocating Eldon Way/Foundry Industrial Estates with no public transport services will exacerbate existing problems. It is clear that the extent of improvements required is both unknown and not funded and the proposal is unsound.

Para.10.5

Policy T3, CLT1 Appendix CLT1

T1 & T2 "...highway improvements serving new developments..in a timely manner..ensuring developments delivered alongside necessary infrastructure".

These improvements cannot possibly be delivered. It should be realised: B1013 (Southend Rd), Rectory Road Hawkwell, Ashingdon, West Rochford - all in area proposed for large new developments are former winding, narrow country roads, tarmacked over for motorised traffic. Large housing increments are unsustainable off these roads, which

Core Strategy Submission Document

16749 Object

CHAPTER 9 Policy CLT1 - Planning Obligations and Standard Charges

cannot be altered without much destruction.

Public transport RDC admits this is in the private sector. In Hockley, operator has cut No 7 service to one per hour from Ashingdon Schools, claiming it is unviable beyond. This is unlikely to change as Hockley is car dependant. No 8 bus through Hawkwell is cut to one per hour to Rayleigh, for same reason as No 7. Proposed planning agreements with developers can't run: e.g., a community centre or classroom given by a developer remains once he has moved on - how can that apply for an on-going bus service?

Ch.11 Economic development

Policy ED3 Core Strategy preferred Options 2008 hinted at possible housing in Eldon Way site. June 2009 Submission version, without consultation, said Eldon Way would be housing (map included Foundry, not the text). September 2009 Submission said redevelopment would be in HAAP (which apart from the Issues/Options version, is unfinished. Judging from results of JAAP Preferred Options where biggest option is chosen, though most respondents were against it, site will be housing, without consultation.

Para.1.25 Para.11.32

Policy ED4 T1 & T2 Note CH.1 Introduction to CS Submission 2009 para.1.25 East England Plan requires 3000 additional jobs, presumably to 2021. Revised Southend Airport is expected to drive Economic development. But at para. 11.32 Eldon Way-Foundry estate is planned to be more suitably utilized. "...alternative land will be required to accommodated employment uses so displaced" - ie jobs sent to eg new site near Southend Airport - not new jobs.

Remove compulsory relocation

Policy states Council will allocate 18ha of land to make up for de-allocations in ED3 - that proves point above.

Proposals for moving employment to out of town locations with no existing transport links are contrary to government policies PPG4, PPS1 and PPS4 and Core Strategy Policy T1.

Evidence Base is ignored by contravening Hockley Parish Plan 2007 and ignoring residents' views on HAAP Issues/Options. Next stage of HAAP Preferred Options is pre-empted and rendered irrelevant.

Core Strategy plans to relocate Eldon Way Foundry estate to Greenfield site with no nearby bus or railway. RDC plans to upgrade the nearest road to dual carriageway, though the connecting B1013 (through Hockley) will stay single, said by ECC Highways statistics to be 72% capacity. Airport bosses and council cannot suggest there will be no traffic growth from JAAP and new industrial site.

Revise both 2009 Core Strategy and 2009 HAAP Issues/options

Move to new industrial site near airport contravenes PPS4:

EC7.3C "out of centre sites, with preference given to sites..well served by choice of..transport and..close to centre and..high likelihood of forming links with centre". There is no current public transport and links with centres is unlikely".

EC 7.5.1 "whether the site is or will be accessible and well served by choice of transport, public transport, walking and cycling, as well as by car..". Remote location, narrow busy B1013 makes the site unsuitable for access by cycle or on foot.

It also contravenes PPS1 (27vii).. "reduce need to travel, encourage accessible public transport provision to secure more sustainable patterns of transport..Planning should actively manage patterns of urban growth to make fullest use of public transport and focus development in existing centres, near to major public transport interchanges". Core Strategy undermines its own policy Transport and Highways policy T1 and is unsound.

H1 & RTC6 Although shown on accompanying drawing in earlier versions, there was no prior textual mention of Foundry industrial estate (next to Eldon Way) for redevelopment until current CS 2009 Submission. In recent amendment to the CS this was stated to be due to a typing error!

Chapter 12: Retail/Town centres

The Core Strategy misrepresents findings of the Retail and Leisure Study 2008.

Defer whole of proposals for Hockley town centre to Hockley Area Action Plan.

Para.12.38 H1 & RTC6 The Core Strategy states (para.12.38) "The Retail & Leisure Study indicates Hockley has great potential. Hockley has been identified as having a need for additional convenience floorspace."

Whereas the R&LS actually states:

1) (10.26) "the scale of need does not lend itself to a foodstore capable of retaining a significant proportion of main food

Core Strategy Submission Document

16749 Object

CHAPTER 9 Policy CLT1 - Planning Obligations and Standard Charges

shopping expenditure".

2) (10.28) "There is no immediate capacity for additional floorspace".

3) (10.29) "we recommend focus be maintained on developing Hockley's existing strengths, rather than retail expansion"

4) 10.31 "the current nature of Hockley does not lend itself to classification as a 'town centre' as defined by PPS6. Moreover, we have identified that it has a very small catchment population. Accordingly, the council may wish to consider reclassifying Hockley from a town centre to a district centre".

Remove threat of compulsory purchase orders.

The Council will work with landowners and its partners to deliver the HAAP.

Chapter 5: Character of Place and Local Lists

Para.5.4 "Rochford district has unique character..stems from traditional buildings..still dominate towns and villages".

Para.5.17 "Council believes many buildings..are of local distinctiveness..part of..cherished local scene".

This only appears to apply to certain places: Rochford, Rayleigh, greenbelt villages. Many Hockley conservable items have been systemically removed for supposedly lucrative development in face of widespread protect. This is for supposed need for housing. In fact heritage items have been replaced by dwellings most cannot afford, and/or are hard to sell due to unsuitability of massing and siting. Many other homes are jeopardised by this practice.

Conclusion

Core Strategy Submission DPD is basically unsound in many respects:

Incomplete information. Amongst others, it refers to Hockley AAP, the first stage of which is complete, but not other three. Rochford AAP first stage has been published in arrears of Core Strategy Submission. Rayleigh AAP is still awaited. Precise housing sites are absent, as Urban Capacity Study 2007 has been superseded by Strategic Housing Land Availability Assessment, not yet published. Traders, residents, are thus responding to Core Strategy Submission with incomplete information.

Lack of community involvement. Chapter 1, Introduction, para. 1.11 "Community involvement is an essential part of the plan making process". In Statement of Community Involvement 2006 Rochford RDC "recognises need to enable people..to have their voices heard".

Re Public Meetings: "Consideration will be had to timing and venue to ensure meeting is as accessible as possible".

Hockley Area Action Plan as an example of the opposite of all this:- Presentation of document was at Hullbridge, 7.30 p.m. It was also discussed with JAAP at Rochford Freight House (for traders only) at 7 a.m., without publicity. Excuse made: HAAP on RDC website, which none will seek unless knowing it is there. Rochford District Matters newssheet had minute articles on p.3, half way through consultation period. Another excuse: a second presentation by Hockley Residents Association with planning officer present: only because of complaints, and it is not the HRA's responsibility to RDC's job. Due to unavoidable haste of calling meeting, few knew and only 50 were present.

In Core Strategy Submission Hockley Parish Plan has been ignored. Proposals also ignore 95% rejection rate response to HAAP 2009, which included proposals for Eldon Way employment site.

Unfettered right of developers to carry on as if Core Strategy didn't exist. In PPS 12, Ch.4.6 states: "Core Strategies should be flexible and able to show how they handle contingencies". Several large planning applications have been submitted proposing developments outside the Core Strategy which does not indicate how such applications will be handled and does not comply with PPS 12.

Where are we? Finally, at Chapter 1, Introduction, para. 1.24: "the Core Strategy will have to be reviewed in the event of a new Local Area Agreement, post-2011, setting different priorities". So what purpose does all this work serve? So we have hardly finished this exercise, before it all starts again?

Summary:

Policy T3 CLT1 Appendix CLT1 T1 & T2

Public transport RDC admits this is in the private sector. In Hockley, operator has cut No 7 service to one per hour from Ashingdon Schools, claiming it is unviable beyond. This is unlikely to change as Hockley is car dependant. No 8 bus through Hawkwell is cut to one per hour to Rayleigh, for same reason as No 7. Proposed planning agreements with developers can't run: e.g., a community centre or classroom given by a developer remains once he has moved on - how can that apply for an on-going bus service?

1.0 Instruction and Introduction

1.1 Charles Planning Associates Limited (Chartered Town Planners) is Instructed by Swan Hill Homes Limited (Swan Hill) to prepare and submit representations on their behalf in respect of the Rochford District Local Development Framework: Core Strategy Submission (September 2009) Development Plan Document.

1.2 The comments refer to the relevant sections and policy designations in the Submission document, as appropriate.

1.3 The comments set out in this submission are intended to assist the District Council in taking forward its Local Development Framework. It is our intention to continue to be involved in the LDF preparation process and we look forward to the opportunity to comment further at the Examination to the Core Strategy.

1.4 If you have any queries regarding the content of this submission then please do not hesitate to contact:

Peter Kneen BSc (Hons) MSc MRTPI
Planner

2.0 Housing:

Policy H1 - The Efficient Use of Land for Housing

2.1 Swan Hill recognises the importance of seeking to concentrate new developments mainly in the existing urban areas, on previously developed land where possible, particularly in view of the Government seeking to ensure 60% of all such new developments are on previously development land (PDL).

2.2 However, given the character of the District, and the strategic housing requirement of the East of England Plan, Swan Hill supports the approach that the Council must also make provision for additional development on the edge of existing settlements on greenfield sites, particularly in the most sustainable locations. As such, Swan Hill supports that where feasible, the redevelopment of existing employment sites for residential/employment purposes can make a contribution towards the strategic housing requirement, provided that sufficient additional employment land is brought forward to ensure the stability of employment levels in the District, and to ensure employment growth meets the East of England Plan requirements.

2.3 Swan Hill considers that Policy H1 should include consideration that new extensions to existing settlements have regard to their potential impact on the wider characteristics and openness objectives of the Green Belt.

Policy H2 - Extensions to Residential Envelopes and Phasing

2.4 Swan Hill generally supports the approach taken by the Council in this policy. As set out above, Swan Hill consider the Council's acknowledgment that housing requirements should be met through the allocation of land on the edge of the existing settlements is the most suitable way forward to meeting the Council's strategic housing requirement and complies with the advice in PPS3.

2.5 The need for suitable greenfield urban extensions represents the best way forward for the Council to meet its strategic housing requirement, as set out in the East of England Plan. Swan Hill supports the recognition that the potential supply of alternative previously developed sites is limited, without detrimentally affecting the character of the District, and therefore the best way forward is the use of sustainable greenfield urban extensions to the existing settlements of the District.

2.6 However, Swan Hill consider that a fundamental consideration that the District Council should consider relates to the potential impact of the urban extensions on the Green Belt policy has been somewhat overlooked. The wider sustainability credentials of the settlements of the District should only be one of many key considerations for determining the level of expansion. In view of the proximity of Southend-on-Sea to all the main settlements of the District, and the influence this has on the likely location many people would travel for employment and leisure, sustainability of many of the settlements is not a key overarching factor, and greater weight should be placed on the potential impact on the openness of the Green Belt, as this cannot be remedied if development occurs in the wrong location.

2.7 As such, Swan Hill considers that determining the location of growth for the main settlements should be to identify

Core Strategy Submission Document

S - 16885 - 8329 - Policy CLT1 - Planning Obligations and Standard Charges - None

16885 Support

CHAPTER 9 Policy CLT1 - Planning Obligations and Standard Charges

those locations where the impact on the wider setting of the Green Belt can be minimised. Further justification for those general locations chosen should be identified in Policy H2. In this regard, Swan Hill has serious concerns regarding the removal of Land South West of Great Wakering as a viable option for the growth of the settlement. The development of this area of Great Wakering, in addition to the potential redevelopment of the Star Lane Industrial Estate could provide a more comprehensive development, whilst ensuring that the wider openness of the Green Belt is maintained. Land South West of Great Wakering is significantly better placed to limit the impact on the wider Green Belt than Land West of Great Wakering, and could contribute to the provision of an important amenity and wildlife site for the local community.

2.8 In addition, Swan Hill consider that the Council now has no reserve provision in the event that any of the existing employment sites set out in Policy H1 fail to come forward for development within the envisaged timescale. Further, Land West of Great Wakering has not been identified in the SHLAA as a deliverable site to help meet the strategic housing requirement, contrary to the requirement set out in PPS3.

2.9 As such, Swan Hill would support the provision of suitable sites which could be safeguarded for future development in the likelihood of a shortfall in supply.

Policy H3 - Extensions to Residential Envelopes Post 2021

2.10 As set out above, Swan Hill supports the overall approach the Council has taken towards the provision of sustainable urban extensions as a suitable means of meeting their strategic housing requirement. However, as set out for Policy H2 above, Swan Hill has serious concerns regarding the removal of several proposed sites set out in the October 2008 Preferred Options Core Strategy, without any guarantee of the ability to deliver those sites set out in Policy H1.

2.11 As also considered above, the inclusion of West of Great Wakering for 250 dwellings should not be included ahead of South West of Great Wakering, in view of the fact that the site is not identified in the SHLAA as available, suitable and achievable as required by PPS3, and thus is not supported by a robust and creditable evidence base for its inclusion as a strategic site for development.

2.12 Whilst Swan Hill acknowledge that alterations to Policy H1 has resulted in the removal of some locations for growth in Policy H3 (as set out in the Sustainability Appraisal), Swan Hill does not consider that the most appropriate locations have been chosen.

2.13 In addition to the matters raised above, the use of West of Great Wakering would also result in the loss of valuable agricultural land, which clearly in a Green Belt location, should be less suitable for development than other sites, such as South West of Great Wakering, which would have limited impact on the wider Green Belt policy, and not result in the loss of valuable agricultural land.

2.14 Finally, in respect of Policies H1, H2 and H3, all of the above comments are based on our interpretation of the Submission Version Core Strategy when compared to the October 2008 Version of the Core Strategy. Without the ability to undertake a detailed assessment of the Council's SHLAA, it is not possible to clarify the proposed Core Strategy position regarding the proposed direction of growth proposed for the settlements in the District. As such, Swan Hill reserves the right to make additional representations regarding the proposed Policies H1, H2 and H3 following the publication of the SHLAA in due course.

Policy H4 - Affordable Housing

2.15 In general terms, Swan Hill supports the approach taken by the Council towards the provision of affordable housing for new residential developments. The Policy accords with the advice of National Policy and is therefore considered sound by Swan Hill.

Policy H5 - Dwelling Types

2.16 Swan Hill supports the policy provision of H5, and considers that the approach taken by the Council for this policy represents a suitably flexible alternative to stipulating percentages of dwelling mix, sought by some local authorities. The Policy accords with the advice of National Policy and is therefore considered sound by Swan Hill.

Policy H6 - Lifetime Homes

2.17 In regard to this policy, Swan Hill objects to the Council's policy where all new dwellings should be provided to the Lifetime Homes Standard. Whilst it is acknowledged that the UK has an aging population, Swan Hill considers that seeking to provide Lifetime Homes on all sites is considered to be overly onerous for proposed developers, particularly when considering the requirement for all car parking spaces to be suitable for disabled users, which could result in more schemes becoming unviable. Therefore, the provision of a percentage of Lifetime Homes should be considered through negotiations with the Council at the planning application stage, and should be determined on a case-by-case basis.

3.0 Character of Place: Policy CP1 - Design

Core Strategy Submission Document

S - 16885 - 8329 - Policy CLT1 - Planning Obligations and Standard Charges - None

16885 Support

CHAPTER 9 Policy CLT1 - Planning Obligations and Standard Charges

3.1 The Town and Country Planning (General Development Procedure) Order 1995 (As Amended) makes the submission of a Design and Access Statement for most types of planning applications a Statutory requirement, and as such, the provision of a Design Brief represents a pre-requisite of all major planning applications.

3.2 Policy CP1 seeks to ensure the provision of good, high quality developments that reflect local characteristics and distinctiveness, this ideology is supported by Swan Hill.

4.0 The Green Belt:
Policy GB1 - Green Belt Protection

4.1 Following the amendments to the wording of the Policy since the October 2008 Preferred Options Core Strategy, Swan Hill is now generally supportive of Policy GB1 and its supporting text. However, as expressed above, it is important that where alterations to the Green Belt boundary occur as a result of the extension of the settlements to meet the strategic housing requirement, both the minimal amount of land is taken and where that land is taken for development, it represents the best available land which has a minimal impact of the wider openness characteristic of the Green Belt.

5.0 Environmental Issues:
Policy ENV3 - Flood Risk

5.1 Swan Hill generally supports the approach set out in Policy ENV3 regarding ensuring development accords with the sequential test of PPS25. The Policy accords with the advice of National Policy and is therefore considered sound by Swan Hill.

Policy ENV4 - Sustainable Drainage Systems (SUDS)

5.2 Following the revisions from the October 2008 Preferred Options Core Strategy, Swan Hill now generally supports the approach set out in Policy ENV4. The Policy accords with the advice of National Policy and is therefore considered sound by Swan Hill.

Policy ENV8 - On-site Renewable and Low Carbon Energy Generation

5.3 Whilst Swan Hill recognises the importance of reducing carbon emissions, particularly in new housing developments, and the role this can play in reducing the nations overall Greenhouse emissions. As such Swan Hill is generally supportive of Policy ENV8. It is noted that Policy ENG1 of the East of England Plan sets out a threshold of developments comprising 10 or more dwellings. Swan Hill consider it important for the District Council to justify the reduction in the threshold level.

5.4 Further, no assessment of Policy ENV8 has been set out in the Sustainability Appraisal which justifies the change in threshold from that of Policy ENG1 of the RSS.

Policy ENV9 - Code for Sustainable Homes

5.5 Following the revisions from the October 2008 Preferred Options Core Strategy, Swan Hill now generally supports the approach set out in Policy ENV9. The Policy accords with the advice of National Policy and is therefore considered sound by Swan Hill.

6.0 Community Infrastructure, Leisure and Tourism:
Policy CLT1 - Planning Obligations and Standard Charges

6.1 Swan Hill generally supports the overall approach the Council has taken in Policy CLT1. It is considered Policy CLT1 sets out a degree of flexibility to ensure that all sites are considered on a site-by-site basis, assessing the individual merits of each planning application, in order to ensure the levels of contributions applicable meet the five tests of Circular 05/05. The Policy accords with the advice of National Policy and is therefore considered sound by Swan Hill.

Policies CLT5 - Open Space;
CLT7 - Play Space;
CLT8 - Youth Facilities; and,
CLT10 - Playing Pitches

6.2 Swan Hill supports the need for new residential developments to incorporate a degree of new publicly accessible open space, children's play space, youth facilities and playing pitches, and as such, generally supports the policy approaches taken by the Council.

6.3 However, it is important that whilst the Council may seek to undertake an assessment of providing standard charges for new development, which, as set out in Policy CLT1, this should be based on thorough public consultation and consideration and sound justification. Swan Hill consider that within the provision of a standard charge, it is important that such provision allows for a degree of flexibility to ensure that each site is assessed individually and on its own merits. This is particularly important for those sites close to existing open spaces and facilities. As such, the levels of

Core Strategy Submission Document

S - 16885 - 8329 - Policy CLT1 - Planning Obligations and Standard Charges - None

16885 Support

CHAPTER 9 Policy CLT1 - Planning Obligations and Standard Charges

open space and recreation facilities required in the 'standard charge' should be based on an up-to-date PPG17 Open Space assessment, which should be used to form a key consideration in the levels of provision likely to be required in the standard charge system proposed.

7.0 Transport: Policy T1 - Highways

7.1 Swan Hill supports the overall objectives set out in Policy T1 requiring developments to be located and designed to reduce the reliance on the private car and to meet the infrastructure needs generated by development or seek to help achieve these needs is acceptable in principle.

7.2 Swan Hill recognises the importance of providing sufficient infrastructure provision to meet the requirements of development, and that where developments have insufficient consideration of impact on existing infrastructure, they should be considered unacceptable and contrary to National policy guidance. However, Swan Hill considers it important to emphasise that the developer's role should not be seen as a means to meet existing shortfalls in provision.

Policy T3 - Public Transport

7.3 Swan Hill is generally supportive of the policy approach set out in T3, however, as set out in paragraph 7.2 above, it is important that the District Council do not consider that it is the developer's responsibility to resolve existing shortfalls in provision of public transport, and any contribution towards additional public transportation provision should only be to mitigate against the additional level of demand likely from the development proposed.

Policy T5 - Cycling and Walking

7.4 Swan Hill supports the general approach to this policy, as Swan Hill recognises the importance of promoting the use of alternatives to the private car. The policy provision acknowledges the need to ensure relevant contributions in the event of additional travel demands generated by individual developments, whilst also setting out additional aspirations for the cycle network in the District.

7.5 As such, Swan Hill considers this policy accords with the advice of National Policy and is therefore considered sound by Swan Hill.

Policy T8 - Parking Standards

7.6 The Council has recently (January 2007) adopted SPD on the requirements for parking standards, and as such, Swan Hill generally supports the policy approach chosen by the Council. As set out in the SPD, whilst Swan Hill generally supports the approach taken by the District Council towards setting residential parking standards, in that the Council has recognised that in the suburban areas, even with some access to public transport, the majority of residents will rely on the use of private cars. However, Swan Hill has concerns over the failure of the District Council to comply with the provisions of PPG13: Transport (2001) which sets out that Local Planning Authorities should not set minimum standards for car parking. Whilst it is acknowledged that PPS3 sets out provision for the consideration of local circumstances, it is considered that the Council has not justified this deviation from PPG13's maximum standard.

7.7 Whilst it is acknowledged that such justification may become apparent through the work currently being undertaken by Essex County Council, until such time, the District Council should only seek to apply the maximum standards indicated in PPG13. However, Swan Hill recommends that the District Council make provisions in the wording of the Policy to allow for changes in the event that future policy on car parking standards need to reflect the County standard, following the completion of the County Council review.

8.0 Economic Development: Policies ED3 - Existing Employment Land ED4 - Future Employment Allocations

8.1 In respect of Policies ED3 and ED4, Swan Hill notes that they have changed considerably since the October 2008 Preferred Options document, in that they are site specific regarding the location of the proposed redevelopment of existing employment sites. These four sites are also identified in Policy H1 - Efficient Use of Land, and in general, Swan Hill supports the approach to the redevelopment of these sites (where feasible) based on the assessments of the sites set out in this version of the Core Strategy.

8.2 However, Swan Hill has concerns that these policies might not be considered suitably sound given that insufficient opportunity has been allocated for consultation on their redevelopment. Without the SHLAA being publically available prior to the consultation on this Core Strategy, an insufficient evidence base has been provided to corroborate that these sites are neither suitable or deliverable to meet the test of soundness requirements.

Summary: Policy CLT1 - Planning Obligations and Standard Charges

6.1 Swan Hill generally supports the overall approach the Council has taken in Policy CLT1. It is considered Policy CLT1 sets out a degree of flexibility to ensure that all sites are considered on a site-by-site basis, assessing the

individual merits of each planning application, in order to ensure the levels of contributions applicable meet the five tests of Circular 05/05. The Policy accords with the advice of National Policy and is therefore considered sound by Swan Hill.

Full Text: Local Development Framework

Representations on the Core Strategy
Submission Document, November 2009
On behalf of Barratts Eastern Counties

Introduction

The requirements of Core Strategies are enshrined in the 2004 Planning and Compensation Act, the Town & Country Planning (Local Development) England (Regulations) 2004 and the 2008 policy guidance in PPS12. The requirements of Coe Strategies are clear. And they are legal requirements. The Core Strategy must comply with the Local Development Scheme, Statement of Community Involvement and the Regulations. The Core Strategy must be subject to a sustainability appraisal, have regard to national guidance, conform generally with the Regional Spatial Strategy and have regard to any Sustainable Community Strategy. A Core strategy must be sound - justified, effective and consistent with national policy. The following representations therefore focus on these legal requirements.

HOUSING

Paragraph 4.6 - Evidence Base

To meet the soundness test Submission Core Strategies (SCS) must be justified, that is to say it must be founded on robust and credible evidence base and comprise the most appropriate strategy when considered against reasonable alternatives. The housing strategy in as far as it identifies a need for Green belt sites is sound, however, there are other elements which are unsound.

Paragraph 4.6 notes that the Strategic Housing Land Availability Assessment (SHLAA) has examined the supply of housing. It is presumed that the Table at paragraph 4.6 is the outcome of this examination. Whilst the SHLAA has some legitimacy in that it identifies various sites that are apparently available, we are concerned that because the SHLAA was only published in November 2009 it post dates the SCS. This implies that the SCS is driving the SHLAA exercise rather than the other way round. Whilst this may have no real practical effect on the outcome of the SCS and the identified need for Green Belt sites, the Inspector will be mindful of the advice in paragraphs 33 and 54 of PPS3 that SCS draw on the evidence in SHLAA. It may be that the SCS should explain how the evidence base has been used to justify the strategy.

PPS12 explains at paragraph 4.37 that Core Strategies are based on thorough evidence. Since the SHLAA has only recently been published it is considered that the SCS is unsound as it is not justifiable. This, together with other comments on the SCS, indicates that the process should be delayed to ensure that a more robust document is placed in front of the EiP Inspector.

Table at Paragraph 4.6 - Evidence base

From our review of the available evidence it would appear that the housing land supply is insufficient and that Green Belt release are required. From the wider strategy being promoted we note that some of the sites that the District Council consider to be 'appropriate' are likely to relate to existing employment areas. As set out elsewhere in our representations, we maintain severe reservations that the redevelopment of existing employment sites for alternative uses and particularly the Eldon Way Industrial Estate is unsustainable. We will make reference to the effectiveness of this strategy in relation to sustainability, whether it is justified in the context of National Policy and the deliverability of such a strategy elsewhere.

In particular, paragraph 11.32 of the SCS refers to existing employment land and sites within the UCS. It does not refer the SHLAA and as such it appears that an evidence base to support the re-use of employment land for residential is not reported in the SCS.

Having reviewed the 2008 Annual Monitoring Report, as we did when commenting on the 2008 Preferred Options Core Strategy, we maintain severe doubts as to the appropriateness of some of the previously developed sites identified as potential housing sites and their expected housing yield. Whilst we cannot at this stage ascertain whether the SHLAA

Core Strategy Submission Document

16929 Support

CHAPTER 9 Policy CLT1 - Planning Obligations and Standard Charges

sites referred to in this table correlate with the Annual Monitoring Report and indeed the 2007 Urban Capacity Study, it is our view that there will be some commonality and so the reliance on these sites is likely to be at odds with Government Policy. We shall elaborate on this objection in relation to the specific housing policy below.

We note that the last two rows in the Table at paragraph 4.6 set out figures with and without Green Belt releases. The text to this section of the Core Strategy should, for reasons of clarity, explain that Green belt review will be necessary in order to deliver the required housing.

Paragraph 4.9

The table on page 40, which sets out the settlement tiers, is supported. Rayleigh, Rochford/Ashingdon, Hockley/Hawkwell are clearly the largest settlements in the District and they benefit from good employment, housing, leisure, community and public transport provision. These settlements are the most sustainable ones with the greatest mix of uses. Consequently, it is sensible that the Core Strategy identifies these as top tier settlements and is able to target them with growth accordingly. This component of the strategy is justified by reference to sustainability data and is effective, since targeting development at these locations will ensure a more sustainable pattern of development.

Paragraph 4.14

We maintain that the strategy for redeveloping the Eldon Way Industrial Estate for housing and other alternative uses to employment is unsound. It is neither justified nor effective. The Industrial Land Availability Study 2006 sets out on page 7 strategic objectives. The 3rd objective seeks to Support town centre and industrial estate enhancement initiatives aimed at improving the environment ensuring the area is economically prosperous and competitive. Clearly the strategy as currently drafted envisages major changes to existing industrial estates, including alternative uses. This strategy is not consistent with other strategies and evidence based studies and so cannot be justified in the context of the tests set out in PPS12. It is also an ineffective strategy since the new employment locations that would free up the Eldon Way site for redevelopment relies on transport infrastructure that has no certainty of being delivered. Principally, the erosion of employment uses at Eldon Way could make the settlement of Hockley/Hawkwell less sustainable and thus conflict with the tiered approach on page 40, paragraph 4.9.

Policy H1

Prioritising the use of previously developed land ("pdl") is supported in principle. It is a justified strategy in the context of PPS3 and effective as sequential choices can be made by implementing the policy. However, the District Council is also promoting a strategy which seeks the redevelopment of existing employment locations to alternative uses and by consequence is identifying green field sites for new employment development elsewhere (Policy ED4 refers). This 'land swapping' is not considered consistent with PPS3, nor is it considered to be justified or effective in delivering the desired strategy. This is particularly the case as most of the existing employment sites are occupied and therefore unavailable for redevelopment. In addition, the new Greenfield sites are in an arguably less sustainable locations away from the top tier settlements identified on page 40 of the Submission Core Strategy. Clearly this element of the strategy is inconsistent with the wider strategy.

The Industrial Land Availability Study 2006 is included as an evidence base by the District Council. It includes an introductory section, which explains that the authority wishes to make Rochford the place of choice for new business. It includes several strategic objectives on page 7 including "Support town centre and industrial estate enhancement initiatives aimed at improving the environment ensuring the area is economically prosperous and competitive." It reviews existing employment areas and identifies vacant land, including land available from allocations. It does not include any assessment of new sites or potential opportunities for new sites that might have been expected to feed into the Core Strategy. The strategy for identifying Green Belt site employment allocation does not appear to be based on any evidence in this document and in that context cannot be justified. The strategy being promoted potentially conflicts with Government policy in PPG13, PPG2 and emerging PPS4.

The Employment Land Study 2008 is a much later document. It has a key recommendation on page ii "we recommend that Rochford District Council adopts strong policies to protect existing employment land." Furthermore under recommendations for existing sites on page iii-iv of that document it states "In our view, Hockley Trading Centre is a strategically well placed employment location. However, we recognise the ambitions of the Hockley Town Centre masterplan and that within this the Council should consider it to be allocated for other uses. However, we recommend that this reallocation happen only if provision is made within the masterplan for office use within Hockley Town Centre as part of a mixed use scheme." The view of the writers of this document is clear - the Eldon Way Industrial estate (Hockley Trading Centre) is a good employment site and that it is for other reasons that alternative uses are being considered and only then if office development is supported. This supports our representations that new future uses at the Eldon Way site should be employment dominated and that alternative uses should relate to the objectives of the Town Centre which is to enhance the shopping and leisure facilities. Residential is not an appropriate alternative.

This document recommends the use of land to the west of Rayleigh for employment and envisages Green belt release. However, the SCS does not explain through the evidence base why existing employment sites should be 'deallocated' and Green belt land unnecessarily used.

CHAPTER 9 Policy CLT1 - Planning Obligations and Standard Charges

In addition to these key issues we have some specific concerns. As a consequence we maintain an objection to the second paragraph of Policy H1. This policy states that the Council will seek the redevelopment of various industrial estates including Eldon Way. The Policy says that alternative uses will be sought (presumably alternative to the existing employment offer) and that new land will be allocated elsewhere. This policy statement, in relation to Eldon Way in particular, is unsound for a number of reasons:

The emerging Hockley Area Action Plan consulted upon in 2008 states that the Eldon Way Industrial Estate is strategically well placed. In a sense this statement underplays the true importance of this highly sustainable employment location and only major employment area in Hockley/Hawkwell. The employment area is adjacent to the railway station and located a short distance from the main bus routes that run along Spa Road. Some of the residential areas of the town are also within walking distance of this commercial area, thus providing a potential for sustainable travel by employees. The Eldon Way Industrial Estate is therefore right at the heart of the settlement of Hockley/Hawkwell and provides an opportunity to meet sustainable transport objectives by reducing the need to travel by car. Consequently, this employment area should be highlighted as a premier employment site in sustainability terms, both in the context of PPG13, PPG4 and PPS6. To encourage alternative uses as set out in Policy H1 implies the removal of the majority of employment based activity at Hockley/Hawkwell and this would be contrary to National policy, would not be the most appropriate strategy when considered against alternatives and is therefore unsound.

Whilst it is acknowledged that improvement to the Eldon Way Industrial Estate can and should take place, the extent to which the mix of employment uses should be altered in favour of alternative land uses requires careful consideration. It is our view that a mix of existing or indeed new employment land uses with some Town Centre type uses should dominate the Eldon Way site. A mix of employment types between offices, light industry and other high technology industries should be encouraged as this will provide many locational advantages to the firms that agglomerate together. The Council says that the existing uses on this site are harmful to amenity. However, the site has operated for many years without any significant issues and if renewal for B1 type uses are encouraged then the employment area can be maintained without harm to amenity. Renewal of the employment stock can help develop and improve trade, improve the sustainability of businesses as a whole and make for a more flexible labour market as skill levels are varied. A singularly different use altogether or a variety of uses which excludes employment could undermine the long term sustainability of the area and Town Centre. As such Policy H1 is not an effective strategy and should be amended to acknowledge the importance of Eldon Way and the need to renew the employment stock to ensure that the site maintains its important role as a employment site, albeit with some ancillary alternative use development where appropriate.

The 2008 Retail Study notes that Hockley Town Centre is not strong and there is trade leakage. Eldon Way Industrial Estate provides a customer base for existing town centre uses. Weekday spending within town centres is an important contributor to the viability of many retail and leisure businesses either through expenditure by employees during the lunchtime trade or expenditure by employers, on necessary goods and services. This relationship helps sustain the critical mass of a centre and provides a platform for new retail and leisure growth. It is important to have a balanced centre with a variety of uses. Policy H1, as currently drafted, implies the removal of employment related development and this is likely to harm the vitality and viability of Hockley Town Centre. The Council has presented no evidence to suggest that this is not the case. Importantly, the 2008 Retail Study explains that there is a need for additional retail and office space. In principle we would support additional office and other B1 type uses plus retail but employment uses should always dominate for the sustainability reasons given above. Retail and office development are likely to present a viable alternative to some of the more industrial type uses.

Consequently, we do not support the phrasing of the third paragraph of Policy H1 and maintain that the most appropriate strategy is to seek renewal of the employment stock with employment based uses and with some new retail development. Removal of employment land uses completely as currently implied-which was the approach adopted in the emerging Hockley Area Action Plan - is not a justifiable strategy.

One of the key tests of a Core Strategy is consistency between policies in the emerging Plan and this strikes at the heart of demonstrating an effective strategy. Policy H1 implies alternative uses to employment and the relocation of Eldon Way to a site identified under Policy ED4. However, Policy RTC6 sets out a suite of policy criteria for Hockley Town Centre which includes employment and commercial activities. In addition Policy ED3 seeks the protection of sustainable employment sites (Eldon Way) and notes that some reallocation of existing employment sites will include a proportion of employment. It notes that in the case of Eldon Way employment development will form a component. The policies appear at odds with one another. The third paragraph of Policy H1 should be deleted as the second paragraph is sufficient to set a strategic context for delivering new housing development. The employment policies and Hockley specific policies should be left to consider the type and quantum of land uses appropriate in the area. If the third paragraph of H1 is to be retained then it should tie in more with Policy RTC6 and in our view explain that employment uses should dominate any redevelopment proposals for the Eldon Way site and that retail and leisure uses should be a supporting proportion.

Implementation, Monitoring and Delivery - page 132 onwards

One of the key tests of soundness is that the Core Strategy should be effective - it should be able to deliver its strategy. The Implementation strategy set out at page 132 onwards of the Core Strategy does not explain how Policy H1, RTC6 and the strategy for redeveloping Eldon Way (Policy ED2 and ED3) will be delivered. The comment at Policy ED3 on

Core Strategy Submission Document

S - 16929 - 10009 - Policy CLT1 - Planning Obligations and Standard Charges - None

16929 Support

CHAPTER 9 Policy CLT1 - Planning Obligations and Standard Charges

page 161 identifies it as a potential risk and alludes to land assembly difficulties and the choices to be made by owner/occupiers. In order to deliver the strategy there should be a clear understanding as to whether the new land use values being promoted are sufficient to encourage relocation voluntarily. Secondly there is a need for more information to be gathered and presented to show that current occupiers and landowners are willing to relocate and the timescales likely for this. For example, do the building lease contracts enable early review or are there any break out clauses. There should be some commentary on whether the Council will engage in compulsory purchase orders to pursue their strategy should the 'encouragement' route fail. As currently drafted there is no clear path to deliver the strategy and the danger is that despite reallocation, the sites identified for redevelopment will not come forward in the plan period. In this regard, evidence to satisfy the test of soundness is not provided.

Policy H2 - General Locations

We support the strategy that new housing growth should be targeted at land South of Hawkwell. This area is suitably located to the urban area of Hockley/Hawkwell and to tie in with the settlement tiers on page 40 of the Submission Core Strategy the same terminology for settlement should be used. This ensures a consistency within the SCS. The choice of this location as a housing growth area is appropriate as it would not contribute to the coalescence of the urban area with Ashingdon (there is existing development between this identified housing area at Rectory Road and Ashingdon and moreover, Rectory Road can form a natural physical boundary for the new Green belt boundary. This area is also well located to the existing road network. Cherry Orchard Way has recently been improved and provides much better accessibility to the proposed housing growth area than any other location around Hockley/Hawkwell. The existing bus routes along Rectory Road also make this location sustainable and the additional housing proposed will help underpin the financial viability of bus routes in this area. Locally there are employment opportunities, including the small commercial estate off Main Road. The Eldon Way Industrial Estate adjacent to the Town Centre also provides the opportunity for employment locally. Extensive public open space, play pitches and built leisure facilities are located just to the north of this area and a community hall is located off Briar Close, nearby. The area to the south of Hockley/Hawkwell is close to local shops on the corner of Heycroft Road and Main Road and there are numerous footpath links between this area and the local community including links via Thorpe Road, Thorpe Close, Briar Close, Hawkwell Park and Park Gardens. The area therefore provides the opportunity to enhance existing links, including cycle links, and contribute towards community integration - more so than other sites on the south side of this settlement. The site is also in the control of one house builder and deliverable.

However, we find that the Policy is not fully consistent with national policy and furthermore needs to be reviewed in order to be justified and effective. We have concerns as to how the Green Belt review strategy set out at Policy H3 and in the Local Development Scheme integrates with this policy and feel that Green Belt review should be more explicit throughout the SCS. We note that it is only Policy H3 which indicates the need for Green Belt land review. In fact Policy H3 only pays lip service to the need for a Green Belt review and provides, at best, loose advice in this regard. It says that prior to 2021 Green Belt will be safeguarded save for the releases noted under Policy H2. Policy H3 then goes on to talk about land release for development after 2021 but no time period is set out to provide a framework for any Green Belt review in this latter period. In our view Policy H2 and certainly Policy H3 and Policy GB1 should explain fully the need for a Green Belt review and that such a review should take place for a defined period. That such a review has not taken place in advance of the SCS is a serious matter for the Inspector to consider in the context of soundness. That said, it is considered that any review of Green Belt should have regard to a period beyond 2021 as indicated by draft Policy H3. Paragraph 1.9 of the East of England Plan explains "this RSS covers the period to 2021 but sets a vision, objectives and core strategy for the longer term". 2026 is therefore considered a minimum suitable period that any Green Belt review must have regard to in order to meet the 5 year land supply requirements in PPS3 for the period after 2021. However, Policy SS7 of the East of England Plan talks about Green Belt reviews up to 2031. In view of this and the need to explore the circumstances of Rochford - that existing settlements cannot contain future housing growth; that Green Belt is necessary to provide housing; and that these provide exceptional reasons to vary the Green Belt locally (paragraph 2.6 to 2.7 of PPG2) the policies and strategy for the SCS should identify a Green Belt review covering the period to 2031 and set out why a review is necessary.

Policy H2 - Phasing and Quantum

The 2008 Preferred Core Strategy document indicated that the area south of Hawkwell should deliver 330 dwellings over a phasing period to post 2021 (see Policy H2 and H3 of that document). The SCS reduces the quantum of housing in this area to 175 but expects delivery by 2015. At a broader level the Preferred Options Core Strategy of 2008, (Policy H2) required 1,450 dwellings to 2015 and a further 1,050 by 2021. In the SCS the figures are now 775 and 1,010 respectively.

Since the SHLAA post dates the publication of the SCS, we are uncertain as to the reason why such a significant reduction in quantum of housing and extensions to the residential envelope is considered necessary. Presumably it is the 'new' strategy to redevelop existing employment areas within the settlements that has led to this change. Our representations on this strategy and specifically the Eldon Way Industrial Estate are included elsewhere within our representations. Previously we have commented on the Table at paragraph 4.6 of the Submission Core Strategy and the lack of evidence to underpin that table. It seems odd that in the space of a year the expected requirement for Greenfield sites has effectively halved on the basis of a SHLAA exercise. The community is therefore not able to effectively

Core Strategy Submission Document

S - 16929 - 10009 - Policy CLT1 - Planning Obligations and Standard Charges - None

16929 Support

CHAPTER 9 Policy CLT1 - Planning Obligations and Standard Charges

comment on the housing land supply and at this stage the Submission Core Strategy is legally unsound.

That said, we are of the view that the quantum of housing envisaged south of Hockley/Hawkwell should be more than the 175 currently envisage. In coming to this view we have reviewed the Urban Capacity Study and the latest housing figures in the Annual Monitoring Report 2008. We conclude that the shortfall in housing land supply is such that 330 dwellings in this location is appropriate.

The recently published SHLAA is based upon the data obtained from the Urban Capacity Study 2007, a call for sites exercise and data from the Annual Monitoring Report 2008.

The 2007 Urban Capacity Study (UCS)

1. 2007 is widely recognised as being the peak level of house prices in the UK and it was acknowledged by Government and practitioners alike that 2007 house prices were at an unsustainable level. It is our view that utilising the 2007 UCS as an evidence base without reference to the market does not pick up the depressed demand that is likely to now exist. Recent corrections to the housing market now mean that housing land prices are at a much lower and arguably more affordable level than before. The implications are that some pdl may not be viable for housing development. Often brownfield sites have much higher development costs than Greenfield sites and so the yield from urban capacity will be much lower than anticipated in the 2007 study. One example is the employment allocation of the Adopted Local Plan located at 76-92 Main Road, Hawkwell. This site has been allocated for several years and has been available during the most recent rises in residential property prices during 2006-07. As a consequence the lack of progress on the site can only be described by its current occupancy and perhaps it comprises high value uses that do not encourage redevelopment. Despite this the site is identified as having high potential for alternative use and high potential demand. The SHLAA form notes that there is no information on legal constraints (e.g., tenancy agreements) As a consequence it is difficult to see how this could continue to be a potential site and as a consequence the allowance for green field releases should be increased.

2. There are considered to be other instances in the UCS and the recently published SHLAA where the assumptions and calculations would indicate that the 1301 urban capacity figure is over optimistic and the SHLAA assessment is limited. In the assessment of 'non-residential sites in appropriate locations' within the UCS assumptions are made as to the probability of sites coming forward for new housing. 68-72 West Street, Rochford is identified as a high probability site but we note that it has been subject to 7 refusals of planning permission/conservation consent. There is a significant gap between the urban capacity identified as being suitable by the Council and the capacity applied for by the owners. Given its alternate use value, it is debateable whether the two capacity figures can be reconciled. No 247 London Road is another example of a site allocated in the Local Plan but which hasn't come forward. This is now the subject of a proposal for a care home and if approved would further limit the scope for market/affordable housing capacity on the site. A striking example of how the urban capacity study has underestimated is also evidence by 2-4 Alderman's Hill, Hockley - described as a disused service station. There has been no residential development application on this site since 2004 and most recent applications have sought commercial use of the site. Rather than being evidence of housing land deliverability, this particular site evidences the need for commercial uses in the area. There are therefore deliverability doubts over these 'high probability' categories which amount to some 40 units.

3. In relation to the assessment in the UCS entitled 'intensification of existing residential uses' we note that the assessment is premised on an assessment of recent trends taking into account net completions between 2001-2006 and 2005-06. This is effectively an assessment of windfall trends and not an approach that PPS3 encourages. Importantly Table 3-12 in the urban capacity study seeks to project forward urban capacity from residential redevelopment - a period that benefited from high house prices and PPG3 guidance encouraging redevelopment. These two circumstances have markedly changed and so the assumptions and conclusions drawn would also have changed. Even taking into account the UCS discounting, the reliability of the 404 units from this source must be questioned and in our view the 1301 figure cannot be a sound basis for urban capacity and further Greenfield releases are necessary.

4. In the section of the UCS entitled 'subdivision of dwellings' and 'living above the shop' it is estimated that recent trends would result in 7 and 15 units. Our concerns with using trends as a basis for urban capacity are detailed above - PPS3 does not encourage this. Rather, local authorities are charged with surveying their areas, identifying which areas may yield urban capacity and how much and developing policies to achieve that. Government guidance does not encourage the estimation of windfalls in the way the UCS does.

5. Redevelopment of established employment land is a separate section within the UCS. At 1 above we identify the low probability of the Main Road residential allocation coming forward. This remaining section of the UCS considers 11 further employment sites which were first identified in the 2000 UCS. Three of these are considered to have a high probability of coming forward. We have looked at these three sites and can find no evidence that they are likely to come forward. In the 8 years between 2000 and 2008 the three identified high probability employment sites have not been developed and there is no reason to assume that the next 5-10 years will be any different. For example the Rawreth Industrial Estate is identified as being well used in the UCS and although it has some unneighbourly uses there is no indication that the site is available, suitable or deliverable for residential. Land between 39-69 Lower Lambricks, Rayleigh is identified as having a high probability of residential uses. Yet there is no

Core Strategy Submission Document

S - 16929 - 10009 - Policy CLT1 - Planning Obligations and Standard Charges - None

16929 Support

CHAPTER 9 Policy CLT1 - Planning Obligations and Standard Charges

evidence of any pre-application advice or planning applications for this area. Stambridge Mills, Mill Lane, Stambridge is a further example. This site is separated from the urban area, in a flood risk zone and protected in the 2006 Replacement Local Plan by Policy EB9 which promotes B1 uses. Against this background there is only two relevant planning applications affecting this area both date from the early 1990's and relate to a plant room and loading bay. There is no evidence that this is likely to come forward for residential purposes in the next 5-10 years.

6. In the UCS extant permissions are identified as 856 dwellings. It is important to note that this figure needs to be continually reassessed so that from the point of adoption of the Core Strategy a 5 and 10 year housing land supply is available. The SHLAA notes extant permissions for 2009-14 being 106. As noted below extant permissions do not necessarily translate into deliverable sites. There is therefore a contingency that needs to be built in. Further allocations on greenfield land need to be increased and as such the quantum of housing in the area south of Hockley/Hawkwell should be increased to 330 dwellings in order to begin to meet the shortfall identified.

The District Council's 5 year housing supply assessment

7. The District Council's Annual Monitoring Report ("AMR") 2008 purports to demonstrate a 5 year housing land supply. The preamble to Table 4.10 in the AMR 2008 explains that Rochford District Council ("RDC") has included units under construction, units with full permission, units with outline permission, units with a resolution to grant, units subject to preapplication discussion/Urban Capacity Assessment and land allocations in its trajectory. The reader is referred to Appendix B which breaks down the sites in more detail. The recently published SHLAA also includes a table showing a potential 1273 dwellings deliverable. However, it refers to "appropriate brownfield sites." Since these 'appropriate sites' are do not benefit from an application or a planning permission it is difficult to programme them into the housing delivery trajectory.

8. In the full planning permission category of the AMR 2008 where work has not yet started there can be no guarantee that all these sites will be delivered in the 5 years. This comment relates to the one above in relation to the recently published SHLAA. It is not uncommon for permissions to be obtained to provide a means for valuing a site where the owner has no immediate plans to sell the site or develop housing. Delivery may also be hampered by funding constraints, or site assembly problems (where sites are in an alternative use or relocation constraints). Appendix B of the AMR 2008 does not set out the intentions of the landowner or whether the sites are truly achievable in the 5 year period as per PPS3 requirements. The SHLAA purports to show developer intentions at Appendix C but the assessment by the local authority into the legitimacy of some of the claims is not presented. The evidence base is not as full as it should be to demonstrate the robustness of Table 4.6 of the SCS. It is also unclear the extent to which this table is based on either the UCS 2007, AMR 2008, SHLAA 2009 or a combination of all three. This should be set out clearly.

9. In addition, to the 'non delivery' of a proportion of new homes in the AMR 2008, there is concern at the timings of delivery in that data set, for example, 10 units in 2008-2009 relates to outline planning permissions and it is doubtful whether reserved matters can be turned round quick enough to begin delivering housing in this year period. There could well be examples in that set of data where the delivery of units in the first year of the 5 is unlikely, thus delivery is reduced for that period and pushed back and this process is then compounded throughout the data set up to and beyond year 5. Statistical evidence from the Department of Communities and Local Government ("CLG") reveals that building starts are 43% down on the quarter to March 2009 compared with March 2008. It is not clear whether the recently published SHLAA has taken this into account and unless it does the data in the Table at 4.6 of the SCS cannot be relied upon, particularly given the current recessionary circumstances. In relation to the Table at Paragraph 4.6 a refinement is therefore needed to take into account this effect on phasing.

10. This problem is compounded for other units relied upon where permission has been granted but no start on site has been made; this accounts for a considerable number of sites in 2009-10 period (100 dwellings) which is (year 2 of the 5 year period). A delay in these will require more Greenfield sites to be identified in order to meet the shortfall.

11. Finally we note that the East of England Plan expresses its land supply requirement as a minimum. This strategy is not reflected in the

Core Strategy Submission Document

S - 16929 - 10009 - Policy CLT1 - Planning Obligations and Standard Charges - None

16929 Support

CHAPTER 9 Policy CLT1 - Planning Obligations and Standard Charges

Submission version of the Core Strategy policy H2.

12. In summary since neither the UCS nor the Annual Monitoring Report form a SHLAA, reservations are maintained about the degree to which sufficient housing land has been identified.

Policy H3

In the Preferred Options Core Strategy 2008 more locations were identified for housing growth in the post 2021 phase. Whilst it is our view that land south of Hockley/Hawkwell should benefit from a greater number of dwellings than the 175 currently identified (330) in order to make the strategy effective. We are concerned at the significant change in strategy between the Preferred Option Core Strategy and the Submission version, which has significantly less housing growth on green field sites. This change in strategy is so significant that we would question whether it is appropriate in the context of soundness and the consultation processes that have taken place so far.

We also have concerns as to how the Green Belt review strategy set out at Policy H3 and in the Local Development Scheme integrates with other policies in the SCS and feel that Green Belt review should be more explicit throughout the SCS. As it currently stands there is a potential conflict with national policies and limited justification for the Green belt strategy. We note that in Policy H3, which indicates the need for Green Belt land review, the advice is limited and unclear. In fact Policy H3 only pays lip service to the need for a Green Belt review and provides, at best, loose advice in this regard. It says that prior to 2021 Green Belt will be safeguarded save for the releases noted under Policy H2. Policy H3 then goes on to talk about land release for development after 2021 but no time period is set out to provide a framework for any Green Belt review in this latter period. In our view Policy H3 and Policy GB1/H2 should explain fully the need for a Green Belt review and that such a review should take place for a defined period. That such a review has not taken place in advance of the SCS is a serious matter for the Inspector to consider in the context of soundness. That said, it is considered that any review of Green Belt should have regard to a period beyond 2021 as indicated by draft Policy H3. Paragraph 1.9 of the East of England Plan explains "this RSS covers the period to 2021 but sets a vision, objectives and core strategy for the longer term". 2026 is therefore considered a minimum suitable period that any Green Belt review must have regard to in order to meet the 5 year land supply requirements in PPS3 for the period after 2021. However, Policy SS7 of the East of England Plan talks about Green Belt reviews up to 2031. In view of this and the need to explore the circumstances of Rochford - that existing settlements cannot contain future housing growth; that Green Belt is necessary to provide housing; and that these provide exceptional reasons to vary the Green Belt locally (paragraph 2.6 to 2.7 of PPG2) the policies and strategy for the SCS should identify a Green Belt review covering the period to 2031 and set out why a review is necessary. Not to do so is unsound for justification and effectiveness reasons.

Policy H4 - Affordable Housing

As currently drafted we feel that the policy is not concise enough and that the policy does not reflect current guidance. The phrase 'at least' would indicate that in most cases affordable housing above 35% will be sought. Our understanding is that the 35% figure is recommended in the SHMA and that to provide a policy framework which seeks to go beyond that figure would potentially be unworkable as many sites could not financially bare the burden of over a third of the net developable area not yielding a value. The policy should be redrafted so that "a target of 35% affordable housing shall be provided on all developments of 15 or more units..."

The last policy paragraph provides some scope to relax this policy, if there are clear site constraints that make on site provision impossible. The policy, though, is not particularly clear on what would constitute exceptional circumstances. For example, physical site constraints, which unusually raise development costs, would be one such reason and this should be specified. There may be other reasons including the nature of housing needs in the part of the District the site is located which justify affordable housing below the 35% target. Design reasons may also have a bearing on how provision is made and in what form, particularly if the site is in an historic area where design might override housing need argument. It is therefore recommended that the policy expand on the type of circumstances where affordable housing may be relaxed and the type of information that will be sought of applicant's who have a need to invoke this part of the policy.

Policy H5

In support of the policy, it is advantageous that no percentages requiring a specific mix are included. This flexibility will enable developers and the Council to respond directly to changing circumstances in the local housing market. In the past some authorities have set out a percentage for the type of housing they require only to find that after a few years of strict implementation there is an oversupply of property of that type and no flexibility in the policy to address the problem.

Policy ED2 - London Southend Airport

It is considered that to grow non aviation related employment at a location north of Southend Airport where sustainable access from the rest of Rochford District requires careful consideration. Most Airports are serviced by aviation related employment development and as such a location close to the airport is sensible and sustainable. However, for surface access reasons it would be inappropriate to encourage travel from Rochford's main settlements to what essentially

Core Strategy Submission Document

S - 16929 - 10009 - Policy CLT1 - Planning Obligations and Standard Charges - None

16929 Support

CHAPTER 9 Policy CLT1 - Planning Obligations and Standard Charges

would be a rural location for general employment uses. Whilst sustainable access would be improved by a railway station and better bus links, there is no evidence to suggest that a sustainable surface access strategy for non related employment development at the Airport can be achieved. Paragraph 11.22 explains the critical importance of a railway station to the delivery of the strategy yet the Transport Chapter and Implementation Chapter provide neither a policy nor an assessment of deliverability. It is also notable that the South Essex Rapid Transit Policy T4, as set out at paragraph 10.16, notes that Rochford is not proposed to be served but may be served in future phases. This uncertainty is no way to plan for a major employment land supply strategy in the District. In relation to PPS12, the ability to deliver sustainable green field employment sites away from the top tier settlements of Hockley/Hawkwell, Rochford and Rayleigh is unsound.

Policy ED3

We fully support the first sentence of the Policy and note the apparent contradiction with the statements in Policy H1 and elsewhere which seeks to develop on alternative uses at industrial estates such as Eldon Way.

This contradiction is evidence in the second paragraph of Policy ED3. In our representations on Policy H1 we have explained why it is not sound to diminish the employment stock at Eldon Way and the importance of maintaining a dominance of employment type uses at this estate. These arguments are not repeated here.

We note the sentiments of the third paragraph and in accordance with our representations elsewhere are of the view that this sentence should be revised to explain that Eldon Way will accommodate principally employment type uses. As noted elsewhere uses which are an alternative to employment would diminish this highly sustainable employment site and this is unsound when assessed against National Policy.

Policy ED4 - Future Employment Allocations

In part, the de-allocation strategy is not supported as it is considered unsound when set against sustainability criteria. In relation to the Eldon Way Industrial Estate it is considered critical to the ongoing sustainability of this settlement that employment uses are maintained at this location. It is close to the railway station, bus routes and local residential areas from which the opportunity exists for employees to walk or cycle to work. Its location adjacent to the Town Centre offers opportunity for some retail and leisure development to complement the centre and to maintain a supporting function. These sustainable benefits would not occur with the deallocation of Eldon Way or the significant erosion of its employment floorspace. Whilst redevelopment of the employment site to achieve new employment is supported, the dominant land use should continue to be employment use. As a consequence, the 18ha of land required for employment in this policy is considered to be excessive and the policy should be reviewed to explain that redevelopment of existing employment sites for primarily new employment development will be encouraged.

Policy T4

It is noted that the South Essex Rapid Transit policy, as elaborated upon at paragraph 10.16 notes that Rochford is not served but may be served in future phases. This uncertainty is contrary to the delivery principles of soundness and directly puts at issue the employment land supply strategy in the District which is founded on sustainable access to new sites. In relation to PPS12, the ability to deliver sustainable green field employment sites away from the top tier settlements of Hockley, Rochford and Rayleigh is unsound.

Appendix H1, CTL1 - Infrastructure

It is recognised that necessary infrastructure provision is an important part of creating a sustainable development and in that context appendix H1 is supported. The supporting text notes that the table at Appendix H1 is not exhaustive and in that context it is very important that the framework properly distinguishes between what should be provided as part of new development schemes and what shouldn't. It is therefore essential that the framework acknowledges the importance of Circular 05/05 and the tests which say that provision of infrastructure and/or contributions should be:

- * Relevant to planning
- * Necessary to make the proposed development acceptable in planning terms
- * Directly related to the proposed development
- * Fairly and reasonably related in scale and kind to the proposed development
- * Reasonable in all other respects

As is made clear (Paragraph B9 of Circular 5/05) contributions should not be used to make good existing deficiencies in infrastructure provision. Nor are they to be used to secure contributions to the achievement of wider planning objectives that are not necessary for consent to be granted. In that context the Core Strategy should set this out as its policy framework.

Policy GB1 - Green Belt

Core Strategy Submission Document

S - 16929 - 10009 - Policy CLT1 - Planning Obligations and Standard Charges - None

16929 Support

CHAPTER 9 Policy CLT1 - Planning Obligations and Standard Charges

The objectives of this policy are supported, although as noted in other representations the SCS is unsound as it does not meet the tests in relation to justification, compliance with national policy or effectiveness of strategy.

Policy GB1 mentions the objective to allocate the minimum amount of Green Belt land necessary. The policy should link to the requirements of PPG2 and RSS which are discussed in relation to the representations on Policy H2 and H3. The policy should set out a timeframe for the review and why Rochford requires a Green Belt review (what the exceptional circumstances are in this District that justify a review of local boundaries. The policy should be amended to set out a 2031 time frame and this may require the SCS to have an extended life span beyond 2021.

We would recommend the deletion of the word character since Green Belt designation is not related to landscape character as currently drafted. For clarity we would also recommend that the Policy or its supporting text explain that a Green Belt review will take place in support of an allocations document (paragraph 6.6) in order to identify an appropriate new boundary. This is particularly necessary given the commitment to a Green belt review in the adopted Local Development Scheme.

Policy CLT1 - Planning Obligations and Standard Charges

In view of the need to test fully the basis on which standard charges are based it is important that any document produced is in a development plan document that enables an examination in public. The policy should explain this in order that when the document is produced it accords with Policy and is based on sound evidence.

ENV9 - Code for Sustainable Homes

Object. The advice from the Department of Communities and Local Government is that the new requirement to have a rating against the Code does not make it mandatory to build a Code home or to have each new home assessed against the Code. It does however mean that all buyers of new homes be given clear information about the sustainability of the new home. A house builder can do this in one of two ways:

- they can choose to build a Code home, have that home assessed against the Code and provide the home buyer with a Code certificate stating the star rating the home has achieved
- or, they can choose to build to current building regulations standards, not to pay for an assessment and instead download a nil-rated certificate of non-assessment (also referred to as a nil-rating) to provide to the home buyer.

As such the Rochford policy requirement that coding 3 be achieved by 2010 and Code 6 by 2013 is out of step with Government advice. The policy wording should explain that it is just the coding that is a requirement of new homes and not necessarily that new homes should be constructed to achieve a standard.

The current Government objectives are for the code to be introduced over a reasonable period with development to be code 3 by 2010, code level 4 by 2013 and code level 5 by 2016. In this regard the policy, as drafted, seeks to achieve code 6 by 2013 and consequently compresses the code requirements into a shorter time scale with the costs associated expected to be subsumed within the housing market through higher prices. This is not a realistic strategy for the delivery of sustainable homes and we consider that the policy should be revised to extend the period of compliance but to also make it more flexible based on local circumstances.

Research undertaken on behalf of the Housing Corporation and English Partnerships, published in February 2007 'A cost review of the code for sustainable homes' reveals that code 6 is unlikely to be unattainable given existing technologies and that achieving code 5 could result in a 12% to 20% increase in costs that would have to be passed onto the consumer. Given the variability of the housing market with peaks and troughs, it is unlikely that the housing market would be able to subsume this level of price increase.

The code system policy as currently drafted does not have regard to site circumstances and so many of the requirements could be difficult to meet. For example, micro electricity generation on site may be difficult to achieve where local circumstances deter the capture of wind or solar power. If more expensive technologies are required to generate power than is the norm then costs will rise. There may be other competing reasons why designs cannot include certain sustainability measures if housing sites are in sensitive landscape and historic locations. Alternatively there may be significant development costs associated with site specific circumstances and so viability of the site's development becomes a valid consideration. By insisting on the code for sustainable homes other policy objectives such as affordable housing at particular rates and other contributions may need to be reconsidered. Consequently, we are of the view that this policy should be drafted in a manner which enables site specific circumstances to be taken into account. As noted above the Government explains that the code is a certification requirement and does not necessarily mean that buildings are constructed in accordance with a code level.

It is also important to note that it is not the purpose of planning legislation to duplicate other legislation. In this regard, the policy should accept that the Building Regulations will be the main vehicle for implementing this policy and that unless the coding requires external development then there will be no need to specify what is to be carried out in a planning application.

Full Text: ROCHFORD CORE STRATEGY SUBMISSION DOCUMENT, SEPTEMBER 2009
RESPONSE OF ESSEX COUNTY COUNCIL

1. General Comment

Essex County Council welcomes and broadly supports the Core Strategy prepared by Rochford District Council. The Strategy contains policies and proposals that address the spatial characteristics, issues and opportunities facing the District whilst respecting the distinctive qualities of the different settlements and parts of the District.

The County Council fully supports the maintenance of a strong policy approach to protection of the Green Belt and of the quality of environmental assets in the District whilst making adequate housing and employment provision within the District. The Core Strategy presents an approach that emphasises a balance of opportunity through the District and recognition of emerging economic prospects in the District and neighbouring areas. The intended preparation of more detailed Action Area Plans for London Southend Airport and its environs and for each of the three town centres of Rayleigh, Rochford and Hockley will further enhance the approach of the Core Strategy. The emphasis on the three town centres is particularly welcomed as offering a stimulus to improvement in the services and facilities available locally within the District whilst also affording possibilities of increased community focus.

2. Housing Distribution and Locations

The East of England Plan requires Rochford to provide a minimum of 3,790 additional dwellings between 2006 and 2021. In addition, provision for a further 1,000 dwellings should be made between 2021 and 2025 to ensure delivery of housing for at least 15 years from adoption of the Core Strategy (expected in 2010). Of this total requirement the District Council has identified a capacity of 2,000 dwellings through a Strategic Housing Land Availability Assessment. This means that the Core Strategy has to identify locations for about 1,750 dwellings to be delivered before 2021 and a further 1,000 dwellings between 2021 and 2025.

Policy H1 (The efficient use of land for housing) is supported. However, prioritisation of the reuse of previously developed land within settlements for additional housing is unlikely to provide a sufficient source of provision due to the generally residential nature of existing settlements in the district and the absence of potentially large sites of previously developed land. The assessment of potential for additional housing provision within settlements already includes the proposed re-allocation to substantially residential use of 4 existing employment areas.

Within Policy H2 (Extensions to residential envelopes and phasing) and Policy H3 (Extension to residential envelopes post-2021) the District Council has adopted a balanced approach to the distribution of additional housing locations, which is based on identification of tiers of settlements defined by reference to their accessibility to jobs, services and facilities (some of which lie outside the District) and the need to protect the valued environments within the District. This approach is generally supported, although implementation and delivery of individual schemes should give further thought to securing sustainable functional relationships between proposed development locations and availability of jobs, services and facilities.

The proposed scale and phasing of development at each of the identified locations in Policy H2 and Policy H3 should be capable of being supported by County Council service groups, provided that adequate and timely funding is available. The County Council would wish to work with the District Council to ensure that future infrastructure and facilities would serve and give benefit to the existing adjoining community as well as to the new development. In this respect it is noted that the Core Strategy proposes preparation by the District Council of a Planning Obligations and Standard Charges document (Policy CLT1). The District Council's document should fully reflect the County Council's own approach to this matter as set out in the County Council's 'Developer's Guide to Infrastructure Contributions'.

3. Economic Development

The approach to Employment Growth (Policy ED1) is supported. Given the economic structure of Rochford District the support to be given to protection and enhancement of the role of small and medium sized businesses; enhancement of the District's commercial centres; and development of a skills training academy is particularly welcome. These measures will assist in building on the existing economic resource of the District.

Proposals for the comprehensive development of London Southend Airport and its environs (Policy ED2) are supported.

Core Strategy Submission Document

16701 Object

CHAPTER 9 Policy CLT2 - Primary Education, Early Years and Childcare Facilities

The further elaboration of proposals through an Area Action Plan will provide a firm foundation to realise the economic regeneration and growth opportunities presented by effective use of the Airport. The recognition of the potential environmental impact of the Airport and the commitment to work to mitigate any adverse impacts on the environment and local amenities is fully supported.

The location of the proposed Eco-Enterprise Centre to the North of London Southend Airport (Policy ED4) is supported. Creation of the Centre would assist reduction of the rate of business start-up failure in the district. Further the proposed location for the Centre would afford a clear offer to businesses within an area of varied business activity.

The continued protection and enhancement of existing employment land (Policy ED3) is supported, as is the identification of 4 existing employment sites for appropriate alternative, substantially residential, uses. Each of the 4 sites affords particular issues and opportunities whereby their redevelopment for other uses and relocation of existing occupiers would confer advantage for the immediately neighbouring areas and for the District as a whole.

4. Town Centres

The town centres of Rayleigh, Rochford and Hockley, and future plans for them, are closely linked to the economic development of the District but also present the opportunity to offer greater community focus within the District. The varied approach being taken to each of these town centres is supported (Policy RTC4, RTC5 and RTC6), notably the recognition of the role and purpose of the town centres beyond retail uses.

The contribution that the County Library service could make to plans for the town centres should not be overlooked. The 5 libraries in the District are substantial footfall draws in their localities and act as a 'community anchor store'. This has knock-on effects in encouraging use of neighbouring retail and service facilities. Further the Library service is currently looking at co-location opportunities for other services within the libraries which would enable them to act as a community focus.

5. Transport

The transport aspects of the Core Strategy are well balanced in identifying potential measures that would meet the needs of existing residents and businesses in the District as well as needs arising from future development. The approach reflects and makes good reference to the transportation aspirations of the County Council. The policy emphasis on close working between the District Council and the County Council to advance the transport aspirations is welcomed and fully supported.

In relation to parking standards (Policy T8 and Paragraph 10.30) the review undertaken by Essex County Council in conjunction with the Essex Planning Officers Association has now been completed. Revised parking standards have been agreed and signed off as County Supplementary Guidance, in accordance with PPS12, and is being applied by the County Council as Local Highways Authority.

6. Coastal Protection Belt

Policy ENV2 (Coastal Protection Belt) is not supported because in its current form it is not a suitable or effective replacement policy for Policy CC1 of the Replacement Structure Plan. Structure Plan Policy CC1 (The Undeveloped Coast - Coastal Protection Belt) currently remains a 'saved' policy of the Essex and Southend-on-Sea Replacement Structure Plan, April 2001 (following a direction of the Secretary of State, dated 27th September 2007, under paragraph 1(3) of Schedule 8 to the Planning and Compulsory Purchase Act 2004). The existing Policy CC1 reads, 'Within the Coastal Protection Belt defined in adopted local plans there shall be the most stringent restrictions on development within the rural and undeveloped coastline situated outside existing built-up areas, and any development which is exceptionally permitted within this Belt shall not adversely affect the open and rural character, historic features or wildlife.'

Core Strategy Policy ENV2 should be revised to include specific reference to,

- * Definition of the boundary of the Coastal Protection Belt in another Development Plan Document;
- * the application of the most stringent restrictions on development within the rural and undeveloped coastline;
- * any development exceptionally permitted not adversely affecting the open and rural character, historic features or wildlife.

7. Historic Environment

The importance of the historic environment in Rochford District is clearly identified within the Core Strategy document. Nevertheless, the policy guidance could be usefully enhanced to promote consideration and enhancement of the historic environment and use of the historic environment to shape place. This would be achieved by the following amendments to the Core Strategy,

- * Policy ENV1 (Protection and Enhancement of the Natural Landscape and Habitats and the Protection of Historical and Archaeological Sites) should be amended by deletion of the final sentence and its replacement with, The Council is committed to the protection, promotion and enhancement of the diverse historic landscape and extensive surviving archaeological deposits of the District.

Core Strategy Submission Document

16701 Object

CHAPTER 9 Policy CLT2 - Primary Education, Early Years and Childcare Facilities

* Paragraph 8.15 of the supporting text should be amended to better support the suggested amendment to Policy ENV1. The existing text of Paragraph 8.15 should be deleted in its entirety and replaced by,
The historic environment of Rochford District has developed through a history of human activity that spans over 450,000 years. Much of the resource lies hidden beneath the ground in the form of archaeological deposits. Other elements such as the historic landscape, the pattern of field, farms, woods and grazing marsh which characterise the District, are a highly visible record of millennia of agriculture, industry and commerce. Of particular significance are the coastal, island and estuarine areas where multi-period landscapes reflecting the exploitation of coastal and marshland resource survive. The District also includes the important historic medieval market towns of Rochford and Rayleigh.

* Page 16 (Sustainable Community Strategy Priority: Promoting a Greener District) should be amended to further support the approach to the Historic Environment. The fourth bullet of the Key Section/Policies of the Core Strategy should be amended to include the word 'historic', so that the first sentence of the bullet would read,
The Environment chapter seeks to protect and enhance the biodiversity, historic and natural environment of the District by protecting sites of local, national and international importance.

8. Community Infrastructure

The approach to Community Infrastructure is supported. The County Council would wish to work with the District Council to ensure that future community infrastructure and facilities would serve and give benefit to the existing adjoining community as well as to the new development. In this respect it is noted that the Core Strategy proposes preparation by the District Council of a Planning Obligations and Standard Charges document (Policy CLT1). The District Council's document should fully reflect the County Council's own approach to this matter as set out in the County Council's 'Developer's Guide to Infrastructure Contributions'.

In addition, it should be noted that,

* Some County Council services are not highly visible despite being regarded as highly desirable community services by local residents. The need to ensure adequate funding and contributions to enable these services to meet community expectations should be recognised and acknowledged in consideration of planning obligations and standard charges.

* The Adult Community Learning Centre at Rocheway, Rochford could be better located with regard to the wider Rochford/Castle Point area of service. Relocation of the Centre could provide opportunities both at the new location and for the current site.

* The Core Strategy should make specific reference to,

o Appendix H1, Location at South Canewdon: new Early Years and Childcare facilities;

o Policy CLT2, final sentence: insert after the words 'primary schools' the words 'and Early Years and Childcare facilities';

o Appendix CLT1, Other issues/comment: for Early years and childcare facilities add 'Land to be allocated within new residential areas, as appropriate'.

9. Implementation, Delivery and Monitoring

The inclusion in the Core Strategy of a section considering Implementation, Delivery and Monitoring is welcomed and supported. Nevertheless, the District Council, in moving towards implementation and delivery of the individual elements of the Core Strategy, should highlight those schemes and projects that are critical to achievement of other aspects of the Strategy.

Further, the monitoring proposal for Policy H6 (Lifetime Homes) and for Policy CP1 (Design) should be amended,

* Policy H6 (Lifetime Homes) - the identified monitoring tool is Core Indicator H6 Housing Quality Building for Life Assessments. The Building for Life Assessment methodology was devised to measure the overall design/layout quality of housing developments. It was not devised to measure compliance with Lifetime Homes, which is largely, but not exclusively, concerned with internal space standards and the provision of internal arrangements within dwellings to meet needs of all residents.

* Policy CP1 (Design) - the monitoring indicator proposed by the Core Strategy is not supported because it is unclear what the indicator would actually be measuring. The proposed indicator should be replaced by the Core Indicator, Housing Quality - Building for Life Assessments, as suggested by the County Council in its response to the Core Strategy Preferred Options, October 2008. A better approach would be to base evaluation and monitoring of Policy CP1 on the Commission for Architecture and the Built Environment's (CABE) 20 Building for Life principles, particularly as Government has endorsed these principles and is urging local authorities to use them to assess design quality. It is suggested that the monitoring arrangements for Preferred Option CP1 be deleted and replaced by the following text, 'The success of the implementation of this policy will be monitored by assessing schemes, or an appropriate sample of schemes, against the Commission for Architecture and the Built Environment's (CABE) Building for Life principles.'

10. Access to Housing

The Core Strategy notes the higher prevalence of older people in Rochford District and the need to support them. However, a more broadly based approach to access to housing should be adopted by Policies H4, H5 and H6. It should recognise the presence of other vulnerable adults in the community, for example, those with learning or mental health disability, and the range of possible forms of accommodation, including supported, sheltered and extra care accommodation. The high level of owner occupation in the District further emphasises the need for a broader approach. The emphasis on Lifetime Homes would not address the variety of future needs, whilst the potential exemptions to the

Core Strategy Submission Document

O - 16701 - 9072 - Policy CLT2 - Primary Education, Early Years and Childcare Facilities - i

16701 Object

CHAPTER 9 Policy CLT2 - Primary Education, Early Years and Childcare Facilities

Summary: Lifetime Homes policy standard in Policy H6 are likely to act against demographic trends. The approach to Community Infrastructure is supported. The County Council would wish to work with the District Council to ensure that future community infrastructure and facilities would serve and give benefit to the existing adjoining community as well as to the new development. In this respect it is noted that the Core Strategy proposes preparation by the District Council of a Planning Obligations and Standard Charges document (Policy CLT1). The District Council's document should fully reflect the County Council's own approach to this matter as set out in the County Council's 'Developer's Guide to Infrastructure Contributions'.

In addition, it should be noted that,

* Some County Council services are not highly visible despite being regarded as highly desirable community services by local residents. The need to ensure adequate funding and contributions to enable these services to meet community expectations should be recognised and acknowledged in consideration of planning obligations and standard charges.

* The Adult Community Learning Centre at Rocheway, Rochford could be better located with regard to the wider Rochford/Castle Point area of service. Relocation of the Centre could provide opportunities both at the new location and for the current site.

The Core Strategy should make specific reference to, Policy CLT2, final sentence: insert after the words 'primary schools' the words 'and Early Years and Childcare facilities;

Policy CLT3 - Secondary Education

Summary: The Respondent finds the document to be unsound in its present form, however were the amendments set out in these representations to be incorporated then it is considered that the document will be sound. No objection is raised to the principle of extending the size of the King Edmund School grounds, subject to the provision of robust evidence as to the need and scale of the extension.

Full Text: The respondent owns the majority of the available land surrounding the school and is thus in the best position to facilitate the expansion. However, it is not clear how the land will be acquired, or whether it will form part of a much wider, mixed use allocation in the Allocations DPD. The CS refers to the Essex Schools Organisation Plan, which identifies a need to increase secondary school places in line with housing growth. It is accepted that housing growth and school places are inextricably linked and that the King Edmund School is at capacity and will require extension in the future. What is not clear from the evidence base is where the identified need for 3 hectares has come from. Reference is made to the Essex Schools Organisation Plan; however, this document does not look beyond 2013 and does not consider the residential allocations presently proposed in this CS.

The respondent has substantial interests in the land identified in the broad locations set out in H2 and H3. It is considered that the school expansion should be part and parcel of the development that comes through in the Ashingdon allocations. An indicative masterplan is attached to these representations, which illustrates a growth option combining urban extensions with the enhancement of King Edmund School.

Amendment to Policy CLT3:

Reference to the need for 3 hectares should only be included if this area can be properly demonstrated.

Masterplan/Facilities plan Council ref AE22

Full Text: ROCHFORD DISTRICT COUNCIL LOCAL DEVELOPMENT FRAMEWORK: CORE STRATEGY SUBMISSION CONSULTATION DOCUMENT

We write on behalf of our client, Sainsbury's Supermarkets Ltd, in respect of the recently published Rochford Core Strategy Submission consultation document. Sainsbury's does not currently have any stores in Rochford but are interested in pursuing future opportunities to develop their retail offer in the area. As such, they are keen to be involved in the Local Development Framework process.

Our representations to earlier consultation stages of the Core Strategy supported the Council's housing strategy. Whilst we re-iterate this support, we consider that the Core Strategy does not sufficiently provide for future retail requirements across the District to support this housing strategy. The Council should adopt a flexible approach to identifying floorspace capacity, particularly in light of the findings of the Retail Study that Rochford suffers from significant expenditure leakage.

This flexible approach to floorspace capacity would allow for improved competition and an improvement to the quality of goods and services provision in the District. It is important for the Council to acknowledge the important contribution retail development makes in achieving and maintaining vital and viable communities and, thus, the Core Strategy and other Local Development Framework documents should allow for appropriate additions to the retail offer in the District.

In relation to the specific policies of the document, we object to Policy CLT4, and the requirement for new non-residential development of over 1,000 square meters to be accompanied by a Health Impact Assessment. This policy is too restrictive on certain developments, such as retail, which will clearly not have an adverse impact on local health facilities. The Council should be encouraging development in the District and not imposing additional requirements on developer's who are aiming to deliver important local facilities.

Sainsbury's wish to continue to work with the Council to improve Rochford's convenience retail offer and we always welcome the opportunity of meeting with officers to discuss Sainsbury's aspirations in the District.

Summary: In relation to the specific policies of the document, we object to Policy CLT4, and the requirement for new non-residential development of over 1,000 square meters to be accompanied by a Health Impact Assessment. This policy is too restrictive on certain developments, such as retail, which will clearly not have an adverse impact on local health facilities. The Council should be encouraging development in the District and not imposing additional requirements on developer's who are aiming to deliver important local facilities.

1.0 Instruction and Introduction

1.1 Charles Planning Associates Limited (Chartered Town Planners) is Instructed by Swan Hill Homes Limited (Swan Hill) to prepare and submit representations on their behalf in respect of the Rochford District Local Development Framework: Core Strategy Submission (September 2009) Development Plan Document.

1.2 The comments refer to the relevant sections and policy designations in the Submission document, as appropriate.

1.3 The comments set out in this submission are intended to assist the District Council in taking forward its Local Development Framework. It is our intention to continue to be involved in the LDF preparation process and we look forward to the opportunity to comment further at the Examination to the Core Strategy.

1.4 If you have any queries regarding the content of this submission then please do not hesitate to contact:

Peter Kneen BSc (Hons) MSc MRTPI
Planner

2.0 Housing:

Policy H1 - The Efficient Use of Land for Housing

2.1 Swan Hill recognises the importance of seeking to concentrate new developments mainly in the existing urban areas, on previously developed land where possible, particularly in view of the Government seeking to ensure 60% of all such new developments are on previously development land (PDL).

2.2 However, given the character of the District, and the strategic housing requirement of the East of England Plan, Swan Hill supports the approach that the Council must also make provision for additional development on the edge of existing settlements on greenfield sites, particularly in the most sustainable locations. As such, Swan Hill supports that where feasible, the redevelopment of existing employment sites for residential/employment purposes can make a contribution towards the strategic housing requirement, provided that sufficient additional employment land is brought forward to ensure the stability of employment levels in the District, and to ensure employment growth meets the East of England Plan requirements.

2.3 Swan Hill considers that Policy H1 should include consideration that new extensions to existing settlements have regard to their potential impact on the wider characteristics and openness objectives of the Green Belt.

Policy H2 - Extensions to Residential Envelopes and Phasing

2.4 Swan Hill generally supports the approach taken by the Council in this policy. As set out above, Swan Hill consider the Council's acknowledgment that housing requirements should be met through the allocation of land on the edge of the existing settlements is the most suitable way forward to meeting the Council's strategic housing requirement and complies with the advice in PPS3.

2.5 The need for suitable greenfield urban extensions represents the best way forward for the Council to meet its strategic housing requirement, as set out in the East of England Plan. Swan Hill supports the recognition that the potential supply of alternative previously developed sites is limited, without detrimentally affecting the character of the District, and therefore the best way forward is the use of sustainable greenfield urban extensions to the existing settlements of the District.

2.6 However, Swan Hill consider that a fundamental consideration that the District Council should consider relates to the potential impact of the urban extensions on the Green Belt policy has been somewhat overlooked. The wider sustainability credentials of the settlements of the District should only be one of many key considerations for determining the level of expansion. In view of the proximity of Southend-on-Sea to all the main settlements of the District, and the influence this has on the likely location many people would travel for employment and leisure, sustainability of many of the settlements is not a key overarching factor, and greater weight should be placed on the potential impact on the openness of the Green Belt, as this cannot be remedied if development occurs in the wrong location.

2.7 As such, Swan Hill considers that determining the location of growth for the main settlements should be to identify

16886 Support

CHAPTER 9 Policy CLT5 - Open Space

those locations where the impact on the wider setting of the Green Belt can be minimised. Further justification for those general locations chosen should be identified in Policy H2. In this regard, Swan Hill has serious concerns regarding the removal of Land South West of Great Wakering as a viable option for the growth of the settlement. The development of this area of Great Wakering, in addition to the potential redevelopment of the Star Lane Industrial Estate could provide a more comprehensive development, whilst ensuring that the wider openness of the Green Belt is maintained. Land South West of Great Wakering is significantly better placed to limit the impact on the wider Green Belt than Land West of Great Wakering, and could contribute to the provision of an important amenity and wildlife site for the local community.

2.8 In addition, Swan Hill consider that the Council now has no reserve provision in the event that any of the existing employment sites set out in Policy H1 fail to come forward for development within the envisaged timescale. Further, Land West of Great Wakering has not been identified in the SHLAA as a deliverable site to help meet the strategic housing requirement, contrary to the requirement set out in PPS3.

2.9 As such, Swan Hill would support the provision of suitable sites which could be safeguarded for future development in the likelihood of a shortfall in supply.

Policy H3 - Extensions to Residential Envelopes Post 2021

2.10 As set out above, Swan Hill supports the overall approach the Council has taken towards the provision of sustainable urban extensions as a suitable means of meeting their strategic housing requirement. However, as set out for Policy H2 above, Swan Hill has serious concerns regarding the removal of several proposed sites set out in the October 2008 Preferred Options Core Strategy, without any guarantee of the ability to deliver those sites set out in Policy H1.

2.11 As also considered above, the inclusion of West of Great Wakering for 250 dwellings should not be included ahead of South West of Great Wakering, in view of the fact that the site is not identified in the SHLAA as available, suitable and achievable as required by PPS3, and thus is not supported by a robust and creditable evidence base for its inclusion as a strategic site for development.

2.12 Whilst Swan Hill acknowledge that alterations to Policy H1 has resulted in the removal of some locations for growth in Policy H3 (as set out in the Sustainability Appraisal), Swan Hill does not consider that the most appropriate locations have been chosen.

2.13 In addition to the matters raised above, the use of West of Great Wakering would also result in the loss of valuable agricultural land, which clearly in a Green Belt location, should be less suitable for development than other sites, such as South West of Great Wakering, which would have limited impact on the wider Green Belt policy, and not result in the loss of valuable agricultural land.

2.14 Finally, in respect of Policies H1, H2 and H3, all of the above comments are based on our interpretation of the Submission Version Core Strategy when compared to the October 2008 Version of the Core Strategy. Without the ability to undertake a detailed assessment of the Council's SHLAA, it is not possible to clarify the proposed Core Strategy position regarding the proposed direction of growth proposed for the settlements in the District. As such, Swan Hill reserves the right to make additional representations regarding the proposed Policies H1, H2 and H3 following the publication of the SHLAA in due course.

Policy H4 - Affordable Housing

2.15 In general terms, Swan Hill supports the approach taken by the Council towards the provision of affordable housing for new residential developments. The Policy accords with the advice of National Policy and is therefore considered sound by Swan Hill.

Policy H5 - Dwelling Types

2.16 Swan Hill supports the policy provision of H5, and considers that the approach taken by the Council for this policy represents a suitably flexible alternative to stipulating percentages of dwelling mix, sought by some local authorities. The Policy accords with the advice of National Policy and is therefore considered sound by Swan Hill.

Policy H6 - Lifetime Homes

2.17 In regard to this policy, Swan Hill objects to the Council's policy where all new dwellings should be provided to the Lifetime Homes Standard. Whilst it is acknowledged that the UK has an aging population, Swan Hill considers that seeking to provide Lifetime Homes on all sites is considered to be overly onerous for proposed developers, particularly when considering the requirement for all car parking spaces to be suitable for disabled users, which could result in more schemes becoming unviable. Therefore, the provision of a percentage of Lifetime Homes should be considered through negotiations with the Council at the planning application stage, and should be determined on a case-by-case basis.

3.0 Character of Place: Policy CP1 - Design

16886 Support

CHAPTER 9 Policy CLT5 - Open Space

3.1 The Town and Country Planning (General Development Procedure) Order 1995 (As Amended) makes the submission of a Design and Access Statement for most types of planning applications a Statutory requirement, and as such, the provision of a Design Brief represents a pre-requisite of all major planning applications.

3.2 Policy CP1 seeks to ensure the provision of good, high quality developments that reflect local characteristics and distinctiveness, this ideology is supported by Swan Hill.

4.0 The Green Belt:
Policy GB1 - Green Belt Protection

4.1 Following the amendments to the wording of the Policy since the October 2008 Preferred Options Core Strategy, Swan Hill is now generally supportive of Policy GB1 and its supporting text. However, as expressed above, it is important that where alterations to the Green Belt boundary occur as a result of the extension of the settlements to meet the strategic housing requirement, both the minimal amount of land is taken and where that land is taken for development, it represents the best available land which has a minimal impact of the wider openness characteristic of the Green Belt.

5.0 Environmental Issues:
Policy ENV3 - Flood Risk

5.1 Swan Hill generally supports the approach set out in Policy ENV3 regarding ensuring development accords with the sequential test of PPS25. The Policy accords with the advice of National Policy and is therefore considered sound by Swan Hill.

Policy ENV4 - Sustainable Drainage Systems (SUDS)

5.2 Following the revisions from the October 2008 Preferred Options Core Strategy, Swan Hill now generally supports the approach set out in Policy ENV4. The Policy accords with the advice of National Policy and is therefore considered sound by Swan Hill.

Policy ENV8 - On-site Renewable and Low Carbon Energy Generation

5.3 Whilst Swan Hill recognises the importance of reducing carbon emissions, particularly in new housing developments, and the role this can play in reducing the nations overall Greenhouse emissions. As such Swan Hill is generally supportive of Policy ENV8. It is noted that Policy ENG1 of the East of England Plan sets out a threshold of developments comprising 10 or more dwellings. Swan Hill consider it important for the District Council to justify the reduction in the threshold level.

5.4 Further, no assessment of Policy ENV8 has been set out in the Sustainability Appraisal which justifies the change in threshold from that of Policy ENG1 of the RSS.

Policy ENV9 - Code for Sustainable Homes

5.5 Following the revisions from the October 2008 Preferred Options Core Strategy, Swan Hill now generally supports the approach set out in Policy ENV9. The Policy accords with the advice of National Policy and is therefore considered sound by Swan Hill.

6.0 Community Infrastructure, Leisure and Tourism:
Policy CLT1 - Planning Obligations and Standard Charges

6.1 Swan Hill generally supports the overall approach the Council has taken in Policy CLT1. It is considered Policy CLT1 sets out a degree of flexibility to ensure that all sites are considered on a site-by-site basis, assessing the individual merits of each planning application, in order to ensure the levels of contributions applicable meet the five tests of Circular 05/05. The Policy accords with the advice of National Policy and is therefore considered sound by Swan Hill.

Policies CLT5 - Open Space;
CLT7 - Play Space;
CLT8 - Youth Facilities; and,
CLT10 - Playing Pitches

6.2 Swan Hill supports the need for new residential developments to incorporate a degree of new publicly accessible open space, children's play space, youth facilities and playing pitches, and as such, generally supports the policy approaches taken by the Council.

6.3 However, it is important that whilst the Council may seek to undertake an assessment of providing standard charges for new development, which, as set out in Policy CLT1, this should be based on thorough public consultation and consideration and sound justification. Swan Hill consider that within the provision of a standard charge, it is important that such provision allows for a degree of flexibility to ensure that each site is assessed individually and on its own merits. This is particularly important for those sites close to existing open spaces and facilities. As such, the levels of

16886 Support

CHAPTER 9 Policy CLT5 - Open Space

open space and recreation facilities required in the 'standard charge' should be based on an up-to-date PPG17 Open Space assessment, which should be used to form a key consideration in the levels of provision likely to be required in the standard charge system proposed.

7.0 Transport: Policy T1 - Highways

7.1 Swan Hill supports the overall objectives set out in Policy T1 requiring developments to be located and designed to reduce the reliance on the private car and to meet the infrastructure needs generated by development or seek to help achieve these needs is acceptable in principle.

7.2 Swan Hill recognises the importance of providing sufficient infrastructure provision to meet the requirements of development, and that where developments have insufficient consideration of impact on existing infrastructure, they should be considered unacceptable and contrary to National policy guidance. However, Swan Hill considers it important to emphasise that the developer's role should not be seen as a means to meet existing shortfalls in provision.

Policy T3 - Public Transport

7.3 Swan Hill is generally supportive of the policy approach set out in T3, however, as set out in paragraph 7.2 above, it is important that the District Council do not consider that it is the developer's responsibility to resolve existing shortfalls in provision of public transport, and any contribution towards additional public transportation provision should only be to mitigate against the additional level of demand likely from the development proposed.

Policy T5 - Cycling and Walking

7.4 Swan Hill supports the general approach to this policy, as Swan Hill recognises the importance of promoting the use of alternatives to the private car. The policy provision acknowledges the need to ensure relevant contributions in the event of additional travel demands generated by individual developments, whilst also setting out additional aspirations for the cycle network in the District.

7.5 As such, Swan Hill considers this policy accords with the advice of National Policy and is therefore considered sound by Swan Hill.

Policy T8 - Parking Standards

7.6 The Council has recently (January 2007) adopted SPD on the requirements for parking standards, and as such, Swan Hill generally supports the policy approach chosen by the Council. As set out in the SPD, whilst Swan Hill generally supports the approach taken by the District Council towards setting residential parking standards, in that the Council has recognised that in the suburban areas, even with some access to public transport, the majority of residents will rely on the use of private cars. However, Swan Hill has concerns over the failure of the District Council to comply with the provisions of PPG13: Transport (2001) which sets out that Local Planning Authorities should not set minimum standards for car parking. Whilst it is acknowledged that PPS3 sets out provision for the consideration of local circumstances, it is considered that the Council has not justified this deviation from PPG13's maximum standard.

7.7 Whilst it is acknowledged that such justification may become apparent through the work currently being undertaken by Essex County Council, until such time, the District Council should only seek to apply the maximum standards indicated in PPG13. However, Swan Hill recommends that the District Council make provisions in the wording of the Policy to allow for changes in the event that future policy on car parking standards need to reflect the County standard, following the completion of the County Council review.

8.0 Economic Development: Policies ED3 - Existing Employment Land ED4 - Future Employment Allocations

8.1 In respect of Policies ED3 and ED4, Swan Hill notes that they have changed considerably since the October 2008 Preferred Options document, in that they are site specific regarding the location of the proposed redevelopment of existing employment sites. These four sites are also identified in Policy H1 - Efficient Use of Land, and in general, Swan Hill supports the approach to the redevelopment of these sites (where feasible) based on the assessments of the sites set out in this version of the Core Strategy.

8.2 However, Swan Hill has concerns that these policies might not be considered suitably sound given that insufficient opportunity has been allocated for consultation on their redevelopment. Without the SHLAA being publically available prior to the consultation on this Core Strategy, an insufficient evidence base has been provided to corroborate that these sites are neither suitable or deliverable to meet the test of soundness requirements.

Full Text: Core Strategy Submission

Thank you for your email of 21 September consulting The Theatres Trust on the Core Strategy Submission.

The Theatres Trust is the national advisory public body for theatres and a statutory consultee on planning applications affecting land on which there is a theatre. This applies to all theatre buildings, old and new, in current use, in other uses, or disused. Established by The Theatres Trust Act 1976 'to promote the better protection of theatres', our main objective is to safeguard theatre use, or the potential for such use but we also provide expert advice on design, conservation, property and planning matters to theatre operators, local authorities and official bodies.

Due to the specific nature of the Trust's remit we are concerned with the protection and promotion of theatres and therefore anticipate policies relating to cultural facilities.

Tests of Soundness

We do not find this document to be sound as it does not reflect your Cultural Strategy which is listed as a District Strategy on page 23, nor do we believe it will be effective.

Reasons

The Core Strategy does not address the issues raised in the Cultural Strategy:

Cultural Strategy page 5 - We have already mentioned that culture affects us all on a daily basis, so it is essential that we do not leave future developments to chance. By creating this strategy and continuing the evaluation and development of the action plans, we can ensure that all gaps in provision, opportunities, demands and aspirations, priorities and partners, are identified and acted upon.

Cultural Strategy page 12 - Lack of cultural facilities in the district was also highlighted, including no specific museum or live music and performance focused space, as well as a frustration regarding the lack of cohesive communication about all opportunities in the district.

Policy CLT9 Leisure Facilities only deals with sport and recreation, according to the accompanying text. Policy CLT6 Community Facilities does not include a description of what facilities are included in the policy and there is no Glossary for the document. It is therefore unclear where the issue of the lack of cultural facilities is attended to in the document. The most likely location for cultural facilities would be Rayleigh Town Centre but its Policy RTC4 only states that an Area Action Plan will provide a range of evening uses. The deferring of development implementations to subsequent planning documents places the reliance on these other documents to make the important decisions. The Core Strategy will set the scene for more detailed guidance but should be able to stand on its own.

The document lacks a clear spatial focus and there are few specifics as to the scale of development, the range and mix of uses, how they relate to each other and the infrastructure necessary to achieve this.

Core Strategy Submission Document

16564 Object

CHAPTER 9 Policy CLT6 - Community Facilities

The policies seem to be a set of generalities lacking any real analysis of the area and the key challenges facing the District. The wording of policies needs to be robust and clear because of the way they determine whether or not, and how development can take place.

1.0 Instruction and Introduction

1.1 Charles Planning Associates Limited (Chartered Town Planners) is Instructed by Swan Hill Homes Limited (Swan Hill) to prepare and submit representations on their behalf in respect of the Rochford District Local Development Framework: Core Strategy Submission (September 2009) Development Plan Document.

1.2 The comments refer to the relevant sections and policy designations in the Submission document, as appropriate.

1.3 The comments set out in this submission are intended to assist the District Council in taking forward its Local Development Framework. It is our intention to continue to be involved in the LDF preparation process and we look forward to the opportunity to comment further at the Examination to the Core Strategy.

1.4 If you have any queries regarding the content of this submission then please do not hesitate to contact:

Peter Kneen BSc (Hons) MSc MRTPI
Planner

2.0 Housing:
Policy H1 - The Efficient Use of Land for Housing

2.1 Swan Hill recognises the importance of seeking to concentrate new developments mainly in the existing urban areas, on previously developed land where possible, particularly in view of the Government seeking to ensure 60% of all such new developments are on previously development land (PDL).

2.2 However, given the character of the District, and the strategic housing requirement of the East of England Plan, Swan Hill supports the approach that the Council must also make provision for additional development on the edge of existing settlements on greenfield sites, particularly in the most sustainable locations. As such, Swan Hill supports that where feasible, the redevelopment of existing employment sites for residential/employment purposes can make a contribution towards the strategic housing requirement, provided that sufficient additional employment land is brought forward to ensure the stability of employment levels in the District, and to ensure employment growth meets the East of England Plan requirements.

2.3 Swan Hill considers that Policy H1 should include consideration that new extensions to existing settlements have regard to their potential impact on the wider characteristics and openness objectives of the Green Belt.

Policy H2 - Extensions to Residential Envelopes and Phasing

2.4 Swan Hill generally supports the approach taken by the Council in this policy. As set out above, Swan Hill consider the Council's acknowledgment that housing requirements should be met through the allocation of land on the edge of the existing settlements is the most suitable way forward to meeting the Council's strategic housing requirement and complies with the advice in PPS3.

2.5 The need for suitable greenfield urban extensions represents the best way forward for the Council to meet its strategic housing requirement, as set out in the East of England Plan. Swan Hill supports the recognition that the potential supply of alternative previously developed sites is limited, without detrimentally affecting the character of the District, and therefore the best way forward is the use of sustainable greenfield urban extensions to the existing settlements of the District.

2.6 However, Swan Hill consider that a fundamental consideration that the District Council should consider relates to the potential impact of the urban extensions on the Green Belt policy has been somewhat overlooked. The wider sustainability credentials of the settlements of the District should only be one of many key considerations for determining the level of expansion. In view of the proximity of Southend-on-Sea to all the main settlements of the District, and the influence this has on the likely location many people would travel for employment and leisure, sustainability of many of the settlements is not a key overarching factor, and greater weight should be placed on the potential impact on the openness of the Green Belt, as this cannot be remedied if development occurs in the wrong location.

2.7 As such, Swan Hill considers that determining the location of growth for the main settlements should be to identify

16887 Support

CHAPTER 9 Policy CLT7 - Play Space

those locations where the impact on the wider setting of the Green Belt can be minimised. Further justification for those general locations chosen should be identified in Policy H2. In this regard, Swan Hill has serious concerns regarding the removal of Land South West of Great Wakering as a viable option for the growth of the settlement. The development of this area of Great Wakering, in addition to the potential redevelopment of the Star Lane Industrial Estate could provide a more comprehensive development, whilst ensuring that the wider openness of the Green Belt is maintained. Land South West of Great Wakering is significantly better placed to limit the impact on the wider Green Belt than Land West of Great Wakering, and could contribute to the provision of an important amenity and wildlife site for the local community.

2.8 In addition, Swan Hill consider that the Council now has no reserve provision in the event that any of the existing employment sites set out in Policy H1 fail to come forward for development within the envisaged timescale. Further, Land West of Great Wakering has not been identified in the SHLAA as a deliverable site to help meet the strategic housing requirement, contrary to the requirement set out in PPS3.

2.9 As such, Swan Hill would support the provision of suitable sites which could be safeguarded for future development in the likelihood of a shortfall in supply.

Policy H3 - Extensions to Residential Envelopes Post 2021

2.10 As set out above, Swan Hill supports the overall approach the Council has taken towards the provision of sustainable urban extensions as a suitable means of meeting their strategic housing requirement. However, as set out for Policy H2 above, Swan Hill has serious concerns regarding the removal of several proposed sites set out in the October 2008 Preferred Options Core Strategy, without any guarantee of the ability to deliver those sites set out in Policy H1.

2.11 As also considered above, the inclusion of West of Great Wakering for 250 dwellings should not be included ahead of South West of Great Wakering, in view of the fact that the site is not identified in the SHLAA as available, suitable and achievable as required by PPS3, and thus is not supported by a robust and creditable evidence base for its inclusion as a strategic site for development.

2.12 Whilst Swan Hill acknowledge that alterations to Policy H1 has resulted in the removal of some locations for growth in Policy H3 (as set out in the Sustainability Appraisal), Swan Hill does not consider that the most appropriate locations have been chosen.

2.13 In addition to the matters raised above, the use of West of Great Wakering would also result in the loss of valuable agricultural land, which clearly in a Green Belt location, should be less suitable for development than other sites, such as South West of Great Wakering, which would have limited impact on the wider Green Belt policy, and not result in the loss of valuable agricultural land.

2.14 Finally, in respect of Policies H1, H2 and H3, all of the above comments are based on our interpretation of the Submission Version Core Strategy when compared to the October 2008 Version of the Core Strategy. Without the ability to undertake a detailed assessment of the Council's SHLAA, it is not possible to clarify the proposed Core Strategy position regarding the proposed direction of growth proposed for the settlements in the District. As such, Swan Hill reserves the right to make additional representations regarding the proposed Policies H1, H2 and H3 following the publication of the SHLAA in due course.

Policy H4 - Affordable Housing

2.15 In general terms, Swan Hill supports the approach taken by the Council towards the provision of affordable housing for new residential developments. The Policy accords with the advice of National Policy and is therefore considered sound by Swan Hill.

Policy H5 - Dwelling Types

2.16 Swan Hill supports the policy provision of H5, and considers that the approach taken by the Council for this policy represents a suitably flexible alternative to stipulating percentages of dwelling mix, sought by some local authorities. The Policy accords with the advice of National Policy and is therefore considered sound by Swan Hill.

Policy H6 - Lifetime Homes

2.17 In regard to this policy, Swan Hill objects to the Council's policy where all new dwellings should be provided to the Lifetime Homes Standard. Whilst it is acknowledged that the UK has an aging population, Swan Hill considers that seeking to provide Lifetime Homes on all sites is considered to be overly onerous for proposed developers, particularly when considering the requirement for all car parking spaces to be suitable for disabled users, which could result in more schemes becoming unviable. Therefore, the provision of a percentage of Lifetime Homes should be considered through negotiations with the Council at the planning application stage, and should be determined on a case-by-case basis.

3.0 Character of Place: Policy CP1 - Design

16887 Support

CHAPTER 9 Policy CLT7 - Play Space

3.1 The Town and Country Planning (General Development Procedure) Order 1995 (As Amended) makes the submission of a Design and Access Statement for most types of planning applications a Statutory requirement, and as such, the provision of a Design Brief represents a pre-requisite of all major planning applications.

3.2 Policy CP1 seeks to ensure the provision of good, high quality developments that reflect local characteristics and distinctiveness, this ideology is supported by Swan Hill.

4.0 The Green Belt:
Policy GB1 - Green Belt Protection

4.1 Following the amendments to the wording of the Policy since the October 2008 Preferred Options Core Strategy, Swan Hill is now generally supportive of Policy GB1 and its supporting text. However, as expressed above, it is important that where alterations to the Green Belt boundary occur as a result of the extension of the settlements to meet the strategic housing requirement, both the minimal amount of land is taken and where that land is taken for development, it represents the best available land which has a minimal impact of the wider openness characteristic of the Green Belt.

5.0 Environmental Issues:
Policy ENV3 - Flood Risk

5.1 Swan Hill generally supports the approach set out in Policy ENV3 regarding ensuring development accords with the sequential test of PPS25. The Policy accords with the advice of National Policy and is therefore considered sound by Swan Hill.

Policy ENV4 - Sustainable Drainage Systems (SUDS)

5.2 Following the revisions from the October 2008 Preferred Options Core Strategy, Swan Hill now generally supports the approach set out in Policy ENV4. The Policy accords with the advice of National Policy and is therefore considered sound by Swan Hill.

Policy ENV8 - On-site Renewable and Low Carbon Energy Generation

5.3 Whilst Swan Hill recognises the importance of reducing carbon emissions, particularly in new housing developments, and the role this can play in reducing the nations overall Greenhouse emissions. As such Swan Hill is generally supportive of Policy ENV8. It is noted that Policy ENG1 of the East of England Plan sets out a threshold of developments comprising 10 or more dwellings. Swan Hill consider it important for the District Council to justify the reduction in the threshold level.

5.4 Further, no assessment of Policy ENV8 has been set out in the Sustainability Appraisal which justifies the change in threshold from that of Policy ENG1 of the RSS.

Policy ENV9 - Code for Sustainable Homes

5.5 Following the revisions from the October 2008 Preferred Options Core Strategy, Swan Hill now generally supports the approach set out in Policy ENV9. The Policy accords with the advice of National Policy and is therefore considered sound by Swan Hill.

6.0 Community Infrastructure, Leisure and Tourism:
Policy CLT1 - Planning Obligations and Standard Charges

6.1 Swan Hill generally supports the overall approach the Council has taken in Policy CLT1. It is considered Policy CLT1 sets out a degree of flexibility to ensure that all sites are considered on a site-by-site basis, assessing the individual merits of each planning application, in order to ensure the levels of contributions applicable meet the five tests of Circular 05/05. The Policy accords with the advice of National Policy and is therefore considered sound by Swan Hill.

Policies CLT5 - Open Space;
CLT7 - Play Space;
CLT8 - Youth Facilities; and,
CLT10 - Playing Pitches

6.2 Swan Hill supports the need for new residential developments to incorporate a degree of new publicly accessible open space, children's play space, youth facilities and playing pitches, and as such, generally supports the policy approaches taken by the Council.

6.3 However, it is important that whilst the Council may seek to undertake an assessment of providing standard charges for new development, which, as set out in Policy CLT1, this should be based on thorough public consultation and consideration and sound justification. Swan Hill consider that within the provision of a standard charge, it is important that such provision allows for a degree of flexibility to ensure that each site is assessed individually and on its own merits. This is particularly important for those sites close to existing open spaces and facilities. As such, the levels of

16887 Support

CHAPTER 9 Policy CLT7 - Play Space

open space and recreation facilities required in the 'standard charge' should be based on an up-to-date PPG17 Open Space assessment, which should be used to form a key consideration in the levels of provision likely to be required in the standard charge system proposed.

7.0 Transport: Policy T1 - Highways

7.1 Swan Hill supports the overall objectives set out in Policy T1 requiring developments to be located and designed to reduce the reliance on the private car and to meet the infrastructure needs generated by development or seek to help achieve these needs is acceptable in principle.

7.2 Swan Hill recognises the importance of providing sufficient infrastructure provision to meet the requirements of development, and that where developments have insufficient consideration of impact on existing infrastructure, they should be considered unacceptable and contrary to National policy guidance. However, Swan Hill considers it important to emphasise that the developer's role should not be seen as a means to meet existing shortfalls in provision.

Policy T3 - Public Transport

7.3 Swan Hill is generally supportive of the policy approach set out in T3, however, as set out in paragraph 7.2 above, it is important that the District Council do not consider that it is the developer's responsibility to resolve existing shortfalls in provision of public transport, and any contribution towards additional public transportation provision should only be to mitigate against the additional level of demand likely from the development proposed.

Policy T5 - Cycling and Walking

7.4 Swan Hill supports the general approach to this policy, as Swan Hill recognises the importance of promoting the use of alternatives to the private car. The policy provision acknowledges the need to ensure relevant contributions in the event of additional travel demands generated by individual developments, whilst also setting out additional aspirations for the cycle network in the District.

7.5 As such, Swan Hill considers this policy accords with the advice of National Policy and is therefore considered sound by Swan Hill.

Policy T8 - Parking Standards

7.6 The Council has recently (January 2007) adopted SPD on the requirements for parking standards, and as such, Swan Hill generally supports the policy approach chosen by the Council. As set out in the SPD, whilst Swan Hill generally supports the approach taken by the District Council towards setting residential parking standards, in that the Council has recognised that in the suburban areas, even with some access to public transport, the majority of residents will rely on the use of private cars. However, Swan Hill has concerns over the failure of the District Council to comply with the provisions of PPG13: Transport (2001) which sets out that Local Planning Authorities should not set minimum standards for car parking. Whilst it is acknowledged that PPS3 sets out provision for the consideration of local circumstances, it is considered that the Council has not justified this deviation from PPG13's maximum standard.

7.7 Whilst it is acknowledged that such justification may become apparent through the work currently being undertaken by Essex County Council, until such time, the District Council should only seek to apply the maximum standards indicated in PPG13. However, Swan Hill recommends that the District Council make provisions in the wording of the Policy to allow for changes in the event that future policy on car parking standards need to reflect the County standard, following the completion of the County Council review.

8.0 Economic Development: Policies ED3 - Existing Employment Land ED4 - Future Employment Allocations

8.1 In respect of Policies ED3 and ED4, Swan Hill notes that they have changed considerably since the October 2008 Preferred Options document, in that they are site specific regarding the location of the proposed redevelopment of existing employment sites. These four sites are also identified in Policy H1 - Efficient Use of Land, and in general, Swan Hill supports the approach to the redevelopment of these sites (where feasible) based on the assessments of the sites set out in this version of the Core Strategy.

8.2 However, Swan Hill has concerns that these policies might not be considered suitably sound given that insufficient opportunity has been allocated for consultation on their redevelopment. Without the SHLAA being publically available prior to the consultation on this Core Strategy, an insufficient evidence base has been provided to corroborate that these sites are neither suitable or deliverable to meet the test of soundness requirements.

Summary:

Policies CLT5 - Open Space;
CLT7 - Play Space;
CLT8 - Youth Facilities; and,
CLT10 - Playing Pitches

Core Strategy Submission Document

S - 16887 - 8329 - Policy CLT7 - Play Space - None

16887 Support

CHAPTER 9 Policy CLT7 - Play Space

6.2 Swan Hill supports the need for new residential developments to incorporate a degree of new publicly accessible open space, children's play space, youth facilities and playing pitches, and as such, generally supports the policy approaches taken by the Council.

6.3 However, it is important that whilst the Council may seek to undertake an assessment of providing standard charges for new development, which, as set out in Policy CLT1, this should be based on thorough public consultation and consideration and sound justification. Swan Hill consider that within the provision of a standard charge, it is important that such provision allows for a degree of flexibility to ensure that each site is assessed individually and on its own merits. This is particularly important for those sites close to existing open spaces and facilities. As such, the levels of open space and recreation facilities required in the 'standard charge' should be based on an up-to-date PPG17 Open Space assessment, which should be used to form a key consideration in the levels of provision likely to be required in the standard charge system proposed.

1.0 Instruction and Introduction

1.1 Charles Planning Associates Limited (Chartered Town Planners) is Instructed by Swan Hill Homes Limited (Swan Hill) to prepare and submit representations on their behalf in respect of the Rochford District Local Development Framework: Core Strategy Submission (September 2009) Development Plan Document.

1.2 The comments refer to the relevant sections and policy designations in the Submission document, as appropriate.

1.3 The comments set out in this submission are intended to assist the District Council in taking forward its Local Development Framework. It is our intention to continue to be involved in the LDF preparation process and we look forward to the opportunity to comment further at the Examination to the Core Strategy.

1.4 If you have any queries regarding the content of this submission then please do not hesitate to contact:

Peter Kneen BSc (Hons) MSc MRTPI
Planner

2.0 Housing:
Policy H1 - The Efficient Use of Land for Housing

2.1 Swan Hill recognises the importance of seeking to concentrate new developments mainly in the existing urban areas, on previously developed land where possible, particularly in view of the Government seeking to ensure 60% of all such new developments are on previously development land (PDL).

2.2 However, given the character of the District, and the strategic housing requirement of the East of England Plan, Swan Hill supports the approach that the Council must also make provision for additional development on the edge of existing settlements on greenfield sites, particularly in the most sustainable locations. As such, Swan Hill supports that where feasible, the redevelopment of existing employment sites for residential/employment purposes can make a contribution towards the strategic housing requirement, provided that sufficient additional employment land is brought forward to ensure the stability of employment levels in the District, and to ensure employment growth meets the East of England Plan requirements.

2.3 Swan Hill considers that Policy H1 should include consideration that new extensions to existing settlements have regard to their potential impact on the wider characteristics and openness objectives of the Green Belt.

Policy H2 - Extensions to Residential Envelopes and Phasing

2.4 Swan Hill generally supports the approach taken by the Council in this policy. As set out above, Swan Hill consider the Council's acknowledgment that housing requirements should be met through the allocation of land on the edge of the existing settlements is the most suitable way forward to meeting the Council's strategic housing requirement and complies with the advice in PPS3.

2.5 The need for suitable greenfield urban extensions represents the best way forward for the Council to meet its strategic housing requirement, as set out in the East of England Plan. Swan Hill supports the recognition that the potential supply of alternative previously developed sites is limited, without detrimentally affecting the character of the District, and therefore the best way forward is the use of sustainable greenfield urban extensions to the existing settlements of the District.

2.6 However, Swan Hill consider that a fundamental consideration that the District Council should consider relates to the potential impact of the urban extensions on the Green Belt policy has been somewhat overlooked. The wider sustainability credentials of the settlements of the District should only be one of many key considerations for determining the level of expansion. In view of the proximity of Southend-on-Sea to all the main settlements of the District, and the influence this has on the likely location many people would travel for employment and leisure, sustainability of many of the settlements is not a key overarching factor, and greater weight should be placed on the potential impact on the openness of the Green Belt, as this cannot be remedied if development occurs in the wrong location.

2.7 As such, Swan Hill considers that determining the location of growth for the main settlements should be to identify

16888 Support

CHAPTER 9 Policy CLT8 - Youth Facilities

those locations where the impact on the wider setting of the Green Belt can be minimised. Further justification for those general locations chosen should be identified in Policy H2. In this regard, Swan Hill has serious concerns regarding the removal of Land South West of Great Wakering as a viable option for the growth of the settlement. The development of this area of Great Wakering, in addition to the potential redevelopment of the Star Lane Industrial Estate could provide a more comprehensive development, whilst ensuring that the wider openness of the Green Belt is maintained. Land South West of Great Wakering is significantly better placed to limit the impact on the wider Green Belt than Land West of Great Wakering, and could contribute to the provision of an important amenity and wildlife site for the local community.

2.8 In addition, Swan Hill consider that the Council now has no reserve provision in the event that any of the existing employment sites set out in Policy H1 fail to come forward for development within the envisaged timescale. Further, Land West of Great Wakering has not been identified in the SHLAA as a deliverable site to help meet the strategic housing requirement, contrary to the requirement set out in PPS3.

2.9 As such, Swan Hill would support the provision of suitable sites which could be safeguarded for future development in the likelihood of a shortfall in supply.

Policy H3 - Extensions to Residential Envelopes Post 2021

2.10 As set out above, Swan Hill supports the overall approach the Council has taken towards the provision of sustainable urban extensions as a suitable means of meeting their strategic housing requirement. However, as set out for Policy H2 above, Swan Hill has serious concerns regarding the removal of several proposed sites set out in the October 2008 Preferred Options Core Strategy, without any guarantee of the ability to deliver those sites set out in Policy H1.

2.11 As also considered above, the inclusion of West of Great Wakering for 250 dwellings should not be included ahead of South West of Great Wakering, in view of the fact that the site is not identified in the SHLAA as available, suitable and achievable as required by PPS3, and thus is not supported by a robust and creditable evidence base for its inclusion as a strategic site for development.

2.12 Whilst Swan Hill acknowledge that alterations to Policy H1 has resulted in the removal of some locations for growth in Policy H3 (as set out in the Sustainability Appraisal), Swan Hill does not consider that the most appropriate locations have been chosen.

2.13 In addition to the matters raised above, the use of West of Great Wakering would also result in the loss of valuable agricultural land, which clearly in a Green Belt location, should be less suitable for development than other sites, such as South West of Great Wakering, which would have limited impact on the wider Green Belt policy, and not result in the loss of valuable agricultural land.

2.14 Finally, in respect of Policies H1, H2 and H3, all of the above comments are based on our interpretation of the Submission Version Core Strategy when compared to the October 2008 Version of the Core Strategy. Without the ability to undertake a detailed assessment of the Council's SHLAA, it is not possible to clarify the proposed Core Strategy position regarding the proposed direction of growth proposed for the settlements in the District. As such, Swan Hill reserves the right to make additional representations regarding the proposed Policies H1, H2 and H3 following the publication of the SHLAA in due course.

Policy H4 - Affordable Housing

2.15 In general terms, Swan Hill supports the approach taken by the Council towards the provision of affordable housing for new residential developments. The Policy accords with the advice of National Policy and is therefore considered sound by Swan Hill.

Policy H5 - Dwelling Types

2.16 Swan Hill supports the policy provision of H5, and considers that the approach taken by the Council for this policy represents a suitably flexible alternative to stipulating percentages of dwelling mix, sought by some local authorities. The Policy accords with the advice of National Policy and is therefore considered sound by Swan Hill.

Policy H6 - Lifetime Homes

2.17 In regard to this policy, Swan Hill objects to the Council's policy where all new dwellings should be provided to the Lifetime Homes Standard. Whilst it is acknowledged that the UK has an aging population, Swan Hill considers that seeking to provide Lifetime Homes on all sites is considered to be overly onerous for proposed developers, particularly when considering the requirement for all car parking spaces to be suitable for disabled users, which could result in more schemes becoming unviable. Therefore, the provision of a percentage of Lifetime Homes should be considered through negotiations with the Council at the planning application stage, and should be determined on a case-by-case basis.

3.0 Character of Place: Policy CP1 - Design

16888 Support

CHAPTER 9 Policy CLT8 - Youth Facilities

3.1 The Town and Country Planning (General Development Procedure) Order 1995 (As Amended) makes the submission of a Design and Access Statement for most types of planning applications a Statutory requirement, and as such, the provision of a Design Brief represents a pre-requisite of all major planning applications.

3.2 Policy CP1 seeks to ensure the provision of good, high quality developments that reflect local characteristics and distinctiveness, this ideology is supported by Swan Hill.

4.0 The Green Belt:
Policy GB1 - Green Belt Protection

4.1 Following the amendments to the wording of the Policy since the October 2008 Preferred Options Core Strategy, Swan Hill is now generally supportive of Policy GB1 and its supporting text. However, as expressed above, it is important that where alterations to the Green Belt boundary occur as a result of the extension of the settlements to meet the strategic housing requirement, both the minimal amount of land is taken and where that land is taken for development, it represents the best available land which has a minimal impact of the wider openness characteristic of the Green Belt.

5.0 Environmental Issues:
Policy ENV3 - Flood Risk

5.1 Swan Hill generally supports the approach set out in Policy ENV3 regarding ensuring development accords with the sequential test of PPS25. The Policy accords with the advice of National Policy and is therefore considered sound by Swan Hill.

Policy ENV4 - Sustainable Drainage Systems (SUDS)

5.2 Following the revisions from the October 2008 Preferred Options Core Strategy, Swan Hill now generally supports the approach set out in Policy ENV4. The Policy accords with the advice of National Policy and is therefore considered sound by Swan Hill.

Policy ENV8 - On-site Renewable and Low Carbon Energy Generation

5.3 Whilst Swan Hill recognises the importance of reducing carbon emissions, particularly in new housing developments, and the role this can play in reducing the nations overall Greenhouse emissions. As such Swan Hill is generally supportive of Policy ENV8. It is noted that Policy ENG1 of the East of England Plan sets out a threshold of developments comprising 10 or more dwellings. Swan Hill consider it important for the District Council to justify the reduction in the threshold level.

5.4 Further, no assessment of Policy ENV8 has been set out in the Sustainability Appraisal which justifies the change in threshold from that of Policy ENG1 of the RSS.

Policy ENV9 - Code for Sustainable Homes

5.5 Following the revisions from the October 2008 Preferred Options Core Strategy, Swan Hill now generally supports the approach set out in Policy ENV9. The Policy accords with the advice of National Policy and is therefore considered sound by Swan Hill.

6.0 Community Infrastructure, Leisure and Tourism:
Policy CLT1 - Planning Obligations and Standard Charges

6.1 Swan Hill generally supports the overall approach the Council has taken in Policy CLT1. It is considered Policy CLT1 sets out a degree of flexibility to ensure that all sites are considered on a site-by-site basis, assessing the individual merits of each planning application, in order to ensure the levels of contributions applicable meet the five tests of Circular 05/05. The Policy accords with the advice of National Policy and is therefore considered sound by Swan Hill.

Policies CLT5 - Open Space;
CLT7 - Play Space;
CLT8 - Youth Facilities; and,
CLT10 - Playing Pitches

6.2 Swan Hill supports the need for new residential developments to incorporate a degree of new publicly accessible open space, children's play space, youth facilities and playing pitches, and as such, generally supports the policy approaches taken by the Council.

6.3 However, it is important that whilst the Council may seek to undertake an assessment of providing standard charges for new development, which, as set out in Policy CLT1, this should be based on thorough public consultation and consideration and sound justification. Swan Hill consider that within the provision of a standard charge, it is important that such provision allows for a degree of flexibility to ensure that each site is assessed individually and on its own merits. This is particularly important for those sites close to existing open spaces and facilities. As such, the levels of

16888 Support

CHAPTER 9 Policy CLT8 - Youth Facilities

open space and recreation facilities required in the 'standard charge' should be based on an up-to-date PPG17 Open Space assessment, which should be used to form a key consideration in the levels of provision likely to be required in the standard charge system proposed.

7.0 Transport: Policy T1 - Highways

7.1 Swan Hill supports the overall objectives set out in Policy T1 requiring developments to be located and designed to reduce the reliance on the private car and to meet the infrastructure needs generated by development or seek to help achieve these needs is acceptable in principle.

7.2 Swan Hill recognises the importance of providing sufficient infrastructure provision to meet the requirements of development, and that where developments have insufficient consideration of impact on existing infrastructure, they should be considered unacceptable and contrary to National policy guidance. However, Swan Hill considers it important to emphasise that the developer's role should not be seen as a means to meet existing shortfalls in provision.

Policy T3 - Public Transport

7.3 Swan Hill is generally supportive of the policy approach set out in T3, however, as set out in paragraph 7.2 above, it is important that the District Council do not consider that it is the developer's responsibility to resolve existing shortfalls in provision of public transport, and any contribution towards additional public transportation provision should only be to mitigate against the additional level of demand likely from the development proposed.

Policy T5 - Cycling and Walking

7.4 Swan Hill supports the general approach to this policy, as Swan Hill recognises the importance of promoting the use of alternatives to the private car. The policy provision acknowledges the need to ensure relevant contributions in the event of additional travel demands generated by individual developments, whilst also setting out additional aspirations for the cycle network in the District.

7.5 As such, Swan Hill considers this policy accords with the advice of National Policy and is therefore considered sound by Swan Hill.

Policy T8 - Parking Standards

7.6 The Council has recently (January 2007) adopted SPD on the requirements for parking standards, and as such, Swan Hill generally supports the policy approach chosen by the Council. As set out in the SPD, whilst Swan Hill generally supports the approach taken by the District Council towards setting residential parking standards, in that the Council has recognised that in the suburban areas, even with some access to public transport, the majority of residents will rely on the use of private cars. However, Swan Hill has concerns over the failure of the District Council to comply with the provisions of PPG13: Transport (2001) which sets out that Local Planning Authorities should not set minimum standards for car parking. Whilst it is acknowledged that PPS3 sets out provision for the consideration of local circumstances, it is considered that the Council has not justified this deviation from PPG13's maximum standard.

7.7 Whilst it is acknowledged that such justification may become apparent through the work currently being undertaken by Essex County Council, until such time, the District Council should only seek to apply the maximum standards indicated in PPG13. However, Swan Hill recommends that the District Council make provisions in the wording of the Policy to allow for changes in the event that future policy on car parking standards need to reflect the County standard, following the completion of the County Council review.

8.0 Economic Development: Policies ED3 - Existing Employment Land ED4 - Future Employment Allocations

8.1 In respect of Policies ED3 and ED4, Swan Hill notes that they have changed considerably since the October 2008 Preferred Options document, in that they are site specific regarding the location of the proposed redevelopment of existing employment sites. These four sites are also identified in Policy H1 - Efficient Use of Land, and in general, Swan Hill supports the approach to the redevelopment of these sites (where feasible) based on the assessments of the sites set out in this version of the Core Strategy.

8.2 However, Swan Hill has concerns that these policies might not be considered suitably sound given that insufficient opportunity has been allocated for consultation on their redevelopment. Without the SHLAA being publically available prior to the consultation on this Core Strategy, an insufficient evidence base has been provided to corroborate that these sites are neither suitable or deliverable to meet the test of soundness requirements.

Full Text: Core Strategy Submission

Thank you for your email of 21 September consulting The Theatres Trust on the Core Strategy Submission.

The Theatres Trust is the national advisory public body for theatres and a statutory consultee on planning applications affecting land on which there is a theatre. This applies to all theatre buildings, old and new, in current use, in other uses, or disused. Established by The Theatres Trust Act 1976 'to promote the better protection of theatres', our main objective is to safeguard theatre use, or the potential for such use but we also provide expert advice on design, conservation, property and planning matters to theatre operators, local authorities and official bodies.

Due to the specific nature of the Trust's remit we are concerned with the protection and promotion of theatres and therefore anticipate policies relating to cultural facilities.

Tests of Soundness

We do not find this document to be sound as it does not reflect your Cultural Strategy which is listed as a District Strategy on page 23, nor do we believe it will be effective.

Reasons

The Core Strategy does not address the issues raised in the Cultural Strategy:

Cultural Strategy page 5 - We have already mentioned that culture effects us all on a daily basis, so it is essential that we do not leave future developments to chance. By creating this strategy and continuing the evaluation and development of the action plans, we can ensure that all gaps in provision, opportunities, demands and aspirations, priorities and partners, are identified and acted upon.

Cultural Strategy page 12 - Lack of cultural facilities in the district was also highlighted, including no specific museum or live music and performance focused space, as well as a frustration regarding the lack of cohesive communication about all opportunities in the district.

Policy CLT9 Leisure Facilities only deals with sport and recreation, according to the accompanying text. Policy CLT6 Community Facilities does not include a description of what facilities are included in the policy and there is not Glossary for the document. It is therefore unclear where the issue of the lack of cultural facilities is attended to in the document. The most likely location for cultural facilities would be Rayleigh Town Centre but its Policy RTC4 only states that an Area Action Plan will provide a range of evening uses. The deferring of development implementations to subsequent planning documents places the reliance on these other documents to make the important decisions. The Core Strategy will set the scene for more detailed guidance but should be able to stand on its own.

The document lacks a clear spatial focus and there are few specifics as to the scale of development, the range and mix of uses, how they relate to each other and the infrastructure necessary to achieve this.

Core Strategy Submission Document

16563 Object

CHAPTER 9 Policy CLT9 - Leisure Facilities

The policies seem to be a set of generalities lacking any real analysis of the area and the key challenges facing the District. The wording of policies needs to be robust and clear because of the way they determine whether or not, and how development can take place.

Full Text: Does not meet effective or accordance with national policy soundness criteria . This is because reference is made to it being acceptable for playing fields to be developed if it can be demonstrated that the site is not viable for use as playing pitch. However this is ambiguous as unclear what is meant by viable for use and does not accord with PPG17 (para 15) on development affecting playing fields which does not include any criteria relating to viability. This has potential to misinterpreted by developers e.g. any former playing field could be claimed to be unviable.

Summary: Does not meet effective or accordance with national policy soundness criteria . This is because reference is made to it being acceptable for playing fields to be developed if it can be demonstrated that the site is not viable for use as playing pitch. However this is ambiguous as unclear what is meant by viable for use and does not accord with PPG17 (para 15) on development affecting playing fields which does not include any criteria relating to viability. This has potential to misinterpreted by developers e.g. any former playing field could be claimed to be unviable.

Change to Plan Delete reference to the loss of existing playing pitches being resisted unless it can be clearly demonstrated that the site is not viable for use as a playing pitch. Suggest that this is replaced with unless an assessment of playing pitche needs has been undertaken which has clearly shown the playing pitch to be surplus to requirements because this would accord with PPG17 and Sport England playing fields policy and may have been what was intended.

1.0 Instruction and Introduction

1.1 Charles Planning Associates Limited (Chartered Town Planners) is Instructed by Swan Hill Homes Limited (Swan Hill) to prepare and submit representations on their behalf in respect of the Rochford District Local Development Framework: Core Strategy Submission (September 2009) Development Plan Document.

1.2 The comments refer to the relevant sections and policy designations in the Submission document, as appropriate.

1.3 The comments set out in this submission are intended to assist the District Council in taking forward its Local Development Framework. It is our intention to continue to be involved in the LDF preparation process and we look forward to the opportunity to comment further at the Examination to the Core Strategy.

1.4 If you have any queries regarding the content of this submission then please do not hesitate to contact:

Peter Kneen BSc (Hons) MSc MRTPI
Planner

2.0 Housing:
Policy H1 - The Efficient Use of Land for Housing

2.1 Swan Hill recognises the importance of seeking to concentrate new developments mainly in the existing urban areas, on previously developed land where possible, particularly in view of the Government seeking to ensure 60% of all such new developments are on previously development land (PDL).

2.2 However, given the character of the District, and the strategic housing requirement of the East of England Plan, Swan Hill supports the approach that the Council must also make provision for additional development on the edge of existing settlements on greenfield sites, particularly in the most sustainable locations. As such, Swan Hill supports that where feasible, the redevelopment of existing employment sites for residential/employment purposes can make a contribution towards the strategic housing requirement, provided that sufficient additional employment land is brought forward to ensure the stability of employment levels in the District, and to ensure employment growth meets the East of England Plan requirements.

2.3 Swan Hill considers that Policy H1 should include consideration that new extensions to existing settlements have regard to their potential impact on the wider characteristics and openness objectives of the Green Belt.

Policy H2 - Extensions to Residential Envelopes and Phasing

2.4 Swan Hill generally supports the approach taken by the Council in this policy. As set out above, Swan Hill consider the Council's acknowledgment that housing requirements should be met through the allocation of land on the edge of the existing settlements is the most suitable way forward to meeting the Council's strategic housing requirement and complies with the advice in PPS3.

2.5 The need for suitable greenfield urban extensions represents the best way forward for the Council to meet its strategic housing requirement, as set out in the East of England Plan. Swan Hill supports the recognition that the potential supply of alternative previously developed sites is limited, without detrimentally affecting the character of the District, and therefore the best way forward is the use of sustainable greenfield urban extensions to the existing settlements of the District.

2.6 However, Swan Hill consider that a fundamental consideration that the District Council should consider relates to the potential impact of the urban extensions on the Green Belt policy has been somewhat overlooked. The wider sustainability credentials of the settlements of the District should only be one of many key considerations for determining the level of expansion. In view of the proximity of Southend-on-Sea to all the main settlements of the District, and the influence this has on the likely location many people would travel for employment and leisure, sustainability of many of the settlements is not a key overarching factor, and greater weight should be placed on the potential impact on the openness of the Green Belt, as this cannot be remedied if development occurs in the wrong location.

2.7 As such, Swan Hill considers that determining the location of growth for the main settlements should be to identify

Core Strategy Submission Document

S - 16889 - 8329 - Policy CLT10 - Playing Pitches - None

16889 Support

CHAPTER 9 Policy CLT10 - Playing Pitches

those locations where the impact on the wider setting of the Green Belt can be minimised. Further justification for those general locations chosen should be identified in Policy H2. In this regard, Swan Hill has serious concerns regarding the removal of Land South West of Great Wakering as a viable option for the growth of the settlement. The development of this area of Great Wakering, in addition to the potential redevelopment of the Star Lane Industrial Estate could provide a more comprehensive development, whilst ensuring that the wider openness of the Green Belt is maintained. Land South West of Great Wakering is significantly better placed to limit the impact on the wider Green Belt than Land West of Great Wakering, and could contribute to the provision of an important amenity and wildlife site for the local community.

2.8 In addition, Swan Hill consider that the Council now has no reserve provision in the event that any of the existing employment sites set out in Policy H1 fail to come forward for development within the envisaged timescale. Further, Land West of Great Wakering has not been identified in the SHLAA as a deliverable site to help meet the strategic housing requirement, contrary to the requirement set out in PPS3.

2.9 As such, Swan Hill would support the provision of suitable sites which could be safeguarded for future development in the likelihood of a shortfall in supply.

Policy H3 - Extensions to Residential Envelopes Post 2021

2.10 As set out above, Swan Hill supports the overall approach the Council has taken towards the provision of sustainable urban extensions as a suitable means of meeting their strategic housing requirement. However, as set out for Policy H2 above, Swan Hill has serious concerns regarding the removal of several proposed sites set out in the October 2008 Preferred Options Core Strategy, without any guarantee of the ability to deliver those sites set out in Policy H1.

2.11 As also considered above, the inclusion of West of Great Wakering for 250 dwellings should not be included ahead of South West of Great Wakering, in view of the fact that the site is not identified in the SHLAA as available, suitable and achievable as required by PPS3, and thus is not supported by a robust and creditable evidence base for its inclusion as a strategic site for development.

2.12 Whilst Swan Hill acknowledge that alterations to Policy H1 has resulted in the removal of some locations for growth in Policy H3 (as set out in the Sustainability Appraisal), Swan Hill does not consider that the most appropriate locations have been chosen.

2.13 In addition to the matters raised above, the use of West of Great Wakering would also result in the loss of valuable agricultural land, which clearly in a Green Belt location, should be less suitable for development than other sites, such as South West of Great Wakering, which would have limited impact on the wider Green Belt policy, and not result in the loss of valuable agricultural land.

2.14 Finally, in respect of Policies H1, H2 and H3, all of the above comments are based on our interpretation of the Submission Version Core Strategy when compared to the October 2008 Version of the Core Strategy. Without the ability to undertake a detailed assessment of the Council's SHLAA, it is not possible to clarify the proposed Core Strategy position regarding the proposed direction of growth proposed for the settlements in the District. As such, Swan Hill reserves the right to make additional representations regarding the proposed Policies H1, H2 and H3 following the publication of the SHLAA in due course.

Policy H4 - Affordable Housing

2.15 In general terms, Swan Hill supports the approach taken by the Council towards the provision of affordable housing for new residential developments. The Policy accords with the advice of National Policy and is therefore considered sound by Swan Hill.

Policy H5 - Dwelling Types

2.16 Swan Hill supports the policy provision of H5, and considers that the approach taken by the Council for this policy represents a suitably flexible alternative to stipulating percentages of dwelling mix, sought by some local authorities. The Policy accords with the advice of National Policy and is therefore considered sound by Swan Hill.

Policy H6 - Lifetime Homes

2.17 In regard to this policy, Swan Hill objects to the Council's policy where all new dwellings should be provided to the Lifetime Homes Standard. Whilst it is acknowledged that the UK has an aging population, Swan Hill considers that seeking to provide Lifetime Homes on all sites is considered to be overly onerous for proposed developers, particularly when considering the requirement for all car parking spaces to be suitable for disabled users, which could result in more schemes becoming unviable. Therefore, the provision of a percentage of Lifetime Homes should be considered through negotiations with the Council at the planning application stage, and should be determined on a case-by-case basis.

3.0 Character of Place: Policy CP1 - Design

Core Strategy Submission Document

S - 16889 - 8329 - Policy CLT10 - Playing Pitches - None

16889 Support

CHAPTER 9 Policy CLT10 - Playing Pitches

3.1 The Town and Country Planning (General Development Procedure) Order 1995 (As Amended) makes the submission of a Design and Access Statement for most types of planning applications a Statutory requirement, and as such, the provision of a Design Brief represents a pre-requisite of all major planning applications.

3.2 Policy CP1 seeks to ensure the provision of good, high quality developments that reflect local characteristics and distinctiveness, this ideology is supported by Swan Hill.

4.0 The Green Belt:
Policy GB1 - Green Belt Protection

4.1 Following the amendments to the wording of the Policy since the October 2008 Preferred Options Core Strategy, Swan Hill is now generally supportive of Policy GB1 and its supporting text. However, as expressed above, it is important that where alterations to the Green Belt boundary occur as a result of the extension of the settlements to meet the strategic housing requirement, both the minimal amount of land is taken and where that land is taken for development, it represents the best available land which has a minimal impact of the wider openness characteristic of the Green Belt.

5.0 Environmental Issues:
Policy ENV3 - Flood Risk

5.1 Swan Hill generally supports the approach set out in Policy ENV3 regarding ensuring development accords with the sequential test of PPS25. The Policy accords with the advice of National Policy and is therefore considered sound by Swan Hill.

Policy ENV4 - Sustainable Drainage Systems (SUDS)

5.2 Following the revisions from the October 2008 Preferred Options Core Strategy, Swan Hill now generally supports the approach set out in Policy ENV4. The Policy accords with the advice of National Policy and is therefore considered sound by Swan Hill.

Policy ENV8 - On-site Renewable and Low Carbon Energy Generation

5.3 Whilst Swan Hill recognises the importance of reducing carbon emissions, particularly in new housing developments, and the role this can play in reducing the nations overall Greenhouse emissions. As such Swan Hill is generally supportive of Policy ENV8. It is noted that Policy ENG1 of the East of England Plan sets out a threshold of developments comprising 10 or more dwellings. Swan Hill consider it important for the District Council to justify the reduction in the threshold level.

5.4 Further, no assessment of Policy ENV8 has been set out in the Sustainability Appraisal which justifies the change in threshold from that of Policy ENG1 of the RSS.

Policy ENV9 - Code for Sustainable Homes

5.5 Following the revisions from the October 2008 Preferred Options Core Strategy, Swan Hill now generally supports the approach set out in Policy ENV9. The Policy accords with the advice of National Policy and is therefore considered sound by Swan Hill.

6.0 Community Infrastructure, Leisure and Tourism:
Policy CLT1 - Planning Obligations and Standard Charges

6.1 Swan Hill generally supports the overall approach the Council has taken in Policy CLT1. It is considered Policy CLT1 sets out a degree of flexibility to ensure that all sites are considered on a site-by-site basis, assessing the individual merits of each planning application, in order to ensure the levels of contributions applicable meet the five tests of Circular 05/05. The Policy accords with the advice of National Policy and is therefore considered sound by Swan Hill.

Policies CLT5 - Open Space;
CLT7 - Play Space;
CLT8 - Youth Facilities; and,
CLT10 - Playing Pitches

6.2 Swan Hill supports the need for new residential developments to incorporate a degree of new publicly accessible open space, children's play space, youth facilities and playing pitches, and as such, generally supports the policy approaches taken by the Council.

6.3 However, it is important that whilst the Council may seek to undertake an assessment of providing standard charges for new development, which, as set out in Policy CLT1, this should be based on thorough public consultation and consideration and sound justification. Swan Hill consider that within the provision of a standard charge, it is important that such provision allows for a degree of flexibility to ensure that each site is assessed individually and on its own merits. This is particularly important for those sites close to existing open spaces and facilities. As such, the levels of

16889 Support

CHAPTER 9 Policy CLT10 - Playing Pitches

open space and recreation facilities required in the 'standard charge' should be based on an up-to-date PPG17 Open Space assessment, which should be used to form a key consideration in the levels of provision likely to be required in the standard charge system proposed.

7.0 Transport: Policy T1 - Highways

7.1 Swan Hill supports the overall objectives set out in Policy T1 requiring developments to be located and designed to reduce the reliance on the private car and to meet the infrastructure needs generated by development or seek to help achieve these needs is acceptable in principle.

7.2 Swan Hill recognises the importance of providing sufficient infrastructure provision to meet the requirements of development, and that where developments have insufficient consideration of impact on existing infrastructure, they should be considered unacceptable and contrary to National policy guidance. However, Swan Hill considers it important to emphasise that the developer's role should not be seen as a means to meet existing shortfalls in provision.

Policy T3 - Public Transport

7.3 Swan Hill is generally supportive of the policy approach set out in T3, however, as set out in paragraph 7.2 above, it is important that the District Council do not consider that it is the developer's responsibility to resolve existing shortfalls in provision of public transport, and any contribution towards additional public transportation provision should only be to mitigate against the additional level of demand likely from the development proposed.

Policy T5 - Cycling and Walking

7.4 Swan Hill supports the general approach to this policy, as Swan Hill recognises the importance of promoting the use of alternatives to the private car. The policy provision acknowledges the need to ensure relevant contributions in the event of additional travel demands generated by individual developments, whilst also setting out additional aspirations for the cycle network in the District.

7.5 As such, Swan Hill considers this policy accords with the advice of National Policy and is therefore considered sound by Swan Hill.

Policy T8 - Parking Standards

7.6 The Council has recently (January 2007) adopted SPD on the requirements for parking standards, and as such, Swan Hill generally supports the policy approach chosen by the Council. As set out in the SPD, whilst Swan Hill generally supports the approach taken by the District Council towards setting residential parking standards, in that the Council has recognised that in the suburban areas, even with some access to public transport, the majority of residents will rely on the use of private cars. However, Swan Hill has concerns over the failure of the District Council to comply with the provisions of PPG13: Transport (2001) which sets out that Local Planning Authorities should not set minimum standards for car parking. Whilst it is acknowledged that PPS3 sets out provision for the consideration of local circumstances, it is considered that the Council has not justified this deviation from PPG13's maximum standard.

7.7 Whilst it is acknowledged that such justification may become apparent through the work currently being undertaken by Essex County Council, until such time, the District Council should only seek to apply the maximum standards indicated in PPG13. However, Swan Hill recommends that the District Council make provisions in the wording of the Policy to allow for changes in the event that future policy on car parking standards need to reflect the County standard, following the completion of the County Council review.

8.0 Economic Development: Policies ED3 - Existing Employment Land ED4 - Future Employment Allocations

8.1 In respect of Policies ED3 and ED4, Swan Hill notes that they have changed considerably since the October 2008 Preferred Options document, in that they are site specific regarding the location of the proposed redevelopment of existing employment sites. These four sites are also identified in Policy H1 - Efficient Use of Land, and in general, Swan Hill supports the approach to the redevelopment of these sites (where feasible) based on the assessments of the sites set out in this version of the Core Strategy.

8.2 However, Swan Hill has concerns that these policies might not be considered suitably sound given that insufficient opportunity has been allocated for consultation on their redevelopment. Without the SHLAA being publically available prior to the consultation on this Core Strategy, an insufficient evidence base has been provided to corroborate that these sites are neither suitable or deliverable to meet the test of soundness requirements.

Summary:

Policies CLT5 - Open Space;
CLT7 - Play Space;
CLT8 - Youth Facilities; and,
CLT10 - Playing Pitches

Core Strategy Submission Document

CHAPTER 9 Policy CLT10 - Playing Pitches

6.2 Swan Hill supports the need for new residential developments to incorporate a degree of new publicly accessible open space, children's play space, youth facilities and playing pitches, and as such, generally supports the policy approaches taken by the Council.

6.3 However, it is important that whilst the Council may seek to undertake an assessment of providing standard charges for new development, which, as set out in Policy CLT1, this should be based on thorough public consultation and consideration and sound justification. Swan Hill consider that within the provision of a standard charge, it is important that such provision allows for a degree of flexibility to ensure that each site is assessed individually and on its own merits. This is particularly important for those sites close to existing open spaces and facilities. As such, the levels of open space and recreation facilities required in the 'standard charge' should be based on an up-to-date PPG17 Open Space assessment, which should be used to form a key consideration in the levels of provision likely to be required in the standard charge system proposed.

Full Text: ROCHFORD CORE STRATEGY SUBMISSION DOCUMENT, SEPTEMBER 2009
RESPONSE OF ESSEX COUNTY COUNCIL

1. General Comment

Essex County Council welcomes and broadly supports the Core Strategy prepared by Rochford District Council. The Strategy contains policies and proposals that address the spatial characteristics, issues and opportunities facing the District whilst respecting the distinctive qualities of the different settlements and parts of the District.

The County Council fully supports the maintenance of a strong policy approach to protection of the Green Belt and of the quality of environmental assets in the District whilst making adequate housing and employment provision within the District. The Core Strategy presents an approach that emphasises a balance of opportunity through the District and recognition of emerging economic prospects in the District and neighbouring areas. The intended preparation of more detailed Action Area Plans for London Southend Airport and its environs and for each of the three town centres of Rayleigh, Rochford and Hockley will further enhance the approach of the Core Strategy. The emphasis on the three town centres is particularly welcomed as offering a stimulus to improvement in the services and facilities available locally within the District whilst also affording possibilities of increased community focus.

2. Housing Distribution and Locations

The East of England Plan requires Rochford to provide a minimum of 3,790 additional dwellings between 2006 and 2021. In addition, provision for a further 1,000 dwellings should be made between 2021 and 2025 to ensure delivery of housing for at least 15 years from adoption of the Core Strategy (expected in 2010). Of this total requirement the District Council has identified a capacity of 2,000 dwellings through a Strategic Housing Land Availability Assessment. This means that the Core Strategy has to identify locations for about 1,750 dwellings to be delivered before 2021 and a further 1,000 dwellings between 2021 and 2025.

Policy H1 (The efficient use of land for housing) is supported. However, prioritisation of the reuse of previously developed land within settlements for additional housing is unlikely to provide a sufficient source of provision due to the generally residential nature of existing settlements in the district and the absence of potentially large sites of previously developed land. The assessment of potential for additional housing provision within settlements already includes the proposed re-allocation to substantially residential use of 4 existing employment areas.

Within Policy H2 (Extensions to residential envelopes and phasing) and Policy H3 (Extension to residential envelopes post-2021) the District Council has adopted a balanced approach to the distribution of additional housing locations, which is based on identification of tiers of settlements defined by reference to their accessibility to jobs, services and facilities (some of which lie outside the District) and the need to protect the valued environments within the District. This approach is generally supported, although implementation and delivery of individual schemes should give further thought to securing sustainable functional relationships between proposed development locations and availability of jobs, services and facilities.

The proposed scale and phasing of development at each of the identified locations in Policy H2 and Policy H3 should be capable of being supported by County Council service groups, provided that adequate and timely funding is available. The County Council would wish to work with the District Council to ensure that future infrastructure and facilities would serve and give benefit to the existing adjoining community as well as to the new development. In this respect it is noted that the Core Strategy proposes preparation by the District Council of a Planning Obligations and Standard Charges document (Policy CLT1). The District Council's document should fully reflect the County Council's own approach to this matter as set out in the County Council's 'Developer's Guide to Infrastructure Contributions'.

3. Economic Development

The approach to Employment Growth (Policy ED1) is supported. Given the economic structure of Rochford District the support to be given to protection and enhancement of the role of small and medium sized businesses; enhancement of the District's commercial centres; and development of a skills training academy is particularly welcome. These measures will assist in building on the existing economic resource of the District.

Proposals for the comprehensive development of London Southend Airport and its environs (Policy ED2) are supported.

16702 Object

CHAPTER 9 Appendix CLT1

The further elaboration of proposals through an Area Action Plan will provide a firm foundation to realise the economic regeneration and growth opportunities presented by effective use of the Airport. The recognition of the potential environmental impact of the Airport and the commitment to work to mitigate any adverse impacts on the environment and local amenities is fully supported.

The location of the proposed Eco-Enterprise Centre to the North of London Southend Airport (Policy ED4) is supported. Creation of the Centre would assist reduction of the rate of business start-up failure in the district. Further the proposed location for the Centre would afford a clear offer to businesses within an area of varied business activity.

The continued protection and enhancement of existing employment land (Policy ED3) is supported, as is the identification of 4 existing employment sites for appropriate alternative, substantially residential, uses. Each of the 4 sites affords particular issues and opportunities whereby their redevelopment for other uses and relocation of existing occupiers would confer advantage for the immediately neighbouring areas and for the District as a whole.

4. Town Centres

The town centres of Rayleigh, Rochford and Hockley, and future plans for them, are closely linked to the economic development of the District but also present the opportunity to offer greater community focus within the District. The varied approach being taken to each of these town centres is supported (Policy RTC4, RTC5 and RTC6), notably the recognition of the role and purpose of the town centres beyond retail uses.

The contribution that the County Library service could make to plans for the town centres should not be overlooked. The 5 libraries in the District are substantial footfall draws in their localities and act as a 'community anchor store'. This has knock-on effects in encouraging use of neighbouring retail and service facilities. Further the Library service is currently looking at co-location opportunities for other services within the libraries which would enable them to act as a community focus.

5. Transport

The transport aspects of the Core Strategy are well balanced in identifying potential measures that would meet the needs of existing residents and businesses in the District as well as needs arising from future development. The approach reflects and makes good reference to the transportation aspirations of the County Council. The policy emphasis on close working between the District Council and the County Council to advance the transport aspirations is welcomed and fully supported.

In relation to parking standards (Policy T8 and Paragraph 10.30) the review undertaken by Essex County Council in conjunction with the Essex Planning Officers Association has now been completed. Revised parking standards have been agreed and signed off as County Supplementary Guidance, in accordance with PPS12, and is being applied by the County Council as Local Highways Authority.

6. Coastal Protection Belt

Policy ENV2 (Coastal Protection Belt) is not supported because in its current form it is not a suitable or effective replacement policy for Policy CC1 of the Replacement Structure Plan. Structure Plan Policy CC1 (The Undeveloped Coast - Coastal Protection Belt) currently remains a 'saved' policy of the Essex and Southend-on-Sea Replacement Structure Plan, April 2001 (following a direction of the Secretary of State, dated 27th September 2007, under paragraph 1(3) of Schedule 8 to the Planning and Compulsory Purchase Act 2004). The existing Policy CC1 reads, 'Within the Coastal Protection Belt defined in adopted local plans there shall be the most stringent restrictions on development within the rural and undeveloped coastline situated outside existing built-up areas, and any development which is exceptionally permitted within this Belt shall not adversely affect the open and rural character, historic features or wildlife.'

Core Strategy Policy ENV2 should be revised to include specific reference to,

- * Definition of the boundary of the Coastal Protection Belt in another Development Plan Document;
- * the application of the most stringent restrictions on development within the rural and undeveloped coastline;
- * any development exceptionally permitted not adversely affecting the open and rural character, historic features or wildlife.

7. Historic Environment

The importance of the historic environment in Rochford District is clearly identified within the Core Strategy document. Nevertheless, the policy guidance could be usefully enhanced to promote consideration and enhancement of the historic environment and use of the historic environment to shape place. This would be achieved by the following amendments to the Core Strategy,

- * Policy ENV1 (Protection and Enhancement of the Natural Landscape and Habitats and the Protection of Historical and Archaeological Sites) should be amended by deletion of the final sentence and its replacement with, 'The Council is committed to the protection, promotion and enhancement of the diverse historic landscape and extensive surviving archaeological deposits of the District.'

16702 Object

CHAPTER 9 Appendix CLT1

* Paragraph 8.15 of the supporting text should be amended to better support the suggested amendment to Policy ENV1. The existing text of Paragraph 8.15 should be deleted in its entirety and replaced by,
The historic environment of Rochford District has developed through a history of human activity that spans over 450,000 years. Much of the resource lies hidden beneath the ground in the form of archaeological deposits. Other elements such as the historic landscape, the pattern of field, farms, woods and grazing marsh which characterise the District, are a highly visible record of millennia of agriculture, industry and commerce. Of particular significance are the coastal, island and estuarine areas where multi-period landscapes reflecting the exploitation of coastal and marshland resource survive. The District also includes the important historic medieval market towns of Rochford and Rayleigh.

* Page 16 (Sustainable Community Strategy Priority: Promoting a Greener District) should be amended to further support the approach to the Historic Environment. The fourth bullet of the Key Section/Policies of the Core Strategy should be amended to include the word 'historic', so that the first sentence of the bullet would read,
The Environment chapter seeks to protect and enhance the biodiversity, historic and natural environment of the District by protecting sites of local, national and international importance.

8. Community Infrastructure

The approach to Community Infrastructure is supported. The County Council would wish to work with the District Council to ensure that future community infrastructure and facilities would serve and give benefit to the existing adjoining community as well as to the new development. In this respect it is noted that the Core Strategy proposes preparation by the District Council of a Planning Obligations and Standard Charges document (Policy CLT1). The District Council's document should fully reflect the County Council's own approach to this matter as set out in the County Council's 'Developer's Guide to Infrastructure Contributions'.

In addition, it should be noted that,

* Some County Council services are not highly visible despite being regarded as highly desirable community services by local residents. The need to ensure adequate funding and contributions to enable these services to meet community expectations should be recognised and acknowledged in consideration of planning obligations and standard charges.

* The Adult Community Learning Centre at Rocheway, Rochford could be better located with regard to the wider Rochford/Castle Point area of service. Relocation of the Centre could provide opportunities both at the new location and for the current site.

* The Core Strategy should make specific reference to,

o Appendix H1, Location at South Canewdon: new Early Years and Childcare facilities;

o Policy CLT2, final sentence: insert after the words 'primary schools' the words 'and Early Years and Childcare facilities';

o Appendix CLT1, Other issues/comment: for Early years and childcare facilities add 'Land to be allocated within new residential areas, as appropriate'.

9. Implementation, Delivery and Monitoring

The inclusion in the Core Strategy of a section considering Implementation, Delivery and Monitoring is welcomed and supported. Nevertheless, the District Council, in moving towards implementation and delivery of the individual elements of the Core Strategy, should highlight those schemes and projects that are critical to achievement of other aspects of the Strategy.

Further, the monitoring proposal for Policy H6 (Lifetime Homes) and for Policy CP1 (Design) should be amended,

* Policy H6 (Lifetime Homes) - the identified monitoring tool is Core Indicator H6 Housing Quality Building for Life Assessments. The Building for Life Assessment methodology was devised to measure the overall design/layout quality of housing developments. It was not devised to measure compliance with Lifetime Homes, which is largely, but not exclusively, concerned with internal space standards and the provision of internal arrangements within dwellings to meet needs of all residents.

* Policy CP1 (Design) - the monitoring indicator proposed by the Core Strategy is not supported because it is unclear what the indicator would actually be measuring. The proposed indicator should be replaced by the Core Indicator, Housing Quality - Building for Life Assessments, as suggested by the County Council in its response to the Core Strategy Preferred Options, October 2008. A better approach would be to base evaluation and monitoring of Policy CP1 on the Commission for Architecture and the Built Environment's (CABE) 20 Building for Life principles, particularly as Government has endorsed these principles and is urging local authorities to use them to assess design quality. It is suggested that the monitoring arrangements for Preferred Option CP1 be deleted and replaced by the following text, 'The success of the implementation of this policy will be monitored by assessing schemes, or an appropriate sample of schemes, against the Commission for Architecture and the Built Environment's (CABE) Building for Life principles.'

10. Access to Housing

The Core Strategy notes the higher prevalence of older people in Rochford District and the need to support them. However, a more broadly based approach to access to housing should be adopted by Policies H4, H5 and H6. It should recognise the presence of other vulnerable adults in the community, for example, those with learning or mental health disability, and the range of possible forms of accommodation, including supported, sheltered and extra care accommodation. The high level of owner occupation in the District further emphasises the need for a broader approach. The emphasis on Lifetime Homes would not address the variety of future needs, whilst the potential exemptions to the

Core Strategy Submission Document

16702 Object

CHAPTER 9 Appendix CLT1

Summary: Lifetime Homes policy standard in Policy H6 are likely to act against demographic trends. The approach to Community Infrastructure is supported. The County Council would wish to work with the District Council to ensure that future community infrastructure and facilities would serve and give benefit to the existing adjoining community as well as to the new development. In this respect it is noted that the Core Strategy proposes preparation by the District Council of a Planning Obligations and Standard Charges document (Policy CLT1). The District Council's document should fully reflect the County Council's own approach to this matter as set out in the County Council's 'Developer's Guide to Infrastructure Contributions'.

In addition, it should be noted that,

* Some County Council services are not highly visible despite being regarded as highly desirable community services by local residents. The need to ensure adequate funding and contributions to enable these services to meet community expectations should be recognised and acknowledged in consideration of planning obligations and standard charges.

* The Adult Community Learning Centre at Rocheway, Rochford could be better located with regard to the wider Rochford/Castle Point area of service. Relocation of the Centre could provide opportunities both at the new location and for the current site.

The Core Strategy should make specific reference to,

Appendix CLT1, Other issues/comment: for Early years and childcare facilities add 'Land to be allocated within new residential areas, as appropriate'.

Change to Plan The Core Strategy should make specific reference to,

Appendix CLT1, Other issues/comment: for Early years and childcare facilities add 'Land to be allocated within new residential areas, as appropriate'.

CHAPTER 9 Appendix CLT1

Respondent: Ms G Yeadell [7834]

6 Southend Road
Hockley
Essex
SS5 4QQ
01702 205450

Agent: N/A

Full Text: Para 4.8 States sustainability underlines any decisions on housing location, primarily: current and future deliverability of infrastructure, eg roads, services, public transport, health.

Policy H1

Para.4.14 Some employment sites are considered more suitable for other uses (eg housing) including Eldon Way/Foundry, Hockley. This is all open to question.

Hockley-re Eldon Way/Foundry

In CS Preferred Options 2008 policy H2 you discarded N.E.Hockley as a housing option - whilst close to centre, station, "impact on highway network from traffic heading through Hockley..along Ashingdon Road..renders location unviable". Clearly the same principle applied to Eldon Way/Foundry for the same reasons.

Response to C.S Preferred Options 2008 and HAAP 2009

June 2009 issue C S Submission issue says Eldon Way will be used for housing, whereas Sept.2009 issue says "alternative uses, including residential.." to be decided by HAAP (Issues consultation done, Pref.Options issue awaited, but judging from JAAP Pref.Options decision - namely biggest option chosen against overriding opposition, it will be housing).

Need to be logical and even-handed in proposals

Health services GP surgeries are full and a PCT health centre will not occur in the foreseeable economic climate.

Ch.10: Highways and Transport

Policy T1, T2 RDC proposes working with ECC Highways, developers, but admits it has no authority, responsibility here. RDC will seek developer contributions, but this is neither detailed nor costed in CS Submission nor HAAP, and contravenes PPS 12.3 para.4.93 which states "The infrastructure planning process should identify as far as possible infrastructure needs and costs". Idea of paying for road & transport improvements through Standard Charges is unproven and unsound.

Establish likely level of Standard Charges. Accept you cannot turn district into motorways with wholesale demolition.

In neither CS Submission nor HAAP is there any highways improvement, except idea to replace Spa roundabout with traffic lights and 1 way system up Southend Road and Hockley Rise.

Para.10.5 "..highway improvements serving new developments..in a timely manner..ensuring developments delivered alongside necessary infrastructure".

These improvements cannot possibly be delivered. It should be realised: B1013 (Southend Rd), Rectory Road Hawkwell, Ashingdon, West Rochford - all in area proposed for large new developments are former winding, narrow country roads, tarmacked over for motorised traffic. Large housing increments are unsustainable off these roads, which cannot be altered without much destruction.

Reply to CS Pref. Options 2008 & HAAP Issues/Options 2009

Policy T3, CLT1 Appendix CLT1 Public transport RDC admits this is in the private sector. In Hockley, operator has cut No7 service to 1 per hour from Ashingdon Schools, claiming it is unviable beyond. This is unlikely to change as Hockley is car dependant. No8 bus through Hawkwell is cut to 1 per hour to Rayleigh, for same reason as No7. Proposed planning agreements with developers can't run: eg, a community centre or classroom given by a developer remains once he has moved on - how can that apply for an on-going bus service?

Reply to Infrastructure Transport in CS Pref. Opts. 2008 and to HAAP Issues Opts. 2009.

Ch.11 Economic development

Policy ED3 Core Strategy preferred Options 2008 hinted at possible housing in Eldon Way site. June 2009 Submission version, without consultation, said Eldon Way would be housing (map included Foundry, not the text). September 2009 Submission said redevelopment would be in HAAP (which apart from the Issues/Options version, is unfinished. Judging from results of JAAP Preferred Options where biggest option is chosen, though most respondents were against it, site will be housing, without consultation.

16717 Object

CHAPTER 9 Appendix CLT1

Para.1.25, Para.11.32 Note CH.1 Introduction to CS Submission 2009 para.1.25 East England Plan requires 3000 additional jobs, presumably to 2021. Revised Southend Airport is expected to drive Economic development. But at para. 11.32 Eldon Way-Foundry estate is planned to be more suitably utilized. "...alternative land will be required to accommodated employment uses so displaced" - ie jobs sent to eg new site near Southend Airport - not new jobs.

Reply to HAAP Issues Options 2009

Remove compulsory relocation

Policy ED4 Policy states Council will allocate 18ha of land to make up for de-allocations in ED3 - that proves point above.

Proposals for moving employment to out of town locations with no existing transport links are contrary to government policies PPG4, PPS1 and PPS4 and Core Strategy Policy T1.

Evidence Base is ignored by contravening Hockley Parish Plan 2007 and ignoring residents' views on HAAP Issues/Options. Next stage of HAAP Preferred Options is pre-empted and rendered irrelevant. Core Strategy plans to relocate Eldon Way Foundry estate to Greenfield site with no nearby bus or railway. RDC plans to upgrade the nearest road to dual carriageway, though the connecting B1013 (through Hockley) will stay single, said by ECC Highways statistics to be 72% capacity. Airport bosses and council cannot suggest there will be no traffic growth from JAAP and new industrial site.

Reply to Hockley Parish Plan 2007. HAAP Issues 2009

Move to new industrial site near airport contravenes PPS4:

- EC7.3C "out of centre sites, with preference given to sites...well served by choice of...transport and...close to centre and...high likelihood of forming links with centre". There is no current public transport and links with centres is unlikely".

- EC 7.5.1 "whether the site is or will be accessible and well served by choice of transport, public transport, walking and cycling, as well as by car...". Remote location, narrow busy B1013 makes the site unsuitable for access by cycle or on foot.

It also contravenes PPS1 (27vii)... "reduce need to travel, encourage accessible public transport provision to secure more sustainable patterns of transport...Planning should actively manage patterns of urban growth to make fullest use of public transport and focus development in existing centres, near to major public transport interchanges". Core Strategy undermines its own policy Transport and Highways policy T1 and is unsound.

Although shown on accompanying drawing in earlier versions, there was no prior textual mention of Foundry industrial estate (next to Eldon Way) for redevelopment until current CS 2009 Submission. This was stated to be a typing error, but does not inspire confidence in reliability of drafting.

Revise both 2009 Core Strategy and 2009 HAAP Issues/options

Chapter 12: Retail/Town centres

The Core Strategy misrepresents findings of the Retail and Leisure Study 2008.

Para.12.38 The Core Strategy states (para.12.38) "The Retail & Leisure Study indicates Hockley has great potential. Hockley has been identified as having a need for additional convenience floorspace."

Whereas the R&LS actually states:

1) (10.26) "the scale of need does not lend itself to a foodstore capable of retaining a significant proportion of main food shopping expenditure".

2) (10.28) "There is no immediate capacity for additional floorspace".

3) (10.29) "we recommend focus be maintained on developing Hockley's existing strengths, rather than retail expansion"

4) 10.31 "the current nature of Hockley does not lend itself to classification as a 'town centre' as defined by PPS6. Moreover, we have identified that it has a very small catchment population. Accordingly, the council may wish to consider reclassifying Hockley from a town centre to a district centre".

Defer whole of proposals for Hockley town centre to Hockley Area Action Plan.

The Council will work with landowners and its partners to deliver the HAAP.

Remove threat of compulsory purchase orders.

16717 Object

CHAPTER 9 Appendix CLT1

One doesn't perceive impartiality when the Planning Director replies to local HAAP survey with "The affluent people of Hockley are entitled to famous name shops".

Chapter 5: Character of Place and Local Lists

Para.5.4 "Rochford district has unique character..stems from traditional buildings..still dominate towns and villages".

Para.5.17 "Council believes many buildings..are of local distinctiveness..part of..cherished local scene".

This only applies to favoured places: Rochford, Rayleigh, greenbelt villages. Many Hockley conservable items have been systemically removed for supposedly lucrative development in face of widespread protect. This is for supposed need for housing. In fact heritage items have been replaced by dwellings most cannot afford, and/or are hard to sell due to unsuitability of massing and siting. Many other homes are jeopardised by this practice.

HAAP issues 2009. Core Strategy 2006, 2007,2008, SCI.2006

Fewer 'vested interests', more even handedness. No more pressing people out of businesses, homes for expediency.

A CPRE Fieldwork issue extolled Local Lists, citing refusal of 16 flats to replace character house, not on local list. Inspector said house, facade made a contribution to area character, even if English heritage decided it didn't warrant listing. Council worked to get the house grade listed and even made adjacent area conservation one.

Hockley had one such on a "significant site" faced with 13 flats. Ward Member omitted house from refusal proposal, so house could be demolished. RDC dropped Local List ahead of appeal: "Government frowned on such Lists" (Other LAs, unaware of supposed directive retained theirs. After demolition RDC restored Local Lists, saying Government now support them. When Inspector queried the complaint, the then policy officer said "just politics, lot of local interest, nothing of character in the area[!]. (A dozen such items had been removed). Some "distinctive" Hockley buildings are still condemned (in Greensward Lane.; others threatened (Spa Road). Whereas a modest hue and cry in Rayleigh will usually result in a building being saved.

Conclusion

Core Strategy Submission DPD is basically unsound in many respects

Incomplete information. Amongst others, it refers to Hockley AAP, the first stage of which is complete, but not other three. Rochford AAP first stage has been published in arrears of Core Strategy Submission. Rayleigh AAP is still awaited. Precise housing sites are absent, as Urban Capacity Study 2007 has been superseded by Strategic Housing Land Availability Assessment, not yet published. Traders, residents, are thus responding to Core Strategy Submission with incomplete information.

Lack of community involvement. Chapter 1, Introduction, para. 1.11 "Community involvement is an essential part of the plan making process".

In Statement of Community Involvement 2006 Rochford RDC "recognises need to enable people to have their voices heard".

Re Public Meetings: "Consideration will be had to timing and venue to ensure meeting is as accessible as possible".

Take Hockley Area Action Plan as an example of the opposite of all this:- Presentation of document was at Hullbridge, 7.30pm. It was also discussed with JAAP at Rochford Freight House (for traders only) at 7am, without publicity. Excuse made: HAAP on RDC website, which none will seek unless knowing it is there. Rochford District Matters newsheet had minute articles on p.3, half way through consultation period. Another excuse: a 2nd presentation by Hockley Residents Association with planning officer present: only because of complaints, and it is not the HRA's responsibility to RDC's job. Due to unavoidable haste of calling meeting, few knew and only 50 were present.

In Core Strategy Submission Hockley Parish Plan has been ignored. Proposals also ignore 95% rejection rate response to HAAP 2009, which included proposals for Eldon Way employment site.

Unfettered right of developers to carry on as if Core Strategy didn't exist. In PPS 12, Ch.4.6 states: "Core Strategies should be flexible and able to show how they handle contingencies". Several large planning applications have been submitted proposing developments outside the Core Strategy which does not indicate how such applications will be handled and does not comply with PPS 12.

Where are we? Finally, at Chapter 1, Introduction, para. 1.24: "the Core Strategy will have to be reviewed in the event of a new Local Area Agreement, post-2011, setting different priorities". So what purpose does all this work serve? So we have hardly finished this exercise, before it all starts again?

Summary:

Policy T3, CLT1 Appendix CLT1 Public transport RDC admits this is in the private sector. In Hockley, operator has cut No7 service to 1 per hour from Ashingdon Schools, claiming it is unviable beyond. This is unlikely to change as Hockley

Core Strategy Submission Document

Hockley Under Threat
None provided

Agent: N/A

Full Text:

Ch. 4 Housing; Ch.10 Transport, Highways; Ch.11 Economic Development; Ch.12 Retail/town centres; Ch.5 Character of place & Local Lists

Chapter 4: Housing

Para 4.8 States sustainability underlines any decisions on housing location, primarily: current and future deliverability of infrastructure, eg roads, services, public transport, health.

Policy H1, Para.4.14 Some employment sites are considered more suitable for other uses (eg housing) including Eldon Way/Foundry, Hockley. This is all open to question.

Hockley-re Eldon Way/Foundry

In CS Preferred Options 2008 policy H2

N.E.Hockley was discarded as a housing option - whilst close to centre, station, "impact on highway network from traffic heading through Hockley...along Ashingdon Road..renders location unviable". Clearly the same principle applied to Eldon Way/Foundry for the same reasons.

Need to be logical and even-handed in proposals

June 2009 issue C S Submission issue says Eldon Way will be used for housing, whereas Sept.2009 issue says "alternative uses, including residential.." to be decided by HAAP (Issues consultation done, Pref.Options issue awaited, but judging from JAAP Pref.Options decision - namely biggest option chosen against overriding opposition, it will be housing).

Policy H1, T1 Proposals for moving employment to out of town locations, at either end of the district, with no existing public transport links, are contrary to government policy PPG14 & PPS1. it also contravenes the Core Strategy's stated aims of reducing carbon emissions; reliance on car transport and providing "an integrated network of cycle paths",

The Core Strategy also contravenes its own policy T1 and is unsound.

Health services GP surgeries are full and a PCT health centre will not occur in the foreseeable economic climate.

Ch.10: Highways and Transport

Policy T1, T2 RDC proposes working with ECC Highways, developers, but admits it has no authority, responsibility here. RDC will seek developer contributions, but this is neither detailed nor costed in CS Submission nor HAAP, and contravenes PPS 12.3 para.4.93 which states "The infrastructure planning process should identify as far as possible infrastructure needs and costs". Idea of paying for road & transport improvements through Standard Charges is unproven and unsound.

Establish like motorways with wholesale demolition.

In neither CS Submission nor HAAP is there any highways improvement, except idea to replace Spa roundabout with traffic lights and 1 way system up Southend Road and Hockley Rise.

RDC are proposing to scatter housing across the district in around 12 or sites but no detailed consideration has been given to the implications for highways across the District. Many roads across the District are at or near capacity but no modelling has been undertaken to determine the impacts.

It is clear that (i) the combined impact of scattering houses across the District and (ii) relocating Eldon Way/Foundry Industrial Estates with no public transport services will exacerbate existing problems. It is clear that the extent of improvements required is both unknown and not funded and the proposal is unsound.

Para.10.5

Policy T3, CLT1 Appendix CLT1

T1 & T2 "...highway improvements serving new developments..in a timely manner..ensuring developments delivered alongside necessary infrastructure".

These improvements cannot possibly be delivered. It should be realised: B1013 (Southend Rd), Rectory Road Hawkwell, Ashingdon, West Rochford - all in area proposed for large new developments are former winding, narrow country roads, tarmacked over for motorised traffic. Large housing increments are unsustainable off these roads, which

Core Strategy Submission Document

O - 16748 - 14229 - Appendix CLT1 - i, iii

16748 Object

CHAPTER 9 Appendix CLT1

cannot be altered without much destruction.

Public transport RDC admits this is in the private sector. In Hockley, operator has cut No 7 service to one per hour from Ashingdon Schools, claiming it is unviable beyond. This is unlikely to change as Hockley is car dependant. No 8 bus through Hawkwell is cut to one per hour to Rayleigh, for same reason as No 7. Proposed planning agreements with developers can't run: e.g., a community centre or classroom given by a developer remains once he has moved on - how can that apply for an on-going bus service?

Ch.11 Economic development

Policy ED3 Core Strategy preferred Options 2008 hinted at possible housing in Eldon Way site. June 2009 Submission version, without consultation, said Eldon Way would be housing (map included Foundry, not the text). September 2009 Submission said redevelopment would be in HAAP (which apart from the Issues/Options version, is unfinished. Judging from results of JAAP Preferred Options where biggest option is chosen, though most respondents were against it, site will be housing, without consultation.

Para.1.25 Para.11.32

Policy ED4 T1 & T2 Note CH.1 Introduction to CS Submission 2009 para.1.25 East England Plan requires 3000 additional jobs, presumably to 2021. Revised Southend Airport is expected to drive Economic development. But at para. 11.32 Eldon Way-Foundry estate is planned to be more suitably utilized. "...alternative land will be required to accommodated employment uses so displaced" - ie jobs sent to eg new site near Southend Airport - not new jobs.

Remove compulsory relocation

Policy states Council will allocate 18ha of land to make up for de-allocations in ED3 - that proves point above.

Proposals for moving employment to out of town locations with no existing transport links are contrary to government policies PPG4, PPS1 and PPS4 and Core Strategy Policy T1.

Evidence Base is ignored by contravening Hockley Parish Plan 2007 and ignoring residents' views on HAAP Issues/Options. Next stage of HAAP Preferred Options is pre-empted and rendered irrelevant.

Core Strategy plans to relocate Eldon Way Foundry estate to Greenfield site with no nearby bus or railway. RDC plans to upgrade the nearest road to dual carriageway, though the connecting B1013 (through Hockley) will stay single, said by ECC Highways statistics to be 72% capacity. Airport bosses and council cannot suggest there will be no traffic growth from JAAP and new industrial site.

Revise both 2009 Core Strategy and 2009 HAAP Issues/options

Move to new industrial site near airport contravenes PPS4:

EC7.3C "out of centre sites, with preference given to sites..well served by choice of..transport and..close to centre and..high likelihood of forming links with centre". There is no current public transport and links with centres is unlikely".

EC 7.5.1 "whether the site is or will be accessible and well served by choice of transport, public transport, walking and cycling, as well as by car..". Remote location, narrow busy B1013 makes the site unsuitable for access by cycle or on foot.

It also contravenes PPS1 (27vii).. "reduce need to travel, encourage accessible public transport provision to secure more sustainable patterns of transport..Planning should actively manage patterns of urban growth to make fullest use of public transport and focus development in existing centres, near to major public transport interchanges". Core Strategy undermines its own policy Transport and Highways policy T1 and is unsound.

H1 & RTC6 Although shown on accompanying drawing in earlier versions, there was no prior textual mention of Foundry industrial estate (next to Eldon Way) for redevelopment until current CS 2009 Submission. In recent amendment to the CS this was stated to be due to a typing error!

Chapter 12: Retail/Town centres

The Core Strategy misrepresents findings of the Retail and Leisure Study 2008.

Defer whole of proposals for Hockley town centre to Hockley Area Action Plan.

Para.12.38 H1 & RTC6 The Core Strategy states (para.12.38) "The Retail & Leisure Study indicates Hockley has great potential. Hockley has been identified as having a need for additional convenience floorspace."

Whereas the R&LS actually states:

1) (10.26) "the scale of need does not lend itself to a foodstore capable of retaining a significant proportion of main food

Core Strategy Submission Document

16748 Object

CHAPTER 9 Appendix CLT1

shopping expenditure".

2) (10.28) "There is no immediate capacity for additional floorspace".

3) (10.29) "we recommend focus be maintained on developing Hockley's existing strengths, rather than retail expansion"

4) 10.31 "the current nature of Hockley does not lend itself to classification as a 'town centre' as defined by PPS6. Moreover, we have identified that it has a very small catchment population. Accordingly, the council may wish to consider reclassifying Hockley from a town centre to a district centre".

Remove threat of compulsory purchase orders.

The Council will work with landowners and its partners to deliver the HAAP.

Chapter 5: Character of Place and Local Lists

Para.5.4 "Rochford district has unique character..stems from traditional buildings..still dominate towns and villages".

Para.5.17 "Council believes many buildings..are of local distinctiveness..part of..cherished local scene".

This only appears to apply to certain places: Rochford, Rayleigh, greenbelt villages. Many Hockley conservable items have been systemically removed for supposedly lucrative development in face of widespread protect. This is for supposed need for housing. In fact heritage items have been replaced by dwellings most cannot afford, and/or are hard to sell due to unsuitability of massing and siting. Many other homes are jeopardised by this practice.

Conclusion

Core Strategy Submission DPD is basically unsound in many respects:

Incomplete information. Amongst others, it refers to Hockley AAP, the first stage of which is complete, but not other three. Rochford AAP first stage has been published in arrears of Core Strategy Submission. Rayleigh AAP is still awaited. Precise housing sites are absent, as Urban Capacity Study 2007 has been superseded by Strategic Housing Land Availability Assessment, not yet published. Traders, residents, are thus responding to Core Strategy Submission with incomplete information.

Lack of community involvement. Chapter 1, Introduction, para. 1.11 "Community involvement is an essential part of the plan making process". In Statement of Community Involvement 2006 Rochford RDC "recognises need to enable people..to have their voices heard".

Re Public Meetings: "Consideration will be had to timing and venue to ensure meeting is as accessible as possible".

Hockley Area Action Plan as an example of the opposite of all this:- Presentation of document was at Hullbridge, 7.30 p.m. It was also discussed with JAAP at Rochford Freight House (for traders only) at 7 a.m., without publicity. Excuse made: HAAP on RDC website, which none will seek unless knowing it is there. Rochford District Matters newssheet had minute articles on p.3, half way through consultation period. Another excuse: a second presentation by Hockley Residents Association with planning officer present: only because of complaints, and it is not the HRA's responsibility to RDC's job. Due to unavoidable haste of calling meeting, few knew and only 50 were present.

In Core Strategy Submission Hockley Parish Plan has been ignored. Proposals also ignore 95% rejection rate response to HAAP 2009, which included proposals for Eldon Way employment site.

Unfettered right of developers to carry on as if Core Strategy didn't exist. In PPS 12, Ch.4.6 states: "Core Strategies should be flexible and able to show how they handle contingencies". Several large planning applications have been submitted proposing developments outside the Core Strategy which does not indicate how such applications will be handled and does not comply with PPS 12.

Where are we? Finally, at Chapter 1, Introduction, para. 1.24: "the Core Strategy will have to be reviewed in the event of a new Local Area Agreement, post-2011, setting different priorities". So what purpose does all this work serve? So we have hardly finished this exercise, before it all starts again?

Summary:

Policy T3 CLT1 Appendix CLT1 T1 & T2

Public transport RDC admits this is in the private sector. In Hockley, operator has cut No 7 service to one per hour from Ashingdon Schools, claiming it is unviable beyond. This is unlikely to change as Hockley is car dependant. No 8 bus through Hawkwell is cut to one per hour to Rayleigh, for same reason as No 7. Proposed planning agreements with developers can't run: e.g., a community centre or classroom given by a developer remains once he has moved on - how can that apply for an on-going bus service?

Highway & Traffic Implications

Proposals for moving employment to out of town locations, at either end of the district, with no existing public transport links, are contrary to government policy PPG4. It also contravenes the Core Strategy's stated aims of reducing carbon emissions; reliance on car transport and providing "an integrated network of cycle paths".

The District of Rochford is predominately spread on a West/East axis along the railway line. Hockley is located in the middle of the district and the two estates are adjacent to the railway station. Bus services are poor with just 3* an hour (following a recent 50% reduction in services) and the operator has admitted they cannot compete with the railway making improvements to new sites away from major centres unlikely. (* one of the 3 services is paid for by ECC on a 6 mth trial and may be terminated in the new year).

However, the Core Strategy proposes to relocate these two estates to a greenfield site near the airport. This site is 2-3 miles from the nearest railway station and there are currently no bus services to the area. As a result, RDC are proposing to upgrade the nearest road to a dual-carriageway, although the main connecting road (the B1013), which runs through Hockley, will remain single-carriageway and is already at 72% of capacity (ECC Highways stats). This is despite extra traffic expected in the area as a result of the Joint Area Action Plan (JAAP) which proposes considerable growth at neighbouring Southend Airport, as well as the new industrial estate.

The site selected for the new industrial estate also contravenes PPS4 which states;
â€¢ (EC7.3C) "out-of-centre sites, with preference given to sites which are or will be well served by a choice of means of transport and which are close to the centre and have a high likelihood of forming links with the centre. There is no existing public transport and no obvious likelihood of forming links with any existing centres.
â€¢ EC7.5 1 "whether the site is or will be accessible and well served by a choice of means of transport, especially public transport, walking and cycling, as well as by car". Its remote location. Accessed by the narrow, busy B1013 is not suitable for access by cycle or on foot.

It also contravenes PPS1 (27 vii) "Reduce the need to travel and encourage accessible public transport provision to secure more sustainable patterns of transport development. Planning should actively manage patterns of urban growth to make the fullest use of public transport and focus development in existing centres and near to major public transport interchanges".

The Core Strategy also contravenes its own policy T1 and is unsound.

Summary:

Proposals for moving employment to out of town locations, at either end of the district, with no existing public transport links, are contrary to government policy PPG4 & PPS1. It also contravenes the Core Strategy's stated aims of reducing carbon emissions; reliance on car transport and providing "an integrated network of cycle paths".

The Core Strategy also contravenes its own policy T1 and is unsound.

The Transport Evidence Base has not been re-evaluated following the decision to impose extra housing on the Eldon Way & Foundry Industrial Estates. ECC Highways have confirmed that the B1013 is running at 72% of its maximum theoretical capacity) and the effect of extra housing in Hockley (as well as Hawkwell) has not been re-evaluated and it is unclear what improvements will be required and whether they can be physically achieved.

Thus the proposals are not founded on a robust and credible evidence base and are unsound
RDC are proposing to scatter housing across the district in around 12 or sites but no detailed consideration has been given to the implications for highways across the District. The "Core Strategy" is not a strategy but simply a collection of disparate sites. Many roads across the District are at or near capacity but no modelling has been undertaken to determine the impacts or the funding required to upgrade them. At the Central Area Committee on 25 June 2009, RDC stated (in response to a question):

"Rochford Council is not the highway authority, but is working closely with Essex County Council to identify highway infrastructure requirements. Highway infrastructure improvements will be set out in the Core Strategy and other subsequent Development Plan Documents as required. These will be fed into the next version of the Essex Local Transport Plan, which is effectively a bidding document for funds to implement highway infrastructure improvements, schemes to tackle congestion, etc.

The District Council is working closely with the Essex County Council to ensure that highway infrastructure identified in the Core Strategy can be delivered."

It is clear that (i) the combined impact of scattering houses across the District and (ii) relocating Eldon Way/Foundry Industrial Estates to the very edge of the District with no public transport services will exacerbate existing problems. It is

16436 Object

CHAPTER 10 Transport

also clear that the extent of improvements required is both unknown and not funded and the proposal is unsound.

Summary:

RDC are proposing to scatter housing across the district in around 12 or sites but no detailed consideration has been given to the implications for highways across the District. Many roads across the District are at or near capacity but no modelling has been undertaken to determine the impacts

It is clear that (i) the combined impact of scattering houses across the District and (ii) relocating Eldon Way/Foundry Industrial Estates with no public transport services will exacerbate existing problems. It is clear that the extent of improvements required is both unknown and not funded and the proposal is unsound.

PPS12 4.9 states "The infrastructure planning process should identify, as far as possible: infrastructure needs and costs". Neither needs nor, especially, costs have been identified and the Core Strategy is therefore unsound.

The district's highways suffer from years of under investment and over use. The Core Strategy proposes to fund infrastructure improvements through use of Standard Charges. However, no detail is provided and no attempt made to identify the likely scale of such charges. It is therefore unclear if use of Standard Charges is financially viable.

Policy T2 provides a list of required highway improvements. The list contains most of the more major roads in the District including Rectory Lane, which has a single track, traffic light controlled railway bridge. 1200 dwellings are proposed for the northern end of Rectory Road and a further 175 at the southern end. The cost of addressing the railway bridge bottleneck will be significant but is not mentioned.

No attempt is made to either cost these charges or explain how improvements not linked to any one specific development will be paid for (eg B1013; Ashingdon Road; a network of walking, cycling, bridleways).

The concept of paying for improvements through use of Standard Charges is totally unproven and unsound.

Summary:

PPS12 4.9 states "The infrastructure planning process should identify, as far as possible: infrastructure needs and costs". Neither needs nor, especially, costs have been identified and the Core Strategy is therefore unsound.

The Core Strategy proposes to fund infrastructure improvements through use of Standard Charges. However, no detail is provided and no attempt made to identify the likely scale of such charges. It is therefore unclear if use of Standard Charges is financially viable.

SERT is put forward as a solution to reducing car use but it will only skirt the edge of the district and the Core Strategy acknowledges there is only "potential" to do so in the future. SERT is not realistic or reliable a solution and the proposal is therefore unsound.

Previous consultations ignored by RDC:

â€¢ The Hockley Parish Plan (dated 2007), clearly states that residents are strongly against any large scale housing development in Hockley, but if there has to be additional housing, then there should be no loss of greenbelt or open spaces, and no large housing estate developments. It was also stated that any developments must be matched by the appropriate levels of infrastructure.

â€¢ The proposals also ignore the 95% rejection rate of respondents to RDC's own Hockley Area Plan (HAAP) Consultation (2009), which included specific proposals for Eldon Way (although HAAP did not even mention the adjoining Foundry Industrial Estate). Why have a consultation and ignore it?

Thus the proposals are not founded on a robust and credible evidence base and are unsound.

Summary:

Thus the proposals are not founded on a robust and credible evidence base and are unsound

RDC have not consulted on the very specific proposals to relocate the Eldon Way and Foundry Industrial Estates

â€¢ The previous CS Strategy stated "we will look at opportunities for more valuable and appropriate uses of the industrial land" with absolutely no consultation at all on concept of moving existing EW businesses entirely

â€¢ the Foundry Industrial Estate has never even been previously mentioned in any plan version; A recent amendment to the Core Strategy states this omission was due to a typing error!

â€¢ The Urban Capacity study stated a "low probability" of housing and did not even mention the Foundry Estate

Thus the proposals are they are not founded on a robust and credible evidence base and are unsound.

CHAPTER 10 Transport

RDC have not consulted on the very specific proposals to relocate the Eldon Way and Foundry Industrial Estates
â€¢ The previous CS Strategy stated "we will look at opportunities for more valuable and appropriate uses of the industrial land" with absolutely no consultation at all on concept of moving existing EW businesses entirely
â€¢ the Foundry Industrial Estate has never even been previously mentioned;
â€¢ The Urban Capacity study stated a "low probability" of housing and did not even mention the Foundry Estate

Thus the proposals are they are not founded on a robust and credible evidence base and are unsound.

Eldon Way and Foundry Industrial Estates form a significant part of the ongoing Hockley Area Action Plan (HAAP) consultation but the Core Strategy proposals pre-empt the next stage of the HAAP consultation.

Neither the Core Strategy nor HAAP define its status relevant to the other plan and subsequent priorities. Why is there no cross-referencing between concurrent plans affecting the exact same piece of land?

There are also inconsistencies between the Core Strategy & HAAP regarding the description of proposed uses for the two industrial estates. The Core Strategy refers to Leisure, Commercial and Residential whilst HAAP mentions a "village green, introducing a significant area of public open space". There is not sufficient space for both and the Core Strategy is again pre-empting the ongoing HAAP.

If a decision is taken now, as part of the Core Strategy, to relocate all the existing businesses on the two estates, it will set a legal precedent which HAAP will need to follow and renders the next stage of HAAP virtually redundant. Particularly given the 95% rejection rate of respondents to the previous round of HAAP such an approach is entirely undemocratic and unsound.

Summary:

The Core Strategy proposals pre-empt the next stage of the HAAP consultation and neither defines its status relevant to the other plan and subsequent priorities.

There are also inconsistencies between the Core Strategy & HAAP.

If a decision is taken as part of the Core Strategy, to relocate all the existing businesses on the two estates, it will set a legal precedent which HAAP will need to follow and renders the next stage of HAAP virtually redundant. Particularly given the 95% rejection rate of respondents to the previous round of HAAP such an approach is entirely undemocratic and unsound.

PPS12, 4.6, states that Cores Strategies should be flexible and "should be able to show how they will handle contingencies". Several large planning applications have already been submitted to RDC proposing developments outside the Core Strategy which does not indicate how such applications will be handled and does not comply with PPS12. Neither have RDC been able to advise residents how such changes will be made and the strategy is unsound.

THE Core Strategy misrepresents the findings of The Retail & Leisure Study (R&LS) 2008.

The Core Strategy states (12.38) "The Retail & Leisure Study indicates Hockley has great potential. Hockley has been identified as having a need for additional convenience floorspace".

Whereas, the R&LS actually states:

- 1) (10.26) "the scale of need does not lend itself to a foodstore capable of retaining a significant proportion of main food shopping expenditure.
 - 2) (10.28) "There is no immediate capacity for additional floor space."
 - 3) (10.29) "we recommend that focus be maintained on developing Hockley's existing strengths, rather than retail expansion"
 - 4) 10.31 "The current nature of Hockley does not lend itself to classification as a 'town centre' as defined by PPS6. Moreover, we have identified that it is a very small catchment population. Accordingly, the Council may wish to consider reclassifying Hockley from a town centre to a district centre".
- The Core Strategy is inaccurate, misleading and unsound.

Objections to RDC's Core Strategy Submission DPD

Reason Unsound

1. Highway & Traffic Implications

Proposals for moving employment to out of town locations, at either end of the district, with no existing public transport links, are contrary to government policy PPG4. It also contravenes the Core Strategy's stated aims of reducing carbon emissions; reliance on car transport and providing "an integrated network of cycle paths".

The District of Rochford is predominately spread on a West/East axis along the railway line. Hockley is located in the middle of the district and the two estates are adjacent to the railway station. Bus service are poor with just 3* an hour (following a recent 50% reduction in services) and the operator has admitted they cannot compete with the railway making improvements to new sites away from major centres unlikely. (* one of the 3 services is paid for by ECC on a 6 mth trial and may be terminated in the new year).

However, the Core Strategy proposes to relocate these two estates to a greenfield site near the airport. This site is 2-3 miles from the nearest railway station and there are currently no bus services to the area. As a result, RDC are proposing to upgrade the nearest road to a dual-carriageway, although the main connecting road (the B1013), which runs through Hockley, will remain single-carriageway and is already at 72% of capacity (ECC Highways stats). This is despite extra traffic expected in the area as a result of the Joint Area Action Plan (JAAP) which proposes considerable growth at neighbouring Southend Airport, as well as the new industrial estate.

The site selected for the new industrial estate also contravenes PPS4 which states:

(EC7.3C) "out-of-centre site, with preference given to sites which are or will be well served by a choice of means of transport and which are close to the centre and have a high likelihood of forming links with the centre. There is no existing public transport and no obvious likelihood of forming links with any existing centres.

EC7.5 1 "whether the site is or will be accessible and well served by a choice of means of transport, especially public transport, walking and cycling, as well as by car". Its remote location. Accessed by the narrow, busy B1013 is not suitable for access by cycle or on foot.

It also contravenes PPS1 (27 vii) "Reduce the need to travel and encourage accessible public transport provision to secure more sustainable patterns of transport development. Planning should actively manage patterns of urban growth to make the fullest use of public transport and focus development in existing centres and near to major public transport interchanges".

The Core Strategy also contravenes its own policy T1 and is unsound.

2. The Transport Evidence Base has not been re-evaluated following the decision to impose extra housing on the Eldon Way & Foundry Industrial Estates. ECC Highways have confirmed that the B1013 is running at 72% of its maximum theoretical capacity) and the effect of extra housing in Hockley (as well as Hawkwell) has not been re-evaluated and it is unclear what improvements will be required and whether they can be physically achieved.

3. RCD are proposing to scatter housing across the district in around 12 or sites but no detailed consideration has been given to the implications for highways across the District. The "Core Strategy" is not a strategy but simply a collection of disparate sites. Many roads across the District are at or near capacity but no modelling has been undertaken to determine the impacts or the funding required to upgrade them. At the Central Area Committee on 25 June 2009, RDC stated (in response to a question):

"Rochford Council is not the highway authority, but is working closely with Essex County Council to identify highway infrastructure requirements. Highway infrastructure improvements will be set out in the Core Strategy and other subsequent Development Plan Documents as required. These will be fed into the next version of the Essex Local Transport Plan, which is effectively a bidding document for funds to implement highway infrastructure improvements, schemes to tackle congestion, etc.

The District Council is working closely with the Essex County Council to ensure that highway infrastructure identified in the Core Strategy can be delivered."

16483 Object

CHAPTER 10 Transport

It is clear that (i) the combined impact of scattering houses across the District and (ii) relocating Eldon Way/Foundry Industrial Estates to the very edge of the District with no public transport services will exacerbate existing problems. It is also clear that the extent of improvements required is both unknown and not funded and the proposal is unsound.

4. PPS12 4.9 states "The infrastructure planning process should identify, as far as possible: infrastructure needs and costs". Neither needs not, especially, costs have been identified and the Core Strategy is therefore unsound.

The district's highways suffer from years of under investment and over use. The Core Strategy proposes to fund infrastructure improvements through use of Standard Charges. However, no detail is provided and no attempt made to identify the likely scale of such charges. Thus it is unclear if use of Standard Charges is financially viable.

The concept of paying for improvements through use of Standard Charges is totally unproven and unsound.

5. SERT is put forward as a solution to reducing car use but it will only skirt the edge of the district and the Core Strategy acknowledges there is only "potential" to do so in the future. SERT is not realistic or reliable a solution and the proposal is therefore unsound.

6. Previous consultations ignored by RDC:

The Hockley Parish Plan (dated 2007), clearly states that residents are strongly against any large scale housing development in Hockley, but if there has to be additional housing, then there should be no loss of greenbelt or open spaces, and no large housing estate developments. It was also stated that any developments must be matched by the appropriate levels of infrastructure.

The proposals also ignore the 95% rejection rate of respondents to RDC's own Hockley Area Plan (HAAP) Consultation (2009), which included specific proposals for Eldon Way (although HAAP did not even mention the adjoining Foundry Industrial Estate). Why have a consultation and ignore it?

7. RDC have not consulted on the very specific proposals to relocate the Eldon Way and Foundry Industrial Estates

The previous CS Strategy stated "we will look at opportunities for more valuable and appropriate uses of the industrial land" with absolutely no consultation at all on concept of moving existing EW businesses entirely

The Foundry Industrial Estates has never even been previously mentioned in any plan version; A recent amendment to the Core Strategy acknowledges this omission was due to a typing error!

The Urban Capacity study stated a "low probability" of housing and did not even mention the Foundry Estate

Thus the proposals are they are not founded on a robust and credible evidence base and are unsound.

8. Eldon Way and Foundry Industrial Estates form a significant part of the ongoing HAAP consultation but the Core Strategy proposals pre-empt the next stage of the HAAP consultation.

Neither the Core Strategy or Hockley Area Action Plan (HAAP) defines its status relevant to the other plan and subsequent priorities. Why is there no cross-referencing between concurrent plans affecting the exact same piece of land?

There are also inconsistencies between the Core Strategy & HAAP regarding the description of proposed uses for the two industrial estates. The Core Strategy refers to Leisure, Commercial and Residential whilst HAAP mentions a "village green, introducing a significant area of public open space". There is not sufficient space for both and the Core Strategy is again pre-empting the ongoing HAAP.

If a decision is taken now, as part of the Core Strategy, to relocate all the existing businesses on the two estates, it will set a legal precedent which HAAP will need to follow and renders the next stage of HAAP virtually redundant. Particularly given the 95% rejection rate of respondents to the previous round of HAAP such an approach is entirely undemocratic and unsound.

9. PPS12, 4.6, states that Cores Strategies show be flexible and "should be able to show how they will handle contingencies". Several large planning applications have already been submitted to RDC proposing developments outside the Core Strategy which do not indicate how such applications will be handled and does not comply with

Core Strategy Submission Document

16489 Object

CHAPTER 10 Transport

PPS12. Neither have RDC been able to advise residents how such changes will be made and the strategy is unsound.

10. The Core Strategy misrepresents the findings of The Retail & Leisure Study (R&LS) 2008.

The Core Strategy states (12.38) "The Retail & Leisure Study indicates Hockley has great potential. Hockley has been identified as having a need for additional convenience floorspace".

Whereas, the R&LS actually states:

1) (10.26) "the scale of need does not lend itself to a foodstore capable of retaining a significant proportion of main food shopping expenditure.

2) (10.28) "There is no immediate capacity for additional floor space."

3) (10.29) "we recommend that focus be maintained on developing Hockley's existing strengths, rather than retail expansion".

4) 10.31 "The current nature of Hockley does not lend itself to classification as a 'town centre' as defined by PPS6. Moreover, we have identified that it is a very small catchment population. Accordingly, the Council may wish to consider reclassifying Hockley from a town centre to a district centre".

The Core Strategy is inaccurate, misleading and unsound.

Summary:

5. SERT is put forward as a solution to reducing car use but it will only skirt the edge of the district and the Core Strategy acknowledges there is only "potential" to do so in the future. SERT is not realistic or reliable a solution and the proposal is therefore unsound.

1. Highway & Traffic Implications

Proposals for moving employment to out of town locations, at either end of the district, with no existing public transport links, are contrary to government policy PPG4. It also contravenes the Core Strategy's stated aims of reducing carbon emissions; reliance on car transport and providing "an integrated network of cycle paths".

The District of Rochford is predominately spread on a West/East axis along the railway line. Hockley is located in the middle of the district and the two estates are adjacent to the railway station. Bus service are poor with just 3* an hour (following a recent 50% reduction in services) and the operator has admitted they cannot compete with the railway making improvements to new sites away from major centres unlikely. (* one of the 3 services is paid for by ECC on a 6 mth trial and may be terminated in the new year).

However, the Core Strategy proposes to relocate these two estates to a greenfield site near the airport. This site is 2-3 miles from the nearest railway station and there are currently no bus services to the area. As a result, RDC are proposing to upgrade the nearest road to a dual-carriageway, although the main connecting road (the B1013), which runs through Hockley, will remain single-carriageway and is already at 72% of capacity (ECC Highways stats). This is despite extra traffic expected in the area as a result of the Joint Area Action Plan (JAAP) which proposes considerable growth at neighbouring Southend Airport, as well as the new industrial estate.

The site selected for the new industrial estate also contravenes PPS4 which states:

(EC7.3C) "out-of-centre site, with preference given to sites which are or will be well served by a choice of means of transport and which are close to the centre and have a high likelihood of forming links with the centre. There is no existing public transport and no obvious likelihood of forming links with any existing centres.

EC7.5 1 "whether the site is or will be accessible and well served by a choice of means of transport, especially public transport, walking and cycling, as well as by car". Its remote location. Accessed by the narrow, busy B1013 is not suitable for access by cycle or on foot.

It also contravenes PPS1 (27 vii) "Reduce the need to travel and encourage accessible public transport provision to secure more sustainable patterns of transport development. Planning should actively manage patterns of urban growth to make the fullest use of public transport and focus development in existing centres and near to major public transport interchanges".

The Core Strategy also contravenes its own policy T1 and is unsound.

2. The Transport Evidence Base has not been re-evaluated following the decision to impose extra housing on the Eldon Way & Foundry Industrial Estates. ECC Highways have confirmed that the B1013 is running at 72% of its maximum theoretical capacity) and the effect of extra housing in Hockley (as well as Hawkwell) has not been re-evaluated and it is unclear what improvements will be required and whether they can be physically achieved.

Thus the proposals are not founded on a robust and credible evidence base and are unsound.

3. RCD are proposing to scatter housing across the district in around 12 or sites but no detailed consideration has been given to the implications for highways across the District. The "Core Strategy" is not a strategy but simply a collection of disparate sites. Many roads across the District are at or near capacity but no modelling has been undertaken to determine the impacts or the funding required to upgrade them. At the Central Area Committee on 25 June 2009, RDC stated (in response to a question):

"Rochford Council is not the highway authority, but is working closely with Essex County Council to identify highway infrastructure requirements. Highway infrastructure improvements will be set out in the Core Strategy and other subsequent Development Plan Documents as required. These will be fed into the next version of the Essex Local Transport Plan, which is effectively a bidding document for funds to implement highway infrastructure improvements, schemes to tackle congestion, etc.

The District Council is working closely with the Essex County Council to ensure that highway infrastructure identified in the Core Strategy can be delivered."

It is clear that (i) the combined impact of scattering houses across the District and (ii) relocating Eldon Way/Foundry Industrial Estates to the very edge of the District with no public transport services will exacerbate existing problems. It is also clear that the extent of improvements required is both unknown and not funded and the proposal is unsound.

16523 Object

CHAPTER 10 Transport

Summary:

RDC are proposing to scatter housing across the district in around 12 or sites but no detailed consideration has been given to the implications for highways across the District. Many roads across the District are at or near capacity but no modelling has been undertaken to determine the impacts.

It is clear that (i) the combined impact of scattering houses across the District and (ii) relocating Eldon Way/Foundry Industrial Estates with no public transport services will exacerbate existing problems. It is clear that the extent of improvements required is both unknown and not funded and the proposal is unsound.

4. PPS12 4.9 states "The infrastructure planning process should identify, as far as possible: infrastructure needs and costs". Neither needs nor, especially, costs have been identified and the Core Strategy is therefore unsound.

The district's highways suffer from years of under investment and over use. The Core Strategy proposes to fund infrastructure improvements through use of Standard Charges. However, no detail is provided and no attempt made to identify the likely scale of such charges. Thus it is unclear if use of Standard Charges is financially viable.

Policy T2 provides a list of required highway improvements. The list contains most of the more major roads in the District including Rectory Lane, which has a single track, traffic light controlled railway bridge. 1200 dwellings are proposed for the northern end of Rectory Road and a further 175 at the southern end. The cost of address the railway bridge bottleneck will be significant but is not mentioned.

No attempt is made to either cost these charges or explain how improvements not linked to any one specific development will be paid for (eg B1013; Ashingdon Road; a network of walking, cycling, bridleways).

The concept of paying for improvements through use of Standard Charges is totally unproven and unsound.

Summary:

PPS12 4.9 states "The infrastructure planning process should identify, as far as possible: infrastructure needs and costs". Neither needs nor, especially, costs have been identified and the Core Strategy is therefore unsound.

The Core Strategy proposes to fund infrastructure improvements through use of Standard Charges. However, no detail is provided and no attempt made to identify the likely scale of such charges. It is therefore unclear if use of Standard Charges is financially viable.

5. SERT is put forward as a solution to reducing car use but it will only skirt the edge of the district and the Core Strategy acknowledges there is only "potential" to do so in the future. SERT is not realistic or reliable a solution and the proposal is therefore unsound.

6. Previous consultations ignored by RDC:

The Hockley Parish Plan (dated 2007), clearly states that residents are strongly against any large scale housing development in Hockley, but if there has to be additional housing, then there should be no loss of greenbelt or open spaces, and no large housing estate developments. It was also stated that any developments must be matched by the appropriate levels of infrastructure.

The proposals also ignore the 95% rejection rate of respondents to RDC's own Hockley Area Plan (HAAP) Consultation (2009), which included specific proposals for Eldon Way (although HAAP did not even mention the adjoining Foundry Industrial Estate). Why have a consultation and ignore it?

Thus the proposals are not founded on a robust and credible evidence base and are unsound.

Summary:

Previous consultations ignored by RDC:

The proposals ignore the 95% rejection rate of respondents to RDC's own Hockley Area Plan (HAAP) Consultation (2009), which included specific proposals for Eldon Way (although HAAP did not even mention the adjoining Foundry Industrial Estate). Why have a consultation and ignore it?

Thus the proposals are not founded on a robust and credible evidence base and are unsound.

7. RDC have not consulted on the very specific proposals to relocate the Eldon Way and Foundry Industrial Estates.

The previous CS Strategy stated "we will look at opportunities for more valuable and appropriate uses of the industrial land" with absolutely no consultation at all on concept of moving existing EW businesses entirely.

The Foundry Industrial Estates has never even been previously mentioned in any plan version; A recent amendment to

16523 Object

CHAPTER 10 Transport

the Core Strategy acknowledges this omission was due to a typing error!

The Urban Capacity study stated a "low probability" of housing and did not even mention the Foundry Estate

Thus the proposals are they are not founded on a robust and credible evidence base and are unsound.

Summary:

RDC have not consulted on the very specific proposals to relocate the Eldon Way and Foundry Industrial Estates.

The previous CS Strategy stated "we will look at opportunities for more valuable and appropriate uses of the industrial land" with absolutely no consultation at all on concept of moving existing FW businesses entirely.

The Foundry Industrial Estate has never even been previously mentioned.

The Urban Capacity study stated a "low probability" of housing and did not even mention the Foundry Estate.

Thus the proposals are they are not founded on a robust and credible evidence base and are unsound.

8. Eldon Way and Foundry Industrial Estates form a significant part of the ongoing HAAP consultation but the Core Strategy proposals pre-empt the next stage of the HAAP consultation.

Neither the Core Strategy or Hockley Area Action Plan (HAAP) defines its status relevant to the other plan and subsequent priorities. Why is there no cross-referencing between concurrent plans affecting the exact same piece of land?

There are also inconsistencies between the Core Strategy & HAAP regarding the description of proposed uses for the two industrial estates. The Core Strategy refers to Leisure, Commercial and Residential whilst HAAP mentions a "village green, introducing a significant area of public open space". There is not sufficient space for both and the Core Strategy is again pre-empting the ongoing HAAP.

If a decision is taken now, as part of the Core Strategy, to relocate all the existing businesses on the two estates, it will set a legal precedent which HAAP will need to follow and renders the next stage of HAAP virtually redundant. Particularly given the 95% rejection rate of respondents to the previous round of HAAP such an approach is entirely undemocratic and unsound.

Summary

The Core Strategy proposals pre-empt the next stage of the HAAP consultation and neither defines its status relevant to the other plan and subsequent priorities.

There are also inconsistencies between the Core Strategy & HAAP.

If a decision is taken as part of the Core Strategy, to relocate all the existing businesses on the two estates, it will set a legal precedent which HAAP will need to follow and renders the next stage of HAAP virtually redundant. Particularly given the 95% rejection rate of respondents to the previous round of HAAP such an approach is entirely undemocratic and unsound.

9. PPS12, 4.6, states that Cores Strategies show be flexible and "should be able to show how they will handle contingencies". Several large planning applications have already been submitted to RDC proposing developments outside the Core Strategy which do not indicate how such applications will be handled and does not comply with PPS12. Neither have RDC been able to advise residents how such changes will be made and the strategy is unsound.

10. The Core Strategy misrepresent the findings of The Retail & Leisure Study (R&LS) 2008.

The Core Strategy states (12.38) "The Retail & Leisure Study indicates Hockley has great potential. Hockley has been identified as having a need for additional convenience floorspace".

Whereas, the R&LS actually states:

1) (10.26) "the scale of need does not lend itself to a foodstore capable of retaining a significant proportion of main food shopping expenditure.

2) (10.28) "There is no immediate capacity for additional floor space."

3) (10.29) "we recommend that focus be maintained on developing Hockley's existing strengths, rather than retail expansion".

4) 10.31 "The current nature of Hockley does not lend itself to classification as a 'town centre' as defined by PPS6.

Highway & Traffic Implications

Proposals for moving employment to out of town locations, at either end of the district, with no existing public transport links, are contrary to government policy PPG4. It also contravenes the Core Strategy's stated aims of reducing carbon emissions; reliance on car transport and providing "an integrated network of cycle paths".

The District of Rochford is predominately spread on a West/East axis along the railway line. Hockley is located in the middle of the district and the two estates are adjacent to the railway station. Bus services are poor with just 3* an hour (following a recent 50% reduction in services) and the operator has admitted they cannot compete with the railway making improvements to new sites away from major centres unlikely. (* one of the 3 services is paid for by ECC on a 6 mth trial and may be terminated in the new year).

However, the Core Strategy proposes to relocate these two estates to a greenfield site near the airport. This site is 2-3 miles from the nearest railway station and there are currently no bus services to the area. As a result, RDC are proposing to upgrade the nearest road to a dual-carriageway, although the main connecting road (the B1013), which runs through Hockley, will remain single-carriageway and is already at 72% of capacity (ECC Highways stats). This is despite extra traffic expected in the area as a result of the Joint Area Action Plan (JAAP) which proposes considerable growth at neighboring Southend Airport, as well as the new industrial estate.

The site selected for the new industrial estate also contravenes PPS4 which states;
â€¢ (EC7.3C) "out-of-centre sites, with preference given to sites which are or will be well served by a choice of means of transport and which are close to the centre and have a high likelihood of forming links with the centre. There is no existing public transport and no obvious likelihood of forming links with any existing centres.
â€¢ EC7.5 1 "whether the site is or will be accessible and well served by a choice of means of transport, especially public transport, walking and cycling, as well as by car". Its remote location. Accessed by the narrow, busy B1013 is not suitable for access by cycle or on foot.

It also contravenes PPS1 (27 vii) "Reduce the need to travel and encourage accessible public transport provision to secure more sustainable patterns of transport development. Planning should actively manage patterns of urban growth to make the fullest use of public transport and focus development in existing centres and near to major public transport interchanges".

The Core Strategy also contravenes its own policy T1 and is unsound.

Summary:

Proposals for moving employment to out of town locations, at either end of the district, with no existing public transport links, are contrary to government policy PPG4 & PPS1. It also contravenes the Core Strategy's stated aims of reducing carbon emissions; reliance on car transport and providing "an integrated network of cycle paths".

The Core Strategy also contravenes its own policy T1 and is unsound.

The Transport Evidence Base has not been re-evaluated following the decision to impose extra housing on the Eldon Way & Foundry Industrial Estates. ECC Highways have confirmed that the B1013 is running at 72% of its maximum theoretical capacity) and the effect of extra housing in Hockley (as well as Hawkwell) has not been re-evaluated and it is unclear what improvements will be required and whether they can be physically achieved.

Thus the proposals are not founded on a robust and credible evidence base and are unsound

RDC are proposing to scatter housing across the district in around 12 or sites but no detailed consideration has been given to the implications for highways across the District. The "Core Strategy" is not a strategy but simply a collection of disparate sites. Many roads across the District are at or near capacity but no modelling has been undertaken to determine the impacts or the funding required to upgrade them. At the Central Area Committee on 25 June 2009, RDC stated (in response to a question):

"Rochford Council is not the highway authority, but is working closely with Essex County Council to identify highway infrastructure requirements. Highway infrastructure improvements will be set out in the Core Strategy and other subsequent Development Plan Documents as required. These will be fed into the next version of the Essex Local Transport Plan, which is effectively a bidding document for funds to implement highway infrastructure improvements, schemes to tackle congestion, etc.

The District Council is working closely with the Essex County Council to ensure that highway infrastructure identified in the Core Strategy can be delivered."

It is clear that (i) the combined impact of scattering houses across the District and (ii) relocating Eldon Way/Foundry Industrial Estates to the very edge of the District with no public transport services will exacerbate existing problems. It is also clear that the extent of improvements required is both unknown and not funded and the proposal is unsound.

CHAPTER 10 Transport

Summary:

RDC are proposing to scatter housing across the district in around 12 or sites but no detailed consideration has been given to the implications for highways across the District. Many roads across the District are at or near capacity but no modeling has been undertaken to determine the impacts

It is clear that (i) the combined impact of scattering houses across the District and (ii) relocating Eldon Way/Foundry Industrial Estates with no public transport services will exacerbate existing problems. It is clear that the extent of improvements required is both unknown and not funded and the proposal is unsound.

PPS12 4.9 states "The infrastructure planning process should identify, as far as possible: infrastructure needs and costs". Neither needs nor, especially, costs have been identified and the Core Strategy is therefore unsound.

The district's highways suffer from years of under investment and over use. The Core Strategy proposes to fund infrastructure improvements through use of Standard Charges. However, no detail is provided and no attempt made to identify the likely scale of such charges. It is therefore unclear if use of Standard Charges is financially viable.

Policy T2 provides a list of required highway improvements. The list contains most of the more major roads in the District including Rectory Lane, which has a single track, traffic light controlled railway bridge. 1200 dwellings are proposed for the northern end of Rectory Road and a further 175 at the southern end. The cost of addressing the railway bridge bottleneck will be significant but is not mentioned.

No attempt is made to either cost these charges or explain how improvements not linked to any one specific development will be paid for (eg B1013; Ashingdon Road; a network of walking, cycling, bridleways).

The concept of paying for improvements through use of Standard Charges is totally unproven and unsound.

Summary:

PPS12 4.9 states "The infrastructure planning process should identify, as far as possible: infrastructure needs and costs". Neither needs nor, especially, costs have been identified and the Core Strategy is therefore unsound.

The Core Strategy proposes to fund infrastructure improvements through use of Standard Charges. However, no detail is provided and no attempt made to identify the likely scale of such charges. It is therefore unclear if use of Standard Charges is financially viable.

SERT is put forward as a solution to reducing car use but it will only skirt the edge of the district and the Core Strategy acknowledges there is only "potential" to do so in the future. SERT is not realistic or reliable a solution and the proposal is therefore unsound.

Previous consultations ignored by RDC:

â€¢ The Hockley Parish Plan (dated 2007), clearly states that residents are strongly against any large scale housing development in Hockley, but if there has to be additional housing, then there should be no loss of greenbelt or open spaces, and no large housing estate developments. It was also stated that any developments must be matched by the appropriate levels of infrastructure.

â€¢ The proposals also ignore the 95% rejection rate of respondents to RDC's own Hockley Area Plan (HAAP) Consultation (2009), which included specific proposals for Eldon Way (although HAAP did not even mention the adjoining Foundry Industrial Estate). Why have a consultation and ignore it?

Thus the proposals are not founded on a robust and credible evidence base and are unsound.

Summary:

Previous consultations ignored by RDC:

The proposals ignore the 95% rejection rate of respondents to RDC's own Hockley Area Plan (HAAP) Consultation (2009), which included specific proposals for Eldon Way (although HAAP did not even mention the adjoining Foundry Industrial Estate). Why have a consultation and ignore it?

Thus the proposals are not founded on a robust and credible evidence base and are unsound

RDC have not consulted on the very specific proposals to relocate the Eldon Way and Foundry Industrial Estates

â€¢ The previous CS Strategy stated "we will look at opportunities for more valuable and appropriate uses of the industrial land" with absolutely no consultation at all on concept of moving existing EW businesses entirely

â€¢ the Foundry Industrial Estate has never even been previously mentioned in any plan version; A recent amendment to the Core Strategy states this omission was due to a typing error!

â€¢ The Urban Capacity study stated a "low probability" of housing and did not even mention the Foundry Estate

Thus the proposals are they are not founded on a robust and credible evidence base and are unsound.

Summary:

RDC have not consulted on the very specific proposals to relocate the Eldon Way and Foundry Industrial Estates

â€¢ The previous CS Strategy stated "we will look at opportunities for more valuable and appropriate uses of the industrial land" with absolutely no consultation at all on concept of moving existing EW businesses entirely

Core Strategy Submission Document

CHAPTER 10 Transport

â€¢ the Foundry Industrial Estate has never even been previously mentioned;
â€¢ The Urban Capacity study stated a "low probability" of housing and did not even mention the Foundry Estate

Thus the proposals are they are not founded on a robust and credible evidence base and are unsound.

Eldon Way and Foundry Industrial Estates form a significant part of the ongoing Hockley Area Action Plan (HAAP) consultation but the Core Strategy proposals pre-empt the next stage of the HAAP consultation.

Neither the Core Strategy nor HAAP define its status relevant to the other plan and subsequent priorities. Why is there no cross-referencing between concurrent plans affecting the exact same piece of land?

There are also inconsistencies between the Core Strategy & HAAP regarding the description of proposed uses for the two industrial estates. The Core Strategy refers to Leisure, Commercial and Residential whilst HAAP mentions a "village green, introducing a significant area of public open space". There is not sufficient space for both and the Core Strategy is again pre-empting the ongoing HAAP.

If a decision is taken now, as part of the Core Strategy, to relocate all the existing businesses on the two estates, it will set a legal precedent which HAAP will need to follow and renders the next stage of HAAP virtually redundant. Particularly given the 95% rejection rate of respondents to the previous round of HAAP such an approach is entirely undemocratic and unsound.

Summary:

The Core Strategy proposals pre-empt the next stage of the HAAP consultation and neither defines its status relevant to the other plan and subsequent priorities.

There are also inconsistencies between the Core Strategy & HAAP.

If a decision is taken as part of the Core Strategy, to relocate all the existing businesses on the two estates, it will set a legal precedent which HAAP will need to follow and renders the next stage of HAAP virtually redundant. Particularly given the 95% rejection rate of respondents to the previous round of HAAP such an approach is entirely undemocratic and unsound.

PPS12, 4.6, states that Cores Strategies should be flexible and "should be able to show how they will handle contingencies". Several large planning applications have already been submitted to RDC proposing developments outside the Core Strategy which does not indicate how such applications will be handled and does not comply with PPS12. Neither have RDC been able to advise residents how such changes will be made and the strategy is unsound.

THE Core Strategy misrepresents the findings of The Retail & Leisure Study (R&LS) 2008.

The Core Strategy states (12.38) "The Retail & Leisure Study indicates Hockley has great potential. Hockley has been identified as having a need for additional convenience floorspace".

Whereas, the R&LS actually states:

- 1) (10.26) "the scale of need does not lend itself to a foodstore capable of retaining a significant proportion of main food shopping expenditure.
 - 2) (10.28) "There is no immediate capacity for additional floor space."
 - 3) (10.29) "we recommend that focus be maintained on developing Hockley's existing strengths, rather than retail expansion"
 - 4) 10.31 "The current nature of Hockley does not lend itself to classification as a 'town centre' as defined by PPS6. Moreover, we have identified that it is a very small catchment population. Accordingly, the Council may wish to consider reclassifying Hockley from a town centre to a district centre".
- The Core Strategy is inaccurate, misleading and unsound.

Summary:

The Core Strategy misrepresents the findings of The Retail & Leisure Study (R&LS) 2008. The Core Strategy states "The Retail & Leisure Study states Hockley has great potential and has a need for additional convenience floorspace". Whereas, the R&LS states: 1) "does not lend itself to a foodstore capable of retaining a significant proportion of main food shopping expenditure. 2) "There is no immediate capacity for additional floor space." 3) "we recommend that focus be maintained on developing Hockley's existing strengths." 4) " the Council may wish to consider reclassifying Hockley from a town centre to a district centre".

Highway & Traffic Implications

Proposals for moving employment to out of town locations, at either end of the district, with no existing public transport links, are contrary to government policy PPG4. It also contravenes the Core Strategy's stated aims of reducing carbon emissions; reliance on car transport and providing "an integrated network of cycle paths".

The District of Rochford is predominately spread on a West/East axis along the railway line. Hockley is located in the middle of the district and the two estates are adjacent to the railway station. Bus services are poor with just 3* an hour (following a recent 50% reduction in services) and the operator has admitted they cannot compete with the railway making improvements to new sites away from major centres unlikely. (* one of the 3 services is paid for by ECC on a 6 mth trial and may be terminated in the new year).

However, the Core Strategy proposes to relocate these two estates to a greenfield site near the airport. This site is 2-3 miles from the nearest railway station and there are currently no bus services to the area. As a result, RDC are proposing to upgrade the nearest road to a dual-carriageway, although the main connecting road (the B1013), which runs through Hockley, will remain single-carriageway and is already at 72% of capacity (ECC Highways stats). This is despite extra traffic expected in the area as a result of the Joint Area Action Plan (JAAP) which proposes considerable growth at neighboring Southend Airport, as well as the new industrial estate.

The site selected for the new industrial estate also contravenes PPS4 which states;
â€¢ (EC7.3C) "out-of-centre sites, with preference given to sites which are or will be well served by a choice of means of transport and which are close to the centre and have a high likelihood of forming links with the centre. There is no existing public transport and no obvious likelihood of forming links with any existing centres.

â€¢ EC7.5 1 "whether the site is or will be accessible and well served by a choice of means of transport, especially public transport, walking and cycling, as well as by car". Its remote location. Accessed by the narrow, busy B1013 is not suitable for access by cycle or on foot.

It also contravenes PPS1 (27 vii) "Reduce the need to travel and encourage accessible public transport provision to secure more sustainable patterns of transport development. Planning should actively manage patterns of urban growth to make the fullest use of public transport and focus development in existing centres and near to major public transport interchanges".

The Core Strategy also contravenes its own policy T1 and is unsound.

Summary:

Proposals for moving employment to out of town locations, at either end of the district, with no existing public transport links, are contrary to government policy PPG4 & PPS1. It also contravenes the Core Strategy's stated aims of reducing carbon emissions; reliance on car transport and providing "an integrated network of cycle paths".

The Core Strategy also contravenes its own policy T1 and is unsound.

The Transport Evidence Base has not been re-evaluated following the decision to impose extra housing on the Eldon Way & Foundry Industrial Estates. ECC Highways have confirmed that the B1013 is running at 72% of its maximum theoretical capacity) and the effect of extra housing in Hockley (as well as Hawkwell) has not been re-evaluated and it is unclear what improvements will be required and whether they can be physically achieved.

Thus the proposals are not founded on a robust and credible evidence base and are unsound

RDC are proposing to scatter housing across the district in around 12 or sites but no detailed consideration has been given to the implications for highways across the District. The "Core Strategy" is not a strategy but simply a collection of disparate sites. Many roads across the District are at or near capacity but no modelling has been undertaken to determine the impacts or the funding required to upgrade them. At the Central Area Committee on 25 June 2009, RDC stated (in response to a question):

"Rochford Council is not the highway authority, but is working closely with Essex County Council to identify highway infrastructure requirements. Highway infrastructure improvements will be set out in the Core Strategy and other subsequent Development Plan Documents as required. These will be fed into the next version of the Essex Local Transport Plan, which is effectively a bidding document for funds to implement highway infrastructure improvements, schemes to tackle congestion, etc.

The District Council is working closely with the Essex County Council to ensure that highway infrastructure identified in the Core Strategy can be delivered."

It is clear that (i) the combined impact of scattering houses across the District and (ii) relocating Eldon Way/Foundry Industrial Estates to the very edge of the District with no public transport services will exacerbate existing problems. It is also clear that the extent of improvements required is both unknown and not funded and the proposal is unsound.

Full Text: Highway & Traffic Implications

1. Proposals for moving employment to out of town locations, at either end of the district, with no existing public transport links, are contrary to government policy PPG4. It also contravenes the Core Strategy's stated aims of reducing carbon emissions; reliance on car transport and providing "an integrated network of cycle paths".

The District of Rochford is predominately spread on a West/East axis along the railway line. Hockley is located in the middle of the district and the two estates are adjacent to the railway station. Bus services are poor with just 3* an hour (following a recent 50% reduction in services) and the operator has admitted they cannot compete with the railway making improvements to new sites away from major centres unlikely. (* one of the 3 services is paid for by ECC on a 6 mth trial and may be terminated in the new year).

However, the Core Strategy proposes to relocate these two estates to a greenfield site near the airport. This site is 2-3 miles from the nearest railway station and there are currently no bus services to the area. As a result, RDC are proposing to upgrade the nearest road to a dual-carriageway, although the main connecting road (the B1013), which runs through Hockley, will remain single-carriageway and is already at 72% of capacity (ECC Highways stats). This is despite extra traffic expected in the area as a result of the Joint Area Action Plan (JAAP) which proposes considerable growth at neighbouring Southend Airport, as well as the new industrial estate.

The site selected for the new industrial estate also contravenes PPS4 which states;

* (EC7.3C) "out-of-centre sites, with preference given to sites which are or will be well served by a choice of means of transport and which are close to the centre and have a high likelihood of forming links with the centre. There is no existing public transport and no obvious likelihood of forming links with any existing centres.

* EC7.5 1 "whether the site is or will be accessible and well served by a choice of means of transport, especially public transport, walking and cycling, as well as by car". Its remote location. Accessed by the narrow, busy B1013 is not suitable for access by cycle or on foot.

It also contravenes PPS1 (27 vii) "Reduce the need to travel and encourage accessible public transport provision to secure more sustainable patterns of transport development. Planning should actively manage patterns of urban growth to make the fullest use of public transport and focus development in existing centres and near to major public transport interchanges".

The Core Strategy also contravenes its own policy T1 and is unsound.

Summary:

Proposals for moving employment to out of town locations, at either end of the district, with no existing public transport links, are contrary to government policy PPG4 & PPS1. It also contravenes the Core Strategy's stated aims of reducing carbon emissions; reliance on car transport and providing "an integrated network of cycle paths".

The Core Strategy also contravenes its own policy T1 and is unsound.

2. The Transport Evidence Base has not been re-evaluated following the decision to impose extra housing on the Eldon Way & Foundry Industrial Estates. ECC Highways have confirmed that the B1013 is running at 72% of its maximum theoretical capacity) and the effect of extra housing in Hockley (as well as Hawkwell) has not been re-evaluated and it is unclear what improvements will be required and whether they can be physically achieved.

Thus the proposals are not founded on a robust and credible evidence base and are unsound

3. RDC are proposing to scatter housing across the district in around 12 or sites but no detailed consideration has been given to the implications for highways across the District. The "Core Strategy" is not a strategy but simply a collection of disparate sites. Many roads across the District are at or near capacity but no modelling has been undertaken to determine the impacts or the funding required to upgrade them. At the Central Area Committee on 25 June 2009, RDC stated (in response to a question):

"Rochford Council is not the highway authority, but is working closely with Essex County Council to identify highway infrastructure requirements. Highway infrastructure improvements will be set out in the Core Strategy and other subsequent Development Plan Documents as required. These will be fed into the next version of the Essex Local

16280 Object

CHAPTER 10 Introduction

Transport Plan, which is effectively a bidding document for funds to implement highway infrastructure improvements, schemes to tackle congestion, etc.

The District Council is working closely with the Essex County Council to ensure that highway infrastructure identified in the Core Strategy can be delivered."

It is clear that (i) the combined impact of scattering houses across the District and (ii) relocating Eldon Way/Foundry Industrial Estates to the very edge of the District with no public transport services will exacerbate existing problems. It is also clear that the extent of improvements required is both unknown and not funded and the proposal is unsound.

Summary:

RDC are proposing to scatter housing across the district in around 12 or sites but no detailed consideration has been given to the implications for highways across the District. Many roads across the District are at or near capacity but no modelling has been undertaken to determine the impacts

It is clear that (i) the combined impact of scattering houses across the District and (ii) relocating Eldon Way/Foundry Industrial Estates with no public transport services will exacerbate existing problems. It is clear that the extent of improvements required is both unknown and not funded and the proposal is unsound.

4. PPS12 4.9 states "The infrastructure planning process should identify, as far as possible: infrastructure needs and costs". Neither needs nor, especially, costs have been identified and the Core Strategy is therefore unsound.

The district's highways suffer from years of under investment and over use. The Core Strategy proposes to fund infrastructure improvements through use of Standard Charges. However, no detail is provided and no attempt made to identify the likely scale of such charges. It is therefore unclear if use of Standard Charges is financially viable.

Policy T2 provides a list of required highway improvements. The list contains most of the more major roads in the District including Rectory Lane, which has a single track, traffic light controlled railway bridge. 1200 dwellings are proposed for the northern end of Rectory Road and a further 175 at the southern end. The cost of addressing the railway bridge bottleneck will be significant but is not mentioned.

No attempt is made to either cost these charges or explain how improvements not linked to any one specific development will be paid for (eg B1013; Ashingdon Road; a network of walking, cycling, bridleways).

The concept of paying for improvements through use of Standard Charges is totally unproven and unsound.

Summary:

PPS12 4.9 states "The infrastructure planning process should identify, as far as possible: infrastructure needs and costs". Neither needs nor, especially, costs have been identified and the Core Strategy is therefore unsound.

The Core Strategy proposes to fund infrastructure improvements through use of Standard Charges. However, no detail is provided and no attempt made to identify the likely scale of such charges. It is therefore unclear if use of Standard Charges is financially viable.

5. SERT is put forward as a solution to reducing car use but it will only skirt the edge of the district and the Core Strategy acknowledges there is only "potential" to do so in the future. SERT is not realistic or reliable a solution and the proposal is therefore unsound.

6. Previous consultations ignored by RDC:

* The Hockley Parish Plan (dated 2007), clearly states that residents are strongly against any large scale housing development in Hockley, but if there has to be additional housing, then there should be no loss of greenbelt or open spaces, and no large housing estate developments. It was also stated that any developments must be matched by the appropriate levels of infrastructure.

* The proposals also ignore the 95% rejection rate of respondents to RDC's own Hockley Area Plan (HAAP) Consultation (2009), which included specific proposals for Eldon Way (although HAAP did not even mention the adjoining Foundry Industrial Estate). Why have a consultation and ignore it?

Thus the proposals are not founded on a robust and credible evidence base and are unsound.

Summary:

Previous consultations ignored by RDC:

The proposals ignore the 95% rejection rate of respondents to RDC's own Hockley Area Plan (HAAP) Consultation (2009), which included specific proposals for Eldon Way (although HAAP did not even mention the adjoining Foundry Industrial Estate). Why have a consultation and ignore it?

16280 Object

CHAPTER 10 Introduction

Thus the proposals are not founded on a robust and credible evidence base and are unsound

7. RDC have not consulted on the very specific proposals to relocate the Eldon Way and Foundry Industrial Estates

* The previous CS Strategy stated "we will look at opportunities for more valuable and appropriate uses of the industrial land" with absolutely no consultation at all on concept of moving existing EW businesses entirely

* the Foundry Industrial Estate has never even been previously mentioned in any plan version; A recent amendment to the Core Strategy states this omission was due to a typing error!

* The Urban Capacity study stated a "low probability" of housing and did not even mention the Foundry Estate

Thus the proposals are they are not founded on a robust and credible evidence base and are unsound.

Summary:

RDC have not consulted on the very specific proposals to relocate the Eldon Way and Foundry Industrial Estates

The previous CS Strategy stated "we will look at opportunities for more valuable and appropriate uses of the industrial land" with absolutely no consultation at all on concept of moving existing EW businesses entirely

the Foundry Industrial Estate has never even been previously mentioned;

The Urban Capacity study stated a "low probability" of housing and did not even mention the Foundry Estate

Thus the proposals are they are not founded on a robust and credible evidence base and are unsound.

8. Eldon Way and Foundry Industrial Estates form a significant part of the ongoing Hockley Area Action Plan (HAAP) consultation but the Core Strategy proposals pre-empt the next stage of the HAAP consultation.

Neither the Core Strategy nor HAAP define its status relevant to the other plan and subsequent priorities. Why is there no cross-referencing between concurrent plans affecting the exact same piece of land?

There are also inconsistencies between the Core Strategy & HAAP regarding the description of proposed uses for the two industrial estates. The Core Strategy refers to Leisure, Commercial and Residential whilst HAAP mentions a "village green, introducing a significant area of public open space". There is not sufficient space for both and the Core Strategy is again pre-empting the ongoing HAAP.

If a decision is taken now, as part of the Core Strategy, to relocate all the existing businesses on the two estates, it will set a legal precedent which HAAP will need to follow and renders the next stage of HAAP virtually redundant. Particularly given the 95% rejection rate of respondents to the previous round of HAAP such an approach is entirely undemocratic and unsound.

Summary:

The Core Strategy proposals pre-empt the next stage of the HAAP consultation and neither defines its status relevant to the other plan and subsequent priorities.

There are also inconsistencies between the Core Strategy & HAAP.

If a decision is taken as part of the Core Strategy, to relocate all the existing businesses on the two estates, it will set a legal precedent which HAAP will need to follow and renders the next stage of HAAP virtually redundant. Particularly given the 95% rejection rate of respondents to the previous round of HAAP such an approach is entirely undemocratic and unsound.

9. PPS12, 4.6, states that Cores Strategies should be flexible and "should be able to show how they will handle contingencies". Several large planning applications have already been submitted to RDC proposing developments outside the Core Strategy which does not indicate how such applications will be handled and does not comply with PPS12. Neither have RDC been able to advise residents how such changes will be made and the strategy is unsound.

10. THE Core Strategy misrepresents the findings of The Retail & Leisure Study (R&LS) 2008.

The Core Strategy states (12.38) "The Retail & Leisure Study indicates Hockley has great potential. Hockley has been identified as having a need for additional convenience floorspace".

Whereas, the R&LS actually states:

1) (10.26) "the scale of need does not lend itself to a foodstore capable of retaining a significant proportion of main food

Core Strategy Submission Document

16280 Object

CHAPTER 10 Introduction

shopping expenditure.

2) (10.28) "There is no immediate capacity for additional floor space."

3) (10.29) "we recommend that focus be maintained on developing Hockley's

existing strengths, rather than retail expansion"

4) 10.31 "The current nature of Hockley does not lend itself to classification as a 'town centre' as defined by PPS6. Moveover, we have identified that it is a very small catchment population. Accordingly, the Council may wish to consider reclassifying Hockley from a town centre to a district centre".

The Core Strategy is inaccurate, misleading and unsound.

Summary:

The Core Strategy misrepresents the findings of The Retail & Leisure Study (R&LS) 2008. The Core Strategy states "The Retail & Leisure Study states Hockley has great potential and has a need for additional convenience floorspace".

Whereas, the R&LS states: 1) "does not lend itself to a foodstore capable of retaining a significant proportion of main food shopping expenditure. 2) "There is no immediate capacity for additional floor space." 3) "we recommend that focus be maintained on developing Hockley's existing strengths." 4) " the Council may wish to consider reclassifying Hockley from a town centre to a district centre".

Summary:

Proposals for moving employment to out of town locations, at either end of the district, with no existing public transport links, are contrary to government policy PPG4 & PPS1. It also contravenes the Core Strategy's stated aims of reducing carbon emissions; reliance on car transport and providing "an integrated network of cycle paths".

The Core Strategy also contravenes its own policy T1 and is unsound.

10 off Unsound Reasons.
1. Highway and Traffic Implications

Proposals for moving employment to out of town locations, at either end of the district, with no existing public transport links, are contrary to government policy PPG4 & PPS1. It also contravenes the Core Strategy's stated aims of reducing carbon emissions; reliance on car transport and providing "an integrated network of cycle paths".

The Core Strategy also contravenes its own policy T1 and is unsound.

2. The Transport Evidence Base has not been re-evaluated following the decision to impose extra housing on the Eldon Way & Foundry Industrial Estates. ECC Highways have confirmed that the B1013 is running at 72% of its maximum theoretical capacity) and the effect of extra housing in Hockley (as well as Hawkwell) has not been re-evaluated and it is unclear what improvements will be required and whether they can be physically achieved.

Thus the proposals are not founded on a robust and credible evidence base and are unsound

3. RDC are proposing to scatter housing across the district in around 12 or sites but no detailed consideration has been given to the implications for highways across the District. Many roads across the District are at or near capacity but no modelling has been undertaken to determine the impacts

It is clear that (i) the combined impact of scattering houses across the District and (ii) relocating Eldon Way/Foundry Industrial Estates with no public transport services will exacerbate existing problems. It is clear that the extent of improvements required is both unknown and not funded and the proposal is unsound.

4. PPS12 4.9 states "The infrastructure planning process should identify, as far as possible: infrastructure needs and costs". Neither needs nor, especially, costs have been identified and the Core Strategy is therefore unsound.

The Core Strategy proposes to fund infrastructure improvements through use of Standard Charges. However, no detail is provided and no attempt made to identify the likely scale of such charges. It is therefore unclear if use of Standard Charges is financially viable.

5. SERT is put forward as a solution to reducing car use but it will only skirt the edge of the district and the Core Strategy acknowledges there is only "potential" to do so in the future. SERT is not realistic or reliable a solution and the proposal is therefore unsound.

6. Previous consultations ignored by RDC:
The Hockley Parish Plan (dated 2007). The proposals ignore the 95% rejection rate of respondents to RDC's own Hockley Area Plan (HAAP) Consultation (2009), which included specific proposals for Eldon Way (although HAAP did not even mention the adjoining Foundry Industrial Estate). Why have a consultation and ignore it?

Thus the proposals are not founded on a robust and credible evidence base and are unsound

7. RDC not consulted on proposals to relocate the Eldon Way and Foundry Industrial Estates

EW; CS Strategy stated "we will look at opportunities for more valuable and appropriate uses of the industrial land" absolutely no consultation on concept of moving EW businesses entirely

FIE; has never even been previously mentioned in any plan version; CS states omission was due to typing error!

Urban Capacity study stated a "low probability" of housing and did not even mention the Foundry Estate

Thus proposals are not founded on a robust and credible evidence base and are unsound.

8. The Core Strategy proposals pre-empt the next stage of the HAAP consultation and neither defines its status relevant to the other plan and subsequent priorities.

Core Strategy Submission Document

16298 Object

CHAPTER 10 Introduction

There are also inconsistencies between the Core Strategy & HAAP.

If a decision is taken as part of the Core Strategy, to relocate all the existing businesses on the two estates, it will set a legal precedent which HAAP will need to follow and renders the next stage of HAAP virtually redundant. Particularly given the 95% rejection rate of respondents to the previous round of HAAP such an approach is entirely undemocratic and unsound

9. PPS12, 4.6, states that Cores Strategies should be flexible and "should be able to show how they will handle contingencies"

Several large planning applications have already been submitted to RDC proposing developments outside the Core Strategy which

does not indicate how such applications will be handled and does not comply with PPS12. Neither have RDC been able to advise

residents how such changes will be made and the strategy is unsound.

10. The CS misrepresents the findings of The Retail & Leisure Study (R&LS) 2008.

The CS states "The R&LS states Hockley has great potential and has a need for additional convenience floorspace".

Whereas, the R&LS actually states:

- 1) "does not lend itself to a food store capable of retaining a significant proportion of main food shopping expenditure.
- 2) "there is no immediate capacity for additional floor space."
- 3) "recommend that focus be maintained on developing Hockley's existing strengths."
- 4) " the Council may wish to consider reclassifying Hockley from a town center, to a district center".

Summary:

1. Highway and Traffic Implications

Proposals for moving employment to out of town locations, at either end of the district, with no existing public transport links, are contrary to government policy PPG4 & PPS1. It also contravenes the Core Strategy's stated aims of reducing carbon emissions; reliance on car transport and providing "an integrated network of cycle paths".

The Core Strategy also contravenes its own policy T1 and is unsound.

CHAPTER 10 Introduction, 10.5

Respondent: Ms G Yeadell [7834]

6 Southend Road
Hockley
Essex
SS5 4QQ
01702 205450

Agent: N/A

Full Text: Para 4.8 States sustainability underlines any decisions on housing location, primarily: current and future deliverability of infrastructure, eg roads, services, public transport, health.

Policy H1

Para.4.14 Some employment sites are considered more suitable for other uses (eg housing) including Eldon Way/Foundry, Hockley. This is all open to question.

Hockley-re Eldon Way/Foundry

In CS Preferred Options 2008 policy H2 you discarded N.E.Hockley as a housing option - whilst close to centre, station, "impact on highway network from traffic heading through Hockley..along Ashingdon Road..renders location unviable". Clearly the same principle applied to Eldon Way/Foundry for the same reasons.

Response to C.S Preferred Options 2008 and HAAP 2009

June 2009 issue C S Submission issue says Eldon Way will be used for housing, whereas Sept.2009 issue says "alternative uses, including residential.." to be decided by HAAP (Issues consultation done, Pref.Options issue awaited, but judging from JAAP Pref.Options decision - namely biggest option chosen against overriding opposition, it will be housing).

Need to be logical and even-handed in proposals

Health services GP surgeries are full and a PCT health centre will not occur in the foreseeable economic climate.

Ch.10: Highways and Transport

Policy T1, T2 RDC proposes working with ECC Highways, developers, but admits it has no authority, responsibility here. RDC will seek developer contributions, but this is neither detailed nor costed in CS Submission nor HAAP, and contravenes PPS 12.3 para.4.93 which states "The infrastructure planning process should identify as far as possible infrastructure needs and costs". Idea of paying for road & transport improvements through Standard Charges is unproven and unsound.

Establish likely level of Standard Charges. Accept you cannot turn district into motorways with wholesale demolition.

In neither CS Submission nor HAAP is there any highways improvement, except idea to replace Spa roundabout with traffic lights and 1 way system up Southend Road and Hockley Rise.

Para.10.5 "..highway improvements serving new developments..in a timely manner..ensuring developments delivered alongside necessary infrastructure".

These improvements cannot possibly be delivered. It should be realised: B1013 (Southend Rd), Rectory Road Hawkwell, Ashingdon, West Rochford - all in area proposed for large new developments are former winding, narrow country roads, tarmacked over for motorised traffic. Large housing increments are unsustainable off these roads, which cannot be altered without much destruction.

Reply to CS Pref. Options 2008 & HAAP Issues/Options 2009

Policy T3, CLT1 Appendix CLT1 Public transport RDC admits this is in the private sector. In Hockley, operator has cut No7 service to 1 per hour from Ashingdon Schools, claiming it is unviable beyond. This is unlikely to change as Hockley is car dependant. No8 bus through Hawkwell is cut to 1 per hour to Rayleigh, for same reason as No7. Proposed planning agreements with developers can't run: eg, a community centre or classroom given by a developer remains once he has moved on - how can that apply for an on-going bus service?

Reply to Infrastructure Transport in CS Pref. Opts. 2008 and to HAAP Issues Opts. 2009.

Ch.11 Economic development

Policy ED3 Core Strategy preferred Options 2008 hinted at possible housing in Eldon Way site. June 2009 Submission version, without consultation, said Eldon Way would be housing (map included Foundry, not the text). September 2009 Submission said redevelopment would be in HAAP (which apart from the Issues/Options version, is unfinished. Judging from results of JAAP Preferred Options where biggest option is chosen, though most respondents were against it, site will be housing, without consultation.

Core Strategy Submission Document

O - 16714 - 7834 - Introduction, 10.5 - i

16714 Object

CHAPTER 10 Introduction, 10.5

Para.1.25, Para.11.32 Note CH.1 Introduction to CS Submission 2009 para.1.25 East England Plan requires 3000 additional jobs, presumably to 2021. Revised Southend Airport is expected to drive Economic development. But at para. 11.32 Eldon Way-Foundry estate is planned to be more suitably utilized. "...alternative land will be required to accommodated employment uses so displaced" - ie jobs sent to eg new site near Southend Airport - not new jobs.

Reply to HAAP Issues Options 2009

Remove compulsory relocation

Policy ED4 Policy states Council will allocate 18ha of land to make up for de-allocations in ED3 - that proves point above.

Proposals for moving employment to out of town locations with no existing transport links are contrary to government policies PPG4, PPS1 and PPS4 and Core Strategy Policy T1.

Evidence Base is ignored by contravening Hockley Parish Plan 2007 and ignoring residents' views on HAAP Issues/Options. Next stage of HAAP Preferred Options is pre-empted and rendered irrelevant. Core Strategy plans to relocate Eldon Way Foundry estate to Greenfield site with no nearby bus or railway. RDC plans to upgrade the nearest road to dual carriageway, though the connecting B1013 (through Hockley) will stay single, said by ECC Highways statistics to be 72% capacity. Airport bosses and council cannot suggest there will be no traffic growth from JAAP and new industrial site.

Reply to Hockley Parish Plan 2007. HAAP Issues 2009

Move to new industrial site near airport contravenes PPS4:

- EC7.3C "out of centre sites, with preference given to sites...well served by choice of...transport and...close to centre and...high likelihood of forming links with centre". There is no current public transport and links with centres is unlikely".

- EC 7.5.1 "whether the site is or will be accessible and well served by choice of transport, public transport, walking and cycling, as well as by car...". Remote location, narrow busy B1013 makes the site unsuitable for access by cycle or on foot.

It also contravenes PPS1 (27vii)... "reduce need to travel, encourage accessible public transport provision to secure more sustainable patterns of transport...Planning should actively manage patterns of urban growth to make fullest use of public transport and focus development in existing centres, near to major public transport interchanges". Core Strategy undermines its own policy Transport and Highways policy T1 and is unsound.

Although shown on accompanying drawing in earlier versions, there was no prior textual mention of Foundry industrial estate (next to Eldon Way) for redevelopment until current CS 2009 Submission. This was stated to be a typing error, but does not inspire confidence in reliability of drafting.

Revise both 2009 Core Strategy and 2009 HAAP Issues/options

Chapter 12: Retail/Town centres

The Core Strategy misrepresents findings of the Retail and Leisure Study 2008.

Para.12.38 The Core Strategy states (para.12.38) "The Retail & Leisure Study indicates Hockley has great potential. Hockley has been identified as having a need for additional convenience floorspace."

Whereas the R&LS actually states:

1) (10.26) "the scale of need does not lend itself to a foodstore capable of retaining a significant proportion of main food shopping expenditure".

2) (10.28) "There is no immediate capacity for additional floorspace".

3) (10.29) "we recommend focus be maintained on developing Hockley's existing strengths, rather than retail expansion"

4) 10.31 "the current nature of Hockley does not lend itself to classification as a 'town centre' as defined by PPS6. Moreover, we have identified that it has a very small catchment population. Accordingly, the council may wish to consider reclassifying Hockley from a town centre to a district centre".

Defer whole of proposals for Hockley town centre to Hockley Area Action Plan.

The Council will work with landowners and its partners to deliver the HAAP.

Remove threat of compulsory purchase orders.

Core Strategy Submission Document

O - 16714 - 7834 - Introduction, 10.5 - i

16714 Object

CHAPTER 10 Introduction, 10.5

One doesn't perceive impartiality when the Planning Director replies to local HAAP survey with "The affluent people of Hockley are entitled to famous name shops".

Chapter 5: Character of Place and Local Lists

Para.5.4 "Rochford district has unique character..stems from traditional buildings..still dominate towns and villages".

Para.5.17 "Council believes many buildings..are of local distinctiveness..part of..cherished local scene".

This only applies to favoured places: Rochford, Rayleigh, greenbelt villages. Many Hockley conservable items have been systemically removed for supposedly lucrative development in face of widespread protect. This is for supposed need for housing. In fact heritage items have been replaced by dwellings most cannot afford, and/or are hard to sell due to unsuitability of massing and siting. Many other homes are jeopardised by this practice.

HAAP issues 2009. Core Strategy 2006, 2007,2008, SCI.2006

Fewer 'vested interests', more even handedness. No more pressing people out of businesses, homes for expediency.

A CPRE Fieldwork issue extolled Local Lists, citing refusal of 16 flats to replace character house, not on local list. Inspector said house, façade made a contribution to area character, even if English heritage decided it didn't warrant listing. Council worked to get the house grade listed and even made adjacent area conservation one.

Hockley had one such on a "significant site" faced with 13 flats. Ward Member omitted house from refusal proposal, so house could be demolished. RDC dropped Local List ahead of appeal: "Government frowned on such Lists" (Other LAs, unaware of supposed directive retained theirs. After demolition RDC restored Local Lists, saying Government now support them. When Inspector queried the complaint, the then policy officer said "just politics, lot of local interest, nothing of character in the area[!]. (A dozen such items had been removed). Some "distinctive" Hockley buildings are still condemned (in Greensward Lane.; others threatened (Spa Road). Whereas a modest hue and cry in Rayleigh will usually result in a building being saved.

Conclusion

Core Strategy Submission DPD is basically unsound in many respects

Incomplete information. Amongst others, it refers to Hockley AAP, the first stage of which is complete, but not other three. Rochford AAP first stage has been published in arrears of Core Strategy Submission. Rayleigh AAP is still awaited. Precise housing sites are absent, as Urban Capacity Study 2007 has been superseded by Strategic Housing Land Availability Assessment, not yet published. Traders, residents, are thus responding to Core Strategy Submission with incomplete information.

Lack of community involvement. Chapter 1, Introduction, para. 1.11 "Community involvement is an essential part of the plan making process".

In Statement of Community Involvement 2006 Rochford RDC "recognises need to enable people to have their voices heard".

Re Public Meetings: "Consideration will be had to timing and venue to ensure meeting is as accessible as possible".

Take Hockley Area Action Plan as an example of the opposite of all this:- Presentation of document was at Hullbridge, 7.30pm. It was also discussed with JAAP at Rochford Freight House (for traders only) at 7am, without publicity. Excuse made: HAAP on RDC website, which none will seek unless knowing it is there. Rochford District Matters newsheet had minute articles on p.3, half way through consultation period. Another excuse: a 2nd presentation by Hockley Residents Association with planning officer present: only because of complaints, and it is not the HRA's responsibility to RDC's job. Due to unavoidable haste of calling meeting, few knew and only 50 were present.

In Core Strategy Submission Hockley Parish Plan has been ignored. Proposals also ignore 95% rejection rate response to HAAP 2009, which included proposals for Eldon Way employment site.

Unfettered right of developers to carry on as if Core Strategy didn't exist. In PPS 12, Ch.4.6 states: "Core Strategies should be flexible and able to show how they handle contingencies". Several large planning applications have been submitted proposing developments outside the Core Strategy which does not indicate how such applications will be handled and does not comply with PPS 12.

Where are we? Finally, at Chapter 1, Introduction, para. 1.24: "the Core Strategy will have to be reviewed in the event of a new Local Area Agreement, post-2011, setting different priorities". So what purpose does all this work serve? So we have hardly finished this exercise, before it all starts again?

Summary:

Para.10.5 "..highway improvements serving new developments..in a timely manner..ensuring developments delivered alongside necessary infrastructure".

These improvements cannot possibly be delivered. It should be realised: B1013 (Southend Rd), Rectory Road

Chapter 4: Housing

Para 4.8 States sustainability underlines any decisions on housing location, primarily: current and future deliverability of infrastructure, eg roads, services, public transport, health.

Policy H1, Para.4.14 Some employment sites are considered more suitable for other uses (eg housing) including Eldon Way/Foundry, Hockley. This is all open to question.

Hockley-re Eldon Way/Foundry

In CS Preferred Options 2008 policy H2

N.E.Hockley was discarded as a housing option - whilst close to centre, station, "impact on highway network from traffic heading through Hockley...along Ashingdon Road..renders location unviable". Clearly the same principle applied to Eldon Way/Foundry for the same reasons.

Need to be logical and even-handed in proposals

June 2009 issue C S Submission issue says Eldon Way will be used for housing, whereas Sept.2009 issue says "alternative uses, including residential.." to be decided by HAAP (Issues consultation done, Pref.Options issue awaited, but judging from JAAP Pref.Options decision - namely biggest option chosen against overriding opposition, it will be housing).

Policy H1, T1 Proposals for moving employment to out of town locations, at either end of the district, with no existing public transport links, are contrary to government policy PPG14 & PPS1. it also contravenes the Core Strategy's stated aims of reducing carbon emissions; reliance on car transport and providing "an integrated network of cycle paths",

The Core Strategy also contravenes its own policy T1 and is unsound.

Health services GP surgeries are full and a PCT health centre will not occur in the foreseeable economic climate.

Ch.10: Highways and Transport

Policy T1, T2 RDC proposes working with ECC Highways, developers, but admits it has no authority, responsibility here. RDC will seek developer contributions, but this is neither detailed nor costed in CS Submission nor HAAP, and contravenes PPS 12.3 para.4.93 which states "The infrastructure planning process should identify as far as possible infrastructure needs and costs". Idea of paying for road & transport improvements through Standard Charges is unproven and unsound.

Establish like motorways with wholesale demolition.

In neither CS Submission nor HAAP is there any highways improvement, except idea to replace Spa roundabout with traffic lights and 1 way system up Southend Road and Hockley Rise.

RDC are proposing to scatter housing across the district in around 12 or sites but no detailed consideration has been given to the implications for highways across the District. Many roads across the District are at or near capacity but no modelling has been undertaken to determine the impacts.

It is clear that (i) the combined impact of scattering houses across the District and (ii) relocating Eldon Way/Foundry Industrial Estates with no public transport services will exacerbate existing problems. It is clear that the extent of improvements required is both unknown and not funded and the proposal is unsound.

Para.10.5

Policy T3, CLT1 Appendix CLT1

T1 & T2 "...highway improvements serving new developments..in a timely manner..ensuring developments delivered alongside necessary infrastructure".

These improvements cannot possibly be delivered. It should be realised: B1013 (Southend Rd), Rectory Road Hawkwell, Ashingdon, West Rochford - all in area proposed for large new developments are former winding, narrow country roads, tarmacked over for motorised traffic. Large housing increments are unsustainable off these roads, which

16746 Object

CHAPTER 10 Introduction, 10.5

cannot be altered without much destruction.

Public transport RDC admits this is in the private sector. In Hockley, operator has cut No 7 service to one per hour from Ashingdon Schools, claiming it is unviable beyond. This is unlikely to change as Hockley is car dependant. No 8 bus through Hawkwell is cut to one per hour to Rayleigh, for same reason as No 7. Proposed planning agreements with developers can't run: e.g., a community centre or classroom given by a developer remains once he has moved on - how can that apply for an on-going bus service?

Ch.11 Economic development

Policy ED3 Core Strategy preferred Options 2008 hinted at possible housing in Eldon Way site. June 2009 Submission version, without consultation, said Eldon Way would be housing (map included Foundry, not the text). September 2009 Submission said redevelopment would be in HAAP (which apart from the Issues/Options version, is unfinished. Judging from results of JAAP Preferred Options where biggest option is chosen, though most respondents were against it, site will be housing, without consultation.

Para.1.25 Para.11.32

Policy ED4 T1 & T2 Note CH.1 Introduction to CS Submission 2009 para.1.25 East England Plan requires 3000 additional jobs, presumably to 2021. Revised Southend Airport is expected to drive Economic development. But at para. 11.32 Eldon Way-Foundry estate is planned to be more suitably utilized. "...alternative land will be required to accommodated employment uses so displaced" - ie jobs sent to eg new site near Southend Airport - not new jobs.

Remove compulsory relocation

Policy states Council will allocate 18ha of land to make up for de-allocations in ED3 - that proves point above.

Proposals for moving employment to out of town locations with no existing transport links are contrary to government policies PPG4, PPS1 and PPS4 and Core Strategy Policy T1.

Evidence Base is ignored by contravening Hockley Parish Plan 2007 and ignoring residents' views on HAAP Issues/Options. Next stage of HAAP Preferred Options is pre-empted and rendered irrelevant.

Core Strategy plans to relocate Eldon Way Foundry estate to Greenfield site with no nearby bus or railway. RDC plans to upgrade the nearest road to dual carriageway, though the connecting B1013 (through Hockley) will stay single, said by ECC Highways statistics to be 72% capacity. Airport bosses and council cannot suggest there will be no traffic growth from JAAP and new industrial site.

Revise both 2009 Core Strategy and 2009 HAAP Issues/options

Move to new industrial site near airport contravenes PPS4:

EC7.3C "out of centre sites, with preference given to sites..well served by choice of..transport and..close to centre and..high likelihood of forming links with centre". There is no current public transport and links with centres is unlikely".

EC 7.5.1 "whether the site is or will be accessible and well served by choice of transport, public transport, walking and cycling, as well as by car..". Remote location, narrow busy B1013 makes the site unsuitable for access by cycle or on foot.

It also contravenes PPS1 (27vii).. "reduce need to travel, encourage accessible public transport provision to secure more sustainable patterns of transport..Planning should actively manage patterns of urban growth to make fullest use of public transport and focus development in existing centres, near to major public transport interchanges". Core Strategy undermines its own policy Transport and Highways policy T1 and is unsound.

H1 & RTC6 Although shown on accompanying drawing in earlier versions, there was no prior textual mention of Foundry industrial estate (next to Eldon Way) for redevelopment until current CS 2009 Submission. In recent amendment to the CS this was stated to be due to a typing error!

Chapter 12: Retail/Town centres

The Core Strategy misrepresents findings of the Retail and Leisure Study 2008.

Defer whole of proposals for Hockley town centre to Hockley Area Action Plan.

Para.12.38 H1 & RTC6 The Core Strategy states (para.12.38) "The Retail & Leisure Study indicates Hockley has great potential. Hockley has been identified as having a need for additional convenience floorspace."

Whereas the R&LS actually states:

1) (10.26) "the scale of need does not lend itself to a foodstore capable of retaining a significant proportion of main food

Core Strategy Submission Document

16746 Object

CHAPTER 10 Introduction, 10.5

shopping expenditure".

2) (10.28) "There is no immediate capacity for additional floorspace".

3) (10.29) "we recommend focus be maintained on developing Hockley's existing strengths, rather than retail expansion"

4) 10.31 "the current nature of Hockley does not lend itself to classification as a 'town centre' as defined by PPS6. Moreover, we have identified that it has a very small catchment population. Accordingly, the council may wish to consider reclassifying Hockley from a town centre to a district centre".

Remove threat of compulsory purchase orders.

The Council will work with landowners and its partners to deliver the HAAP.

Chapter 5: Character of Place and Local Lists

Para.5.4 "Rochford district has unique character..stems from traditional buildings..still dominate towns and villages".

Para.5.17 "Council believes many buildings..are of local distinctiveness..part of..cherished local scene".

This only appears to apply to certain places: Rochford, Rayleigh, greenbelt villages. Many Hockley conservable items have been systemically removed for supposedly lucrative development in face of widespread protect. This is for supposed need for housing. In fact heritage items have been replaced by dwellings most cannot afford, and/or are hard to sell due to unsuitability of massing and siting. Many other homes are jeopardised by this practice.

Conclusion

Core Strategy Submission DPD is basically unsound in many respects:

Incomplete information. Amongst others, it refers to Hockley AAP, the first stage of which is complete, but not other three. Rochford AAP first stage has been published in arrears of Core Strategy Submission. Rayleigh AAP is still awaited. Precise housing sites are absent, as Urban Capacity Study 2007 has been superseded by Strategic Housing Land Availability Assessment, not yet published. Traders, residents, are thus responding to Core Strategy Submission with incomplete information.

Lack of community involvement. Chapter 1, Introduction, para. 1.11 "Community involvement is an essential part of the plan making process". In Statement of Community Involvement 2006 Rochford RDC "recognises need to enable people..to have their voices heard".

Re Public Meetings: "Consideration will be had to timing and venue to ensure meeting is as accessible as possible".

Hockley Area Action Plan as an example of the opposite of all this:- Presentation of document was at Hullbridge, 7.30 p.m. It was also discussed with JAAP at Rochford Freight House (for traders only) at 7 a.m., without publicity. Excuse made: HAAP on RDC website, which none will seek unless knowing it is there. Rochford District Matters newssheet had minute articles on p.3, half way through consultation period. Another excuse: a second presentation by Hockley Residents Association with planning officer present: only because of complaints, and it is not the HRA's responsibility to RDC's job. Due to unavoidable haste of calling meeting, few knew and only 50 were present.

In Core Strategy Submission Hockley Parish Plan has been ignored. Proposals also ignore 95% rejection rate response to HAAP 2009, which included proposals for Eldon Way employment site.

Unfettered right of developers to carry on as if Core Strategy didn't exist. In PPS 12, Ch.4.6 states: "Core Strategies should be flexible and able to show how they handle contingencies". Several large planning applications have been submitted proposing developments outside the Core Strategy which does not indicate how such applications will be handled and does not comply with PPS 12.

Where are we? Finally, at Chapter 1, Introduction, para. 1.24: "the Core Strategy will have to be reviewed in the event of a new Local Area Agreement, post-2011, setting different priorities". So what purpose does all this work serve? So we have hardly finished this exercise, before it all starts again?

Summary:

Para 10.5 "..highway improvements serving new developments..in a timely manner..ensuring developments delivered alongside necessary infrastructure".

These improvements cannot possibly be delivered. It should be realised: B1013 (Southend Rd), Rectory Road Hawkwell, Ashingdon, West Rochford - all in area proposed for large new developments are former winding, narrow country roads, tarmacked over for motorised traffic. Large housing increments are unsustainable off these roads, which cannot be altered without much destruction.

CHAPTER 10 Highways, 10.9

Respondent: Mr Alan Stone [7995]

180 Rawreth Lane
Rayleigh
Essex
SS6 9RN
United Kingdom
01268 784031

Agent: N/A

Full Text:

Policy T1 - Highways states "Developments will be required to be located and designed in such a way as to reduce reliance on the private car. However, some impact on the highway network is inevitable and the Council will work with developers and the Highway Authority to ensure that appropriate improvements are carried out. The Council will work with the Highways Authority to deliver online improvements to the east to west road network".

Policy T1 - Highways (extracts) Policy states:

1, "Developments will be required to be located and designed in such a way as to reduce reliance on the private car, However, some impact on the highway network is inevitable and the Council will work with developers and the Highway Authority to ensure that appropriate improvements are carried out".

This is an UNSOUND Statement. Development of Rawreth will not reduce the reliance on the private car because it is too remote from principal towns and schools. Public transport is poor and infrequent. Bus companies keep saying it is not commercially viable.

2, "The Council will work with the Highways Authority to deliver online improvements to the east to west road network". Rawreth Lane forms part of the East to West road network but has no mention in T2 - Highway Improvements. This road already suffers severe congestion at commuter and school run periods. Regular grid lock happens now and will only get worse if a massive development, linked to Rawreth Lane, is approved.

This is also UNSOUND as Rawreth Lane is not identified as part of the East to West road network

Summary:

Development in Rawreth will not reduce the reliance on cars, because it is too remote from principal towns and schools. Not mentioned in T2, Rawreth Lane forms part of the East to West network. Presumably this means no delivery of online improvements. *** I disagree with these summaries, please read the full submission.

Change to Plan

Include Rawreth Lane when considering any improvements to the East to West road network. Do not ignore the fact that such development will cause additional pressure on an already inadequate road.

Full Text: Quote from above: "In addition, the Council believe that existing connections between the west, where the population is focused, and the more rural east which nevertheless contains a number of local employment uses, is inadequate. The Council will work with Essex County Council to seek necessary improvements to east-west highways in order to help sustain employment uses in the east of the District".
Yet more evidence that the extra dwellings in the west will affect existing connections with the east. Again I state that far less dwellings should be proposed for Rawreth.

Full Text: RDC are proposing to scatter housing across the district in around 12 or sites but no detailed consideration has been given to the implications for highways across the District. The "Core Strategy" is not a strategy but simply a collection of disparate sites. Many roads across the District are at or near capacity but no modelling has been undertaken to determine the impacts or the funding required to upgrade them. At the Central Area Committee on 25 June 2009, RDC stated (in response to a question):

"Rochford Council is not the highway authority, but is working closely with Essex County Council to identify highway infrastructure requirements. Highway infrastructure improvements will be set out in the Core Strategy and other subsequent Development Plan Documents as required. These will be fed into the next version of the Essex Local Transport Plan, which is effectively a bidding document for funds to implement highway infrastructure improvements, schemes to tackle congestion, etc.

The District Council is working closely with the Essex County Council to ensure that highway infrastructure identified in the Core Strategy can be delivered."

It is clear that (i) the combined impact of scattering houses across the District and (ii) relocating Eldon Way/Foundry Industrial Estates to the very edge of the District with no public transport services will exacerbate existing problems. It is also clear that the extent of improvements required is both unknown and not funded and the proposal is unsound.

Full Text:

I quote from this section. "A considerable impact on the highway network is inevitable". So if this is the case, are RDC failing to address the problem by merely stating "we will work with developers and the Highway Authority to ensure that the requisite improvements are carried out"?

Pro-active plans are essential and RDC are failing drastically in this, as they cannot envisage a solution. What is meant by their stated objective "To deliver online improvements on the east to west road networks in partnership with the Highways Authority, Essex County Council ?

To me this is an unsound and meaningless statement. Rochford District residents have continually raised the question of how the east to west road networks can be improved and we are always told that they cannot due to the nature and topography of the area.

End of page 1. See page 2

Summary:

RDC and ECC Highways should be instructed to provide details of a structured and achievable plan to overcome the fact that "A considerable impact on the highway network is inevitable". Highways infrastructure, and in particular the East-West road network, should be in place before any further building is allowed.

Change to Plan

RDC and ECC Highways should be instructed to provide details of a structured and achievable plan to overcome the fact that "A considerable impact on the highway network is inevitable". Highways infrastructure should be in place before any further building is allowed.

Page 2. Please link to page 1.

In the not to distant future the potentially massive development London Southend Airport will have a dramatic impact on the existing road networks. This will not only result in an increase of passenger and freight traffic on our overcrowded roads, there will also have to be capacity for the 7000 personnel entering new jobs that will be created.

Can anything be so unsound as this! To enter such a period of expansion in people, and ultimately road traffic, without a structured and achievable plan is absolutely ludicrous.

Linked to the subject of 7000 new jobs at the airport, I raise again the proposal for 1020 new dwellings in Rawreth. It has been suggested by RDC that many of the new employees will need new accommodation and to achieve low levels of car use it would be sensible to provide dwellings in close proximity to the workplace thus enabling employees to walk or cycle to work.

This being the case, the proposed 'North of London Road' Rawreth site is eight miles from the airport and I would suggest that in general the car would be the method of commuting. Here again commuters would have to use the inadequate west to east routes.

Surely workforce dwellings should be within about two miles radius of the workplace to reduce traffic capacity and currently there are a number of areas to the north and north east of the airport to accommodate this. It may mean that some farmland and plotlands in the areas of Rochford and Ashingdon would have to be used but these are better suited to minimise traffic problems and could spare the need to erode the natural green belt between Rayleigh and the A130 trunk road at Rawreth.

Summary:

7000 new jobs at Southend Airport and more than 50% of the houses in the west of the district. Probably little walking or cycling to work. Poor public transport and an inadequate east/west route. Workers houses should be within a 2 mile radius of airport, to north or north east.

Change to Plan

Reduce the road traffic on the East/West route by locating more houses to the north or north east of the airport, Rochford west or Ashingdon, and reduce the amount in Rawreth.

Full Text: Highway & Traffic Implications

1. Proposals for moving employment to out of town locations, at either end of the district, with no existing public transport links, are contrary to government policy PPG4. It also contravenes the Core Strategy's stated aims of reducing carbon emissions; reliance on car transport and providing "an integrated network of cycle paths".

The District of Rochford is predominately spread on a West/East axis along the railway line. Hockley is located in the middle of the district and the two estates are adjacent to the railway station. Bus services are poor with just 3* an hour (following a recent 50% reduction in services) and the operator has admitted they cannot compete with the railway making improvements to new sites away from major centres unlikely. (* one of the 3 services is paid for by ECC on a 6 mth trial and may be terminated in the new year).

However, the Core Strategy proposes to relocate these two estates to a greenfield site near the airport. This site is 2-3 miles from the nearest railway station and there are currently no bus services to the area. As a result, RDC are proposing to upgrade the nearest road to a dual-carriageway, although the main connecting road (the B1013), which runs through Hockley, will remain single-carriageway and is already at 72% of capacity (ECC Highways stats). This is despite extra traffic expected in the area as a result of the Joint Area Action Plan (JAAP) which proposes considerable growth at neighbouring Southend Airport, as well as the new industrial estate.

The site selected for the new industrial estate also contravenes PPS4 which states;

* (EC7.3C) "out-of-centre sites, with preference given to sites which are or will be well served by a choice of means of transport and which are close to the centre and have a high likelihood of forming links with the centre. There is no existing public transport and no obvious likelihood of forming links with any existing centres.

* EC7.5 1 "whether the site is or will be accessible and well served by a choice of means of transport, especially public transport, walking and cycling, as well as by car". Its remote location. Accessed by the narrow, busy B1013 is not suitable for access by cycle or on foot.

It also contravenes PPS1 (27 vii) "Reduce the need to travel and encourage accessible public transport provision to secure more sustainable patterns of transport development. Planning should actively manage patterns of urban growth to make the fullest use of public transport and focus development in existing centres and near to major public transport interchanges".

The Core Strategy also contravenes its own policy T1 and is unsound.

Summary:

Proposals for moving employment to out of town locations, at either end of the district, with no existing public transport links, are contrary to government policy PPG4 & PPS1. It also contravenes the Core Strategy's stated aims of reducing carbon emissions; reliance on car transport and providing "an integrated network of cycle paths".

The Core Strategy also contravenes its own policy T1 and is unsound.

2. The Transport Evidence Base has not been re-evaluated following the decision to impose extra housing on the Eldon Way & Foundry Industrial Estates. ECC Highways have confirmed that the B1013 is running at 72% of its maximum theoretical capacity) and the effect of extra housing in Hockley (as well as Hawkwell) has not been re-evaluated and it is unclear what improvements will be required and whether they can be physically achieved.

Thus the proposals are not founded on a robust and credible evidence base and are unsound

3. RDC are proposing to scatter housing across the district in around 12 or sites but no detailed consideration has been given to the implications for highways across the District. The "Core Strategy" is not a strategy but simply a collection of disparate sites. Many roads across the District are at or near capacity but no modelling has been undertaken to determine the impacts or the funding required to upgrade them. At the Central Area Committee on 25 June 2009, RDC stated (in response to a question):

"Rochford Council is not the highway authority, but is working closely with Essex County Council to identify highway infrastructure requirements. Highway infrastructure improvements will be set out in the Core Strategy and other subsequent Development Plan Documents as required. These will be fed into the next version of the Essex Local

16282 Object

CHAPTER 10 Policy T1 - Highways

Transport Plan, which is effectively a bidding document for funds to implement highway infrastructure improvements, schemes to tackle congestion, etc.

The District Council is working closely with the Essex County Council to ensure that highway infrastructure identified in the Core Strategy can be delivered."

It is clear that (i) the combined impact of scattering houses across the District and (ii) relocating Eldon Way/Foundry Industrial Estates to the very edge of the District with no public transport services will exacerbate existing problems. It is also clear that the extent of improvements required is both unknown and not funded and the proposal is unsound.

Summary:

RDC are proposing to scatter housing across the district in around 12 or sites but no detailed consideration has been given to the implications for highways across the District. Many roads across the District are at or near capacity but no modelling has been undertaken to determine the impacts

It is clear that (i) the combined impact of scattering houses across the District and (ii) relocating Eldon Way/Foundry Industrial Estates with no public transport services will exacerbate existing problems. It is clear that the extent of improvements required is both unknown and not funded and the proposal is unsound.

4. PPS12 4.9 states "The infrastructure planning process should identify, as far as possible: infrastructure needs and costs". Neither needs nor, especially, costs have been identified and the Core Strategy is therefore unsound.

The district's highways suffer from years of under investment and over use. The Core Strategy proposes to fund infrastructure improvements through use of Standard Charges. However, no detail is provided and no attempt made to identify the likely scale of such charges. It is therefore unclear if use of Standard Charges is financially viable.

Policy T2 provides a list of required highway improvements. The list contains most of the more major roads in the District including Rectory Lane, which has a single track, traffic light controlled railway bridge. 1200 dwellings are proposed for the northern end of Rectory Road and a further 175 at the southern end. The cost of addressing the railway bridge bottleneck will be significant but is not mentioned.

No attempt is made to either cost these charges or explain how improvements not linked to any one specific development will be paid for (eg B1013; Ashingdon Road; a network of walking, cycling, bridleways).

The concept of paying for improvements through use of Standard Charges is totally unproven and unsound.

Summary:

PPS12 4.9 states "The infrastructure planning process should identify, as far as possible: infrastructure needs and costs". Neither needs nor, especially, costs have been identified and the Core Strategy is therefore unsound.

The Core Strategy proposes to fund infrastructure improvements through use of Standard Charges. However, no detail is provided and no attempt made to identify the likely scale of such charges. It is therefore unclear if use of Standard Charges is financially viable.

5. SERT is put forward as a solution to reducing car use but it will only skirt the edge of the district and the Core Strategy acknowledges there is only "potential" to do so in the future. SERT is not realistic or reliable a solution and the proposal is therefore unsound.

6. Previous consultations ignored by RDC:

* The Hockley Parish Plan (dated 2007), clearly states that residents are strongly against any large scale housing development in Hockley, but if there has to be additional housing, then there should be no loss of greenbelt or open spaces, and no large housing estate developments. It was also stated that any developments must be matched by the appropriate levels of infrastructure.

* The proposals also ignore the 95% rejection rate of respondents to RDC's own Hockley Area Plan (HAAP) Consultation (2009), which included specific proposals for Eldon Way (although HAAP did not even mention the adjoining Foundry Industrial Estate). Why have a consultation and ignore it?

Thus the proposals are not founded on a robust and credible evidence base and are unsound.

Summary:

Previous consultations ignored by RDC:

The proposals ignore the 95% rejection rate of respondents to RDC's own Hockley Area Plan (HAAP) Consultation (2009), which included specific proposals for Eldon Way (although HAAP did not even mention the adjoining Foundry Industrial Estate). Why have a consultation and ignore it?

16282 Object

CHAPTER 10 Policy T1 - Highways

Thus the proposals are not founded on a robust and credible evidence base and are unsound

7. RDC have not consulted on the very specific proposals to relocate the Eldon Way and Foundry Industrial Estates

* The previous CS Strategy stated "we will look at opportunities for more valuable and appropriate uses of the industrial land" with absolutely no consultation at all on concept of moving existing EW businesses entirely

* the Foundry Industrial Estate has never even been previously mentioned in any plan version; A recent amendment to the Core Strategy states this omission was due to a typing error!

* The Urban Capacity study stated a "low probability" of housing and did not even mention the Foundry Estate

Thus the proposals are they are not founded on a robust and credible evidence base and are unsound.

Summary:

RDC have not consulted on the very specific proposals to relocate the Eldon Way and Foundry Industrial Estates

The previous CS Strategy stated "we will look at opportunities for more valuable and appropriate uses of the industrial land" with absolutely no consultation at all on concept of moving existing EW businesses entirely

the Foundry Industrial Estate has never even been previously mentioned;

The Urban Capacity study stated a "low probability" of housing and did not even mention the Foundry Estate

Thus the proposals are they are not founded on a robust and credible evidence base and are unsound.

8. Eldon Way and Foundry Industrial Estates form a significant part of the ongoing Hockley Area Action Plan (HAAP) consultation but the Core Strategy proposals pre-empt the next stage of the HAAP consultation.

Neither the Core Strategy nor HAAP define its status relevant to the other plan and subsequent priorities. Why is there no cross-referencing between concurrent plans affecting the exact same piece of land?

There are also inconsistencies between the Core Strategy & HAAP regarding the description of proposed uses for the two industrial estates. The Core Strategy refers to Leisure, Commercial and Residential whilst HAAP mentions a "village green, introducing a significant area of public open space". There is not sufficient space for both and the Core Strategy is again pre-empting the ongoing HAAP.

If a decision is taken now, as part of the Core Strategy, to relocate all the existing businesses on the two estates, it will set a legal precedent which HAAP will need to follow and renders the next stage of HAAP virtually redundant. Particularly given the 95% rejection rate of respondents to the previous round of HAAP such an approach is entirely undemocratic and unsound.

Summary:

The Core Strategy proposals pre-empt the next stage of the HAAP consultation and neither defines its status relevant to the other plan and subsequent priorities.

There are also inconsistencies between the Core Strategy & HAAP.

If a decision is taken as part of the Core Strategy, to relocate all the existing businesses on the two estates, it will set a legal precedent which HAAP will need to follow and renders the next stage of HAAP virtually redundant. Particularly given the 95% rejection rate of respondents to the previous round of HAAP such an approach is entirely undemocratic and unsound.

9. PPS12, 4.6, states that Cores Strategies should be flexible and "should be able to show how they will handle contingencies". Several large planning applications have already been submitted to RDC proposing developments outside the Core Strategy which does not indicate how such applications will be handled and does not comply with PPS12. Neither have RDC been able to advise residents how such changes will be made and the strategy is unsound.

10. THE Core Strategy misrepresents the findings of The Retail & Leisure Study (R&LS) 2008.

The Core Strategy states (12.38) "The Retail & Leisure Study indicates Hockley has great potential. Hockley has been identified as having a need for additional convenience floorspace".

Whereas, the R&LS actually states:

1) (10.26) "the scale of need does not lend itself to a foodstore capable of retaining a significant proportion of main food

Core Strategy Submission Document

16282 Object

CHAPTER 10 Policy T1 - Highways

shopping expenditure.

2) (10.28) "There is no immediate capacity for additional floor space."

3) (10.29) "we recommend that focus be maintained on developing Hockley's

existing strengths, rather than retail expansion"

4) 10.31 "The current nature of Hockley does not lend itself to classification as a 'town centre' as defined by PPS6. Moveover, we have identified that it is a very small catchment population. Accordingly, the Council may wish to consider reclassifying Hockley from a town centre to a district centre".

The Core Strategy is inaccurate, misleading and unsound.

Summary:

The Core Strategy misrepresents the findings of The Retail & Leisure Study (R&LS) 2008. The Core Strategy states "The Retail & Leisure Study states Hockley has great potential and has a need for additional convenience floorspace". Whereas, the R&LS states: 1) "does not lend itself to a foodstore capable of retaining a significant proportion of main food shopping expenditure. 2) "There is no immediate capacity for additional floor space." 3) "we recommend that focus be maintained on developing Hockley's existing strengths." 4) " the Council may wish to consider reclassifying Hockley from a town centre to a district centre".

Summary:

Proposals for moving employment to out of town locations, at either end of the district, with no existing public transport links, are contrary to government policy PPG4 & PPS1. It also contravenes the Core Strategy's stated aims of reducing carbon emissions; reliance on car transport and providing "an integrated network of cycle paths".

The Core Strategy also contravenes its own policy T1 and is unsound.

Thus the proposals are they are not founded on a robust and credible evidence base and are unsound.

Summary:

RDC have not consulted on the very specific proposals to relocate the Eldon Way and Foundry Industrial Estates

The previous CS Strategy stated "we will look at opportunities for more valuable and appropriate uses of the industrial land" with absolutely no consultation at all on concept of moving existing EW businesses entirely

the Foundry Industrial Estate has never even been previously mentioned;

The Urban Capacity study stated a "low probability" of housing and did not even mention the Foundry Estate

Thus the proposals are they are not founded on a robust and credible evidence base and are unsound.

8. Eldon Way and Foundry Industrial Estates form a significant part of the ongoing Hockley Area Action Plan (HAAP) consultation but the Core Strategy proposals pre-empt the next stage of the HAAP consultation.

Neither the Core Strategy nor HAAP define its status relevant to the other plan and subsequent priorities. Why is there no cross-referencing between concurrent plans affecting the exact same piece of land?

There are also inconsistencies between the Core Strategy & HAAP regarding the description of proposed uses for the two industrial estates. The Core Strategy refers to Leisure, Commercial and Residential whilst HAAP mentions a "village green, introducing a significant area of public open space". There is not sufficient space for both and the Core Strategy is again pre-empting the ongoing HAAP.

If a decision is taken now, as part of the Core Strategy, to relocate all the existing businesses on the two estates, it will set a legal precedent which HAAP will need to follow and renders the next stage of HAAP virtually redundant. Particularly given the 95% rejection rate of respondents to the previous round of HAAP such an approach is entirely undemocratic and unsound.

Summary:

The Core Strategy proposals pre-empt the next stage of the HAAP consultation and neither defines its status relevant to the other plan and subsequent priorities.

There are also inconsistencies between the Core Strategy & HAAP.

If a decision is taken as part of the Core Strategy, to relocate all the existing businesses on the two estates, it will set a legal precedent which HAAP will need to follow and renders the next stage of HAAP virtually redundant. Particularly given the 95% rejection rate of respondents to the previous round of HAAP such an approach is entirely undemocratic and unsound.

9. PPS12, 4.6, states that Cores Strategies should be flexible and "should be able to show how they will handle contingencies". Several large planning applications have already been submitted to RDC proposing developments outside the Core Strategy which does not indicate how such applications will be handled and does not comply with PPS12. Neither have RDC been able to advise residents how such changes will be made and the strategy is unsound.

10. THE Core Strategy misrepresents the findings of The Retail & Leisure Study (R&LS) 2008.

The Core Strategy states (12.38) "The Retail & Leisure Study indicates Hockley has great potential. Hockley has been identified as having a need for additional convenience floorspace".

Whereas, the R&LS actually states:

1) (10.26) "the scale of need does not lend itself to a foodstore capable of retaining a significant proportion of main food

Core Strategy Submission Document

16283 Object

CHAPTER 10 Policy T1 - Highways

shopping expenditure.

2) (10.28) "There is no immediate capacity for additional floor space."

3) (10.29) "we recommend that focus be maintained on developing Hockley's

existing strengths, rather than retail expansion"

4) 10.31 "The current nature of Hockley does not lend itself to classification as a 'town centre' as defined by PPS6. Moreover, we have identified that it is a very small catchment population. Accordingly, the Council may wish to consider reclassifying Hockley from a town centre to a district centre".

The Core Strategy is inaccurate, misleading and unsound.

Summary:

The Core Strategy misrepresents the findings of The Retail & Leisure Study (R&LS) 2008. The Core Strategy states "The Retail & Leisure Study states Hockley has great potential and has a need for additional convenience floorspace". Whereas, the R&LS states: 1) "does not lend itself to a foodstore capable of retaining a significant proportion of main food shopping expenditure. 2) "There is no immediate capacity for additional floor space." 3) "we recommend that focus be maintained on developing Hockley's existing strengths." 4) " the Council may wish to consider reclassifying Hockley from a town centre to a district centre".

Summary:

The Transport Evidence Base has not been re-evaluated following the decision to impose extra housing on the Eldon Way & Foundry Industrial Estates. ECC Highways have confirmed that the B1013 is running at 72% of its maximum theoretical capacity) and the effect of extra housing in Hockley (as well as Hawkwell) has not been re-evaluated and it is unclear what improvements will be required and whether they can be physically achieved.

Thus the proposals are not founded on a robust and credible evidence base and are unsound

Agent: N/A

Full Text: Highway & Traffic Implications

1. Proposals for moving employment to out of town locations, at either end of the district, with no existing public transport links, are contrary to government policy PPG4. It also contravenes the Core Strategy's stated aims of reducing carbon emissions; reliance on car transport and providing "an integrated network of cycle paths".

The District of Rochford is predominately spread on a West/East axis along the railway line. Hockley is located in the middle of the district and the two estates are adjacent to the railway station. Bus services are poor with just 3* an hour (following a recent 50% reduction in services) and the operator has admitted they cannot compete with the railway making improvements to new sites away from major centres unlikely. (* one of the 3 services is paid for by ECC on a 6 mth trial and may be terminated in the new year).

However, the Core Strategy proposes to relocate these two estates to a greenfield site near the airport. This site is 2-3 miles from the nearest railway station and there are currently no bus services to the area. As a result, RDC are proposing to upgrade the nearest road to a dual-carriageway, although the main connecting road (the B1013), which runs through Hockley, will remain single-carriageway and is already at 72% of capacity (ECC Highways stats). This is despite extra traffic expected in the area as a result of the Joint Area Action Plan (JAAP) which proposes considerable growth at neighbouring Southend Airport, as well as the new industrial estate.

The site selected for the new industrial estate also contravenes PPS4 which states;

* (EC7.3C) "out-of-centre sites, with preference given to sites which are or will be well served by a choice of means of transport and which are close to the centre and have a high likelihood of forming links with the centre. There is no existing public transport and no obvious likelihood of forming links with any existing centres.

* EC7.5 1 "whether the site is or will be accessible and well served by a choice of means of transport, especially public transport, walking and cycling, as well as by car". Its remote location. Accessed by the narrow, busy B1013 is not suitable for access by cycle or on foot.

It also contravenes PPS1 (27 vii) "Reduce the need to travel and encourage accessible public transport provision to secure more sustainable patterns of transport development. Planning should actively manage patterns of urban growth to make the fullest use of public transport and focus development in existing centres and near to major public transport interchanges".

The Core Strategy also contravenes its own policy T1 and is unsound.

Summary:

Proposals for moving employment to out of town locations, at either end of the district, with no existing public transport links, are contrary to government policy PPG4 & PPS1. It also contravenes the Core Strategy's stated aims of reducing carbon emissions; reliance on car transport and providing "an integrated network of cycle paths".

The Core Strategy also contravenes its own policy T1 and is unsound.

2. The Transport Evidence Base has not been re-evaluated following the decision to impose extra housing on the Eldon Way & Foundry Industrial Estates. ECC Highways have confirmed that the B1013 is running at 72% of its maximum theoretical capacity) and the effect of extra housing in Hockley (as well as Hawkwell) has not been re-evaluated and it is unclear what improvements will be required and whether they can be physically achieved.

Thus the proposals are not founded on a robust and credible evidence base and are unsound

3. RDC are proposing to scatter housing across the district in around 12 or sites but no detailed consideration has been given to the implications for highways across the District. The "Core Strategy" is not a strategy but simply a collection of disparate sites. Many roads across the District are at or near capacity but no modelling has been undertaken to determine the impacts or the funding required to upgrade them. At the Central Area Committee on 25 June 2009, RDC stated (in response to a question):

"Rochford Council is not the highway authority, but is working closely with Essex County Council to identify highway infrastructure requirements. Highway infrastructure improvements will be set out in the Core Strategy and other subsequent Development Plan Documents as required. These will be fed into the next version of the Essex Local

16285 Object

CHAPTER 10 Policy T1 - Highways

Transport Plan, which is effectively a bidding document for funds to implement highway infrastructure improvements, schemes to tackle congestion, etc.

The District Council is working closely with the Essex County Council to ensure that highway infrastructure identified in the Core Strategy can be delivered."

It is clear that (i) the combined impact of scattering houses across the District and (ii) relocating Eldon Way/Foundry Industrial Estates to the very edge of the District with no public transport services will exacerbate existing problems. It is also clear that the extent of improvements required is both unknown and not funded and the proposal is unsound.

Summary:

RDC are proposing to scatter housing across the district in around 12 or sites but no detailed consideration has been given to the implications for highways across the District. Many roads across the District are at or near capacity but no modelling has been undertaken to determine the impacts

It is clear that (i) the combined impact of scattering houses across the District and (ii) relocating Eldon Way/Foundry Industrial Estates with no public transport services will exacerbate existing problems. It is clear that the extent of improvements required is both unknown and not funded and the proposal is unsound.

4. PPS12 4.9 states "The infrastructure planning process should identify, as far as possible: infrastructure needs and costs". Neither needs nor, especially, costs have been identified and the Core Strategy is therefore unsound.

The district's highways suffer from years of under investment and over use. The Core Strategy proposes to fund infrastructure improvements through use of Standard Charges. However, no detail is provided and no attempt made to identify the likely scale of such charges. It is therefore unclear if use of Standard Charges is financially viable.

Policy T2 provides a list of required highway improvements. The list contains most of the more major roads in the District including Rectory Lane, which has a single track, traffic light controlled railway bridge. 1200 dwellings are proposed for the northern end of Rectory Road and a further 175 at the southern end. The cost of addressing the railway bridge bottleneck will be significant but is not mentioned.

No attempt is made to either cost these charges or explain how improvements not linked to any one specific development will be paid for (eg B1013; Ashingdon Road; a network of walking, cycling, bridleways).

The concept of paying for improvements through use of Standard Charges is totally unproven and unsound.

Summary:

PPS12 4.9 states "The infrastructure planning process should identify, as far as possible: infrastructure needs and costs". Neither needs nor, especially, costs have been identified and the Core Strategy is therefore unsound.

The Core Strategy proposes to fund infrastructure improvements through use of Standard Charges. However, no detail is provided and no attempt made to identify the likely scale of such charges. It is therefore unclear if use of Standard Charges is financially viable.

5. SERT is put forward as a solution to reducing car use but it will only skirt the edge of the district and the Core Strategy acknowledges there is only "potential" to do so in the future. SERT is not realistic or reliable a solution and the proposal is therefore unsound.

6. Previous consultations ignored by RDC:

* The Hockley Parish Plan (dated 2007), clearly states that residents are strongly against any large scale housing development in Hockley, but if there has to be additional housing, then there should be no loss of greenbelt or open spaces, and no large housing estate developments. It was also stated that any developments must be matched by the appropriate levels of infrastructure.

* The proposals also ignore the 95% rejection rate of respondents to RDC's own Hockley Area Plan (HAAP) Consultation (2009), which included specific proposals for Eldon Way (although HAAP did not even mention the adjoining Foundry Industrial Estate). Why have a consultation and ignore it?

Thus the proposals are not founded on a robust and credible evidence base and are unsound.

Summary:

Previous consultations ignored by RDC:

The proposals ignore the 95% rejection rate of respondents to RDC's own Hockley Area Plan (HAAP) Consultation (2009), which included specific proposals for Eldon Way (although HAAP did not even mention the adjoining Foundry Industrial Estate). Why have a consultation and ignore it?

16285 Object

CHAPTER 10 Policy T1 - Highways

Thus the proposals are not founded on a robust and credible evidence base and are unsound

7. RDC have not consulted on the very specific proposals to relocate the Eldon Way and Foundry Industrial Estates

* The previous CS Strategy stated "we will look at opportunities for more valuable and appropriate uses of the industrial land" with absolutely no consultation at all on concept of moving existing EW businesses entirely

* the Foundry Industrial Estate has never even been previously mentioned in any plan version; A recent amendment to the Core Strategy states this omission was due to a typing error!

* The Urban Capacity study stated a "low probability" of housing and did not even mention the Foundry Estate

Thus the proposals are they are not founded on a robust and credible evidence base and are unsound.

Summary:

RDC have not consulted on the very specific proposals to relocate the Eldon Way and Foundry Industrial Estates

The previous CS Strategy stated "we will look at opportunities for more valuable and appropriate uses of the industrial land" with absolutely no consultation at all on concept of moving existing EW businesses entirely

the Foundry Industrial Estate has never even been previously mentioned;

The Urban Capacity study stated a "low probability" of housing and did not even mention the Foundry Estate

Thus the proposals are they are not founded on a robust and credible evidence base and are unsound.

8. Eldon Way and Foundry Industrial Estates form a significant part of the ongoing Hockley Area Action Plan (HAAP) consultation but the Core Strategy proposals pre-empt the next stage of the HAAP consultation.

Neither the Core Strategy nor HAAP define its status relevant to the other plan and subsequent priorities. Why is there no cross-referencing between concurrent plans affecting the exact same piece of land?

There are also inconsistencies between the Core Strategy & HAAP regarding the description of proposed uses for the two industrial estates. The Core Strategy refers to Leisure, Commercial and Residential whilst HAAP mentions a "village green, introducing a significant area of public open space". There is not sufficient space for both and the Core Strategy is again pre-empting the ongoing HAAP.

If a decision is taken now, as part of the Core Strategy, to relocate all the existing businesses on the two estates, it will set a legal precedent which HAAP will need to follow and renders the next stage of HAAP virtually redundant. Particularly given the 95% rejection rate of respondents to the previous round of HAAP such an approach is entirely undemocratic and unsound.

Summary:

The Core Strategy proposals pre-empt the next stage of the HAAP consultation and neither defines its status relevant to the other plan and subsequent priorities.

There are also inconsistencies between the Core Strategy & HAAP.

If a decision is taken as part of the Core Strategy, to relocate all the existing businesses on the two estates, it will set a legal precedent which HAAP will need to follow and renders the next stage of HAAP virtually redundant. Particularly given the 95% rejection rate of respondents to the previous round of HAAP such an approach is entirely undemocratic and unsound.

9. PPS12, 4.6, states that Cores Strategies should be flexible and "should be able to show how they will handle contingencies". Several large planning applications have already been submitted to RDC proposing developments outside the Core Strategy which does not indicate how such applications will be handled and does not comply with PPS12. Neither have RDC been able to advise residents how such changes will be made and the strategy is unsound.

10. THE Core Strategy misrepresents the findings of The Retail & Leisure Study (R&LS) 2008.

The Core Strategy states (12.38) "The Retail & Leisure Study indicates Hockley has great potential. Hockley has been identified as having a need for additional convenience floorspace".

Whereas, the R&LS actually states:

1) (10.26) "the scale of need does not lend itself to a foodstore capable of retaining a significant proportion of main food

Core Strategy Submission Document

16285 Object

CHAPTER 10 Policy T1 - Highways

shopping expenditure.

2) (10.28) "There is no immediate capacity for additional floor space."

3) (10.29) "we recommend that focus be maintained on developing Hockley's

existing strengths, rather than retail expansion"

4) 10.31 "The current nature of Hockley does not lend itself to classification as a 'town centre' as defined by PPS6. Moreover, we have identified that it is a very small catchment population. Accordingly, the Council may wish to consider reclassifying Hockley from a town centre to a district centre".

The Core Strategy is inaccurate, misleading and unsound.

Summary:

The Core Strategy misrepresents the findings of The Retail & Leisure Study (R&LS) 2008. The Core Strategy states "The Retail & Leisure Study states Hockley has great potential and has a need for additional convenience floorspace". Whereas, the R&LS states: 1) "does not lend itself to a foodstore capable of retaining a significant proportion of main food shopping expenditure. 2) "There is no immediate capacity for additional floor space." 3) "we recommend that focus be maintained on developing Hockley's existing strengths." 4) " the Council may wish to consider reclassifying Hockley from a town centre to a district centre".

CHAPTER 10 Policy T1 - Highways

There are also inconsistencies between the Core Strategy & HAAP.

If a decision is taken as part of the Core Strategy, to relocate all the existing businesses on the two estates, it will set a legal precedent which HAAP will need to follow and renders the next stage of HAAP virtually redundant. Particularly given the 95% rejection rate of respondents to the previous round of HAAP such an approach is entirely undemocratic and unsound

9. PPS12, 4.6, states that Cores Strategies should be flexible and "should be able to show how they will handle contingencies"

Several large planning applications have already been submitted to RDC proposing developments outside the Core Strategy which

does not indicate how such applications will be handled and does not comply with PPS12. Neither have RDC been able to advise

residents how such changes will be made and the strategy is unsound.

10. The CS misrepresents the findings of The Retail & Leisure Study (R&LS) 2008.

The CS states "The R&LS states Hockley has great potential and has a need for additional convenience floorspace".

Whereas, the R&LS actually states:

1) "does not lend itself to a food store capable of retaining a significant proportion of main food shopping expenditure.

2) "there is no immediate capacity for additional floor space."

3) "recommend that focus be maintained on developing Hockley's existing strengths."

4) " the Council may wish to consider reclassifying Hockley from a town center, to a district center".

Summary:

3. RDC are proposing to scatter housing across the district in around 12 or sites but no detailed consideration has been given to the implications for highways across the District. Many roads across the District are at or near capacity but no modelling has been undertaken to determine the impacts

It is clear that (i) the combined impact of scattering houses across the District and (ii) relocating Eldon Way/Foundry Industrial Estates with no public transport services will exacerbate existing problems. It is clear that the extent of improvements required is both unknown and not funded and the proposal is unsound.

Highway & Traffic Implications

Proposals for moving employment to out of town locations, at either end of the district, with no existing public transport links, are contrary to government policy PPG4. It also contravenes the Core Strategy's stated aims of reducing carbon emissions; reliance on car transport and providing "an integrated network of cycle paths".

The District of Rochford is predominately spread on a West/East axis along the railway line. Hockley is located in the middle of the district and the two estates are adjacent to the railway station. Bus services are poor with just 3* an hour (following a recent 50% reduction in services) and the operator has admitted they cannot compete with the railway making improvements to new sites away from major centres unlikely. (* one of the 3 services is paid for by ECC on a 6 mth trial and may be terminated in the new year).

However, the Core Strategy proposes to relocate these two estates to a greenfield site near the airport. This site is 2-3 miles from the nearest railway station and there are currently no bus services to the area. As a result, RDC are proposing to upgrade the nearest road to a dual-carriageway, although the main connecting road (the B1013), which runs through Hockley, will remain single-carriageway and is already at 72% of capacity (ECC Highways stats). This is despite extra traffic expected in the area as a result of the Joint Area Action Plan (JAAP) which proposes considerable growth at neighbouring Southend Airport, as well as the new industrial estate.

The site selected for the new industrial estate also contravenes PPS4 which states;
â€¢ (EC7.3C) "out-of-centre sites, with preference given to sites which are or will be well served by a choice of means of transport and which are close to the centre and have a high likelihood of forming links with the centre. There is no existing public transport and no obvious likelihood of forming links with any existing centres.
â€¢ EC7.5 1 "whether the site is or will be accessible and well served by a choice of means of transport, especially public transport, walking and cycling, as well as by car". Its remote location. Accessed by the narrow, busy B1013 is not suitable for access by cycle or on foot.

It also contravenes PPS1 (27 vii) "Reduce the need to travel and encourage accessible public transport provision to secure more sustainable patterns of transport development. Planning should actively manage patterns of urban growth to make the fullest use of public transport and focus development in existing centres and near to major public transport interchanges".

The Core Strategy also contravenes its own policy T1 and is unsound.

Summary:

Proposals for moving employment to out of town locations, at either end of the district, with no existing public transport links, are contrary to government policy PPG4 & PPS1. It also contravenes the Core Strategy's stated aims of reducing carbon emissions; reliance on car transport and providing "an integrated network of cycle paths".

The Core Strategy also contravenes its own policy T1 and is unsound.

The Transport Evidence Base has not been re-evaluated following the decision to impose extra housing on the Eldon Way & Foundry Industrial Estates. ECC Highways have confirmed that the B1013 is running at 72% of its maximum theoretical capacity) and the effect of extra housing in Hockley (as well as Hawkwell) has not been re-evaluated and it is unclear what improvements will be required and whether they can be physically achieved.

Thus the proposals are not founded on a robust and credible evidence base and are unsound
RDC are proposing to scatter housing across the district in around 12 or sites but no detailed consideration has been given to the implications for highways across the District. The "Core Strategy" is not a strategy but simply a collection of disparate sites. Many roads across the District are at or near capacity but no modelling has been undertaken to determine the impacts or the funding required to upgrade them. At the Central Area Committee on 25 June 2009, RDC stated (in response to a question):

"Rochford Council is not the highway authority, but is working closely with Essex County Council to identify highway infrastructure requirements. Highway infrastructure improvements will be set out in the Core Strategy and other subsequent Development Plan Documents as required. These will be fed into the next version of the Essex Local Transport Plan, which is effectively a bidding document for funds to implement highway infrastructure improvements, schemes to tackle congestion, etc.

The District Council is working closely with the Essex County Council to ensure that highway infrastructure identified in the Core Strategy can be delivered."

It is clear that (i) the combined impact of scattering houses across the District and (ii) relocating Eldon Way/Foundry Industrial Estates to the very edge of the District with no public transport services will exacerbate existing problems. It is

16438 Object

CHAPTER 10 Policy T1 - Highways

also clear that the extent of improvements required is both unknown and not funded and the proposal is unsound.

Summary:

RDC are proposing to scatter housing across the district in around 12 or sites but no detailed consideration has been given to the implications for highways across the District. Many roads across the District are at or near capacity but no modelling has been undertaken to determine the impacts

It is clear that (i) the combined impact of scattering houses across the District and (ii) relocating Eldon Way/Foundry Industrial Estates with no public transport services will exacerbate existing problems. It is clear that the extent of improvements required is both unknown and not funded and the proposal is unsound.

PPS12 4.9 states "The infrastructure planning process should identify, as far as possible: infrastructure needs and costs". Neither needs nor, especially, costs have been identified and the Core Strategy is therefore unsound.

The district's highways suffer from years of under investment and over use. The Core Strategy proposes to fund infrastructure improvements through use of Standard Charges. However, no detail is provided and no attempt made to identify the likely scale of such charges. It is therefore unclear if use of Standard Charges is financially viable.

Policy T2 provides a list of required highway improvements. The list contains most of the more major roads in the District including Rectory Lane, which has a single track, traffic light controlled railway bridge. 1200 dwellings are proposed for the northern end of Rectory Road and a further 175 at the southern end. The cost of addressing the railway bridge bottleneck will be significant but is not mentioned.

No attempt is made to either cost these charges or explain how improvements not linked to any one specific development will be paid for (eg B1013; Ashingdon Road; a network of walking, cycling, bridleways).

The concept of paying for improvements through use of Standard Charges is totally unproven and unsound.

Summary:

PPS12 4.9 states "The infrastructure planning process should identify, as far as possible: infrastructure needs and costs". Neither needs nor, especially, costs have been identified and the Core Strategy is therefore unsound.

The Core Strategy proposes to fund infrastructure improvements through use of Standard Charges. However, no detail is provided and no attempt made to identify the likely scale of such charges. It is therefore unclear if use of Standard Charges is financially viable.

SERT is put forward as a solution to reducing car use but it will only skirt the edge of the district and the Core Strategy acknowledges there is only "potential" to do so in the future. SERT is not realistic or reliable a solution and the proposal is therefore unsound.

Previous consultations ignored by RDC:

â€¢ The Hockley Parish Plan (dated 2007), clearly states that residents are strongly against any large scale housing development in Hockley, but if there has to be additional housing, then there should be no loss of greenbelt or open spaces, and no large housing estate developments. It was also stated that any developments must be matched by the appropriate levels of infrastructure.

â€¢ The proposals also ignore the 95% rejection rate of respondents to RDC's own Hockley Area Plan (HAAP) Consultation (2009), which included specific proposals for Eldon Way (although HAAP did not even mention the adjoining Foundry Industrial Estate). Why have a consultation and ignore it?

Thus the proposals are not founded on a robust and credible evidence base and are unsound.

Summary:

Previous consultations ignored by RDC:

Thus the proposals are not founded on a robust and credible evidence base and are unsound

RDC have not consulted on the very specific proposals to relocate the Eldon Way and Foundry Industrial Estates
â€¢ The previous CS Strategy stated "we will look at opportunities for more valuable and appropriate uses of the industrial land" with absolutely no consultation at all on concept of moving existing EW businesses entirely
â€¢ the Foundry Industrial Estate has never even been previously mentioned in any plan version; A recent amendment to the Core Strategy states this omission was due to a typing error!
â€¢ The Urban Capacity study stated a "low probability" of housing and did not even mention the Foundry Estate

Thus the proposals are they are not founded on a robust and credible evidence base and are unsound.

Summary:

â€¢ the Foundry Industrial Estate has never even been previously mentioned;
â€¢ The Urban Capacity study stated a "low probability" of housing and did not even mention the Foundry Estate

Thus the proposals are they are not founded on a robust and credible evidence base and are unsound.

Eldon Way and Foundry Industrial Estates form a significant part of the ongoing Hockley Area Action Plan (HAAP) consultation but the Core Strategy proposals pre-empt the next stage of the HAAP consultation.

Neither the Core Strategy nor HAAP define its status relevant to the other plan and subsequent priorities. Why is there no cross-referencing between concurrent plans affecting the exact same piece of land?

There are also inconsistencies between the Core Strategy & HAAP regarding the description of proposed uses for the two industrial estates. The Core Strategy refers to Leisure, Commercial and Residential whilst HAAP mentions a "village green, introducing a significant area of public open space". There is not sufficient space for both and the Core Strategy is again pre-empting the ongoing HAAP.

If a decision is taken now, as part of the Core Strategy, to relocate all the existing businesses on the two estates, it will set a legal precedent which HAAP will need to follow and renders the next stage of HAAP virtually redundant. Particularly given the 95% rejection rate of respondents to the previous round of HAAP such an approach is entirely undemocratic and unsound.

Summary:

The Core Strategy proposals pre-empt the next stage of the HAAP consultation and neither defines its status relevant to the other plan and subsequent priorities.

Particularly given the 95% rejection rate of respondents to the previous round of HAAP such an approach is entirely undemocratic and unsound.

PPS12, 4.6, states that Cores Strategies should be flexible and "should be able to show how they will handle contingencies". Several large planning applications have already been submitted to RDC proposing developments outside the Core Strategy which does not indicate how such applications will be handled and does not comply with PPS12. Neither have RDC been able to advise residents how such changes will be made and the strategy is unsound.

THE Core Strategy misrepresents the findings of The Retail & Leisure Study (R&LS) 2008.

The Core Strategy states (12.38) "The Retail & Leisure Study indicates Hockley has great potential. Hockley has been identified as having a need for additional convenience floorspace".

Whereas, the R&LS actually states:

- 1) (10.26) "the scale of need does not lend itself to a foodstore capable of retaining a significant proportion of main food shopping expenditure.
 - 2) (10.28) "There is no immediate capacity for additional floor space."
 - 3) (10.29) "we recommend that focus be maintained on developing Hockley's existing strengths, rather than retail expansion"
 - 4) 10.31 "The current nature of Hockley does not lend itself to classification as a 'town centre' as defined by PPS6. Moreover, we have identified that it is a very small catchment population. Accordingly, the Council may wish to consider reclassifying Hockley from a town centre to a district centre".
- The Core Strategy is inaccurate, misleading and unsound.

Highway & Traffic Implications

Proposals for moving employment to out of town locations, at either end of the district, with no existing public transport links, are contrary to government policy PPG4. It also contravenes the Core Strategy's stated aims of reducing carbon emissions; reliance on car transport and providing "an integrated network of cycle paths".

The District of Rochford is predominately spread on a West/East axis along the railway line. Hockley is located in the middle of the district and the two estates are adjacent to the railway station. Bus services are poor with just 3* an hour (following a recent 50% reduction in services) and the operator has admitted they cannot compete with the railway making improvements to new sites away from major centres unlikely. (* one of the 3 services is paid for by ECC on a 6 mth trial and may be terminated in the new year).

However, the Core Strategy proposes to relocate these two estates to a greenfield site near the airport. This site is 2-3 miles from the nearest railway station and there are currently no bus services to the area. As a result, RDC are proposing to upgrade the nearest road to a dual-carriageway, although the main connecting road (the B1013), which runs through Hockley, will remain single-carriageway and is already at 72% of capacity (ECC Highways stats). This is despite extra traffic expected in the area as a result of the Joint Area Action Plan (JAAP) which proposes considerable growth at neighbouring Southend Airport, as well as the new industrial estate.

The site selected for the new industrial estate also contravenes PPS4 which states;
â€¢ (EC7.3C) "out-of-centre sites, with preference given to sites which are or will be well served by a choice of means of transport and which are close to the centre and have a high likelihood of forming links with the centre. There is no existing public transport and no obvious likelihood of forming links with any existing centres.
â€¢ EC7.5 1 "whether the site is or will be accessible and well served by a choice of means of transport, especially public transport, walking and cycling, as well as by car". Its remote location. Accessed by the narrow, busy B1013 is not suitable for access by cycle or on foot.

It also contravenes PPS1 (27 vii) "Reduce the need to travel and encourage accessible public transport provision to secure more sustainable patterns of transport development. Planning should actively manage patterns of urban growth to make the fullest use of public transport and focus development in existing centres and near to major public transport interchanges".

The Core Strategy also contravenes its own policy T1 and is unsound.

Summary:

Proposals for moving employment to out of town locations, at either end of the district, with no existing public transport links, are contrary to government policy PPG4 & PPS1. It also contravenes the Core Strategy's stated aims of reducing carbon emissions; reliance on car transport and providing "an integrated network of cycle paths".

The Core Strategy also contravenes its own policy T1 and is unsound.

The Transport Evidence Base has not been re-evaluated following the decision to impose extra housing on the Eldon Way & Foundry Industrial Estates. ECC Highways have confirmed that the B1013 is running at 72% of its maximum theoretical capacity) and the effect of extra housing in Hockley (as well as Hawkwell) has not been re-evaluated and it is unclear what improvements will be required and whether they can be physically achieved.

Thus the proposals are not founded on a robust and credible evidence base and are unsound
RDC are proposing to scatter housing across the district in around 12 or sites but no detailed consideration has been given to the implications for highways across the District. The "Core Strategy" is not a strategy but simply a collection of disparate sites. Many roads across the District are at or near capacity but no modelling has been undertaken to determine the impacts or the funding required to upgrade them. At the Central Area Committee on 25 June 2009, RDC stated (in response to a question):

"Rochford Council is not the highway authority, but is working closely with Essex County Council to identify highway infrastructure requirements. Highway infrastructure improvements will be set out in the Core Strategy and other subsequent Development Plan Documents as required. These will be fed into the next version of the Essex Local Transport Plan, which is effectively a bidding document for funds to implement highway infrastructure improvements, schemes to tackle congestion, etc.

The District Council is working closely with the Essex County Council to ensure that highway infrastructure identified in the Core Strategy can be delivered."

It is clear that (i) the combined impact of scattering houses across the District and (ii) relocating Eldon Way/Foundry Industrial Estates to the very edge of the District with no public transport services will exacerbate existing problems. It is

16439 Object

CHAPTER 10 Policy T1 - Highways

also clear that the extent of improvements required is both unknown and not funded and the proposal is unsound.

Summary:

RDC are proposing to scatter housing across the district in around 12 or sites but no detailed consideration has been given to the implications for highways across the District. Many roads across the District are at or near capacity but no modelling has been undertaken to determine the impacts

It is clear that (i) the combined impact of scattering houses across the District and (ii) relocating Eldon Way/Foundry Industrial Estates with no public transport services will exacerbate existing problems. It is clear that the extent of improvements required is both unknown and not funded and the proposal is unsound.

PPS12 4.9 states "The infrastructure planning process should identify, as far as possible: infrastructure needs and costs". Neither needs nor, especially, costs have been identified and the Core Strategy is therefore unsound.

The district's highways suffer from years of under investment and over use. The Core Strategy proposes to fund infrastructure improvements through use of Standard Charges. As a result, RDC are proposing to upgrade the nearest road to a dual-carriageway, although the main connecting road (the B1013), which runs through Hockley, will remain single-carriageway and is already at 72% of capacity (ECC Highways stats). This is despite extra traffic expected in the area as a result of the Joint Area Action Plan (JAAP) which proposes considerable growth at neighbouring Southend Airport, as well as the new industrial estate.

The site selected for the new industrial estate also contravenes PPS4 which states;
â€¢ (EC7.3C) "out-of-centre sites, with preference given to sites which are or will be well served by a choice of means of transport and which are close to the centre and have a high likelihood of forming links with the centre. There is no existing public transport and no obvious likelihood of forming links with any existing centres.
â€¢ EC7.5 1 "whether the site is or will be accessible and well served by a choice of means of transport, especially public transport, walking and cycling, as well as by car". Its remote location. Accessed by the narrow, busy B1013 is not suitable for access by cycle or on foot.

It also contravenes PPS1 (27 vii) "Reduce the need to travel and encourage accessible public transport provision to secure more sustainable patterns of transport development. Planning should actively manage patterns of urban growth to make the fullest use of public transport and focus development in existing centres and near to major public transport interchanges".

The Core Strategy also contravenes its own policy T1 and is unsound.

Summary:

Proposals for moving employment to out of town locations, at either end of the district, with no existing public transport links, are contrary to government policy PPG4 & PPS1. It also contravenes the Core Strategy's stated aims of reducing carbon emissions; reliance on car transport and providing "an integrated network of cycle paths".

The Core Strategy also contravenes its own policy T1 and is unsound.

The Transport Evidence Base has not been re-evaluated following the decision to impose extra housing on the Eldon Way & Foundry Industrial Estates. ECC Highways have confirmed that the B1013 is running at 72% of its maximum theoretical capacity) and the effect of extra housing in Hockley (as well as Hawkwell) has not been re-evaluated and it is unclear what improvements will be required and whether they can be physically achieved.

Thus the proposals are not founded on a robust and credible evidence base and are unsound
RDC are proposing to scatter housing across the district in around 12 or sites but no detailed consideration has been given to the implications for highways across the District. The "Core Strategy" is not a strategy but simply a collection of disparate sites. Many roads across the District are at or near capacity but no modelling has been undertaken to determine the impacts or the funding required to upgrade them. At the Central Area Committee on 25 June 2009, RDC stated (in response to a question):

"Rochford Council is not the highway authority, but is working closely with Essex County Council to identify highway infrastructure requirements. Highway infrastructure improvements will be set out in the Core Strategy and other subsequent Development Plan Documents as required. These will be fed into the next version of the Essex Local Transport Plan, which is effectively a bidding document for funds to implement highway infrastructure improvements, schemes to tackle congestion, etc.

The District Council is working closely with the Essex County Council to ensure that highway infrastructure identified in the Core Strategy can be delivered."

It is clear that (i) the combined impact of scattering houses across the District and (ii) relocating Eldon Way/Foundry Industrial Estates to the very edge of the District with no public transport services will exacerbate existing problems. It is

16441 Object

CHAPTER 10 Policy T1 - Highways

also clear that the extent of improvements required is both unknown and not funded and the proposal is unsound.

Summary:

RDC are proposing to scatter housing across the district in around 12 or sites but no detailed consideration has been given to the implications for highways across the District. Many roads across the District are at or near capacity but no modelling has been undertaken to determine the impacts

It is clear that (i) the combined impact of scattering houses across the District and (ii) relocating Eldon Way/Foundry Industrial Estates with no public transport services will exacerbate existing problems. It is clear that the extent of improvements required is both unknown and not funded and the proposal is unsound.

PPS12 4.9 states "The infrastructure planning process should identify, as far as possible: infrastructure needs and costs". Neither needs nor, especially, costs have been identified and the Core Strategy is therefore unsound.

The district's highways suffer from years of under investment and over use. The Core Strategy proposes to fund infrastructure improvements through use of Standard Charges. However, no detail is provided and no attempt made to identify the likely scale of such charges. It is therefore unclear if use of Standard Charges is financially viable.

Policy T2 provides a list of required highway improvements. The list contains most of the more major roads in the District including Rectory Lane, which has a single track, traffic light controlled railway bridge. 1200 dwellings are proposed for the northern end of Rectory Road and a further 175 at the southern end. The cost of addressing the railway bridge bottleneck will be significant but is not mentioned.

No attempt is made to either cost these charges or explain how improvements not linked to any one specific development will be paid for (eg B1013; Ashingdon Road; a network of walking, cycling, bridleways).

The concept of paying for improvements through use of Standard Charges is totally unproven and unsound.

Summary:

PPS12 4.9 states "The infrastructure planning process should identify, as far as possible: infrastructure needs and costs". Neither needs nor, especially, costs have been identified and the Core Strategy is therefore unsound.

The Core Strategy proposes to fund infrastructure improvements through use of Standard Charges. However, no detail is provided and no attempt made to identify the likely scale of such charges. It is therefore unclear if use of Standard Charges is financially viable.

SERT is put forward as a solution to reducing car use but it will only skirt the edge of the district and the Core Strategy acknowledges there is only "potential" to do so in the future. SERT is not realistic or reliable a solution and the proposal is therefore unsound.

Previous consultations ignored by RDC:

â€¢ The Hockley Parish Plan (dated 2007), clearly states that residents are strongly against any large scale housing development in Hockley, but if there has to be additional housing, then there should be no loss of greenbelt or open spaces, and no large housing estate developments. It was also stated that any developments must be matched by the appropriate levels of infrastructure.

â€¢ The proposals also ignore the 95% rejection rate of respondents to RDC's own Hockley Area Plan (HAAP) Consultation (2009), which included specific proposals for Eldon Way (although HAAP did not even mention the adjoining Foundry Industrial Estate). Why have a consultation and ignore it?

Thus the proposals are not founded on a robust and credible evidence base and are unsound.

Thus the proposals are not founded on a robust and credible evidence base and are unsound

RDC have not consulted on the very specific proposals to relocate the Eldon Way and Foundry Industrial Estates
â€¢ The previous CS Strategy stated "we will look at opportunities for more valuable and appropriate uses of the industrial land" with absolutely no consultation at all on concept of moving existing EW businesses entirely
â€¢ the Foundry Industrial Estate has never even been previously mentioned in any plan version; A recent amendment to the Core Strategy states this omission was due to a typing error!
â€¢ The Urban Capacity study stated a "low probability" of housing and did not even mention the Foundry Estate

Thus the proposals are they are not founded on a robust and credible evidence base and are unsound.

CHAPTER 10 Policy T1 - Highways

RDC have not consulted on the very specific proposals to relocate the Eldon Way and Foundry Industrial Estates
â€¢ The previous CS Strategy stated "we will look at opportunities for more valuable and appropriate uses of the industrial land" with absolutely no consultation at all on concept of moving existing EW businesses entirely
â€¢ the Foundry Industrial Estate has never even been previously mentioned;
â€¢ The Urban Capacity study stated a "low probability" of housing and did not even mention the Foundry Estate

Thus the proposals are they are not founded on a robust and credible evidence base and are unsound.

Eldon Way and Foundry Industrial Estates form a significant part of the ongoing Hockley Area Action Plan (HAAP) consultation but the Core Strategy proposals pre-empt the next stage of the HAAP consultation.

Neither the Core Strategy nor HAAP define its status relevant to the other plan and subsequent priorities. Why is there no cross-referencing between concurrent plans affecting the exact same piece of land?

There are also inconsistencies between the Core Strategy & HAAP regarding the description of proposed uses for the two industrial estates. The Core Strategy refers to Leisure, Commercial and Residential whilst HAAP mentions a "village green, introducing a significant area of public open space". There is not sufficient space for both and the Core Strategy is again pre-empting the ongoing HAAP.

If a decision is taken now, as part of the Core Strategy, to relocate all the existing businesses on the two estates, it will set a legal precedent which HAAP will need to follow and renders the next stage of HAAP virtually redundant. Particularly given the 95% rejection rate of respondents to the previous round of HAAP such an approach is entirely undemocratic and unsound.

Summary:

The Core Strategy proposals pre-empt the next stage of the HAAP consultation and neither defines its status relevant to the other plan and subsequent priorities.

There are also inconsistencies between the Core Strategy & HAAP.

If a decision is taken as part of the Core Strategy, to relocate all the existing businesses on the two estates, it will set a legal precedent which HAAP will need to follow and renders the next stage of HAAP virtually redundant. Particularly given the 95% rejection rate of respondents to the previous round of HAAP such an approach is entirely undemocratic and unsound.

PPS12, 4.6, states that Cores Strategies should be flexible and "should be able to show how they will handle contingencies". Several large planning applications have already been submitted to RDC proposing developments outside the Core Strategy which does not indicate how such applications will be handled and does not comply with PPS12. Neither have RDC been able to advise residents how such changes will be made and the strategy is unsound.

THE Core Strategy misrepresents the findings of The Retail & Leisure Study (R&LS) 2008.

The Core Strategy states (12.38) "The Retail & Leisure Study indicates Hockley has great potential. Hockley has been identified as having a need for additional convenience floorspace".

Whereas, the R&LS actually states:

- 1) (10.26) "the scale of need does not lend itself to a foodstore capable of retaining a significant proportion of main food shopping expenditure.
 - 2) (10.28) "There is no immediate capacity for additional floor space."
 - 3) (10.29) "we recommend that focus be maintained on developing Hockley's existing strengths, rather than retail expansion"
 - 4) 10.31 "The current nature of Hockley does not lend itself to classification as a 'town centre' as defined by PPS6. Moreover, we have identified that it is a very small catchment population. Accordingly, the Council may wish to consider reclassifying Hockley from a town centre to a district centre".
- The Core Strategy is inaccurate, misleading and unsound.

Objections to RDC's Core Strategy Submission DPD

Reason Unsound

1. Highway & Traffic Implications

Proposals for moving employment to out of town locations, at either end of the district, with no existing public transport links, are contrary to government policy PPG4. It also contravenes the Core Strategy's stated aims of reducing carbon emissions; reliance on car transport and providing "an integrated network of cycle paths".

The District of Rochford is predominately spread on a West/East axis along the railway line. Hockley is located in the middle of the district and the two estates are adjacent to the railway station. Bus service are poor with just 3* an hour (following a recent 50% reduction in services) and the operator has admitted they cannot compete with the railway making improvements to new sites away from major centres unlikely. (* one of the 3 services is paid for by ECC on a 6 mth trial and may be terminated in the new year).

However, the Core Strategy proposes to relocate these two estates to a greenfield site near the airport. This site is 2-3 miles from the nearest railway station and there are currently no bus services to the area. As a result, RDC are proposing to upgrade the nearest road to a dual-carriageway, although the main connecting road (the B1013), which runs through Hockley, will remain single-carriageway and is already at 72% of capacity (ECC Highways stats). This is despite extra traffic expected in the area as a result of the Joint Area Action Plan (JAAP) which proposes considerable growth at neighbouring Southend Airport, as well as the new industrial estate.

The site selected for the new industrial estate also contravenes PPS4 which states:

(EC7.3C) "out-of-centre site, with preference given to sites which are or will be well served by a choice of means of transport and which are close to the centre and have a high likelihood of forming links with the centre. There is no existing public transport and no obvious likelihood of forming links with any existing centres.

EC7.5 1 "whether the site is or will be accessible and well served by a choice of means of transport, especially public transport, walking and cycling, as well as by car". Its remote location. Accessed by the narrow, busy B1013 is not suitable for access by cycle or on foot.

It also contravenes PPS1 (27 vii) "Reduce the need to travel and encourage accessible public transport provision to secure more sustainable patterns of transport development. Planning should actively manage patterns of urban growth to make the fullest use of public transport and focus development in existing centres and near to major public transport interchanges".

The Core Strategy also contravenes its own policy T1 and is unsound.

2. The Transport Evidence Base has not been re-evaluated following the decision to impose extra housing on the Eldon Way & Foundry Industrial Estates. ECC Highways have confirmed that the B1013 is running at 72% of its maximum theoretical capacity) and the effect of extra housing in Hockley (as well as Hawkwell) has not been re-evaluated and it is unclear what improvements will be required and whether they can be physically achieved.

3. RDC are proposing to scatter housing across the district in around 12 or sites but no detailed consideration has been given to the implications for highways across the District. The "Core Strategy" is not a strategy but simply a collection of disparate sites. Many roads across the District are at or near capacity but no modelling has been undertaken to determine the impacts or the funding required to upgrade them. At the Central Area Committee on 25 June 2009, RDC stated (in response to a question):

"Rochford Council is not the highway authority, but is working closely with Essex County Council to identify highway infrastructure requirements. Highway infrastructure improvements will be set out in the Core Strategy and other subsequent Development Plan Documents as required. These will be fed into the next version of the Essex Local Transport Plan, which is effectively a bidding document for funds to implement highway infrastructure improvements, schemes to tackle congestion, etc.

PPS12. Neither have RDC been able to advise residents how such changes will be made and the strategy is unsound.

10. The Core Strategy misrepresents the findings of The Retail & Leisure Study (R&LS) 2008.

The Core Strategy states (12.38) "The Retail & Leisure Study indicates Hockley has great potential. Hockley has been identified as having a need for additional convenience floorspace".

Whereas, the R&LS actually states:

1) (10.26) "the scale of need does not lend itself to a foodstore capable of retaining a significant proportion of main food shopping expenditure.

2) (10.28) "There is no immediate capacity for additional floor space."

3) (10.29) "we recommend that focus be maintained on developing Hockley's existing strengths, rather than retail expansion".

4) 10.31 "The current nature of Hockley does not lend itself to classification as a 'town centre' as defined by PPS6. Moreover, we have identified that it is a very small catchment population. Accordingly, the Council may wish to consider reclassifying Hockley from a town centre to a district centre".

The Core Strategy is inaccurate, misleading and unsound.

Summary:

2. The Transport Evidence Base has not been re-evaluated following the decision to impose extra housing on the Eldon Way & Foundry Industrial Estates. ECC Highways have confirmed that the B1013 is running at 72% of its maximum theoretical capacity) and the effect of extra housing in Hockley (as well as Hawkwell) has not been re-evaluated and it is unclear what improvements will be required and whether they can be physically achieved.

3. RCD are proposing to scatter housing across the district in around 12 or sites but no detailed consideration has been given to the implications for highways across the District. The "Core Strategy" is not a strategy but simply a collection of disparate sites. Many roads across the District are at or near capacity but no modelling has been undertaken to determine the impacts or the funding required to upgrade them. At the Central Area Committee on 25 June 2009, RDC stated (in response to a question):

"Rochford Council is not the highway authority, but is working closely with Essex County Council to identify highway infrastructure requirements. Highway infrastructure improvements will be set out in the Core Strategy and other subsequent Development Plan Documents as required. These will be fed into the next version of the Essex Local Transport Plan, which is effectively a bidding document for funds to implement highway infrastructure improvements, schemes to tackle congestion, etc.

The District Council is working closely with the Essex County Council to ensure that highway infrastructure identified in the Core Strategy can be delivered."

It is clear that (i) the combined impact of scattering houses across the District and (ii) relocating Eldon Way/Foundry Industrial Estates to the very edge of the District with no public transport services will exacerbate existing problems. It is also clear that the extent of improvements required is both unknown and not funded and the proposal is unsound.

Full Text:

1. Highway & Traffic Implications

Proposals for moving employment to out of town locations, at either end of the district, with no existing public transport links, are contrary to government policy PPG4. It also contravenes the Core Strategy's stated aims of reducing carbon emissions; reliance on car transport and providing "an integrated network of cycle paths".

The District of Rochford is predominately spread on a West/East axis along the railway line. Hockley is located in the middle of the district and the two estates are adjacent to the railway station. Bus service are poor with just 3* an hour (following a recent 50% reduction in services) and the operator has admitted they cannot compete with the railway making improvements to new sites away from major centres unlikely. (* one of the 3 services is paid for by ECC on a 6 mth trial and may be terminated in the new year).

However, the Core Strategy proposes to relocate these two estates to a greenfield site near the airport. This site is 2-3 miles from the nearest railway station and there are currently no bus services to the area. As a result, RDC are proposing to upgrade the nearest road to a dual-carriageway, although the main connecting road (the B1013), which runs through Hockley, will remain single-carriageway and is already at 72% of capacity (ECC Highways stats). This is despite extra traffic expected in the area as a result of the Joint Area Action Plan (JAAP) which proposes considerable growth at neighbouring Southend Airport, as well as the new industrial estate.

The site selected for the new industrial estate also contravenes PPS4 which states:

(EC7.3C) "out-of-centre site, with preference given to sites which are or will be well served by a choice of means of transport and which are close to the centre and have a high likelihood of forming links with the centre. There is no existing public transport and no obvious likelihood of forming links with any existing centres.

EC7.5 1 "whether the site is or will be accessible and well served by a choice of means of transport, especially public transport, walking and cycling, as well as by car". Its remote location. Accessed by the narrow, busy B1013 is not suitable for access by cycle or on foot.

It also contravenes PPS1 (27 vii) "Reduce the need to travel and encourage accessible public transport provision to secure more sustainable patterns of transport development. Planning should actively manage patterns of urban growth to make the fullest use of public transport and focus development in existing centres and near to major public transport interchanges".

The Core Strategy also contravenes its own policy T1 and is unsound.

2. The Transport Evidence Base has not been re-evaluated following the decision to impose extra housing on the Eldon Way & Foundry Industrial Estates. ECC Highways have confirmed that the B1013 is running at 72% of its maximum theoretical capacity) and the effect of extra housing in Hockley (as well as Hawkwell) has not been re-evaluated and it is unclear what improvements will be required and whether they can be physically achieved.

Thus the proposals are not founded on a robust and credible evidence base and are unsound.

3. RCD are proposing to scatter housing across the district in around 12 or sites but no detailed consideration has been given to the implications for highways across the District. The "Core Strategy" is not a strategy but simply a collection of disparate sites. Many roads across the District are at or near capacity but no modelling has been undertaken to determine the impacts or the funding required to upgrade them. At the Central Area Committee on 25 June 2009, RDC stated (in response to a question):

"Rochford Council is not the highway authority, but is working closely with Essex County Council to identify highway infrastructure requirements. Highway infrastructure improvements will be set out in the Core Strategy and other subsequent Development Plan Documents as required. These will be fed into the next version of the Essex Local Transport Plan, which is effectively a bidding document for funds to implement highway infrastructure improvements, schemes to tackle congestion, etc.

The District Council is working closely with the Essex County Council to ensure that highway infrastructure identified in the Core Strategy can be delivered."

It is clear that (i) the combined impact of scattering houses across the District and (ii) relocating Eldon Way/Foundry Industrial Estates to the very edge of the District with no public transport services will exacerbate existing problems. It is also clear that the extent of improvements required is both unknown and not funded and the proposal is unsound.

16525 Object

CHAPTER 10 Policy T1 - Highways

Summary:

RDC are proposing to scatter housing across the district in around 12 or sites but no detailed consideration has been given to the implications for highways across the District. Many roads across the District are at or near capacity but no modelling has been undertaken to determine the impacts.

It is clear that (i) the combined impact of scattering houses across the District and (ii) relocating Eldon Way/Foundry Industrial Estates with no public transport services will exacerbate existing problems. It is clear that the extent of improvements required is both unknown and not funded and the proposal is unsound.

4. PPS12 4.9 states "The infrastructure planning process should identify, as far as possible: infrastructure needs and costs". Neither needs nor, especially, costs have been identified and the Core Strategy is therefore unsound.

The district's highways suffer from years of under investment and over use. The Core Strategy proposes to fund infrastructure improvements through use of Standard Charges. However, no detail is provided and no attempt made to identify the likely scale of such charges. Thus it is unclear if use of Standard Charges is financially viable.

Policy T2 provides a list of required highway improvements. The list contains most of the more major roads in the District including Rectory Lane, which has a single track, traffic light controlled railway bridge. 1200 dwellings are proposed for the northern end of Rectory Road and a further 175 at the southern end. The cost of address the railway bridge bottleneck will be significant but is not mentioned.

No attempt is made to either cost these charges or explain how improvements not linked to any one specific development will be paid for (eg B1013; Ashingdon Road; a network of walking, cycling, bridleways).

The concept of paying for improvements through use of Standard Charges is totally unproven and unsound.

Summary:

PPS12 4.9 states "The infrastructure planning process should identify, as far as possible: infrastructure needs and costs". Neither needs nor, especially, costs have been identified and the Core Strategy is therefore unsound.

The Core Strategy proposes to fund infrastructure improvements through use of Standard Charges. However, no detail is provided and no attempt made to identify the likely scale of such charges. It is therefore unclear if use of Standard Charges is financially viable.

5. SERT is put forward as a solution to reducing car use but it will only skirt the edge of the district and the Core Strategy acknowledges there is only "potential" to do so in the future. SERT is not realistic or reliable a solution and the proposal is therefore unsound.

6. Previous consultations ignored by RDC:

The Hockley Parish Plan (dated 2007), clearly states that residents are strongly against any large scale housing development in Hockley, but if there has to be additional housing, then there should be no loss of greenbelt or open spaces, and no large housing estate developments. It was also stated that any developments must be matched by the appropriate levels of infrastructure.

The proposals also ignore the 95% rejection rate of respondents to RDC's own Hockley Area Plan (HAAP) Consultation (2009), which included specific proposals for Eldon Way (although HAAP did not even mention the adjoining Foundry Industrial Estate). Why have a consultation and ignore it?

Thus the proposals are not founded on a robust and credible evidence base and are unsound.

Summary:

Previous consultations ignored by RDC:

The proposals ignore the 95% rejection rate of respondents to RDC's own Hockley Area Plan (HAAP) Consultation (2009), which included specific proposals for Eldon Way (although HAAP did not even mention the adjoining Foundry Industrial Estate). Why have a consultation and ignore it?

Thus the proposals are not founded on a robust and credible evidence base and are unsound.

7. RDC have not consulted on the very specific proposals to relocate the Eldon Way and Foundry Industrial Estates.

The previous CS Strategy stated "we will look at opportunities for more valuable and appropriate uses of the industrial land" with absolutely no consultation at all on concept of moving existing EW businesses entirely.

The Foundry Industrial Estates has never even been previously mentioned in any plan version; A recent amendment to

16525 Object

CHAPTER 10 Policy T1 - Highways

the Core Strategy acknowledges this omission was due to a typing error!

The Urban Capacity study stated a "low probability" of housing and did not even mention the Foundry Estate

Thus the proposals are they are not founded on a robust and credible evidence base and are unsound.

Summary:

RDC have not consulted on the very specific proposals to relocate the Eldon Way and Foundry Industrial Estates.

The previous CS Strategy stated "we will look at opportunities for more valuable and appropriate uses of the industrial land" with absolutely no consultation at all on concept of moving existing FW businesses entirely.

The Foundry Industrial Estate has never even been previously mentioned.

The Urban Capacity study stated a "low probability" of housing and did not even mention the Foundry Estate.

Thus the proposals are they are not founded on a robust and credible evidence base and are unsound.

8. Eldon Way and Foundry Industrial Estates form a significant part of the ongoing HAAP consultation but the Core Strategy proposals pre-empt the next stage of the HAAP consultation.

Neither the Core Strategy or Hockley Area Action Plan (HAAP) defines its status relevant to the other plan and subsequent priorities. Why is there no cross-referencing between concurrent plans affecting the exact same piece of land?

There are also inconsistencies between the Core Strategy & HAAP regarding the description of proposed uses for the two industrial estates. The Core Strategy refers to Leisure, Commercial and Residential whilst HAAP mentions a "village green, introducing a significant area of public open space". There is not sufficient space for both and the Core Strategy is again pre-empting the ongoing HAAP.

If a decision is taken now, as part of the Core Strategy, to relocate all the existing businesses on the two estates, it will set a legal precedent which HAAP will need to follow and renders the next stage of HAAP virtually redundant. Particularly given the 95% rejection rate of respondents to the previous round of HAAP such an approach is entirely undemocratic and unsound.

Summary

The Core Strategy proposals pre-empt the next stage of the HAAP consultation and neither defines its status relevant to the other plan and subsequent priorities.

There are also inconsistencies between the Core Strategy & HAAP.

If a decision is taken as part of the Core Strategy, to relocate all the existing businesses on the two estates, it will set a legal precedent which HAAP will need to follow and renders the next stage of HAAP virtually redundant. Particularly given the 95% rejection rate of respondents to the previous round of HAAP such an approach is entirely undemocratic and unsound.

9. PPS12, 4.6, states that Cores Strategies show be flexible and "should be able to show how they will handle contingencies". Several large planning applications have already been submitted to RDC proposing developments outside the Core Strategy which do not indicate how such applications will be handled and does not comply with PPS12. Neither have RDC been able to advise residents how such changes will be made and the strategy is unsound.

10. The Core Strategy misrepresent the findings of The Retail & Leisure Study (R&LS) 2008.

The Core Strategy states (12.38) "The Retail & Leisure Study indicates Hockley has great potential. Hockley has been identified as having a need for additional convenience floorspace".

Whereas, the R&LS actually states:

1) (10.26) "the scale of need does not lend itself to a foodstore capable of retaining a significant proportion of main food shopping expenditure.

2) (10.28) "There is no immediate capacity for additional floor space."

3) (10.29) "we recommend that focus be maintained on developing Hockley's existing strengths, rather than retail expansion".

4) 10.31 "The current nature of Hockley does not lend itself to classification as a 'town centre' as defined by PPS6.

Core Strategy Submission Document

16525 Object

CHAPTER 10 Policy T1 - Highways

Moreover, we have identified that it is a very small catchment population. Accordingly, the Council may wish to consider reclassifying Hockley from a town centre to a district centre".

The Core Strategy is inaccurate, misleading and unsound.

1. Highway & Traffic Implications

Proposals for moving employment to out of town locations, at either end of the district, with no existing public transport links, are contrary to government policy PPG4. It also contravenes the Core Strategy's stated aims of reducing carbon emissions; reliance on car transport and providing "an integrated network of cycle paths".

The District of Rochford is predominately spread on a West/East axis along the railway line. Hockley is located in the middle of the district and the two estates are adjacent to the railway station. Bus service are poor with just 3* an hour (following a recent 50% reduction in services) and the operator has admitted they cannot compete with the railway making improvements to new sites away from major centres unlikely. (* one of the 3 services is paid for by ECC on a 6 mth trial and may be terminated in the new year).

However, the Core Strategy proposes to relocate these two estates to a greenfield site near the airport. This site is 2-3 miles from the nearest railway station and there are currently no bus services to the area. As a result, RDC are proposing to upgrade the nearest road to a dual-carriageway, although the main connecting road (the B1013), which runs through Hockley, will remain single-carriageway and is already at 72% of capacity (ECC Highways stats). This is despite extra traffic expected in the area as a result of the Joint Area Action Plan (JAAP) which proposes considerable growth at neighbouring Southend Airport, as well as the new industrial estate.

The site selected for the new industrial estate also contravenes PPS4 which states:

(EC7.3C) "out-of-centre site, with preference given to sites which are or will be well served by a choice of means of transport and which are close to the centre and have a high likelihood of forming links with the centre. There is no existing public transport and no obvious likelihood of forming links with any existing centres.

EC7.5 1 "whether the site is or will be accessible and well served by a choice of means of transport, especially public transport, walking and cycling, as well as by car". Its remote location. Accessed by the narrow, busy B1013 is not suitable for access by cycle or on foot.

It also contravenes PPS1 (27 vii) "Reduce the need to travel and encourage accessible public transport provision to secure more sustainable patterns of transport development. Planning should actively manage patterns of urban growth to make the fullest use of public transport and focus development in existing centres and near to major public transport interchanges".

The Core Strategy also contravenes its own policy T1 and is unsound.

2. The Transport Evidence Base has not been re-evaluated following the decision to impose extra housing on the Eldon Way & Foundry Industrial Estates. ECC Highways have confirmed that the B1013 is running at 72% of its maximum theoretical capacity) and the effect of extra housing in Hockley (as well as Hawkwell) has not been re-evaluated and it is unclear what improvements will be required and whether they can be physically achieved.

Thus the proposals are not founded on a robust and credible evidence base and are unsound.

3. RCD are proposing to scatter housing across the district in around 12 or sites but no detailed consideration has been given to the implications for highways across the District. The "Core Strategy" is not a strategy but simply a collection of disparate sites. Many roads across the District are at or near capacity but no modelling has been undertaken to determine the impacts or the funding required to upgrade them. At the Central Area Committee on 25 June 2009, RDC stated (in response to a question):

"Rochford Council is not the highway authority, but is working closely with Essex County Council to identify highway infrastructure requirements. Highway infrastructure improvements will be set out in the Core Strategy and other subsequent Development Plan Documents as required. These will be fed into the next version of the Essex Local Transport Plan, which is effectively a bidding document for funds to implement highway infrastructure improvements, schemes to tackle congestion, etc.

The District Council is working closely with the Essex County Council to ensure that highway infrastructure identified in the Core Strategy can be delivered."

It is clear that (i) the combined impact of scattering houses across the District and (ii) relocating Eldon Way/Foundry Industrial Estates to the very edge of the District with no public transport services will exacerbate existing problems. It is also clear that the extent of improvements required is both unknown and not funded and the proposal is unsound.

16528 Object

CHAPTER 10 Policy T1 - Highways

Summary:

RDC are proposing to scatter housing across the district in around 12 or sites but no detailed consideration has been given to the implications for highways across the District. Many roads across the District are at or near capacity but no modelling has been undertaken to determine the impacts.

It is clear that (i) the combined impact of scattering houses across the District and (ii) relocating Eldon Way/Foundry Industrial Estates with no public transport services will exacerbate existing problems. It is clear that the extent of improvements required is both unknown and not funded and the proposal is unsound.

4. PPS12 4.9 states "The infrastructure planning process should identify, as far as possible: infrastructure needs and costs". Neither needs nor, especially, costs have been identified and the Core Strategy is therefore unsound.

The district's highways suffer from years of under investment and over use. The Core Strategy proposes to fund infrastructure improvements through use of Standard Charges. However, no detail is provided and no attempt made to identify the likely scale of such charges. Thus it is unclear if use of Standard Charges is financially viable.

Policy T2 provides a list of required highway improvements. The list contains most of the more major roads in the District including Rectory Lane, which has a single track, traffic light controlled railway bridge. 1200 dwellings are proposed for the northern end of Rectory Road and a further 175 at the southern end. The cost of address the railway bridge bottleneck will be significant but is not mentioned.

No attempt is made to either cost these charges or explain how improvements not linked to any one specific development will be paid for (eg B1013; Ashingdon Road; a network of walking, cycling, bridleways).

The concept of paying for improvements through use of Standard Charges is totally unproven and unsound.

Summary:

PPS12 4.9 states "The infrastructure planning process should identify, as far as possible: infrastructure needs and costs". Neither needs nor, especially, costs have been identified and the Core Strategy is therefore unsound.

The Core Strategy proposes to fund infrastructure improvements through use of Standard Charges. However, no detail is provided and no attempt made to identify the likely scale of such charges. It is therefore unclear if use of Standard Charges is financially viable.

5. SERT is put forward as a solution to reducing car use but it will only skirt the edge of the district and the Core Strategy acknowledges there is only "potential" to do so in the future. SERT is not realistic or reliable a solution and the proposal is therefore unsound.

6. Previous consultations ignored by RDC:

The Hockley Parish Plan (dated 2007), clearly states that residents are strongly against any large scale housing development in Hockley, but if there has to be additional housing, then there should be no loss of greenbelt or open spaces, and no large housing estate developments. It was also stated that any developments must be matched by the appropriate levels of infrastructure.

The proposals also ignore the 95% rejection rate of respondents to RDC's own Hockley Area Plan (HAAP) Consultation (2009), which included specific proposals for Eldon Way (although HAAP did not even mention the adjoining Foundry Industrial Estate). Why have a consultation and ignore it?

Thus the proposals are not founded on a robust and credible evidence base and are unsound.

Summary:

Previous consultations ignored by RDC:

The proposals ignore the 95% rejection rate of respondents to RDC's own Hockley Area Plan (HAAP) Consultation (2009), which included specific proposals for Eldon Way (although HAAP did not even mention the adjoining Foundry Industrial Estate). Why have a consultation and ignore it?

Thus the proposals are not founded on a robust and credible evidence base and are unsound.

7. RDC have not consulted on the very specific proposals to relocate the Eldon Way and Foundry Industrial Estates.

The previous CS Strategy stated "we will look at opportunities for more valuable and appropriate uses of the industrial land" with absolutely no consultation at all on concept of moving existing EW businesses entirely.

The Foundry Industrial Estates has never even been previously mentioned in any plan version; A recent amendment to

16528 Object

CHAPTER 10 Policy T1 - Highways

the Core Strategy acknowledges this omission was due to a typing error!

The Urban Capacity study stated a "low probability" of housing and did not even mention the Foundry Estate

Thus the proposals are they are not founded on a robust and credible evidence base and are unsound.

Summary:

RDC have not consulted on the very specific proposals to relocate the Eldon Way and Foundry Industrial Estates.

The previous CS Strategy stated "we will look at opportunities for more valuable and appropriate uses of the industrial land" with absolutely no consultation at all on concept of moving existing FW businesses entirely.

The Foundry Industrial Estate has never even been previously mentioned.

The Urban Capacity study stated a "low probability" of housing and did not even mention the Foundry Estate.

Thus the proposals are they are not founded on a robust and credible evidence base and are unsound.

8. Eldon Way and Foundry Industrial Estates form a significant part of the ongoing HAAP consultation but the Core Strategy proposals pre-empt the next stage of the HAAP consultation.

Neither the Core Strategy or Hockley Area Action Plan (HAAP) defines its status relevant to the other plan and subsequent priorities. Why is there no cross-referencing between concurrent plans affecting the exact same piece of land?

There are also inconsistencies between the Core Strategy & HAAP regarding the description of proposed uses for the two industrial estates. The Core Strategy refers to Leisure, Commercial and Residential whilst HAAP mentions a "village green, introducing a significant area of public open space". There is not sufficient space for both and the Core Strategy is again pre-empting the ongoing HAAP.

If a decision is taken now, as part of the Core Strategy, to relocate all the existing businesses on the two estates, it will set a legal precedent which HAAP will need to follow and renders the next stage of HAAP virtually redundant. Particularly given the 95% rejection rate of respondents to the previous round of HAAP such an approach is entirely undemocratic and unsound.

Summary

The Core Strategy proposals pre-empt the next stage of the HAAP consultation and neither defines its status relevant to the other plan and subsequent priorities.

There are also inconsistencies between the Core Strategy & HAAP.

If a decision is taken as part of the Core Strategy, to relocate all the existing businesses on the two estates, it will set a legal precedent which HAAP will need to follow and renders the next stage of HAAP virtually redundant. Particularly given the 95% rejection rate of respondents to the previous round of HAAP such an approach is entirely undemocratic and unsound.

9. PPS12, 4.6, states that Cores Strategies show be flexible and "should be able to show how they will handle contingencies". Several large planning applications have already been submitted to RDC proposing developments outside the Core Strategy which do not indicate how such applications will be handled and does not comply with PPS12. Neither have RDC been able to advise residents how such changes will be made and the strategy is unsound.

10. The Core Strategy misrepresent the findings of The Retail & Leisure Study (R&LS) 2008.

The Core Strategy states (12.38) "The Retail & Leisure Study indicates Hockley has great potential. Hockley has been identified as having a need for additional convenience floorspace".

Whereas, the R&LS actually states:

1) (10.26) "the scale of need does not lend itself to a foodstore capable of retaining a significant proportion of main food shopping expenditure.

2) (10.28) "There is no immediate capacity for additional floor space."

3) (10.29) "we recommend that focus be maintained on developing Hockley's existing strengths, rather than retail expansion".

4) 10.31 "The current nature of Hockley does not lend itself to classification as a 'town centre' as defined by PPS6.

Core Strategy Submission Document

16528 Object

CHAPTER 10 Policy T1 - Highways

Moreover, we have identified that it is a very small catchment population. Accordingly, the Council may wish to consider reclassifying Hockley from a town centre to a district centre".

The Core Strategy is inaccurate, misleading and unsound.

Summary:

The Core Strategy misrepresents the findings of The Retail & Leisure Study (R&LS) 2008. The Core Strategy states "The Retail & Leisure Study states Hockley has great potential and has a need for additional convenience floorspace". Whereas, the R&LS states: 1) "does not lend itself to a foodstore capable of retaining a significant proportion of main food shopping expenditure. 2) "There is no immediate capacity for additional space." 3) "we recommend that focus be maintained on developing Hockley's existing strengths." 4) "the Council may wish to consider reclassifying Hockley from a town centre to a district centre.

Summary: RDC are proposing to scatter housing across the district in around 12 or sites but no detailed consideration has been given to the implications for highways across the District. 1. Highway & Traffic Implications

Proposals for moving employment to out of town locations, at either end of the district, with no existing public transport links, are contrary to government policy PPG4. It also contravenes the Core Strategy's stated aims of reducing carbon emissions; reliance on car transport and providing "an integrated network of cycle paths".

The District of Rochford is predominately spread on a West/East axis along the railway line. Hockley is located in the middle of the district and the two estates are adjacent to the railway station. Bus service are poor with just 3* an hour (following a recent 50% reduction in services) and the operator has admitted they cannot compete with the railway making improvements to new sites away from major centres unlikely. (* one of the 3 services is paid for by ECC on a 6 mth trial and may be terminated in the new year).

However, the Core Strategy proposes to relocate these two estates to a greenfield site near the airport. This site is 2-3 miles from the nearest railway station and there are currently no bus services to the area. As a result, RDC are proposing to upgrade the nearest road to a dual-carriageway, although the main connecting road (the B1013), which runs through Hockley, will remain single-carriageway and is already at 72% of capacity (ECC Highways stats). This is despite extra traffic expected in the area as a result of the Joint Area Action Plan (JAAP) which proposes considerable growth at neighbouring Southend Airport, as well as the new industrial estate.

The site selected for the new industrial estate also contravenes PPS4 which states:

(EC7.3C) "out-of-centre site, with preference given to sites which are or will be well served by a choice of means of transport and which are close to the centre and have a high likelihood of forming links with the centre. There is no existing public transport and no obvious likelihood of forming links with any existing centres.

EC7.5 1 "whether the site is or will be accessible and well served by a choice of means of transport, especially public transport, walking and cycling, as well as by car". Its remote location. Accessed by the narrow, busy B1013 is not suitable for access by cycle or on foot.

It also contravenes PPS1 (27 vii) "Reduce the need to travel and encourage accessible public transport provision to secure more sustainable patterns of transport development. Planning should actively manage patterns of urban growth to make the fullest use of public transport and focus development in existing centres and near to major public transport interchanges".

Summary:

Proposals for moving employment to of town locations, at either end of the district, with no existing public transport inks, are contrary to government policy PPG4 & PPS1. It also contravenes the Core Strategy's stated aims of reducing carbon emissions; reliance on car transport and providing "an integrated network of cycle paths".

The Core Strategy also contravenes its own policy T1 and is unsound.

2. The Transport Evidence Base has not been re-evaluated following the decision to impose extra housing on the Eldon Way & Foundry Industrial Estates. ECC Highways have confirmed that the B1013 is running at 72% of its maximum theoretical capacity) and the effect of extra housing in Hockley (as well as Hawkwell) has not been re-evaluated and it is unclear what improvements will be required and whether they can be physically achieved.

Thus the proposals are not founded on a robust and credible evidence base and are unsound.

3. RCD are proposing to scatter housing across the district in around 12 or sites but no detailed consideration has been given to the implications for highways across the District. The "Core Strategy" is not a strategy but simply a collection of disparate sites. Many roads across the District are at or near capacity but no modelling has been undertaken to determine the impacts or the funding required to upgrade them. At the Central Area Committee on 25 June 2009, RDC stated (in response to a question):

"Rochford Council is not the highway authority, but is working closely with Essex County Council to identify highway infrastructure requirements. Summary:

RDC have not consulted on the very specific proposals to relocate the Eldon Way and Foundry Industrial Estates.

The previous CS Strategy stated "we will look at opportunities for more valuable and appropriate uses of the industrial land" with absolutely no consultation at all on concept of moving existing FW businesses entirely.

The Foundry Industrial Estate has never even been previously mentioned.

The Urban Capacity study stated a "low probability" of housing and did not even mention the Foundry Estate.

Thus the proposals are they are not founded on a robust and credible evidence base and are unsound.

8. Eldon Way and Foundry Industrial Estates form a significant part of the ongoing HAAP consultation but the Core Strategy proposals pre-empt the next stage of the HAAP consultation.

Neither the Core Strategy or Hockley Area Action Plan (HAAP) defines its status relevant to the other plan and subsequent priorities. Why is there no cross-referencing between concurrent plans affecting the exact same piece of land?

There are also inconsistencies between the Core Strategy & HAAP regarding the description of proposed uses for the two industrial estates. The Core Strategy refers to Leisure, Commercial and Residential whilst HAAP mentions a "village green, introducing a significant area of public open space". There is not sufficient space for both and the Core Strategy is again pre-empting the ongoing HAAP.

If a decision is taken now, as part of the Core Strategy, to relocate all the existing businesses on the two estates, it will set a legal precedent which HAAP will need to follow and renders the next stage of HAAP virtually redundant. Particularly given the 95% rejection rate of respondents to the previous round of HAAP such an approach is entirely undemocratic and unsound.

Summary

The Core Strategy proposals pre-empt the next stage of the HAAP consultation and neither defines its status relevant to the other plan and subsequent priorities.

There are also inconsistencies between the Core Strategy & HAAP.

If a decision is taken as part of the Core Strategy, to relocate all the existing businesses on the two estates, it will set a legal precedent which HAAP will need to follow and renders the next stage of HAAP virtually redundant. Particularly given the 95% rejection rate of respondents to the previous round of HAAP such an approach is entirely undemocratic and unsound.

9. PPS12, 4.6, states that Cores Strategies show be flexible and "should be able to show how they will handle contingencies". Several large planning applications have already been submitted to RDC proposing developments outside the Core Strategy which do not indicate how such applications will be handled and does not comply with PPS12. Neither have RDC been able to advise residents how such changes will be made and the strategy is unsound.

10. The Core Strategy misrepresent the findings of The Retail & Leisure Study (R&LS) 2008.

The Core Strategy states (12.38) "The Retail & Leisure Study indicates Hockley has great potential. Hockley has been identified as having a need for additional convenience floorspace".

Whereas, the R&LS actually states:

1) (10.26) "the scale of need does not lend itself to a foodstore capable of retaining a significant proportion of main food shopping expenditure.

Core Strategy Submission Document

16544 Object

CHAPTER 10 Policy T1 - Highways

2) (10.28) "There is no immediate capacity for additional floor space."

3) (10.29) "we recommend that focus be maintained on developing Hockley's existing strengths, rather than retail expansion".

4) 10.31 "The current nature of Hockley does not lend itself to classification as a 'town centre' as defined by PPS6. Moreover, we have identified that it is a very small catchment population. Accordingly, the Council may wish to consider reclassifying Hockley from a town centre to a district centre".

The Core Strategy is inaccurate, misleading and unsound.

Summary:

The Core Strategy misrepresents the findings of The Retail & Leisure Study (R&LS) 2008. The Core Strategy states "The Retail & Leisure Study states Hockley has great potential and has a need for additional convenience floorspace". Whereas, the R&LS states: 1) "does not lend itself to a foodstore capable of retaining a significant proportion of main food shopping expenditure. 2) "There is no immediate capacity for additional space." 3) "we recommend that focus be maintained on developing Hockley's existing strengths." 4) "the Council may wish to consider reclassifying Hockley from a town centre to a district centre.

Summary:

2. The Transport Evidence Base has not been re-evaluated following the decision to impose extra housing on the Eldon Way & Foundry Industrial Estates. ECC Highways have confirmed that the B1013 is running at 72% of its maximum theoretical capacity) and the effect of extra housing in Hockley (as well as Hawkwell) has not been re-evaluated and it is unclear what improvements will be required and whether they can be physically achieved.

Thus the proposals are not founded on a robust and credible evidence base and are unsound.

Full Text:

1. Highway & Traffic Implications

Proposals for moving employment to out of town locations, at either end of the district, with no existing public transport links, are contrary to government policy PPG4. It also contravenes the Core Strategy's stated aims of reducing carbon emissions; reliance on car transport and providing "an integrated network of cycle paths".

The District of Rochford is predominately spread on a West/East axis along the railway line. Hockley is located in the middle of the district and the two estates are adjacent to the railway station. Bus service are poor with just 3* an hour (following a recent 50% reduction in services) and the operator has admitted they cannot compete with the railway making improvements to new sites away from major centres unlikely. (* one of the 3 services is paid for by ECC on a 6 mth trial and may be terminated in the new year).

However, the Core Strategy proposes to relocate these two estates to a greenfield site near the airport. This site is 2-3 miles from the nearest railway station and there are currently no bus services to the area. As a result, RDC are proposing to upgrade the nearest road to a dual-carriageway, although the main connecting road (the B1013), which runs through Hockley, will remain single-carriageway and is already at 72% of capacity (ECC Highways stats). This is despite extra traffic expected in the area as a result of the Joint Area Action Plan (JAAP) which proposes considerable growth at neighbouring Southend Airport, as well as the new industrial estate.

The site selected for the new industrial estate also contravenes PPS4 which states:

(EC7.3C) "out-of-centre site, with preference given to sites which are or will be well served by a choice of means of transport and which are close to the centre and have a high likelihood of forming links with the centre. There is no existing public transport and no obvious likelihood of forming links with any existing centres.

EC7.5 1 "whether the site is or will be accessible and well served by a choice of means of transport, especially public transport, walking and cycling, as well as by car". Its remote location. Accessed by the narrow, busy B1013 is not suitable for access by cycle or on foot.

It also contravenes PPS1 (27 vii) "Reduce the need to travel and encourage accessible public transport provision to secure more sustainable patterns of transport development. Planning should actively manage patterns of urban growth to make the fullest use of public transport and focus development in existing centres and near to major public transport interchanges".

Summary:

Proposals for moving employment to of town locations, at either end of the district, with no existing public transport inks, are contrary to government policy PPG4 & PPS1. It also contravenes the Core Strategy's stated aims of reducing carbon emissions; reliance on car transport and providing "an integrated network of cycle paths".

The Core Strategy also contravenes its own policy T1 and is unsound.

2. The Transport Evidence Base has not been re-evaluated following the decision to impose extra housing on the Eldon Way & Foundry Industrial Estates. ECC Highways have confirmed that the B1013 is running at 72% of its maximum theoretical capacity) and the effect of extra housing in Hockley (as well as Hawkwell) has not been re-evaluated and it is unclear what improvements will be required and whether they can be physically achieved.

Thus the proposals are not founded on a robust and credible evidence base and are unsound.

3. RCD are proposing to scatter housing across the district in around 12 or sites but no detailed consideration has been given to the implications for highways across the District. The "Core Strategy" is not a strategy but simply a collection of disparate sites. Many roads across the District are at or near capacity but no modelling has been undertaken to determine the impacts or the funding required to upgrade them. At the Central Area Committee on 25 June 2009, RDC stated (in response to a question):

"Rochford Council is not the highway authority, but is working closely with Essex County Council to identify highway infrastructure requirements. Highway infrastructure improvements will be set out in the Core Strategy and other subsequent Development Plan Documents as required. These will be fed into the next version of the Essex Local Transport Plan, which is effectively a bidding document for funds to implement highway infrastructure improvements, schemes to tackle congestion, etc.

The District Council is working closely with the Essex County Council to ensure that highway infrastructure identified in

16546 Object

CHAPTER 10 Policy T1 - Highways

the Core Strategy can be delivered."

It is clear that (i) the combined impact of scattering houses across the District and (ii) relocating Eldon Way/Foundry Industrial Estates to the very edge of the District with no public transport services will exacerbate existing problems. It is also clear that the extent of improvements required is both unknown and not funded and the proposal is unsound.

Summary:

RDC are proposing to scatter housing across the district in around 12 or sites but no detailed consideration has been given to the implications for highways across the District. Many roads across the District are at or near capacity but no modelling has been undertaken to determine the impacts.

It is clear that (i) the combined impact of scattering houses across the District and (ii) relocating Eldon Way/Foundry Industrial Estates with no public transport services will exacerbate existing problems. It is clear that the extent of improvements required is both unknown and not funded and the proposal is unsound.

4. PPS12 4.9 states "The infrastructure planning process should identify, as far as possible: infrastructure needs and costs". Neither needs not, especially, costs have been identified and the Core Strategy is therefore unsound.

The district's highways suffer from years of under investment and over use. The Core Strategy proposes to fund infrastructure improvements through use of Standard Charges. However, no detail is provided and no attempt made to identify the likely scale of such charges. Thus it is unclear if use of Standard Charges is financially viable.

Policy T2 provides a list of required highway improvements. The list contains most of the more major roads in the District including Rectory Lane, which has a single track, traffic light controlled railway bridge. 1200 dwellings are proposed for the northern end of Rectory Road and a further 175 at the southern end. The cost of address the railway bridge bottleneck will be significant but is not mentioned.

No attempt is made to either cost these charges or explain how improvements not linked to any one specific development will be paid for (eg B1013; Ashingdon Road; a network of walking, cycling, bridleways).

The concept of paying for improvements through use of Standard Charges is totally unproven and unsound.

Summary:

PPS12 4.9 states "The infrastructure planning process should identify, as far as possible: infrastructure needs and costs". Neither needs nor, especially, costs have been identified and the Core Strategy is therefore unsound.

The Core Strategy proposes to fund infrastructure improvements through use of Standard Charges. However, no detail is provided and no attempt made to identify the likely scale of such charges. It is therefore unclear if use of Standard Charges is financially viable.

5. SERT is put forward as a solution to reducing car use but it will only skirt the edge of the district and the Core Strategy acknowledges there is only "potential" to do so in the future. SERT is not realistic or reliable a solution and the proposal is therefore unsound.

6. Previous consultations ignored by RDC:

The Hockley Parish Plan (dated 2007), clearly states that residents are strongly against any large scale housing development in Hockley, but if there has to be additional housing, then there should be no loss of greenbelt or open spaces, and no large housing estate developments. It was also stated that any developments must be matched by the appropriate levels of infrastructure.

The proposals also ignore the 95% rejection rate of respondents to RDC's own Hockley Area Plan (HAAP) Consultation (2009), which included specific proposals for Eldon Way (although HAAP did not even mention the adjoining Foundry Industrial Estate). Why have a consultation and ignore it?

Thus the proposals are not founded on a robust and credible evidence base and are unsound.

Summary:

The District of Rochford is predominately spread on a West/East axis along the railway line. Hockley is located in the middle of the district and the two estates are adjacent to the railway station. Bus services are poor with just 3* an hour (following a recent 50% reduction in services) and the operator has admitted they cannot compete with the railway making improvements to new sites away from major centres unlikely. (* one of the 3 services is paid for by ECC on a 6 mth trial and may be terminated in the new year).

However, the Core Strategy proposes to relocate these two estates to a greenfield site near the airport. This site is 2-3 miles from the nearest railway station and there are currently no bus services to the area. As a result, RDC are proposing to upgrade the nearest road to a dual-carriageway, although the main connecting road (the B1013), which runs through Hockley, will remain single-carriageway and is already at 72% of capacity (ECC Highways stats). This is despite extra traffic expected in the area as a result of the Joint Area Action Plan (JAAP) which proposes considerable growth at neighboring Southend Airport, as well as the new industrial estate.

The site selected for the new industrial estate also contravenes PPS4 which states;
â€¢ (EC7.3C) "out-of-centre sites, with preference given to sites which are or will be well served by a choice of means of transport and which are close to the centre and have a high likelihood of forming links with the centre. There is no existing public transport and no obvious likelihood of forming links with any existing centres.
â€¢ EC7.5 1 "whether the site is or will be accessible and well served by a choice of means of transport, especially public transport, walking and cycling, as well as by car". Its remote location. Accessed by the narrow, busy B1013 is not suitable for access by cycle or on foot.

It also contravenes PPS1 (27 vii) "Reduce the need to travel and encourage accessible public transport provision to secure more sustainable patterns of transport development. Planning should actively manage patterns of urban growth to make the fullest use of public transport and focus development in existing centres and near to major public transport interchanges".

The Core Strategy also contravenes its own policy T1 and is unsound.

Summary:

Proposals for moving employment to out of town locations, at either end of the district, with no existing public transport links, are contrary to government policy PPG4 & PPS1. It also contravenes the Core Strategy's stated aims of reducing carbon emissions; reliance on car transport and providing "an integrated network of cycle paths".

The Core Strategy also contravenes its own policy T1 and is unsound.

The Transport Evidence Base has not been re-evaluated following the decision to impose extra housing on the Eldon Way & Foundry Industrial Estates. ECC Highways have confirmed that the B1013 is running at 72% of its maximum theoretical capacity) and the effect of extra housing in Hockley (as well as Hawkwell) has not been re-evaluated and it is unclear what improvements will be required and whether they can be physically achieved.

Thus the proposals are not founded on a robust and credible evidence base and are unsound

RDC are proposing to scatter housing across the district in around 12 or sites but no detailed consideration has been given to the implications for highways across the District. The "Core Strategy" is not a strategy but simply a collection of disparate sites. Many roads across the District are at or near capacity but no modelling has been undertaken to determine the impacts or the funding required to upgrade them. At the Central Area Committee on 25 June 2009, RDC stated (in response to a question):

"Rochford Council is not the highway authority, but is working closely with Essex County Council to identify highway infrastructure requirements. Highway infrastructure improvements will be set out in the Core Strategy and other subsequent Development Plan Documents as required. These will be fed into the next version of the Essex Local Transport Plan, which is effectively a bidding document for funds to implement highway infrastructure improvements, schemes to tackle congestion, etc.

The District Council is working closely with the Essex County Council to ensure that highway infrastructure identified in the Core Strategy can be delivered."

It is clear that (i) the combined impact of scattering houses across the District and (ii) relocating Eldon Way/Foundry Industrial Estates to the very edge of the District with no public transport services will exacerbate existing problems. It is also clear that the extent of improvements required is both unknown and not funded and the proposal is unsound.

CHAPTER 10 Policy T1 - Highways

Summary:

RDC are proposing to scatter housing across the district in around 12 or sites but no detailed consideration has been given to the implications for highways across the District. Many roads across the District are at or near capacity but no modeling has been undertaken to determine the impacts

It is clear that (i) the combined impact of scattering houses across the District and (ii) relocating Eldon Way/Foundry Industrial Estates with no public transport services will exacerbate existing problems. It is clear that the extent of improvements required is both unknown and not funded and the proposal is unsound.

PPS12 4.9 states "The infrastructure planning process should identify, as far as possible: infrastructure needs and costs". Neither needs nor, especially, costs have been identified and the Core Strategy is therefore unsound.

The district's highways suffer from years of under investment and over use. The Core Strategy proposes to fund infrastructure improvements through use of Standard Charges. However, no detail is provided and no attempt made to identify the likely scale of such charges. It is therefore unclear if use of Standard Charges is financially viable.

Policy T2 provides a list of required highway improvements. The list contains most of the more major roads in the District including Rectory Lane, which has a single track, traffic light controlled railway bridge. 1200 dwellings are proposed for the northern end of Rectory Road and a further 175 at the southern end. The cost of addressing the railway bridge bottleneck will be significant but is not mentioned.

No attempt is made to either cost these charges or explain how improvements not linked to any one specific development will be paid for (eg B1013; Ashingdon Road; a network of walking, cycling, bridleways).

The concept of paying for improvements through use of Standard Charges is totally unproven and unsound.

Summary:

PPS12 4.9 states "The infrastructure planning process should identify, as far as possible: infrastructure needs and costs". Neither needs nor, especially, costs have been identified and the Core Strategy is therefore unsound.

The Core Strategy proposes to fund infrastructure improvements through use of Standard Charges. However, no detail is provided and no attempt made to identify the likely scale of such charges. It is therefore unclear if use of Standard Charges is financially viable.

SERT is put forward as a solution to reducing car use but it will only skirt the edge of the district and the Core Strategy acknowledges there is only "potential" to do so in the future. SERT is not realistic or reliable a solution and the proposal is therefore unsound.

Previous consultations ignored by RDC:

• The Hockley Parish Plan (dated 2007), clearly states that residents are strongly against any large scale housing development in Hockley, but if there has to be additional housing, then there should be no loss of greenbelt or open spaces, and no large housing estate developments. It was also stated that any developments must be matched by the appropriate levels of infrastructure.

• The proposals also ignore the 95% rejection rate of respondents to RDC's own Hockley Area Plan (HAAP) Consultation (2009), which included specific proposals for Eldon Way (although HAAP did not even mention the adjoining Foundry Industrial Estate). Why have a consultation and ignore it?

Thus the proposals are not founded on a robust and credible evidence base and are unsound.

Summary:

Previous consultations ignored by RDC:

The proposals ignore the 95% rejection rate of respondents to RDC's own Hockley Area Plan (HAAP) Consultation (2009), which included specific proposals for Eldon Way (although HAAP did not even mention the adjoining Foundry Industrial Estate). Why have a consultation and ignore it?

Thus the proposals are not founded on a robust and credible evidence base and are unsound

RDC have not consulted on the very specific proposals to relocate the Eldon Way and Foundry Industrial Estates

• The previous CS Strategy stated "we will look at opportunities for more valuable and appropriate uses of the industrial land" with absolutely no consultation at all on concept of moving existing EW businesses entirely

• the Foundry Industrial Estate has never even been previously mentioned in any plan version; A recent amendment to the Core Strategy states this omission was due to a typing error!

• The Urban Capacity study stated a "low probability" of housing and did not even mention the Foundry Estate

Thus the proposals are they are not founded on a robust and credible evidence base and are unsound.

Summary:

RDC have not consulted on the very specific proposals to relocate the Eldon Way and Foundry Industrial Estates

• The previous CS Strategy stated "we will look at opportunities for more valuable and appropriate uses of the industrial land" with absolutely no consultation at all on concept of moving existing EW businesses entirely

Core Strategy Submission Document

O - 16577 - 14231 - Policy T1 - Highways - i

16577 Object

CHAPTER 10 Policy T1 - Highways

â€¢ the Foundry Industrial Estate has never even been previously mentioned;
â€¢ The Urban Capacity study stated a "low probability" of housing and did not even mention the Foundry Estate

Thus the proposals are they are not founded on a robust and credible evidence base and are unsound.

Eldon Way and Foundry Industrial Estates form a significant part of the ongoing Hockley Area Action Plan (HAAP) consultation but the Core Strategy proposals pre-empt the next stage of the HAAP consultation.

Neither the Core Strategy nor HAAP define its status relevant to the other plan and subsequent priorities. Why is there no cross-referencing between concurrent plans affecting the exact same piece of land?

There are also inconsistencies between the Core Strategy & HAAP regarding the description of proposed uses for the two industrial estates. The Core Strategy refers to Leisure, Commercial and Residential whilst HAAP mentions a "village green, introducing a significant area of public open space". There is not sufficient space for both and the Core Strategy is again pre-empting the ongoing HAAP.

If a decision is taken now, as part of the Core Strategy, to relocate all the existing businesses on the two estates, it will set a legal precedent which HAAP will need to follow and renders the next stage of HAAP virtually redundant. Particularly given the 95% rejection rate of respondents to the previous round of HAAP such an approach is entirely undemocratic and unsound.

Summary:

The Core Strategy proposals pre-empt the next stage of the HAAP consultation and neither defines its status relevant to the other plan and subsequent priorities.

There are also inconsistencies between the Core Strategy & HAAP.

If a decision is taken as part of the Core Strategy, to relocate all the existing businesses on the two estates, it will set a legal precedent which HAAP will need to follow and renders the next stage of HAAP virtually redundant. Particularly given the 95% rejection rate of respondents to the previous round of HAAP such an approach is entirely undemocratic and unsound.

PPS12, 4.6, states that Cores Strategies should be flexible and "should be able to show how they will handle contingencies". Several large planning applications have already been submitted to RDC proposing developments outside the Core Strategy which does not indicate how such applications will be handled and does not comply with PPS12. Neither have RDC been able to advise residents how such changes will be made and the strategy is unsound.

THE Core Strategy misrepresents the findings of The Retail & Leisure Study (R&LS) 2008.

The Core Strategy states (12.38) "The Retail & Leisure Study indicates Hockley has great potential. Hockley has been identified as having a need for additional convenience floorspace".

Whereas, the R&LS actually states:

- 1) (10.26) "the scale of need does not lend itself to a foodstore capable of retaining a significant proportion of main food shopping expenditure.
 - 2) (10.28) "There is no immediate capacity for additional floor space."
 - 3) (10.29) "we recommend that focus be maintained on developing Hockley's existing strengths, rather than retail expansion"
 - 4) 10.31 "The current nature of Hockley does not lend itself to classification as a 'town centre' as defined by PPS6. Moreover, we have identified that it is a very small catchment population. Accordingly, the Council may wish to consider reclassifying Hockley from a town centre to a district centre".
- The Core Strategy is inaccurate, misleading and unsound.

Summary:

The Core Strategy misrepresents the findings of The Retail & Leisure Study (R&LS) 2008. The Core Strategy states "The Retail & Leisure Study states Hockley has great potential and has a need for additional convenience floorspace". Whereas, the R&LS states: 1) "does not lend itself to a foodstore capable of retaining a significant proportion of main food shopping expenditure. 2) "There is no immediate capacity for additional floor space." 3) "we recommend that focus be maintained on developing Hockley's existing strengths." 4) " the Council may wish to consider reclassifying Hockley from a town centre to a district centre".

Summary:

The Transport Evidence Base has not been re-evaluated following the decision to impose extra housing on the Eldon Way & Foundry Industrial Estates. ECC Highways have confirmed that the B1013 is running at 72% of its maximum theoretical capacity) and the effect of extra housing in Hockley (as well as Hawkwell) has not been re-evaluated and it is unclear what improvements will be required and whether they can be physically achieved.

Thus the proposals are not founded on a robust and credible evidence base and are unsound

Highway & Traffic Implications

Proposals for moving employment to out of town locations, at either end of the district, with no existing public transport links, are contrary to government policy PPG4. It also contravenes the Core Strategy's stated aims of reducing carbon emissions; reliance on car transport and providing "an integrated network of cycle paths".

The District of Rochford is predominately spread on a West/East axis along the railway line. Hockley is located in the middle of the district and the two estates are adjacent to the railway station. Bus services are poor with just 3* an hour (following a recent 50% reduction in services) and the operator has admitted they cannot compete with the railway making improvements to new sites away from major centres unlikely. (* one of the 3 services is paid for by ECC on a 6 mth trial and may be terminated in the new year).

However, the Core Strategy proposes to relocate these two estates to a greenfield site near the airport. This site is 2-3 miles from the nearest railway station and there are currently no bus services to the area. As a result, RDC are proposing to upgrade the nearest road to a dual-carriageway, although the main connecting road (the B1013), which runs through Hockley, will remain single-carriageway and is already at 72% of capacity (ECC Highways stats). This is despite extra traffic expected in the area as a result of the Joint Area Action Plan (JAAP) which proposes considerable growth at neighboring Southend Airport, as well as the new industrial estate.

The site selected for the new industrial estate also contravenes PPS4 which states;
â€¢ (EC7.3C) "out-of-centre sites, with preference given to sites which are or will be well served by a choice of means of transport and which are close to the centre and have a high likelihood of forming links with the centre. There is no existing public transport and no obvious likelihood of forming links with any existing centres.
â€¢ EC7.5 1 "whether the site is or will be accessible and well served by a choice of means of transport, especially public transport, walking and cycling, as well as by car". Its remote location. Accessed by the narrow, busy B1013 is not suitable for access by cycle or on foot.

It also contravenes PPS1 (27 vii) "Reduce the need to travel and encourage accessible public transport provision to secure more sustainable patterns of transport development. Planning should actively manage patterns of urban growth to make the fullest use of public transport and focus development in existing centres and near to major public transport interchanges".

The Core Strategy also contravenes its own policy T1 and is unsound.

Summary:

Proposals for moving employment to out of town locations, at either end of the district, with no existing public transport links, are contrary to government policy PPG4 & PPS1. It also contravenes the Core Strategy's stated aims of reducing carbon emissions; reliance on car transport and providing "an integrated network of cycle paths".

The Core Strategy also contravenes its own policy T1 and is unsound.

The Transport Evidence Base has not been re-evaluated following the decision to impose extra housing on the Eldon Way & Foundry Industrial Estates. ECC Highways have confirmed that the B1013 is running at 72% of its maximum theoretical capacity) and the effect of extra housing in Hockley (as well as Hawkwell) has not been re-evaluated and it is unclear what improvements will be required and whether they can be physically achieved.

Thus the proposals are not founded on a robust and credible evidence base and are unsound

RDC are proposing to scatter housing across the district in around 12 or sites but no detailed consideration has been given to the implications for highways across the District. The "Core Strategy" is not a strategy but simply a collection of disparate sites. Many roads across the District are at or near capacity but no modelling has been undertaken to determine the impacts or the funding required to upgrade them. At the Central Area Committee on 25 June 2009, RDC stated (in response to a question):

"Rochford Council is not the highway authority, but is working closely with Essex County Council to identify highway infrastructure requirements. Highway infrastructure improvements will be set out in the Core Strategy and other subsequent Development Plan Documents as required. These will be fed into the next version of the Essex Local Transport Plan, which is effectively a bidding document for funds to implement highway infrastructure improvements, schemes to tackle congestion, etc.

The District Council is working closely with the Essex County Council to ensure that highway infrastructure identified in the Core Strategy can be delivered."

It is clear that (i) the combined impact of scattering houses across the District and (ii) relocating Eldon Way/Foundry Industrial Estates to the very edge of the District with no public transport services will exacerbate existing problems. It is also clear that the extent of improvements required is both unknown and not funded and the proposal is unsound.

CHAPTER 10 Policy T1 - Highways

Summary:

RDC are proposing to scatter housing across the district in around 12 or sites but no detailed consideration has been given to the implications for highways across the District. Many roads across the District are at or near capacity but no modeling has been undertaken to determine the impacts

It is clear that (i) the combined impact of scattering houses across the District and (ii) relocating Eldon Way/Foundry Industrial Estates with no public transport services will exacerbate existing problems. It is clear that the extent of improvements required is both unknown and not funded and the proposal is unsound.

PPS12 4.9 states "The infrastructure planning process should identify, as far as possible: infrastructure needs and costs". Neither needs nor, especially, costs have been identified and the Core Strategy is therefore unsound.

The district's highways suffer from years of under investment and over use. The Core Strategy proposes to fund infrastructure improvements through use of Standard Charges. However, no detail is provided and no attempt made to identify the likely scale of such charges. It is therefore unclear if use of Standard Charges is financially viable.

Policy T2 provides a list of required highway improvements. The list contains most of the more major roads in the District including Rectory Lane, which has a single track, traffic light controlled railway bridge. 1200 dwellings are proposed for the northern end of Rectory Road and a further 175 at the southern end. The cost of addressing the railway bridge bottleneck will be significant but is not mentioned.

No attempt is made to either cost these charges or explain how improvements not linked to any one specific development will be paid for (eg B1013; Ashingdon Road; a network of walking, cycling, bridleways).

The concept of paying for improvements through use of Standard Charges is totally unproven and unsound.

Summary:

PPS12 4.9 states "The infrastructure planning process should identify, as far as possible: infrastructure needs and costs". Neither needs nor, especially, costs have been identified and the Core Strategy is therefore unsound.

The Core Strategy proposes to fund infrastructure improvements through use of Standard Charges. However, no detail is provided and no attempt made to identify the likely scale of such charges. It is therefore unclear if use of Standard Charges is financially viable.

SERT is put forward as a solution to reducing car use but it will only skirt the edge of the district and the Core Strategy acknowledges there is only "potential" to do so in the future. SERT is not realistic or reliable a solution and the proposal is therefore unsound.

Previous consultations ignored by RDC:

• The Hockley Parish Plan (dated 2007), clearly states that residents are strongly against any large scale housing development in Hockley, but if there has to be additional housing, then there should be no loss of greenbelt or open spaces, and no large housing estate developments. It was also stated that any developments must be matched by the appropriate levels of infrastructure.

• The proposals also ignore the 95% rejection rate of respondents to RDC's own Hockley Area Plan (HAAP) Consultation (2009), which included specific proposals for Eldon Way (although HAAP did not even mention the adjoining Foundry Industrial Estate). Why have a consultation and ignore it?

Thus the proposals are not founded on a robust and credible evidence base and are unsound.

Highway & Traffic Implications

Proposals for moving employment to out of town locations, at either end of the district, with no existing public transport links, are contrary to government policy PPG4. It also contravenes the Core Strategy's stated aims of reducing carbon emissions; reliance on car transport and providing "an integrated network of cycle paths".

The District of Rochford is predominately spread on a West/East axis along the railway line. Hockley is located in the middle of the district and the two estates are adjacent to the railway station. Bus services are poor with just 3* an hour (following a recent 50% reduction in services) and the operator has admitted they cannot compete with the railway making improvements to new sites away from major centres unlikely. (* one of the 3 services is paid for by ECC on a 6 mth trial and may be terminated in the new year).

However, the Core Strategy proposes to relocate these two estates to a greenfield site near the airport. This site is 2-3 miles from the nearest railway station and there are currently no bus services to the area. As a result, RDC are proposing to upgrade the nearest road to a dual-carriageway, although the main connecting road (the B1013), which runs through Hockley, will remain single-carriageway and is already at 72% of capacity (ECC Highways stats). This is despite extra traffic expected in the area as a result of the Joint Area Action Plan (JAAP) which proposes considerable growth at neighboring Southend Airport, as well as the new industrial estate.

The site selected for the new industrial estate also contravenes PPS4 which states;
â€¢ (EC7.3C) "out-of-centre sites, with preference given to sites which are or will be well served by a choice of means of transport and which are close to the centre and have a high likelihood of forming links with the centre. There is no existing public transport and no obvious likelihood of forming links with any existing centres.
â€¢ EC7.5 1 "whether the site is or will be accessible and well served by a choice of means of transport, especially public transport, walking and cycling, as well as by car". Its remote location. Accessed by the narrow, busy B1013 is not suitable for access by cycle or on foot.

It also contravenes PPS1 (27 vii) "Reduce the need to travel and encourage accessible public transport provision to secure more sustainable patterns of transport development. Planning should actively manage patterns of urban growth to make the fullest use of public transport and focus development in existing centres and near to major public transport interchanges".

The Core Strategy also contravenes its own policy T1 and is unsound.

Summary:

Proposals for moving employment to out of town locations, at either end of the district, with no existing public transport links, are contrary to government policy PPG4 & PPS1. It also contravenes the Core Strategy's stated aims of reducing carbon emissions; reliance on car transport and providing "an integrated network of cycle paths".

The Core Strategy also contravenes its own policy T1 and is unsound.

The Transport Evidence Base has not been re-evaluated following the decision to impose extra housing on the Eldon Way & Foundry Industrial Estates. ECC Highways have confirmed that the B1013 is running at 72% of its maximum theoretical capacity) and the effect of extra housing in Hockley (as well as Hawkwell) has not been re-evaluated and it is unclear what improvements will be required and whether they can be physically achieved.

Thus the proposals are not founded on a robust and credible evidence base and are unsound

RDC are proposing to scatter housing across the district in around 12 or sites but no detailed consideration has been given to the implications for highways across the District. The "Core Strategy" is not a strategy but simply a collection of disparate sites. Many roads across the District are at or near capacity but no modelling has been undertaken to determine the impacts or the funding required to upgrade them. At the Central Area Committee on 25 June 2009, RDC stated (in response to a question):

"Rochford Council is not the highway authority, but is working closely with Essex County Council to identify highway infrastructure requirements. Highway infrastructure improvements will be set out in the Core Strategy and other subsequent Development Plan Documents as required. These will be fed into the next version of the Essex Local Transport Plan, which is effectively a bidding document for funds to implement highway infrastructure improvements, schemes to tackle congestion, etc.

The District Council is working closely with the Essex County Council to ensure that highway infrastructure identified in the Core Strategy can be delivered."

It is clear that (i) the combined impact of scattering houses across the District and (ii) relocating Eldon Way/Foundry Industrial Estates to the very edge of the District with no public transport services will exacerbate existing problems. It is also clear that the extent of improvements required is both unknown and not funded and the proposal is unsound.

CHAPTER 10 Policy T1 - Highways

Summary:

RDC are proposing to scatter housing across the district in around 12 or sites but no detailed consideration has been given to the implications for highways across the District. Many roads across the District are at or near capacity but no modeling has been undertaken to determine the impacts

It is clear that (i) the combined impact of scattering houses across the District and (ii) relocating Eldon Way/Foundry Industrial Estates with no public transport services will exacerbate existing problems. It is clear that the extent of improvements required is both unknown and not funded and the proposal is unsound.

PPS12 4.9 states "The infrastructure planning process should identify, as far as possible: infrastructure needs and costs". Neither needs nor, especially, costs have been identified and the Core Strategy is therefore unsound.

The district's highways suffer from years of under investment and over use. The Core Strategy proposes to fund infrastructure improvements through use of Standard Charges. However, no detail is provided and no attempt made to identify the likely scale of such charges. It is therefore unclear if use of Standard Charges is financially viable.

Policy T2 provides a list of required highway improvements. The list contains most of the more major roads in the District including Rectory Lane, which has a single track, traffic light controlled railway bridge. 1200 dwellings are proposed for the northern end of Rectory Road and a further 175 at the southern end. The cost of addressing the railway bridge bottleneck will be significant but is not mentioned.

No attempt is made to either cost these charges or explain how improvements not linked to any one specific development will be paid for (eg B1013; Ashingdon Road; a network of walking, cycling, bridleways).

The concept of paying for improvements through use of Standard Charges is totally unproven and unsound.

Summary:

PPS12 4.9 states "The infrastructure planning process should identify, as far as possible: infrastructure needs and costs". Neither needs nor, especially, costs have been identified and the Core Strategy is therefore unsound.

The Core Strategy proposes to fund infrastructure improvements through use of Standard Charges. However, no detail is provided and no attempt made to identify the likely scale of such charges. It is therefore unclear if use of Standard Charges is financially viable.

SERT is put forward as a solution to reducing car use but it will only skirt the edge of the district and the Core Strategy acknowledges there is only "potential" to do so in the future. SERT is not realistic or reliable a solution and the proposal is therefore unsound.

Previous consultations ignored by RDC:

• The Hockley Parish Plan (dated 2007), clearly states that residents are strongly against any large scale housing development in Hockley, but if there has to be additional housing, then there should be no loss of greenbelt or open spaces, and no large housing estate developments. It was also stated that any developments must be matched by the appropriate levels of infrastructure.

• The proposals also ignore the 95% rejection rate of respondents to RDC's own Hockley Area Plan (HAAP) Consultation (2009), which included specific proposals for Eldon Way (although HAAP did not even mention the adjoining Foundry Industrial Estate). Why have a consultation and ignore it?

Thus the proposals are not founded on a robust and credible evidence base and are unsound.

Summary:

Previous consultations ignored by RDC:

The proposals ignore the 95% rejection rate of respondents to RDC's own Hockley Area Plan (HAAP) Consultation (2009), which included specific proposals for Eldon Way (although HAAP did not even mention the adjoining Foundry Industrial Estate). Why have a consultation and ignore it?

Thus the proposals are not founded on a robust and credible evidence base and are unsound

RDC have not consulted on the very specific proposals to relocate the Eldon Way and Foundry Industrial Estates

• The previous CS Strategy stated "we will look at opportunities for more valuable and appropriate uses of the industrial land" with absolutely no consultation at all on concept of moving existing EW businesses entirely

• the Foundry Industrial Estate has never even been previously mentioned in any plan version; A recent amendment to the Core Strategy states this omission was due to a typing error!

• The Urban Capacity study stated a "low probability" of housing and did not even mention the Foundry Estate

Thus the proposals are they are not founded on a robust and credible evidence base and are unsound.

CHAPTER 10 Policy T1 - Highways

â€¢ the Foundry Industrial Estate has never even been previously mentioned;
â€¢ The Urban Capacity study stated a "low probability" of housing and did not even mention the Foundry Estate

Thus the proposals are they are not founded on a robust and credible evidence base and are unsound.

Eldon Way and Foundry Industrial Estates form a significant part of the ongoing Hockley Area Action Plan (HAAP) consultation but the Core Strategy proposals pre-empt the next stage of the HAAP consultation.

Neither the Core Strategy nor HAAP define its status relevant to the other plan and subsequent priorities. Why is there no cross-referencing between concurrent plans affecting the exact same piece of land?

There are also inconsistencies between the Core Strategy & HAAP regarding the description of proposed uses for the two industrial estates. The Core Strategy refers to Leisure, Commercial and Residential whilst HAAP mentions a "village green, introducing a significant area of public open space". There is not sufficient space for both and the Core Strategy is again pre-empting the ongoing HAAP.

If a decision is taken now, as part of the Core Strategy, to relocate all the existing businesses on the two estates, it will set a legal precedent which HAAP will need to follow and renders the next stage of HAAP virtually redundant. Particularly given the 95% rejection rate of respondents to the previous round of HAAP such an approach is entirely undemocratic and unsound.

Summary:

The Core Strategy proposals pre-empt the next stage of the HAAP consultation and neither defines its status relevant to the other plan and subsequent priorities.

There are also inconsistencies between the Core Strategy & HAAP.

If a decision is taken as part of the Core Strategy, to relocate all the existing businesses on the two estates, it will set a legal precedent which HAAP will need to follow and renders the next stage of HAAP virtually redundant. Particularly given the 95% rejection rate of respondents to the previous round of HAAP such an approach is entirely undemocratic and unsound.

PPS12, 4.6, states that Cores Strategies should be flexible and "should be able to show how they will handle contingencies". Several large planning applications have already been submitted to RDC proposing developments outside the Core Strategy which does not indicate how such applications will be handled and does not comply with PPS12. Neither have RDC been able to advise residents how such changes will be made and the strategy is unsound.

THE Core Strategy misrepresents the findings of The Retail & Leisure Study (R&LS) 2008.

The Core Strategy states (12.38) "The Retail & Leisure Study indicates Hockley has great potential. Hockley has been identified as having a need for additional convenience floorspace".

Whereas, the R&LS actually states:

- 1) (10.26) "the scale of need does not lend itself to a foodstore capable of retaining a significant proportion of main food shopping expenditure.
 - 2) (10.28) "There is no immediate capacity for additional floor space."
 - 3) (10.29) "we recommend that focus be maintained on developing Hockley's existing strengths, rather than retail expansion"
 - 4) 10.31 "The current nature of Hockley does not lend itself to classification as a 'town centre' as defined by PPS6. Moreover, we have identified that it is a very small catchment population. Accordingly, the Council may wish to consider reclassifying Hockley from a town centre to a district centre".
- The Core Strategy is inaccurate, misleading and unsound.

Summary:

The Core Strategy misrepresents the findings of The Retail & Leisure Study (R&LS) 2008. The Core Strategy states "The Retail & Leisure Study states Hockley has great potential and has a need for additional convenience floorspace". Whereas, the R&LS states: 1) "does not lend itself to a foodstore capable of retaining a significant proportion of main food shopping expenditure. 2) "There is no immediate capacity for additional floor space." 3) "we recommend that focus be maintained on developing Hockley's existing strengths." 4) " the Council may wish to consider reclassifying Hockley from a town centre to a district centre".

Summary:

Summary:

Proposals for moving employment to out of town locations, at either end of the district, with no existing public transport links, are contrary to government policy PPG4 & PPS1. It also contravenes the Core Strategy's stated aims of reducing carbon emissions; reliance on car transport and providing "an integrated network of cycle paths".

The Core Strategy also contravenes its own policy T1 and is unsound.

Highway & Traffic Implications

Proposals for moving employment to out of town locations, at either end of the district, with no existing public transport links, are contrary to government policy PPG4. It also contravenes the Core Strategy's stated aims of reducing carbon emissions; reliance on car transport and providing "an integrated network of cycle paths".

The District of Rochford is predominately spread on a West/East axis along the railway line. Hockley is located in the middle of the district and the two estates are adjacent to the railway station. Bus services are poor with just 3* an hour (following a recent 50% reduction in services) and the operator has admitted they cannot compete with the railway making improvements to new sites away from major centres unlikely. (* one of the 3 services is paid for by ECC on a 6 mth trial and may be terminated in the new year).

However, the Core Strategy proposes to relocate these two estates to a greenfield site near the airport. This site is 2-3 miles from the nearest railway station and there are currently no bus services to the area. As a result, RDC are proposing to upgrade the nearest road to a dual-carriageway, although the main connecting road (the B1013), which runs through Hockley, will remain single-carriageway and is already at 72% of capacity (ECC Highways stats). This is despite extra traffic expected in the area as a result of the Joint Area Action Plan (JAAP) which proposes considerable growth at neighboring Southend Airport, as well as the new industrial estate.

The site selected for the new industrial estate also contravenes PPS4 which states;
â€¢ (EC7.3C) "out-of-centre sites, with preference given to sites which are or will be well served by a choice of means of transport and which are close to the centre and have a high likelihood of forming links with the centre. There is no existing public transport and no obvious likelihood of forming links with any existing centres.

â€¢ EC7.5 1 "whether the site is or will be accessible and well served by a choice of means of transport, especially public transport, walking and cycling, as well as by car". Its remote location. Accessed by the narrow, busy B1013 is not suitable for access by cycle or on foot.

It also contravenes PPS1 (27 vii) "Reduce the need to travel and encourage accessible public transport provision to secure more sustainable patterns of transport development. Planning should actively manage patterns of urban growth to make the fullest use of public transport and focus development in existing centres and near to major public transport interchanges".

The Core Strategy also contravenes its own policy T1 and is unsound.

Summary:

Proposals for moving employment to out of town locations, at either end of the district, with no existing public transport links, are contrary to government policy PPG4 & PPS1. It also contravenes the Core Strategy's stated aims of reducing carbon emissions; reliance on car transport and providing "an integrated network of cycle paths".

The Core Strategy also contravenes its own policy T1 and is unsound.

The Transport Evidence Base has not been re-evaluated following the decision to impose extra housing on the Eldon Way & Foundry Industrial Estates. ECC Highways have confirmed that the B1013 is running at 72% of its maximum theoretical capacity) and the effect of extra housing in Hockley (as well as Hawkwell) has not been re-evaluated and it is unclear what improvements will be required and whether they can be physically achieved.

Thus the proposals are not founded on a robust and credible evidence base and are unsound

RDC are proposing to scatter housing across the district in around 12 or sites but no detailed consideration has been given to the implications for highways across the District. The "Core Strategy" is not a strategy but simply a collection of disparate sites. Many roads across the District are at or near capacity but no modelling has been undertaken to determine the impacts or the funding required to upgrade them. At the Central Area Committee on 25 June 2009, RDC stated (in response to a question):

"Rochford Council is not the highway authority, but is working closely with Essex County Council to identify highway infrastructure requirements. Highway infrastructure improvements will be set out in the Core Strategy and other subsequent Development Plan Documents as required. These will be fed into the next version of the Essex Local Transport Plan, which is effectively a bidding document for funds to implement highway infrastructure improvements, schemes to tackle congestion, etc.

The District Council is working closely with the Essex County Council to ensure that highway infrastructure identified in the Core Strategy can be delivered."

It is clear that (i) the combined impact of scattering houses across the District and (ii) relocating Eldon Way/Foundry Industrial Estates to the very edge of the District with no public transport services will exacerbate existing problems. It is also clear that the extent of improvements required is both unknown and not funded and the proposal is unsound.

Neither have RDC been able to advise residents how such changes will be made and the strategy is unsound.

THE Core Strategy misrepresents the findings of The Retail & Leisure Study (R&LS) 2008.

The Core Strategy states (12.38) "The Retail & Leisure Study indicates Hockley has great potential. Hockley has been identified as having a need for additional convenience floorspace".

Whereas, the R&LS actually states:

- 1) (10.26) "the scale of need does not lend itself to a foodstore capable of retaining a significant proportion of main food shopping expenditure.
 - 2) (10.28) "There is no immediate capacity for additional floor space."
 - 3) (10.29) "we recommend that focus be maintained on developing Hockley's existing strengths, rather than retail expansion"
 - 4) 10.31 "The current nature of Hockley does not lend itself to classification as a 'town centre' as defined by PPS6. Moreover, we have identified that it is a very small catchment population. Accordingly, the Council may wish to consider reclassifying Hockley from a town centre to a district centre".
- The Core Strategy is inaccurate, misleading and unsound.

Summary:

The Core Strategy misrepresents the findings of The Retail & Leisure Study (R&LS) 2008. The Core Strategy states "The Retail & Leisure Study states Hockley has great potential and has a need for additional convenience floorspace". Whereas, the R&LS states: 1) "does not lend itself to a foodstore capable of retaining a significant proportion of main food shopping expenditure. 2) "There is no immediate capacity for additional floor space." 3) "we recommend that focus be maintained on developing Hockley's existing strengths." 4) " the Council may wish to consider reclassifying Hockley from a town centre to a district centre".

Summary:

Summary:

RDC are proposing to scatter housing across the district in around 12 or sites but no detailed consideration has been given to the implications for highways across the District. Many roads across the District are at or near capacity but no modeling has been undertaken to determine the impacts

It is clear that (i) the combined impact of scattering houses across the District and (ii) relocating Eldon Way/Foundry Industrial Estates with no public transport services will exacerbate existing problems. It is clear that the extent of improvements required is both unknown and not funded and the proposal is unsound.

CHAPTER 10 Policy T1 - Highways

Respondent: Ms G Yeadell [7834]

6 Southend Road
Hockley
Essex
SS5 4QQ
01702 205450

Agent: N/A

Full Text: Para 4.8 States sustainability underlines any decisions on housing location, primarily: current and future deliverability of infrastructure, eg roads, services, public transport, health.

Policy H1

Para.4.14 Some employment sites are considered more suitable for other uses (eg housing) including Eldon Way/Foundry, Hockley. This is all open to question.

Hockley-re Eldon Way/Foundry

In CS Preferred Options 2008 policy H2 you discarded N.E.Hockley as a housing option - whilst close to centre, station, "impact on highway network from traffic heading through Hockley..along Ashingdon Road..renders location unviable". Clearly the same principle applied to Eldon Way/Foundry for the same reasons.

Response to C.S Preferred Options 2008 and HAAP 2009

June 2009 issue C S Submission issue says Eldon Way will be used for housing, whereas Sept.2009 issue says "alternative uses, including residential.." to be decided by HAAP (Issues consultation done, Pref.Options issue awaited, but judging from JAAP Pref.Options decision - namely biggest option chosen against overriding opposition, it will be housing).

Need to be logical and even-handed in proposals

Health services GP surgeries are full and a PCT health centre will not occur in the foreseeable economic climate.

Ch.10: Highways and Transport

Policy T1, T2 RDC proposes working with ECC Highways, developers, but admits it has no authority, responsibility here. RDC will seek developer contributions, but this is neither detailed nor costed in CS Submission nor HAAP, and contravenes PPS 12.3 para.4.93 which states "The infrastructure planning process should identify as far as possible infrastructure needs and costs". Idea of paying for road & transport improvements through Standard Charges is unproven and unsound.

Establish likely level of Standard Charges. Accept you cannot turn district into motorways with wholesale demolition.

In neither CS Submission nor HAAP is there any highways improvement, except idea to replace Spa roundabout with traffic lights and 1 way system up Southend Road and Hockley Rise.

Para.10.5 "..highway improvements serving new developments..in a timely manner..ensuring developments delivered alongside necessary infrastructure".

These improvements cannot possibly be delivered. It should be realised: B1013 (Southend Rd), Rectory Road Hawkwell, Ashingdon, West Rochford - all in area proposed for large new developments are former winding, narrow country roads, tarmacked over for motorised traffic. Large housing increments are unsustainable off these roads, which cannot be altered without much destruction.

Reply to CS Pref. Options 2008 & HAAP Issues/Options 2009

Policy T3, CLT1 Appendix CLT1 Public transport RDC admits this is in the private sector. In Hockley, operator has cut No7 service to 1 per hour from Ashingdon Schools, claiming it is unviable beyond. This is unlikely to change as Hockley is car dependant. No8 bus through Hawkwell is cut to 1 per hour to Rayleigh, for same reason as No7. Proposed planning agreements with developers can't run: eg, a community centre or classroom given by a developer remains once he has moved on - how can that apply for an on-going bus service?

Reply to Infrastructure Transport in CS Pref. Opts. 2008 and to HAAP Issues Opts. 2009.

Ch.11 Economic development

Policy ED3 Core Strategy preferred Options 2008 hinted at possible housing in Eldon Way site. June 2009 Submission version, without consultation, said Eldon Way would be housing (map included Foundry, not the text). September 2009 Submission said redevelopment would be in HAAP (which apart from the Issues/Options version, is unfinished. Judging from results of JAAP Preferred Options where biggest option is chosen, though most respondents were against it, site will be housing, without consultation.

Core Strategy Submission Document

O - 16712 - 7834 - Policy T1 - Highways - i

16712 Object

CHAPTER 10 Policy T1 - Highways

Para.1.25, Para.11.32 Note CH.1 Introduction to CS Submission 2009 para.1.25 East England Plan requires 3000 additional jobs, presumably to 2021. Revised Southend Airport is expected to drive Economic development. But at para. 11.32 Eldon Way-Foundry estate is planned to be more suitably utilized. "...alternative land will be required to accommodate employment uses so displaced" - ie jobs sent to eg new site near Southend Airport - not new jobs.

Reply to HAAP Issues Options 2009

Remove compulsory relocation

Policy ED4 Policy states Council will allocate 18ha of land to make up for de-allocations in ED3 - that proves point above.

Proposals for moving employment to out of town locations with no existing transport links are contrary to government policies PPG4, PPS1 and PPS4 and Core Strategy Policy T1.

Evidence Base is ignored by contravening Hockley Parish Plan 2007 and ignoring residents' views on HAAP Issues/Options. Next stage of HAAP Preferred Options is pre-empted and rendered irrelevant. Core Strategy plans to relocate Eldon Way Foundry estate to Greenfield site with no nearby bus or railway. RDC plans to upgrade the nearest road to dual carriageway, though the connecting B1013 (through Hockley) will stay single, said by ECC Highways statistics to be 72% capacity. Airport bosses and council cannot suggest there will be no traffic growth from JAAP and new industrial site.

Reply to Hockley Parish Plan 2007. HAAP Issues 2009

Move to new industrial site near airport contravenes PPS4:

- EC7.3C "out of centre sites, with preference given to sites...well served by choice of...transport and...close to centre and...high likelihood of forming links with centre". There is no current public transport and links with centres is unlikely".

- EC 7.5.1 "whether the site is or will be accessible and well served by choice of transport, public transport, walking and cycling, as well as by car...". Remote location, narrow busy B1013 makes the site unsuitable for access by cycle or on foot.

It also contravenes PPS1 (27vii)... "reduce need to travel, encourage accessible public transport provision to secure more sustainable patterns of transport...Planning should actively manage patterns of urban growth to make fullest use of public transport and focus development in existing centres, near to major public transport interchanges". Core Strategy undermines its own policy Transport and Highways policy T1 and is unsound.

Although shown on accompanying drawing in earlier versions, there was no prior textual mention of Foundry industrial estate (next to Eldon Way) for redevelopment until current CS 2009 Submission. This was stated to be a typing error, but does not inspire confidence in reliability of drafting.

Revise both 2009 Core Strategy and 2009 HAAP Issues/options

Chapter 12: Retail/Town centres

The Core Strategy misrepresents findings of the Retail and Leisure Study 2008.

Para.12.38 The Core Strategy states (para.12.38) "The Retail & Leisure Study indicates Hockley has great potential. Hockley has been identified as having a need for additional convenience floorspace."

Whereas the R&LS actually states:

1) (10.26) "the scale of need does not lend itself to a foodstore capable of retaining a significant proportion of main food shopping expenditure".

2) (10.28) "There is no immediate capacity for additional floorspace".

3) (10.29) "we recommend focus be maintained on developing Hockley's existing strengths, rather than retail expansion"

4) 10.31 "the current nature of Hockley does not lend itself to classification as a 'town centre' as defined by PPS6. Moreover, we have identified that it has a very small catchment population. Accordingly, the council may wish to consider reclassifying Hockley from a town centre to a district centre".

Defer whole of proposals for Hockley town centre to Hockley Area Action Plan.

The Council will work with landowners and its partners to deliver the HAAP.

Remove threat of compulsory purchase orders.

Core Strategy Submission Document

O - 16712 - 7834 - Policy T1 - Highways - i

16712 Object

CHAPTER 10 Policy T1 - Highways

One doesn't perceive impartiality when the Planning Director replies to local HAAP survey with "The affluent people of Hockley are entitled to famous name shops".

Chapter 5: Character of Place and Local Lists

Para.5.4 "Rochford district has unique character..stems from traditional buildings..still dominate towns and villages".

Para.5.17 "Council believes many buildings..are of local distinctiveness..part of..cherished local scene".

This only applies to favoured places: Rochford, Rayleigh, greenbelt villages. Many Hockley conservable items have been systemically removed for supposedly lucrative development in face of widespread protect. This is for supposed need for housing. In fact heritage items have been replaced by dwellings most cannot afford, and/or are hard to sell due to unsuitability of massing and siting. Many other homes are jeopardised by this practice.

HAAP issues 2009. Core Strategy 2006, 2007,2008, SCI.2006

Fewer 'vested interests', more even handedness. No more pressing people out of businesses, homes for expediency.

A CPRE Fieldwork issue extolled Local Lists, citing refusal of 16 flats to replace character house, not on local list. Inspector said house, facade made a contribution to area character, even if English heritage decided it didn't warrant listing. Council worked to get the house grade listed and even made adjacent area conservation one.

Hockley had one such on a "significant site" faced with 13 flats. Ward Member omitted house from refusal proposal, so house could be demolished. RDC dropped Local List ahead of appeal: "Government frowned on such Lists" (Other LAs, unaware of supposed directive retained theirs. After demolition RDC restored Local Lists, saying Government now support them. When Inspector queried the complaint, the then policy officer said "just politics, lot of local interest, nothing of character in the area[!]. (A dozen such items had been removed). Some "distinctive" Hockley buildings are still condemned (in Greensward Lane.; others threatened (Spa Road). Whereas a modest hue and cry in Rayleigh will usually result in a building being saved.

Conclusion

Core Strategy Submission DPD is basically unsound in many respects

Incomplete information. Amongst others, it refers to Hockley AAP, the first stage of which is complete, but not other three. Rochford AAP first stage has been published in arrears of Core Strategy Submission. Rayleigh AAP is still awaited. Precise housing sites are absent, as Urban Capacity Study 2007 has been superseded by Strategic Housing Land Availability Assessment, not yet published. Traders, residents, are thus responding to Core Strategy Submission with incomplete information.

Lack of community involvement. Chapter 1, Introduction, para. 1.11 "Community involvement is an essential part of the plan making process".

In Statement of Community Involvement 2006 Rochford RDC "recognises need to enable people to have their voices heard".

Re Public Meetings: "Consideration will be had to timing and venue to ensure meeting is as accessible as possible".

Take Hockley Area Action Plan as an example of the opposite of all this:- Presentation of document was at Hullbridge, 7.30pm. It was also discussed with JAAP at Rochford Freight House (for traders only) at 7am, without publicity. Excuse made: HAAP on RDC website, which none will seek unless knowing it is there. Rochford District Matters newsheet had minute articles on p.3, half way through consultation period. Another excuse: a 2nd presentation by Hockley Residents Association with planning officer present: only because of complaints, and it is not the HRA's responsibility to RDC's job. Due to unavoidable haste of calling meeting, few knew and only 50 were present.

In Core Strategy Submission Hockley Parish Plan has been ignored. Proposals also ignore 95% rejection rate response to HAAP 2009, which included proposals for Eldon Way employment site.

Unfettered right of developers to carry on as if Core Strategy didn't exist. In PPS 12, Ch.4.6 states: "Core Strategies should be flexible and able to show how they handle contingencies". Several large planning applications have been submitted proposing developments outside the Core Strategy which does not indicate how such applications will be handled and does not comply with PPS 12.

Where are we? Finally, at Chapter 1, Introduction, para. 1.24: "the Core Strategy will have to be reviewed in the event of a new Local Area Agreement, post-2011, setting different priorities". So what purpose does all this work serve? So we have hardly finished this exercise, before it all starts again?

Summary:

Ch.10: Highways and Transport

Policy T1, T2 RDC proposes working with ECC Highways, developers, but admits it has no authority, responsibility here. RDC will seek developer contributions, but this is neither detailed nor costed in CS Submission nor HAAP, and

Full Text:

Thank you for inviting the Highways Agency (HA) to comment on the Rochford Core Strategy (CS) Submission Document and Rochford Area Action plan (AAP) prepared by Rochford District Council

As you are aware the HA is an executive agency of the Department for Transport (DfT). We are responsible for operating, maintaining and improving England's motorway and all-purpose trunk road network, collectively known as the Strategic Road Network (SRN), on behalf of the Secretary of State for Transport.

In spatial planning and development control terms, we have a duty to safeguard the operation of the motorway and trunk road network as set out in the Department for Transport Circular: 02/2007: Planning and the Strategic Road Network. <http://www.dft.gov.uk/pgr/regional/strategy/policy/circular207planningandstrategic>. The circular encourages the HA to work co-operatively with Local Planning Authorities within the framework of the Government's policies for planning, growth areas, regeneration, integrated transport and sustainability. We look to your Council's Local Development Framework to promote strategies, policies and land allocations which would support alternatives to the private car.

In the case of Rochford there are no trunk roads within the District although there are two strategic corridors namely the A13 and A127/A1159 which connect into the M25 motorway network at Junctions 30 and 29 respectively. Sections of these areas are currently heavily congested, particularly during peak periods, and operate under considerable levels of network stress. Therefore it is important to the HA that the impact of major development proposals in the Rochford area is considered within the context of future impact on the M25 and the A13 Trunk Road.

Please see below some general comments regarding the soundness of the CS and SSA from a transport perspective, referring to specific proposed submission policies as necessary. This response has been completed with reference to paragraph 4.52 of PPS12 (2008) PPS12, paragraph 4.52 - To be 'sound' a core strategy should be JUSTIFIED, EFFECTIVE and consistent with NATIONAL POLICY.

CORE STRATEGY

Policy GB1 - Green Belt Protection

The HA acknowledges that only the minimum amount of Green Belt land will be allocated to meet the District's housing and employment needs as necessary. However, the HA is concerned that any proposed redevelopment of greenbelt sites could result in development in areas with limited access to sustainable transport modes therefore resulting in higher levels of car usage and subsequent impact on the SRN. Although the HA recognizes that new public transport hubs that would facilitate the use of non-car modes could be developed over time, this process is likely to require very substantial investment.

It is therefore important that an appropriate assessment of infrastructure requirements is performed for development sites on Green Belt land. Funding towards the necessary public transport infrastructure improvements must be sought and secured prior to occupation of any new development on greenbelt land. Furthermore, the occupation of such developments should be phased in line with necessary transport infrastructure. This will help the CS meet the PPS12 requirement that a sound DPD should be 'justified' and 'effective' and hence deliverable.

Policy T1 - Highways

Policy T1 highlights the need to reduce reliance on the private car but also observes that 'some impact on the highway network is inevitable'. In a District with such high levels of private car ownership and a limited public transport network, as stated in paragraph 10.2, it will be important to assess the potential impacts to the highway network and ensure that mitigation measures are proposed and implemented where necessary.

An emphasis should be placed on the provision and improvement of sustainable transport infrastructure, particularly where high trip-generating developments such as offices are proposed. In line with the DfT's Guidance on Transport Assessment (2007) - DfT GTA, paragraph 4.51 - 'The key issue is the need to ensure that development proposals strive to achieve nil detriment ('no worse off') to the strategic network, for the opening year and appropriate horizon year'. This emphasis will assist in mitigating potential increases in private vehicle trips and hence help ensure that there is a nil-detriment effect on the SRN.

Policy T3 - Public Transport

Core Strategy Submission Document

O - 16727 - 14244 - Policy T1 - Highways - i, ii

16727 Object

CHAPTER 10 Policy T1 - Highways

The recent Planning Inspectorate 'LDF - Learning from Experience' document (September 2009) suggests that a Core Strategy should identify a clear source of funding for infrastructure for at least the first 5 years of the plan - The Planning Inspectorate, LDF: Examining DPDs: Learning from experience, September 2009, Paragraph 22 - 'For at least the first 5 years of the plan it should be clear what infrastructure is required, who is going to fund and provide it and how it is to relate to the rate of development'.. Paragraph 10.15 of the CS highlights the importance of public transport links for new developments and implies that developers may be required to contribute towards public transport provision. However, it is noted that developer contributions cannot be expected to pay for all transport improvements and as such, in line with the recent Planning Inspectorate document outlined above additional sources of funding should be identified. It is recommended that alternative sources of funding for public transport improvements are clearly outlined within the CS to ensure that adequate infrastructure provision is made.

Policy T4 - South Essex Rapid Transit

As mentioned in our response to the Core Strategy Issues and options consultation the HA is supportive of this policy and the need to progress the route through South Essex. This has the potential to reduce the impact on the SRN (A13).

Policy T5 - Travel Plans

The HA welcomes the requirement for a travel plan for developments involving both destination and origin trips. However it is noted that no threshold for employment sites have been specified. Essex County Council requires the production of a workplace travel plan for developments with over 50 employees or where there will be a significant impact on the local road network. To avoid ambiguity for developers, the HA recommends that the Rochford District Core Strategy specifies a similar threshold within Policy T5. This will ensure the Core Strategy is in line with PPG13 paragraph 87 - PPG13 - 'Local authorities are expected to consider setting local targets for the adoption of travel plans by local businesses and other organizations..'

Policy ED2 - London Southend Airport

The HA previously responded to the London Southend and Environs Joint Area Action Plan Preferred Options Document (March 2009). As such, we have not repeated our comments here but instead refer you to our consultation response dated 31 March 2009.

Summary:

Policy T1 - Highways

Policy T1 highlights the need to reduce reliance on the private car but also observes that 'some impact on the highway network is inevitable'. In a District with such high levels of private car ownership and a limited public transport network, as stated in paragraph 10.2, it will be important to assess the potential impacts to the highway network and ensure that mitigation measures are proposed and implemented where necessary.

An emphasis should be placed on the provision and improvement of sustainable transport infrastructure, particularly where high trip-generating developments such as offices are proposed. In line with the DfT's Guidance on Transport Assessment (2007) - DfT GTA, paragraph 4.51 - 'The key issue is the need to ensure that development proposals strive to achieve nil detriment ('no worse off') to the strategic network, for the opening year and appropriate horizon year'. This emphasis will assist in mitigating potential increases in private vehicle trips and hence help ensure that there is a nil-detriment effect on the SRN.

Hockley Under Threat
None provided

Agent: N/A

Full Text:

Ch. 4 Housing; Ch.10 Transport, Highways; Ch.11 Economic Development; Ch.12 Retail/town centres; Ch.5 Character of place & Local Lists

Chapter 4: Housing

Para 4.8 States sustainability underlines any decisions on housing location, primarily: current and future deliverability of infrastructure, eg roads, services, public transport, health.

Policy H1, Para.4.14 Some employment sites are considered more suitable for other uses (eg housing) including Eldon Way/Foundry, Hockley. This is all open to question.

Hockley-re Eldon Way/Foundry

In CS Preferred Options 2008 policy H2

N.E.Hockley was discarded as a housing option - whilst close to centre, station, "impact on highway network from traffic heading through Hockley...along Ashingdon Road..renders location unviable". Clearly the same principle applied to Eldon Way/Foundry for the same reasons.

Need to be logical and even-handed in proposals

June 2009 issue C S Submission issue says Eldon Way will be used for housing, whereas Sept.2009 issue says "alternative uses, including residential.." to be decided by HAAP (Issues consultation done, Pref.Options issue awaited, but judging from JAAP Pref.Options decision - namely biggest option chosen against overriding opposition, it will be housing).

Policy H1, T1 Proposals for moving employment to out of town locations, at either end of the district, with no existing public transport links, are contrary to government policy PPG14 & PPS1. it also contravenes the Core Strategy's stated aims of reducing carbon emissions; reliance on car transport and providing "an integrated network of cycle paths",

The Core Strategy also contravenes its own policy T1 and is unsound.

Health services GP surgeries are full and a PCT health centre will not occur in the foreseeable economic climate.

Ch.10: Highways and Transport

Policy T1, T2 RDC proposes working with ECC Highways, developers, but admits it has no authority, responsibility here. RDC will seek developer contributions, but this is neither detailed nor costed in CS Submission nor HAAP, and contravenes PPS 12.3 para.4.93 which states "The infrastructure planning process should identify as far as possible infrastructure needs and costs". Idea of paying for road & transport improvements through Standard Charges is unproven and unsound.

Establish like motorways with wholesale demolition.

In neither CS Submission nor HAAP is there any highways improvement, except idea to replace Spa roundabout with traffic lights and 1 way system up Southend Road and Hockley Rise.

RDC are proposing to scatter housing across the district in around 12 or sites but no detailed consideration has been given to the implications for highways across the District. Many roads across the District are at or near capacity but no modelling has been undertaken to determine the impacts.

It is clear that (i) the combined impact of scattering houses across the District and (ii) relocating Eldon Way/Foundry Industrial Estates with no public transport services will exacerbate existing problems. It is clear that the extent of improvements required is both unknown and not funded and the proposal is unsound.

Para.10.5

Policy T3, CLT1 Appendix CLT1

T1 & T2 "...highway improvements serving new developments..in a timely manner..ensuring developments delivered alongside necessary infrastructure".

These improvements cannot possibly be delivered. It should be realised: B1013 (Southend Rd), Rectory Road Hawkwell, Ashingdon, West Rochford - all in area proposed for large new developments are former winding, narrow country roads, tarmacked over for motorised traffic. Large housing increments are unsustainable off these roads, which

16744 Object

CHAPTER 10 Policy T1 - Highways

cannot be altered without much destruction.

Public transport RDC admits this is in the private sector. In Hockley, operator has cut No 7 service to one per hour from Ashingdon Schools, claiming it is unviable beyond. This is unlikely to change as Hockley is car dependant. No 8 bus through Hawkwell is cut to one per hour to Rayleigh, for same reason as No 7. Proposed planning agreements with developers can't run: e.g., a community centre or classroom given by a developer remains once he has moved on - how can that apply for an on-going bus service?

Ch.11 Economic development

Policy ED3 Core Strategy preferred Options 2008 hinted at possible housing in Eldon Way site. June 2009 Submission version, without consultation, said Eldon Way would be housing (map included Foundry, not the text). September 2009 Submission said redevelopment would be in HAAP (which apart from the Issues/Options version, is unfinished. Judging from results of JAAP Preferred Options where biggest option is chosen, though most respondents were against it, site will be housing, without consultation.

Para.1.25 Para.11.32

Policy ED4 T1 & T2 Note CH.1 Introduction to CS Submission 2009 para.1.25 East England Plan requires 3000 additional jobs, presumably to 2021. Revised Southend Airport is expected to drive Economic development. But at para. 11.32 Eldon Way-Foundry estate is planned to be more suitably utilized. "...alternative land will be required to accommodated employment uses so displaced" - ie jobs sent to eg new site near Southend Airport - not new jobs.

Remove compulsory relocation

Policy states Council will allocate 18ha of land to make up for de-allocations in ED3 - that proves point above.

Proposals for moving employment to out of town locations with no existing transport links are contrary to government policies PPG4, PPS1 and PPS4 and Core Strategy Policy T1.

Evidence Base is ignored by contravening Hockley Parish Plan 2007 and ignoring residents' views on HAAP Issues/Options. Next stage of HAAP Preferred Options is pre-empted and rendered irrelevant.

Core Strategy plans to relocate Eldon Way Foundry estate to Greenfield site with no nearby bus or railway. RDC plans to upgrade the nearest road to dual carriageway, though the connecting B1013 (through Hockley) will stay single, said by ECC Highways statistics to be 72% capacity. Airport bosses and council cannot suggest there will be no traffic growth from JAAP and new industrial site.

Revise both 2009 Core Strategy and 2009 HAAP Issues/options

Move to new industrial site near airport contravenes PPS4:

EC7.3C "out of centre sites, with preference given to sites..well served by choice of..transport and..close to centre and..high likelihood of forming links with centre". There is no current public transport and links with centres is unlikely".

EC 7.5.1 "whether the site is or will be accessible and well served by choice of transport, public transport, walking and cycling, as well as by car..". Remote location, narrow busy B1013 makes the site unsuitable for access by cycle or on foot.

It also contravenes PPS1 (27vii).. "reduce need to travel, encourage accessible public transport provision to secure more sustainable patterns of transport..Planning should actively manage patterns of urban growth to make fullest use of public transport and focus development in existing centres, near to major public transport interchanges". Core Strategy undermines its own policy Transport and Highways policy T1 and is unsound.

H1 & RTC6 Although shown on accompanying drawing in earlier versions, there was no prior textual mention of Foundry industrial estate (next to Eldon Way) for redevelopment until current CS 2009 Submission. In recent amendment to the CS this was stated to be due to a typing error!

Chapter 12: Retail/Town centres

The Core Strategy misrepresents findings of the Retail and Leisure Study 2008.

Defer whole of proposals for Hockley town centre to Hockley Area Action Plan.

Para.12.38 H1 & RTC6 The Core Strategy states (para.12.38) "The Retail & Leisure Study indicates Hockley has great potential. Hockley has been identified as having a need for additional convenience floorspace."

Whereas the R&LS actually states:

1) (10.26) "the scale of need does not lend itself to a foodstore capable of retaining a significant proportion of main food

Core Strategy Submission Document

O - 16744 - 14229 - Policy T1 - Highways - i, iii

16744 Object

CHAPTER 10 Policy T1 - Highways

shopping expenditure".

2) (10.28) "There is no immediate capacity for additional floorspace".

3) (10.29) "we recommend focus be maintained on developing Hockley's existing strengths, rather than retail expansion"

4) 10.31 "the current nature of Hockley does not lend itself to classification as a 'town centre' as defined by PPS6. Moreover, we have identified that it has a very small catchment population. Accordingly, the council may wish to consider reclassifying Hockley from a town centre to a district centre".

Remove threat of compulsory purchase orders.

The Council will work with landowners and its partners to deliver the HAAP.

Chapter 5: Character of Place and Local Lists

Para.5.4 "Rochford district has unique character..stems from traditional buildings..still dominate towns and villages".

Para.5.17 "Council believes many buildings..are of local distinctiveness..part of..cherished local scene".

This only appears to apply to certain places: Rochford, Rayleigh, greenbelt villages. Many Hockley conservable items have been systemically removed for supposedly lucrative development in face of widespread protect. This is for supposed need for housing. In fact heritage items have been replaced by dwellings most cannot afford, and/or are hard to sell due to unsuitability of massing and siting. Many other homes are jeopardised by this practice.

Conclusion

Core Strategy Submission DPD is basically unsound in many respects:

Incomplete information. Amongst others, it refers to Hockley AAP, the first stage of which is complete, but not other three. Rochford AAP first stage has been published in arrears of Core Strategy Submission. Rayleigh AAP is still awaited. Precise housing sites are absent, as Urban Capacity Study 2007 has been superseded by Strategic Housing Land Availability Assessment, not yet published. Traders, residents, are thus responding to Core Strategy Submission with incomplete information.

Lack of community involvement. Chapter 1, Introduction, para. 1.11 "Community involvement is an essential part of the plan making process". In Statement of Community Involvement 2006 Rochford RDC "recognises need to enable people..to have their voices heard".

Re Public Meetings: "Consideration will be had to timing and venue to ensure meeting is as accessible as possible".

Hockley Area Action Plan as an example of the opposite of all this:- Presentation of document was at Hullbridge, 7.30 p.m. It was also discussed with JAAP at Rochford Freight House (for traders only) at 7 a.m., without publicity. Excuse made: HAAP on RDC website, which none will seek unless knowing it is there. Rochford District Matters newssheet had minute articles on p.3, half way through consultation period. Another excuse: a second presentation by Hockley Residents Association with planning officer present: only because of complaints, and it is not the HRA's responsibility to RDC's job. Due to unavoidable haste of calling meeting, few knew and only 50 were present.

In Core Strategy Submission Hockley Parish Plan has been ignored. Proposals also ignore 95% rejection rate response to HAAP 2009, which included proposals for Eldon Way employment site.

Unfettered right of developers to carry on as if Core Strategy didn't exist. In PPS 12, Ch.4.6 states: "Core Strategies should be flexible and able to show how they handle contingencies". Several large planning applications have been submitted proposing developments outside the Core Strategy which does not indicate how such applications will be handled and does not comply with PPS 12.

Where are we? Finally, at Chapter 1, Introduction, para. 1.24: "the Core Strategy will have to be reviewed in the event of a new Local Area Agreement, post-2011, setting different priorities". So what purpose does all this work serve? So we have hardly finished this exercise, before it all starts again?

Summary:

Policy T1, T2 RDC proposes working with ECC Highways, developers, but admits it has no authority, responsibility here. RDC will seek developer contributions, but this is neither detailed nor costed in CS Submission nor HAAP, and contravenes PPS 12.3 para.4.93 which states "The infrastructure planning process should identify as far as possible infrastructure needs and costs". Idea of paying for road & transport improvements through Standard Charges is unproven and unsound.

In neither CS Submission nor HAAP is there any highways improvement, except idea to replace Spa roundabout with traffic lights and 1 way system up Southend Road and Hockley Rise.

RDC are proposing to scatter housing across the district in around 12 or sites but no detailed consideration has been given to the implications for highways across the District. Many roads across the District are at or near capacity but no modelling has been undertaken to determine the impacts.

Full Text:

Ch. 4 Housing; Ch.10 Transport, Highways; Ch.11 Economic Development; Ch.12 Retail/town centres; Ch.5 Character of place & Local Lists

Chapter 4: Housing

Para 4.8 States sustainability underlines any decisions on housing location, primarily: current and future deliverability of infrastructure, eg roads, services, public transport, health.

Policy H1, Para.4.14 Some employment sites are considered more suitable for other uses (eg housing) including Eldon Way/Foundry, Hockley. This is all open to question.

Hockley-re Eldon Way/Foundry

In CS Preferred Options 2008 policy H2

N.E.Hockley was discarded as a housing option - whilst close to centre, station, "impact on highway network from traffic heading through Hockley...along Ashingdon Road..renders location unviable". Clearly the same principle applied to Eldon Way/Foundry for the same reasons.

Need to be logical and even-handed in proposals

June 2009 issue C S Submission issue says Eldon Way will be used for housing, whereas Sept.2009 issue says "alternative uses, including residential.." to be decided by HAAP (Issues consultation done, Pref.Options issue awaited, but judging from JAAP Pref.Options decision - namely biggest option chosen against overriding opposition, it will be housing).

Policy H1, T1 Proposals for moving employment to out of town locations, at either end of the district, with no existing public transport links, are contrary to government policy PPG14 & PPS1. it also contravenes the Core Strategy's stated aims of reducing carbon emissions; reliance on car transport and providing "an integrated network of cycle paths",

The Core Strategy also contravenes its own policy T1 and is unsound.

Health services GP surgeries are full and a PCT health centre will not occur in the foreseeable economic climate.

Ch.10: Highways and Transport

Policy T1, T2 RDC proposes working with ECC Highways, developers, but admits it has no authority, responsibility here. RDC will seek developer contributions, but this is neither detailed nor costed in CS Submission nor HAAP, and contravenes PPS 12.3 para.4.93 which states "The infrastructure planning process should identify as far as possible infrastructure needs and costs". Idea of paying for road & transport improvements through Standard Charges is unproven and unsound.

Establish like motorways with wholesale demolition.

In neither CS Submission nor HAAP is there any highways improvement, except idea to replace Spa roundabout with traffic lights and 1 way system up Southend Road and Hockley Rise.

RDC are proposing to scatter housing across the district in around 12 or sites but no detailed consideration has been given to the implications for highways across the District. Many roads across the District are at or near capacity but no modelling has been undertaken to determine the impacts.

It is clear that (i) the combined impact of scattering houses across the District and (ii) relocating Eldon Way/Foundry Industrial Estates with no public transport services will exacerbate existing problems. It is clear that the extent of improvements required is both unknown and not funded and the proposal is unsound.

Para.10.5

Policy T3, CLT1 Appendix CLT1

T1 & T2 "...highway improvements serving new developments..in a timely manner..ensuring developments delivered alongside necessary infrastructure".

These improvements cannot possibly be delivered. It should be realised: B1013 (Southend Rd), Rectory Road Hawkwell, Ashingdon, West Rochford - all in area proposed for large new developments are former winding, narrow country roads, tarmacked over for motorised traffic. Large housing increments are unsustainable off these roads, which

16750 Object

CHAPTER 10 Policy T1 - Highways

cannot be altered without much destruction.

Public transport RDC admits this is in the private sector. In Hockley, operator has cut No 7 service to one per hour from Ashingdon Schools, claiming it is unviable beyond. This is unlikely to change as Hockley is car dependant. No 8 bus through Hawkwell is cut to one per hour to Rayleigh, for same reason as No 7. Proposed planning agreements with developers can't run: e.g., a community centre or classroom given by a developer remains once he has moved on - how can that apply for an on-going bus service?

Ch.11 Economic development

Policy ED3 Core Strategy preferred Options 2008 hinted at possible housing in Eldon Way site. June 2009 Submission version, without consultation, said Eldon Way would be housing (map included Foundry, not the text). September 2009 Submission said redevelopment would be in HAAP (which apart from the Issues/Options version, is unfinished. Judging from results of JAAP Preferred Options where biggest option is chosen, though most respondents were against it, site will be housing, without consultation.

Para.1.25 Para.11.32

Policy ED4 T1 & T2 Note CH.1 Introduction to CS Submission 2009 para.1.25 East England Plan requires 3000 additional jobs, presumably to 2021. Revised Southend Airport is expected to drive Economic development. But at para. 11.32 Eldon Way-Foundry estate is planned to be more suitably utilized. "...alternative land will be required to accommodated employment uses so displaced" - ie jobs sent to eg new site near Southend Airport - not new jobs.

Remove compulsory relocation

Policy states Council will allocate 18ha of land to make up for de-allocations in ED3 - that proves point above.

Proposals for moving employment to out of town locations with no existing transport links are contrary to government policies PPG4, PPS1 and PPS4 and Core Strategy Policy T1.

Evidence Base is ignored by contravening Hockley Parish Plan 2007 and ignoring residents' views on HAAP Issues/Options. Next stage of HAAP Preferred Options is pre-empted and rendered irrelevant.

Core Strategy plans to relocate Eldon Way Foundry estate to Greenfield site with no nearby bus or railway. RDC plans to upgrade the nearest road to dual carriageway, though the connecting B1013 (through Hockley) will stay single, said by ECC Highways statistics to be 72% capacity. Airport bosses and council cannot suggest there will be no traffic growth from JAAP and new industrial site.

Revise both 2009 Core Strategy and 2009 HAAP Issues/options

Move to new industrial site near airport contravenes PPS4:

EC7.3C "out of centre sites, with preference given to sites..well served by choice of..transport and..close to centre and..high likelihood of forming links with centre". There is no current public transport and links with centres is unlikely".

EC 7.5.1 "whether the site is or will be accessible and well served by choice of transport, public transport, walking and cycling, as well as by car..". Remote location, narrow busy B1013 makes the site unsuitable for access by cycle or on foot.

It also contravenes PPS1 (27vii).. "reduce need to travel, encourage accessible public transport provision to secure more sustainable patterns of transport..Planning should actively manage patterns of urban growth to make fullest use of public transport and focus development in existing centres, near to major public transport interchanges". Core Strategy undermines its own policy Transport and Highways policy T1 and is unsound.

H1 & RTC6 Although shown on accompanying drawing in earlier versions, there was no prior textual mention of Foundry industrial estate (next to Eldon Way) for redevelopment until current CS 2009 Submission. In recent amendment to the CS this was stated to be due to a typing error!

Chapter 12: Retail/Town centres

The Core Strategy misrepresents findings of the Retail and Leisure Study 2008.

Defer whole of proposals for Hockley town centre to Hockley Area Action Plan.

Para.12.38 H1 & RTC6 The Core Strategy states (para.12.38) "The Retail & Leisure Study indicates Hockley has great potential. Hockley has been identified as having a need for additional convenience floorspace."

Whereas the R&LS actually states:

1) (10.26) "the scale of need does not lend itself to a foodstore capable of retaining a significant proportion of main food

Core Strategy Submission Document

O - 16750 - 14229 - Policy T1 - Highways - i, iii

16750 Object

CHAPTER 10 Policy T1 - Highways

shopping expenditure".

2) (10.28) "There is no immediate capacity for additional floorspace".

3) (10.29) "we recommend focus be maintained on developing Hockley's existing strengths, rather than retail expansion"

4) 10.31 "the current nature of Hockley does not lend itself to classification as a 'town centre' as defined by PPS6. Moreover, we have identified that it has a very small catchment population. Accordingly, the council may wish to consider reclassifying Hockley from a town centre to a district centre".

Remove threat of compulsory purchase orders.

The Council will work with landowners and its partners to deliver the HAAP.

Chapter 5: Character of Place and Local Lists

Para.5.4 "Rochford district has unique character..stems from traditional buildings..still dominate towns and villages".

Para.5.17 "Council believes many buildings..are of local distinctiveness..part of..cherished local scene".

This only appears to apply to certain places: Rochford, Rayleigh, greenbelt villages. Many Hockley conservable items have been systemically removed for supposedly lucrative development in face of widespread protect. This is for supposed need for housing. In fact heritage items have been replaced by dwellings most cannot afford, and/or are hard to sell due to unsuitability of massing and siting. Many other homes are jeopardised by this practice.

Conclusion

Core Strategy Submission DPD is basically unsound in many respects:

Incomplete information. Amongst others, it refers to Hockley AAP, the first stage of which is complete, but not other three. Rochford AAP first stage has been published in arrears of Core Strategy Submission. Rayleigh AAP is still awaited. Ch.10: Highways and Transport

Policy T1, T2 RDC proposes working with ECC Highways, developers, but admits it has no authority, responsibility here. RDC will seek developer contributions, but this is neither detailed nor costed in CS Submission nor HAAP, and contravenes PPS 12.3 para.4.93 which states "The infrastructure planning process should identify as far as possible infrastructure needs and costs". Idea of paying for road & transport improvements through Standard Charges is unproven and unsound.

Establish like motorways with wholesale demolition.

In neither CS Submission nor HAAP is there any highways improvement, except idea to replace Spa roundabout with traffic lights and 1 way system up Southend Road and Hockley Rise.

RDC are proposing to scatter housing across the district in around 12 or sites but no detailed consideration has been given to the implications for highways across the District. Many roads across the District are at or near capacity but no modelling has been undertaken to determine the impacts.

It is clear that (i) the combined impact of scattering houses across the District and (ii) relocating Eldon Way/Foundry Industrial Estates with no public transport services will exacerbate existing problems. It is clear that the extent of improvements required is both unknown and not funded and the proposal is unsound.

Para.10.5

Policy T3, CLT1 Appendix CLT1

T1 & T2 "...highway improvements serving new developments..in a timely manner..ensuring developments delivered alongside necessary infrastructure".

These improvements cannot possibly be delivered. It should be realised: B1013 (Southend Rd), Rectory Road Hawkwell, Ashingdon, West Rochford - all in area proposed for large new developments are former winding, narrow country roads, tarmacked over for motorised traffic. Large housing increments are unsustainable off these roads, which

16758 Object

CHAPTER 10 Policy T1 - Highways

cannot be altered without much destruction.

Public transport RDC admits this is in the private sector. In Hockley, operator has cut No 7 service to one per hour from Ashingdon Schools, claiming it is unviable beyond. This is unlikely to change as Hockley is car dependant. No 8 bus through Hawkwell is cut to one per hour to Rayleigh, for same reason as No 7. Proposed planning agreements with developers can't run: e.g., a community centre or classroom given by a developer remains once he has moved on - how can that apply for an on-going bus service?

Ch.11 Economic development

Policy ED3 Core Strategy preferred Options 2008 hinted at possible housing in Eldon Way site. June 2009 Submission version, without consultation, said Eldon Way would be housing (map included Foundry, not the text). September 2009 Submission said redevelopment would be in HAAP (which apart from the Issues/Options version, is unfinished. Judging from results of JAAP Preferred Options where biggest option is chosen, though most respondents were against it, site will be housing, without consultation.

Para.1.25 Para.11.32

Policy ED4 T1 & T2 Note CH.1 Introduction to CS Submission 2009 para.1.25 East England Plan requires 3000 additional jobs, presumably to 2021. Revised Southend Airport is expected to drive Economic development. But at para. 11.32 Eldon Way-Foundry estate is planned to be more suitably utilized. "...alternative land will be required to accommodated employment uses so displaced" - ie jobs sent to eg new site near Southend Airport - not new jobs.

Remove compulsory relocation

Policy states Council will allocate 18ha of land to make up for de-allocations in ED3 - that proves point above.

Proposals for moving employment to out of town locations with no existing transport links are contrary to government policies PPG4, PPS1 and PPS4 and Core Strategy Policy T1.

Evidence Base is ignored by contravening Hockley Parish Plan 2007 and ignoring residents' views on HAAP Issues/Options. Next stage of HAAP Preferred Options is pre-empted and rendered irrelevant.

Core Strategy plans to relocate Eldon Way Foundry estate to Greenfield site with no nearby bus or railway. RDC plans to upgrade the nearest road to dual carriageway, though the connecting B1013 (through Hockley) will stay single, said by ECC Highways statistics to be 72% capacity. Airport bosses and council cannot suggest there will be no traffic growth from JAAP and new industrial site.

Revise both 2009 Core Strategy and 2009 HAAP Issues/options

Move to new industrial site near airport contravenes PPS4:

EC7.3C "out of centre sites, with preference given to sites..well served by choice of..transport and..close to centre and..high likelihood of forming links with centre". There is no current public transport and links with centres is unlikely".

EC 7.5.1 "whether the site is or will be accessible and well served by choice of transport, public transport, walking and cycling, as well as by car..". Remote location, narrow busy B1013 makes the site unsuitable for access by cycle or on foot.

It also contravenes PPS1 (27vii).. "reduce need to travel, encourage accessible public transport provision to secure more sustainable patterns of transport..Planning should actively manage patterns of urban growth to make fullest use of public transport and focus development in existing centres, near to major public transport interchanges". Core Strategy undermines its own policy Transport and Highways policy T1 and is unsound.

H1 & RTC6 Although shown on accompanying drawing in earlier versions, there was no prior textual mention of Foundry industrial estate (next to Eldon Way) for redevelopment until current CS 2009 Submission. In recent amendment to the CS this was stated to be due to a typing error!

Chapter 12: Retail/Town centres

The Core Strategy misrepresents findings of the Retail and Leisure Study 2008.

Defer whole of proposals for Hockley town centre to Hockley Area Action Plan.

Para.12.38 H1 & RTC6 The Core Strategy states (para.12.38) "The Retail & Leisure Study indicates Hockley has great potential. Hockley has been identified as having a need for additional convenience floorspace."

Whereas the R&LS actually states:

1) (10.26) "the scale of need does not lend itself to a foodstore capable of retaining a significant proportion of main food

Core Strategy Submission Document

O - 16758 - 14229 - Policy T1 - Highways - i, iii

16758 Object

CHAPTER 10 Policy T1 - Highways

shopping expenditure".

2) (10.28) "There is no immediate capacity for additional floorspace".

3) (10.29) "we recommend focus be maintained on developing Hockley's existing strengths, rather than retail expansion"

4) 10.31 "the current nature of Hockley does not lend itself to classification as a 'town centre' as defined by PPS6. Moreover, we have identified that it has a very small catchment population. Accordingly, the council may wish to consider reclassifying Hockley from a town centre to a district centre".

Remove threat of compulsory purchase orders.

The Council will work with landowners and its partners to deliver the HAAP.

Chapter 5: Character of Place and Local Lists

Para.5.4 "Rochford district has unique character..stems from traditional buildings..still dominate towns and villages".

Para.5.17 "Council believes many buildings..are of local distinctiveness..part of..cherished local scene".

This only appears to apply to certain places: Rochford, Rayleigh, greenbelt villages. Many Hockley conservable items have been systemically removed for supposedly lucrative development in face of widespread protect. This is for supposed need for housing. In fact heritage items have been replaced by dwellings most cannot afford, and/or are hard to sell due to unsuitability of massing and siting. Many other homes are jeopardised by this practice.

Conclusion

Core Strategy Submission DPD is basically unsound in many respects:

Incomplete information. Amongst others, it refers to Hockley AAP, the first stage of which is complete, but not other three. Rochford AAP first stage has been published in arrears of Core Strategy Submission. Rayleigh AAP is still awaited. Precise housing sites are absent, as Urban Capacity Study 2007 has been superseded by Strategic Housing Land Availability Assessment, not yet published. Traders, residents, are thus responding to Core Strategy Submission with incomplete information.

Lack of community involvement. Chapter 1, Introduction, para. 1.11 "Community involvement is an essential part of the plan making process". In Statement of Community Involvement 2006 Rochford RDC "recognises need to enable people..to have their voices heard".

Re Public Meetings: "Consideration will be had to timing and venue to ensure meeting is as accessible as possible".

Hockley Area Action Plan as an example of the opposite of all this:- Presentation of document was at Hullbridge, 7.30 p.m. It was also discussed with JAAP at Rochford Freight House (for traders only) at 7 a.m., without publicity. Excuse made: HAAP on RDC website, which none will seek unless knowing it is there. Rochford District Matters newsheet had minute articles on p.3, half way through consultation period. Another excuse: a second presentation by Hockley Residents Association with planning officer present: only because of complaints, and it is not the HRA's responsibility to RDC's job. Due to unavoidable haste of calling meeting, few knew and only 50 were present.

In Core Strategy Submission Hockley Parish Plan has been ignored. Proposals also ignore 95% rejection rate response to HAAP 2009, which included proposals for Eldon Way employment site.

Unfettered right of developers to carry on as if Core Strategy didn't exist. In PPS 12, Ch.4.6 states: "Core Strategies should be flexible and able to show how they handle contingencies". Several large planning applications have been submitted proposing developments outside the Core Strategy which does not indicate how such applications will be handled and does not comply with PPS 12.

Where are we? Finally, at Chapter 1, Introduction, para. 1.24: "the Core Strategy will have to be reviewed in the event of a new Local Area Agreement, post-2011, setting different priorities". So what purpose does all this work serve? So we have hardly finished this exercise, before it all starts again?

Summary:

Policy states Council will allocate 18ha of land to make up for de-allocations in ED3 - that proves point above.

Proposals for moving employment to out of town locations with no existing transport links are contrary to government policies PPG4, PPS1 and PPS4 and Core Strategy Policy T1.

Evidence Base is ignored by contravening Hockley Parish Plan 2007 and ignoring residents' views on HAAP Issues/Options. Next stage of HAAP Preferred Options is pre-empted and rendered irrelevant.

Core Strategy plans to relocate Eldon Way Foundry estate to Greenfield site with no nearby bus or railway. RDC plans to upgrade the nearest road to dual carriageway, though the connecting B1013 (through Hockley) will stay single, said by ECC Highways statistics to be 72% capacity. Airport bosses and council cannot suggest there will be no traffic growth from JAAP and new industrial site.

1.0 Instruction and Introduction

1.1 Charles Planning Associates Limited (Chartered Town Planners) is Instructed by Swan Hill Homes Limited (Swan Hill) to prepare and submit representations on their behalf in respect of the Rochford District Local Development Framework: Core Strategy Submission (September 2009) Development Plan Document.

1.2 The comments refer to the relevant sections and policy designations in the Submission document, as appropriate.

1.3 The comments set out in this submission are intended to assist the District Council in taking forward its Local Development Framework. It is our intention to continue to be involved in the LDF preparation process and we look forward to the opportunity to comment further at the Examination to the Core Strategy.

1.4 If you have any queries regarding the content of this submission then please do not hesitate to contact:

Peter Kneen BSc (Hons) MSc MRTPI
Planner

2.0 Housing: Policy H1 - The Efficient Use of Land for Housing

2.1 Swan Hill recognises the importance of seeking to concentrate new developments mainly in the existing urban areas, on previously developed land where possible, particularly in view of the Government seeking to ensure 60% of all such new developments are on previously development land (PDL).

2.2 However, given the character of the District, and the strategic housing requirement of the East of England Plan, Swan Hill supports the approach that the Council must also make provision for additional development on the edge of existing settlements on greenfield sites, particularly in the most sustainable locations. As such, Swan Hill supports that where feasible, the redevelopment of existing employment sites for residential/employment purposes can make a contribution towards the strategic housing requirement, provided that sufficient additional employment land is brought forward to ensure the stability of employment levels in the District, and to ensure employment growth meets the East of England Plan requirements.

2.3 Swan Hill considers that Policy H1 should include consideration that new extensions to existing settlements have regard to their potential impact on the wider characteristics and openness objectives of the Green Belt.

Policy H2 - Extensions to Residential Envelopes and Phasing

2.4 Swan Hill generally supports the approach taken by the Council in this policy. As set out above, Swan Hill consider the Council's acknowledgment that housing requirements should be met through the allocation of land on the edge of the existing settlements is the most suitable way forward to meeting the Council's strategic housing requirement and complies with the advice in PPS3.

2.5 The need for suitable greenfield urban extensions represents the best way forward for the Council to meet its strategic housing requirement, as set out in the East of England Plan. Swan Hill supports the recognition that the potential supply of alternative previously developed sites is limited, without detrimentally affecting the character of the District, and therefore the best way forward is the use of sustainable greenfield urban extensions to the existing settlements of the District.

2.6 However, Swan Hill consider that a fundamental consideration that the District Council should consider relates to the potential impact of the urban extensions on the Green Belt policy has been somewhat overlooked. The wider sustainability credentials of the settlements of the District should only be one of many key considerations for determining the level of expansion. In view of the proximity of Southend-on-Sea to all the main settlements of the District, and the influence this has on the likely location many people would travel for employment and leisure, sustainability of many of the settlements is not a key overarching factor, and greater weight should be placed on the potential impact on the openness of the Green Belt, as this cannot be remedied if development occurs in the wrong location.

2.7 As such, Swan Hill considers that determining the location of growth for the main settlements should be to identify

Core Strategy Submission Document

S - 16890 - 8329 - Policy T1 - Highways - None

16890 Support

CHAPTER 10 Policy T1 - Highways

those locations where the impact on the wider setting of the Green Belt can be minimised. Further justification for those general locations chosen should be identified in Policy H2. In this regard, Swan Hill has serious concerns regarding the removal of Land South West of Great Wakering as a viable option for the growth of the settlement. The development of this area of Great Wakering, in addition to the potential redevelopment of the Star Lane Industrial Estate could provide a more comprehensive development, whilst ensuring that the wider openness of the Green Belt is maintained. Land South West of Great Wakering is significantly better placed to limit the impact on the wider Green Belt than Land West of Great Wakering, and could contribute to the provision of an important amenity and wildlife site for the local community.

2.8 In addition, Swan Hill consider that the Council now has no reserve provision in the event that any of the existing employment sites set out in Policy H1 fail to come forward for development within the envisaged timescale. Further, Land West of Great Wakering has not been identified in the SHLAA as a deliverable site to help meet the strategic housing requirement, contrary to the requirement set out in PPS3.

2.9 As such, Swan Hill would support the provision of suitable sites which could be safeguarded for future development in the likelihood of a shortfall in supply.

Policy H3 - Extensions to Residential Envelopes Post 2021

2.10 As set out above, Swan Hill supports the overall approach the Council has taken towards the provision of sustainable urban extensions as a suitable means of meeting their strategic housing requirement. However, as set out for Policy H2 above, Swan Hill has serious concerns regarding the removal of several proposed sites set out in the October 2008 Preferred Options Core Strategy, without any guarantee of the ability to deliver those sites set out in Policy H1.

2.11 As also considered above, the inclusion of West of Great Wakering for 250 dwellings should not be included ahead of South West of Great Wakering, in view of the fact that the site is not identified in the SHLAA as available, suitable and achievable as required by PPS3, and thus is not supported by a robust and creditable evidence base for its inclusion as a strategic site for development.

2.12 Whilst Swan Hill acknowledge that alterations to Policy H1 has resulted in the removal of some locations for growth in Policy H3 (as set out in the Sustainability Appraisal), Swan Hill does not consider that the most appropriate locations have been chosen.

2.13 In addition to the matters raised above, the use of West of Great Wakering would also result in the loss of valuable agricultural land, which clearly in a Green Belt location, should be less suitable for development than other sites, such as South West of Great Wakering, which would have limited impact on the wider Green Belt policy, and not result in the loss of valuable agricultural land.

2.14 Finally, in respect of Policies H1, H2 and H3, all of the above comments are based on our interpretation of the Submission Version Core Strategy when compared to the October 2008 Version of the Core Strategy. Without the ability to undertake a detailed assessment of the Council's SHLAA, it is not possible to clarify the proposed Core Strategy position regarding the proposed direction of growth proposed for the settlements in the District. As such, Swan Hill reserves the right to make additional representations regarding the proposed Policies H1, H2 and H3 following the publication of the SHLAA in due course.

Policy H4 - Affordable Housing

2.15 In general terms, Swan Hill supports the approach taken by the Council towards the provision of affordable housing for new residential developments. The Policy accords with the advice of National Policy and is therefore considered sound by Swan Hill.

Policy H5 - Dwelling Types

2.16 Swan Hill supports the policy provision of H5, and considers that the approach taken by the Council for this policy represents a suitably flexible alternative to stipulating percentages of dwelling mix, sought by some local authorities. The Policy accords with the advice of National Policy and is therefore considered sound by Swan Hill.

Policy H6 - Lifetime Homes

2.17 In regard to this policy, Swan Hill objects to the Council's policy where all new dwellings should be provided to the Lifetime Homes Standard. Whilst it is acknowledged that the UK has an aging population, Swan Hill considers that seeking to provide Lifetime Homes on all sites is considered to be overly onerous for proposed developers, particularly when considering the requirement for all car parking spaces to be suitable for disabled users, which could result in more schemes becoming unviable. Therefore, the provision of a percentage of Lifetime Homes should be considered through negotiations with the Council at the planning application stage, and should be determined on a case-by-case basis.

3.0 Character of Place: Policy CP1 - Design

16890 Support

CHAPTER 10 Policy T1 - Highways

3.1 The Town and Country Planning (General Development Procedure) Order 1995 (As Amended) makes the submission of a Design and Access Statement for most types of planning applications a Statutory requirement, and as such, the provision of a Design Brief represents a pre-requisite of all major planning applications.

3.2 Policy CP1 seeks to ensure the provision of good, high quality developments that reflect local characteristics and distinctiveness, this ideology is supported by Swan Hill.

4.0 The Green Belt:
Policy GB1 - Green Belt Protection

4.1 Following the amendments to the wording of the Policy since the October 2008 Preferred Options Core Strategy, Swan Hill is now generally supportive of Policy GB1 and its supporting text. However, as expressed above, it is important that where alterations to the Green Belt boundary occur as a result of the extension of the settlements to meet the strategic housing requirement, both the minimal amount of land is taken and where that land is taken for development, it represents the best available land which has a minimal impact of the wider openness characteristic of the Green Belt.

5.0 Environmental Issues:
Policy ENV3 - Flood Risk

5.1 Swan Hill generally supports the approach set out in Policy ENV3 regarding ensuring development accords with the sequential test of PPS25. The Policy accords with the advice of National Policy and is therefore considered sound by Swan Hill.

Policy ENV4 - Sustainable Drainage Systems (SUDS)

5.2 Following the revisions from the October 2008 Preferred Options Core Strategy, Swan Hill now generally supports the approach set out in Policy ENV4. The Policy accords with the advice of National Policy and is therefore considered sound by Swan Hill.

Policy ENV8 - On-site Renewable and Low Carbon Energy Generation

5.3 Whilst Swan Hill recognises the importance of reducing carbon emissions, particularly in new housing developments, and the role this can play in reducing the nations overall Greenhouse emissions. As such Swan Hill is generally supportive of Policy ENV8. It is noted that Policy ENG1 of the East of England Plan sets out a threshold of developments comprising 10 or more dwellings. Swan Hill consider it important for the District Council to justify the reduction in the threshold level.

5.4 Further, no assessment of Policy ENV8 has been set out in the Sustainability Appraisal which justifies the change in threshold from that of Policy ENG1 of the RSS.

Policy ENV9 - Code for Sustainable Homes

5.5 Following the revisions from the October 2008 Preferred Options Core Strategy, Swan Hill now generally supports the approach set out in Policy ENV9. The Policy accords with the advice of National Policy and is therefore considered sound by Swan Hill.

6.0 Community Infrastructure, Leisure and Tourism:
Policy CLT1 - Planning Obligations and Standard Charges

6.1 Swan Hill generally supports the overall approach the Council has taken in Policy CLT1. It is considered Policy CLT1 sets out a degree of flexibility to ensure that all sites are considered on a site-by-site basis, assessing the individual merits of each planning application, in order to ensure the levels of contributions applicable meet the five tests of Circular 05/05. The Policy accords with the advice of National Policy and is therefore considered sound by Swan Hill.

Policies CLT5 - Open Space;
CLT7 - Play Space;
CLT8 - Youth Facilities; and,
CLT10 - Playing Pitches

6.2 Swan Hill supports the need for new residential developments to incorporate a degree of new publicly accessible open space, children's play space, youth facilities and playing pitches, and as such, generally supports the policy approaches taken by the Council.

6.3 However, it is important that whilst the Council may seek to undertake an assessment of providing standard charges for new development, which, as set out in Policy CLT1, this should be based on thorough public consultation and consideration and sound justification. Swan Hill consider that within the provision of a standard charge, it is important that such provision allows for a degree of flexibility to ensure that each site is assessed individually and on its own merits. This is particularly important for those sites close to existing open spaces and facilities. As such, the levels of

16890 Support

CHAPTER 10 Policy T1 - Highways

open space and recreation facilities required in the 'standard charge' should be based on an up-to-date PPG17 Open Space assessment, which should be used to form a key consideration in the levels of provision likely to be required in the standard charge system proposed.

7.0 Transport: Policy T1 - Highways

7.1 Swan Hill supports the overall objectives set out in Policy T1 requiring developments to be located and designed to reduce the reliance on the private car and to meet the infrastructure needs generated by development or seek to help achieve these needs is acceptable in principle.

7.2 Swan Hill recognises the importance of providing sufficient infrastructure provision to meet the requirements of development, and that where developments have insufficient consideration of impact on existing infrastructure, they should be considered unacceptable and contrary to National policy guidance. However, Swan Hill considers it important to emphasise that the developer's role should not be seen as a means to meet existing shortfalls in provision.

Policy T3 - Public Transport

7.3 Swan Hill is generally supportive of the policy approach set out in T3, however, as set out in paragraph 7.2 above, it is important that the District Council do not consider that it is the developer's responsibility to resolve existing shortfalls in provision of public transport, and any contribution towards additional public transportation provision should only be to mitigate against the additional level of demand likely from the development proposed.

Policy T5 - Cycling and Walking

7.4 Swan Hill supports the general approach to this policy, as Swan Hill recognises the importance of promoting the use of alternatives to the private car. The policy provision acknowledges the need to ensure relevant contributions in the event of additional travel demands generated by individual developments, whilst also setting out additional aspirations for the cycle network in the District.

7.5 As such, Swan Hill considers this policy accords with the advice of National Policy and is therefore considered sound by Swan Hill.

Policy T8 - Parking Standards

7.6 The Council has recently (January 2007) adopted SPD on the requirements for parking standards, and as such, Swan Hill generally supports the policy approach chosen by the Council. As set out in the SPD, whilst Swan Hill generally supports the approach taken by the District Council towards setting residential parking standards, in that the Council has recognised that in the suburban areas, even with some access to public transport, the majority of residents will rely on the use of private cars. However, Swan Hill has concerns over the failure of the District Council to comply with the provisions of PPG13: Transport (2001) which sets out that Local Planning Authorities should not set minimum standards for car parking. Whilst it is acknowledged that PPS3 sets out provision for the consideration of local circumstances, it is considered that the Council has not justified this deviation from PPG13's maximum standard.

7.7 Whilst it is acknowledged that such justification may become apparent through the work currently being undertaken by Essex County Council, until such time, the District Council should only seek to apply the maximum standards indicated in PPG13. However, Swan Hill recommends that the District Council make provisions in the wording of the Policy to allow for changes in the event that future policy on car parking standards need to reflect the County standard, following the completion of the County Council review.

8.0 Economic Development: Policies ED3 - Existing Employment Land ED4 - Future Employment Allocations

8.1 In respect of Policies ED3 and ED4, Swan Hill notes that they have changed considerably since the October 2008 Preferred Options document, in that they are site specific regarding the location of the proposed redevelopment of existing employment sites. These four sites are also identified in Policy H1 - Efficient Use of Land, and in general, Swan Hill supports the approach to the redevelopment of these sites (where feasible) based on the assessments of the sites set out in this version of the Core Strategy.

8.2 However, Swan Hill has concerns that these policies might not be considered suitably sound given that insufficient opportunity has been allocated for consultation on their redevelopment. Without the SHLAA being publically available prior to the consultation on this Core Strategy, an insufficient evidence base has been provided to corroborate that these sites are neither suitable or deliverable to meet the test of soundness requirements.

Summary:

Policy T1 - Highways

7.1 Swan Hill supports the overall objectives set out in Policy T1 requiring developments to be located and designed to reduce the reliance on the private car and to meet the infrastructure needs generated by development or seek to help

Core Strategy Submission Document

S - 16890 - 8329 - Policy T1 - Highways - None

achieve these needs is acceptable in principle.

7.2 Swan Hill recognises the importance of providing sufficient infrastructure provision to meet the requirements of development, and that where developments have insufficient consideration of impact on existing infrastructure, they should be considered unacceptable and contrary to National policy guidance. However, Swan Hill considers it important to emphasise that the developer's role should not be seen as a means to meet existing shortfalls in provision.

CHAPTER 10 Policy T2 - Highways Improvements

Respondent: Hockley Residents Association (Mr B Guyett) [4951] **Agent:** N/A

Hockley Residents Association
2 Tonbridge Road
Hockley
Essex
SS5 5HL

Full Text: RDC are proposing to scatter housing across the district in around 12 or sites but no detailed consideration has been given to the implications for highways across the District. The "Core Strategy" is not a strategy but simply a collection of disparate sites. Many roads across the District are at or near capacity but no modelling has been undertaken to determine the impacts or the funding required to upgrade them. At the Central Area Committee on 25 June 2009, RDC stated (in response to a question):

"Rochford Council is not the highway authority, but is working closely with Essex County Council to identify highway infrastructure requirements. Highway infrastructure improvements will be set out in the Core Strategy and other subsequent Development Plan Documents as required. These will be fed into the next version of the Essex Local Transport Plan, which is effectively a bidding document for funds to implement highway infrastructure improvements, schemes to tackle congestion, etc.

The District Council is working closely with the Essex County Council to ensure that highway infrastructure identified in the Core Strategy can be delivered."

It is clear that (i) the combined impact of scattering houses across the District and (ii) relocating Eldon Way/Foundry Industrial Estates to the very edge of the District with no public transport services will exacerbate existing problems. It is also clear that the extent of improvements required is both unknown and not funded and the proposal is unsound.

Summary: Housing will be scattered across the district but no detailed consideration has been given to the implications for highways. Many roads are at or near capacity but no modelling has been undertaken to determine the impacts or the funding required to upgrade them. It is clear that (i) the combined impact of scattering houses across the District and (ii) relocating Eldon Way/Foundry Industrial Estates with no public transport services will exacerbate existing problems. It is also clear that the extent of improvements required is both unknown and not funded and the proposal is unsound.

Full Text: RDC are proposing to scatter housing across the district in around 12 or sites but no detailed consideration has been given to the implications for highways across the District. The "Core Strategy" is not a strategy but simply a collection of disparate sites. Many roads across the District are at or near capacity but no modelling has been undertaken to determine the impacts or the funding required to upgrade them. At the Central Area Committee on 25 June 2009, RDC stated (in response to a question):

"Rochford Council is not the highway authority, but is working closely with Essex County Council to identify highway infrastructure requirements. Highway infrastructure improvements will be set out in the Core Strategy and other subsequent Development Plan Documents as required. These will be fed into the next version of the Essex Local Transport Plan, which is effectively a bidding document for funds to implement highway infrastructure improvements, schemes to tackle congestion, etc.

The District Council is working closely with the Essex County Council to ensure that highway infrastructure identified in the Core Strategy can be delivered."

It is clear that (i) the combined impact of scattering houses across the District and (ii) relocating Eldon Way/Foundry Industrial Estates to the very edge of the District with no public transport services will exacerbate existing problems. It is also clear that the extent of improvements required is both unknown and not funded and the proposal is unsound.

Full Text:

"The Council will work with Essex County Council Highways Authority to ensure that highway improvements are implemented to address issues of congestion".
In this section Ashingdon Road, Rectory Road, Spa Road and Main Road are highlighted as having congestion issues. During the Local Development Framework consultations, residents were invited to submit suggestions to be considered for the Core Strategy Document and I replied with a proposal which would reduce congestion in these areas. My suggestion also included links to Hall Road and the B1013 east to west road network, which also have congested sections.
The proposal was to extend Cherry Orchard Way (adjacent London Southend Airport) northward some 2.5 miles to north Ashingdon linking to points in Hall Road, Rectory Road and Ashingdon Road. By doing this, better access to the A127 would be provided and traffic flows through Ashingdon, Rochford, Hawkwell and Hockley could all be drastically reduced. I even submitted drawings of the proposal to assist explanation.
Unfortunately the response from RDC was very disappointing, their only comment being that it could not be justified as it included passing over a railway line.
I feel that RDC's statement to "address issues of congestion" is unsound because it does not portray the major improvements needed to solve the congestion problems in the whole of the district.
I wish to participate at the oral part of the examination and present my suggestion.

Summary:

During LDF consultations residents were invited to submit suggestions on any matters. I submitted a suggestion to extend Cherry Orchard Way northward. Connected to 3 East/West routes it would reduce congestion through surrounding towns. This was dismissed without even a thank you. Wish to participate during oral part of the examination.

Change to Plan

Include positive suggestions from residents in the submission document in order that the Planning Inspectorate can make an assessment of what is being presented by the public and not just the views of the council.

Full Text: There is reference to The Spa/Main Road, Ashingdon/Rectory Road junctions, and enhancement of the B1013 as possible traffic improvements (which will be needed if the developments in Hockley and Hawkwell go ahead), but no specific explanation how these will be implemented. Installing traffic lights will not help to cut down tailbacks in rush hour, as shown by those on the Plumberow Ave/Greensward Lane junction - And these are not on the B1013!

Summary: There is reference to The Spa/Main Road, Ashingdon/Rectory Road junctions, and enhancement of the B1013 as possible traffic improvements (which will be needed if the developments in Hockley and Hawkwell go ahead), but no specific explanation how these will be implemented. Installing traffic lights will not help to cut down tailbacks in rush hour, as shown by those on the Plumberow Ave/Greensward Lane junction - And these are not on the B1013!

Change to Plan A) Straighten out and widen existing winding (ex country) roads such as the B1013, or build a bypass for Hockley and Hawkwell. In both cases this is unrealistic economically (properties which have to be compulsory purchased, and where are the displaced residents going to go?), or taking the bypass through open spaces (such as Hockley Woods/Jubilee Park).

B) Discourage people from using cars. One way of doing this is by drastically improving public transport (again, not realistic - Proof of which is the deterioration of Arriva Bus Service 7&8). SERT has been mentioned (Policy T4) as the only specific plan, but it does not touch Hawkwell nor Hockley.

Another way to discourage car use is to improve and build more connecting, properly sign-posted cycle paths and walkways (most existing cycle paths and walkways don't connect with each other and need local knowledge to know that they even exist) that are designed to be used safely by both cyclists and pedestrians (rather than a half-hearted way to get cyclists off the roads), while encouraging the use and sale of bicycles (for example by using the Cycle2Work tax-exempt scheme).

Such a scheme would certainly be necessary to encourage the new residents of the proposed 330 home Housing Estate in Hawkwell to walk/cycle to Hockley Station. At present the most direct route would take them through the grounds of Clements Hall, possibly encountering badly-policed anti-social behaviour (from the types of people who loiter there), and along the main road up a steep hill, making the walk/cycle ride extremely unpleasant. The only specific Greenways mentioned in the document (policy T7) are not planned in Hawkwell, nor Hockley.

Full Text: PPS12 4.9 states "The infrastructure planning process should identify, as far as possible: infrastructure needs and costs". Neither needs nor, especially, costs have been identified and the Core Strategy is therefore unsound.

The district's highways suffer from years of under investment and over use. The Core Strategy proposes to fund infrastructure improvements through use of Standard Charges. However, no detail is provided and no attempt made to identify the likely scale of such charges. It is therefore unclear if use of Standard Charges is financially viable.

Policy T2 provides a list of required highway improvements. The list contains most of the more major roads in the District including Rectory Lane, which has a single track, traffic light controlled railway bridge. 1200 dwellings are proposed for the northern end of Rectory Road and a further 175 at the southern end. The cost of addressing the railway bridge bottleneck will be significant but is not mentioned.

No attempt is made to either cost these charges or explain how improvements not linked to any one specific development will be paid for (eg B1013; Ashingdon Road; a network of walking, cycling, bridleways).

The concept of paying for improvements through use of Standard Charges is totally unproven and unsound.

Summary: PPS12 4.9 states "The infrastructure planning process should identify, as far as possible: infrastructure needs and costs". Neither needs nor, especially, costs have been identified and the Core Strategy is therefore unsound.

Full Text: Highway & Traffic Implications

1. Proposals for moving employment to out of town locations, at either end of the district, with no existing public transport links, are contrary to government policy PPG4. It also contravenes the Core Strategy's stated aims of reducing carbon emissions; reliance on car transport and providing "an integrated network of cycle paths".

The District of Rochford is predominately spread on a West/East axis along the railway line. Hockley is located in the middle of the district and the two estates are adjacent to the railway station. Bus services are poor with just 3* an hour (following a recent 50% reduction in services) and the operator has admitted they cannot compete with the railway making improvements to new sites away from major centres unlikely. (* one of the 3 services is paid for by ECC on a 6 mth trial and may be terminated in the new year).

However, the Core Strategy proposes to relocate these two estates to a greenfield site near the airport. This site is 2-3 miles from the nearest railway station and there are currently no bus services to the area. As a result, RDC are proposing to upgrade the nearest road to a dual-carriageway, although the main connecting road (the B1013), which runs through Hockley, will remain single-carriageway and is already at 72% of capacity (ECC Highways stats). This is despite extra traffic expected in the area as a result of the Joint Area Action Plan (JAAP) which proposes considerable growth at neighbouring Southend Airport, as well as the new industrial estate.

The site selected for the new industrial estate also contravenes PPS4 which states;

* (EC7.3C) "out-of-centre sites, with preference given to sites which are or will be well served by a choice of means of transport and which are close to the centre and have a high likelihood of forming links with the centre. There is no existing public transport and no obvious likelihood of forming links with any existing centres.

* EC7.5 1 "whether the site is or will be accessible and well served by a choice of means of transport, especially public transport, walking and cycling, as well as by car". Its remote location. Accessed by the narrow, busy B1013 is not suitable for access by cycle or on foot.

It also contravenes PPS1 (27 vii) "Reduce the need to travel and encourage accessible public transport provision to secure more sustainable patterns of transport development. Planning should actively manage patterns of urban growth to make the fullest use of public transport and focus development in existing centres and near to major public transport interchanges".

The Core Strategy also contravenes its own policy T1 and is unsound.

Summary:

Proposals for moving employment to out of town locations, at either end of the district, with no existing public transport links, are contrary to government policy PPG4 & PPS1. It also contravenes the Core Strategy's stated aims of reducing carbon emissions; reliance on car transport and providing "an integrated network of cycle paths".

The Core Strategy also contravenes its own policy T1 and is unsound.

2. The Transport Evidence Base has not been re-evaluated following the decision to impose extra housing on the Eldon Way & Foundry Industrial Estates. ECC Highways have confirmed that the B1013 is running at 72% of its maximum theoretical capacity) and the effect of extra housing in Hockley (as well as Hawkwell) has not been re-evaluated and it is unclear what improvements will be required and whether they can be physically achieved.

Thus the proposals are not founded on a robust and credible evidence base and are unsound

3. RDC are proposing to scatter housing across the district in around 12 or sites but no detailed consideration has been given to the implications for highways across the District. The "Core Strategy" is not a strategy but simply a collection of disparate sites. Many roads across the District are at or near capacity but no modelling has been undertaken to determine the impacts or the funding required to upgrade them. At the Central Area Committee on 25 June 2009, RDC stated (in response to a question):

"Rochford Council is not the highway authority, but is working closely with Essex County Council to identify highway infrastructure requirements. Highway infrastructure improvements will be set out in the Core Strategy and other subsequent Development Plan Documents as required. These will be fed into the next version of the Essex Local

16284 Object

CHAPTER 10 Policy T2 - Highways Improvements

Transport Plan, which is effectively a bidding document for funds to implement highway infrastructure improvements, schemes to tackle congestion, etc.

The District Council is working closely with the Essex County Council to ensure that highway infrastructure identified in the Core Strategy can be delivered."

It is clear that (i) the combined impact of scattering houses across the District and (ii) relocating Eldon Way/Foundry Industrial Estates to the very edge of the District with no public transport services will exacerbate existing problems. It is also clear that the extent of improvements required is both unknown and not funded and the proposal is unsound.

Summary:

RDC are proposing to scatter housing across the district in around 12 or sites but no detailed consideration has been given to the implications for highways across the District. Many roads across the District are at or near capacity but no modelling has been undertaken to determine the impacts

It is clear that (i) the combined impact of scattering houses across the District and (ii) relocating Eldon Way/Foundry Industrial Estates with no public transport services will exacerbate existing problems. It is clear that the extent of improvements required is both unknown and not funded and the proposal is unsound.

4. PPS12 4.9 states "The infrastructure planning process should identify, as far as possible: infrastructure needs and costs". Neither needs nor, especially, costs have been identified and the Core Strategy is therefore unsound.

The district's highways suffer from years of under investment and over use. The Core Strategy proposes to fund infrastructure improvements through use of Standard Charges. However, no detail is provided and no attempt made to identify the likely scale of such charges. It is therefore unclear if use of Standard Charges is financially viable.

Policy T2 provides a list of required highway improvements. The list contains most of the more major roads in the District including Rectory Lane, which has a single track, traffic light controlled railway bridge. 1200 dwellings are proposed for the northern end of Rectory Road and a further 175 at the southern end. The cost of addressing the railway bridge bottleneck will be significant but is not mentioned.

No attempt is made to either cost these charges or explain how improvements not linked to any one specific development will be paid for (eg B1013; Ashingdon Road; a network of walking, cycling, bridleways).

The concept of paying for improvements through use of Standard Charges is totally unproven and unsound.

Summary:

PPS12 4.9 states "The infrastructure planning process should identify, as far as possible: infrastructure needs and costs". Neither needs nor, especially, costs have been identified and the Core Strategy is therefore unsound.

The Core Strategy proposes to fund infrastructure improvements through use of Standard Charges. However, no detail is provided and no attempt made to identify the likely scale of such charges. It is therefore unclear if use of Standard Charges is financially viable.

5. SERT is put forward as a solution to reducing car use but it will only skirt the edge of the district and the Core Strategy acknowledges there is only "potential" to do so in the future. SERT is not realistic or reliable a solution and the proposal is therefore unsound.

6. Previous consultations ignored by RDC:

* The Hockley Parish Plan (dated 2007), clearly states that residents are strongly against any large scale housing development in Hockley, but if there has to be additional housing, then there should be no loss of greenbelt or open spaces, and no large housing estate developments. It was also stated that any developments must be matched by the appropriate levels of infrastructure.

* The proposals also ignore the 95% rejection rate of respondents to RDC's own Hockley Area Plan (HAAP) Consultation (2009), which included specific proposals for Eldon Way (although HAAP did not even mention the adjoining Foundry Industrial Estate). Why have a consultation and ignore it?

Thus the proposals are not founded on a robust and credible evidence base and are unsound.

Summary:

Previous consultations ignored by RDC:

The proposals ignore the 95% rejection rate of respondents to RDC's own Hockley Area Plan (HAAP) Consultation (2009), which included specific proposals for Eldon Way (although HAAP did not even mention the adjoining Foundry Industrial Estate). Why have a consultation and ignore it?

Core Strategy Submission Document

16284 Object

CHAPTER 10 Policy T2 - Highways Improvements

Thus the proposals are not founded on a robust and credible evidence base and are unsound

7. RDC have not consulted on the very specific proposals to relocate the Eldon Way and Foundry Industrial Estates

* The previous CS Strategy stated "we will look at opportunities for more valuable and appropriate uses of the industrial land" with absolutely no consultation at all on concept of moving existing EW businesses entirely

* the Foundry Industrial Estate has never even been previously mentioned in any plan version; A recent amendment to the Core Strategy states this omission was due to a typing error!

* The Urban Capacity study stated a "low probability" of housing and did not even mention the Foundry Estate

Thus the proposals are they are not founded on a robust and credible evidence base and are unsound.

Summary:

RDC have not consulted on the very specific proposals to relocate the Eldon Way and Foundry Industrial Estates

The previous CS Strategy stated "we will look at opportunities for more valuable and appropriate uses of the industrial land" with absolutely no consultation at all on concept of moving existing EW businesses entirely

the Foundry Industrial Estate has never even been previously mentioned;

The Urban Capacity study stated a "low probability" of housing and did not even mention the Foundry Estate

Thus the proposals are they are not founded on a robust and credible evidence base and are unsound.

8. Eldon Way and Foundry Industrial Estates form a significant part of the ongoing Hockley Area Action Plan (HAAP) consultation but the Core Strategy proposals pre-empt the next stage of the HAAP consultation.

Neither the Core Strategy nor HAAP define its status relevant to the other plan and subsequent priorities. Why is there no cross-referencing between concurrent plans affecting the exact same piece of land?

There are also inconsistencies between the Core Strategy & HAAP regarding the description of proposed uses for the two industrial estates. The Core Strategy refers to Leisure, Commercial and Residential whilst HAAP mentions a "village green, introducing a significant area of public open space". There is not sufficient space for both and the Core Strategy is again pre-empting the ongoing HAAP.

If a decision is taken now, as part of the Core Strategy, to relocate all the existing businesses on the two estates, it will set a legal precedent which HAAP will need to follow and renders the next stage of HAAP virtually redundant. Particularly given the 95% rejection rate of respondents to the previous round of HAAP such an approach is entirely undemocratic and unsound.

Summary:

The Core Strategy proposals pre-empt the next stage of the HAAP consultation and neither defines its status relevant to the other plan and subsequent priorities.

There are also inconsistencies between the Core Strategy & HAAP.

If a decision is taken as part of the Core Strategy, to relocate all the existing businesses on the two estates, it will set a legal precedent which HAAP will need to follow and renders the next stage of HAAP virtually redundant. Particularly given the 95% rejection rate of respondents to the previous round of HAAP such an approach is entirely undemocratic and unsound.

9. PPS12, 4.6, states that Cores Strategies should be flexible and "should be able to show how they will handle contingencies". Several large planning applications have already been submitted to RDC proposing developments outside the Core Strategy which does not indicate how such applications will be handled and does not comply with PPS12. Neither have RDC been able to advise residents how such changes will be made and the strategy is unsound.

10. THE Core Strategy misrepresents the findings of The Retail & Leisure Study (R&LS) 2008.

The Core Strategy states (12.38) "The Retail & Leisure Study indicates Hockley has great potential. Hockley has been identified as having a need for additional convenience floorspace".

Whereas, the R&LS actually states:

1) (10.26) "the scale of need does not lend itself to a foodstore capable of retaining a significant proportion of main food

Core Strategy Submission Document

16284 Object

CHAPTER 10 Policy T2 - Highways Improvements

shopping expenditure.

2) (10.28) "There is no immediate capacity for additional floor space."

3) (10.29) "we recommend that focus be maintained on developing Hockley's

existing strengths, rather than retail expansion"

4) 10.31 "The current nature of Hockley does not lend itself to classification as a 'town centre' as defined by PPS6. Moreover, we have identified that it is a very small catchment population. Accordingly, the Council may wish to consider reclassifying Hockley from a town centre to a district centre".

The Core Strategy is inaccurate, misleading and unsound.

Summary:

The Core Strategy misrepresents the findings of The Retail & Leisure Study (R&LS) 2008. The Core Strategy states "The Retail & Leisure Study states Hockley has great potential and has a need for additional convenience floorspace". Whereas, the R&LS states: 1) "does not lend itself to a foodstore capable of retaining a significant proportion of main food shopping expenditure. 2) "There is no immediate capacity for additional floor space." 3) "we recommend that focus be maintained on developing Hockley's existing strengths." 4) " the Council may wish to consider reclassifying Hockley from a town centre to a district centre".

Summary:

The Transport Evidence Base has not been re-evaluated following the decision to impose extra housing on the Eldon Way & Foundry Industrial Estates. ECC Highways have confirmed that the B1013 is running at 72% of its maximum theoretical capacity) and the effect of extra housing in Hockley (as well as Hawkwell) has not been re-evaluated and it is unclear what improvements will be required and whether they can be physically achieved.

Thus the proposals are not founded on a robust and credible evidence base and are unsound

Full Text: Highway & Traffic Implications

1. Proposals for moving employment to out of town locations, at either end of the district, with no existing public transport links, are contrary to government policy PPG4. It also contravenes the Core Strategy's stated aims of reducing carbon emissions; reliance on car transport and providing "an integrated network of cycle paths".

The District of Rochford is predominately spread on a West/East axis along the railway line. Hockley is located in the middle of the district and the two estates are adjacent to the railway station. Bus services are poor with just 3* an hour (following a recent 50% reduction in services) and the operator has admitted they cannot compete with the railway making improvements to new sites away from major centres unlikely. (* one of the 3 services is paid for by ECC on a 6 mth trial and may be terminated in the new year).

However, the Core Strategy proposes to relocate these two estates to a greenfield site near the airport. This site is 2-3 miles from the nearest railway station and there are currently no bus services to the area. As a result, RDC are proposing to upgrade the nearest road to a dual-carriageway, although the main connecting road (the B1013), which runs through Hockley, will remain single-carriageway and is already at 72% of capacity (ECC Highways stats). This is despite extra traffic expected in the area as a result of the Joint Area Action Plan (JAAP) which proposes considerable growth at neighbouring Southend Airport, as well as the new industrial estate.

The site selected for the new industrial estate also contravenes PPS4 which states;

* (EC7.3C) "out-of-centre sites, with preference given to sites which are or will be well served by a choice of means of transport and which are close to the centre and have a high likelihood of forming links with the centre. There is no existing public transport and no obvious likelihood of forming links with any existing centres.

* EC7.5 1 "whether the site is or will be accessible and well served by a choice of means of transport, especially public transport, walking and cycling, as well as by car". Its remote location. Accessed by the narrow, busy B1013 is not suitable for access by cycle or on foot.

It also contravenes PPS1 (27 vii) "Reduce the need to travel and encourage accessible public transport provision to secure more sustainable patterns of transport development. Planning should actively manage patterns of urban growth to make the fullest use of public transport and focus development in existing centres and near to major public transport interchanges".

The Core Strategy also contravenes its own policy T1 and is unsound.

Summary:

Proposals for moving employment to out of town locations, at either end of the district, with no existing public transport links, are contrary to government policy PPG4 & PPS1. It also contravenes the Core Strategy's stated aims of reducing carbon emissions; reliance on car transport and providing "an integrated network of cycle paths".

The Core Strategy also contravenes its own policy T1 and is unsound.

2. The Transport Evidence Base has not been re-evaluated following the decision to impose extra housing on the Eldon Way & Foundry Industrial Estates. ECC Highways have confirmed that the B1013 is running at 72% of its maximum theoretical capacity) and the effect of extra housing in Hockley (as well as Hawkwell) has not been re-evaluated and it is unclear what improvements will be required and whether they can be physically achieved.

Thus the proposals are not founded on a robust and credible evidence base and are unsound

3. RDC are proposing to scatter housing across the district in around 12 or sites but no detailed consideration has been given to the implications for highways across the District. The "Core Strategy" is not a strategy but simply a collection of disparate sites. Many roads across the District are at or near capacity but no modelling has been undertaken to determine the impacts or the funding required to upgrade them. At the Central Area Committee on 25 June 2009, RDC stated (in response to a question):

"Rochford Council is not the highway authority, but is working closely with Essex County Council to identify highway infrastructure requirements. Highway infrastructure improvements will be set out in the Core Strategy and other subsequent Development Plan Documents as required. These will be fed into the next version of the Essex Local

16286 Object

CHAPTER 10 Policy T2 - Highways Improvements

Transport Plan, which is effectively a bidding document for funds to implement highway infrastructure improvements, schemes to tackle congestion, etc.

The District Council is working closely with the Essex County Council to ensure that highway infrastructure identified in the Core Strategy can be delivered."

It is clear that (i) the combined impact of scattering houses across the District and (ii) relocating Eldon Way/Foundry Industrial Estates to the very edge of the District with no public transport services will exacerbate existing problems. It is also clear that the extent of improvements required is both unknown and not funded and the proposal is unsound.

Summary:

RDC are proposing to scatter housing across the district in around 12 or sites but no detailed consideration has been given to the implications for highways across the District. Many roads across the District are at or near capacity but no modelling has been undertaken to determine the impacts

It is clear that (i) the combined impact of scattering houses across the District and (ii) relocating Eldon Way/Foundry Industrial Estates with no public transport services will exacerbate existing problems. It is clear that the extent of improvements required is both unknown and not funded and the proposal is unsound.

4. PPS12 4.9 states "The infrastructure planning process should identify, as far as possible: infrastructure needs and costs". Neither needs nor, especially, costs have been identified and the Core Strategy is therefore unsound.

The district's highways suffer from years of under investment and over use. The Core Strategy proposes to fund infrastructure improvements through use of Standard Charges. However, no detail is provided and no attempt made to identify the likely scale of such charges. It is therefore unclear if use of Standard Charges is financially viable.

Policy T2 provides a list of required highway improvements. The list contains most of the more major roads in the District including Rectory Lane, which has a single track, traffic light controlled railway bridge. 1200 dwellings are proposed for the northern end of Rectory Road and a further 175 at the southern end. The cost of addressing the railway bridge bottleneck will be significant but is not mentioned.

No attempt is made to either cost these charges or explain how improvements not linked to any one specific development will be paid for (eg B1013; Ashingdon Road; a network of walking, cycling, bridleways).

The concept of paying for improvements through use of Standard Charges is totally unproven and unsound.

Summary:

PPS12 4.9 states "The infrastructure planning process should identify, as far as possible: infrastructure needs and costs". Neither needs nor, especially, costs have been identified and the Core Strategy is therefore unsound.

The Core Strategy proposes to fund infrastructure improvements through use of Standard Charges. However, no detail is provided and no attempt made to identify the likely scale of such charges. It is therefore unclear if use of Standard Charges is financially viable.

5. SERT is put forward as a solution to reducing car use but it will only skirt the edge of the district and the Core Strategy acknowledges there is only "potential" to do so in the future. SERT is not realistic or reliable a solution and the proposal is therefore unsound.

6. Previous consultations ignored by RDC:

* The Hockley Parish Plan (dated 2007), clearly states that residents are strongly against any large scale housing development in Hockley, but if there has to be additional housing, then there should be no loss of greenbelt or open spaces, and no large housing estate developments. It was also stated that any developments must be matched by the appropriate levels of infrastructure.

* The proposals also ignore the 95% rejection rate of respondents to RDC's own Hockley Area Plan (HAAP) Consultation (2009), which included specific proposals for Eldon Way (although HAAP did not even mention the adjoining Foundry Industrial Estate). Why have a consultation and ignore it?

Thus the proposals are not founded on a robust and credible evidence base and are unsound.

Summary:

Previous consultations ignored by RDC:

The proposals ignore the 95% rejection rate of respondents to RDC's own Hockley Area Plan (HAAP) Consultation (2009), which included specific proposals for Eldon Way (although HAAP did not even mention the adjoining Foundry Industrial Estate). Why have a consultation and ignore it?

Core Strategy Submission Document

16286 Object

CHAPTER 10 Policy T2 - Highways Improvements

Thus the proposals are not founded on a robust and credible evidence base and are unsound

7. RDC have not consulted on the very specific proposals to relocate the Eldon Way and Foundry Industrial Estates

* The previous CS Strategy stated "we will look at opportunities for more valuable and appropriate uses of the industrial land" with absolutely no consultation at all on concept of moving existing EW businesses entirely

* the Foundry Industrial Estate has never even been previously mentioned in any plan version; A recent amendment to the Core Strategy states this omission was due to a typing error!

* The Urban Capacity study stated a "low probability" of housing and did not even mention the Foundry Estate

Thus the proposals are they are not founded on a robust and credible evidence base and are unsound.

Summary:

RDC have not consulted on the very specific proposals to relocate the Eldon Way and Foundry Industrial Estates

The previous CS Strategy stated "we will look at opportunities for more valuable and appropriate uses of the industrial land" with absolutely no consultation at all on concept of moving existing EW businesses entirely

the Foundry Industrial Estate has never even been previously mentioned;

The Urban Capacity study stated a "low probability" of housing and did not even mention the Foundry Estate

Thus the proposals are they are not founded on a robust and credible evidence base and are unsound.

8. Eldon Way and Foundry Industrial Estates form a significant part of the ongoing Hockley Area Action Plan (HAAP) consultation but the Core Strategy proposals pre-empt the next stage of the HAAP consultation.

Neither the Core Strategy nor HAAP define its status relevant to the other plan and subsequent priorities. Why is there no cross-referencing between concurrent plans affecting the exact same piece of land?

There are also inconsistencies between the Core Strategy & HAAP regarding the description of proposed uses for the two industrial estates. The Core Strategy refers to Leisure, Commercial and Residential whilst HAAP mentions a "village green, introducing a significant area of public open space". There is not sufficient space for both and the Core Strategy is again pre-empting the ongoing HAAP.

If a decision is taken now, as part of the Core Strategy, to relocate all the existing businesses on the two estates, it will set a legal precedent which HAAP will need to follow and renders the next stage of HAAP virtually redundant. Particularly given the 95% rejection rate of respondents to the previous round of HAAP such an approach is entirely undemocratic and unsound.

Summary:

The Core Strategy proposals pre-empt the next stage of the HAAP consultation and neither defines its status relevant to the other plan and subsequent priorities.

There are also inconsistencies between the Core Strategy & HAAP.

If a decision is taken as part of the Core Strategy, to relocate all the existing businesses on the two estates, it will set a legal precedent which HAAP will need to follow and renders the next stage of HAAP virtually redundant. Particularly given the 95% rejection rate of respondents to the previous round of HAAP such an approach is entirely undemocratic and unsound.

9. PPS12, 4.6, states that Cores Strategies should be flexible and "should be able to show how they will handle contingencies". Several large planning applications have already been submitted to RDC proposing developments outside the Core Strategy which does not indicate how such applications will be handled and does not comply with PPS12. Neither have RDC been able to advise residents how such changes will be made and the strategy is unsound.

10. THE Core Strategy misrepresents the findings of The Retail & Leisure Study (R&LS) 2008.

The Core Strategy states (12.38) "The Retail & Leisure Study indicates Hockley has great potential. Hockley has been identified as having a need for additional convenience floorspace".

Whereas, the R&LS actually states:

1) (10.26) "the scale of need does not lend itself to a foodstore capable of retaining a significant proportion of main food

Core Strategy Submission Document

16286 Object

CHAPTER 10 Policy T2 - Highways Improvements

shopping expenditure.

2) (10.28) "There is no immediate capacity for additional floor space."

3) (10.29) "we recommend that focus be maintained on developing Hockley's

existing strengths, rather than retail expansion"

4) 10.31 "The current nature of Hockley does not lend itself to classification as a 'town centre' as defined by PPS6. Moveover, we have identified that it is a very small catchment population. Accordingly, the Council may wish to consider reclassifying Hockley from a town centre to a district centre".

The Core Strategy is inaccurate, misleading and unsound.

Summary:

The Core Strategy misrepresents the findings of The Retail & Leisure Study (R&LS) 2008. The Core Strategy states "The Retail & Leisure Study states Hockley has great potential and has a need for additional convenience floorspace".

Whereas, the R&LS states: 1) "does not lend itself to a foodstore capable of retaining a significant proportion of main food shopping expenditure. 2) "There is no immediate capacity for additional floor space." 3) "we recommend that focus be maintained on developing Hockley's existing strengths." 4) " the Council may wish to consider reclassifying Hockley from a town centre to a district centre".

Summary:

RDC are proposing to scatter housing across the district in around 12 or sites but no detailed consideration has been given to the implications for highways across the District. Many roads across the District are at or near capacity but no modelling has been undertaken to determine the impacts

It is clear that (i) the combined impact of scattering houses across the District and (ii) relocating Eldon Way/Foundry Industrial Estates with no public transport services will exacerbate existing problems. It is clear that the extent of improvements required is both unknown and not funded and the proposal is unsound.

CHAPTER 10 Policy T2 - Highways Improvements

Respondent: Joan and Phil Smith [13749]

46 Woodpond Avenue
Hockley
Essex
SS5 4PX

Agent: N/A

Full Text: Re: Core Strategy for Hockley Redevelopment

I object to the Core Strategy for the following reasons;

You are ignoring the views of the local residents, who have overwhelmingly stated via the Hockley Parish Plan that they do not want any large-scale housing development in Hockley, but if there has to be some additional housing, there must be no loss of greenbelt or open spaces and any developments must be matched by the appropriate levels of infrastructure.

Our village needs improvements to build on what we have now rather than a long drawn out proposal, which, by the time it is agreed and completed will have seen Hockley become just a huge housing estate without a thriving centre, because many local businesses will have disappeared due to the dreadfully inadequate transport links.

Our roads simply cannot cope with the existing traffic volumes let alone the massive increase in traffic, which will result from the relocation of businesses and numerous housing developments.

Our village is surrounded by some of the most beautiful countryside in the district which we do not want to see disappear forever.

Listed below are some of the technical points as to why I object to the Core Strategy and why I believe it to be inaccurate, misleading and unsound.

By proposing to move employment at Hockley's two business estates to a green field site near the airport, which has no existing public transport links and being 2-3 miles from the nearest railway station, is contrary to government policy PPG4. It also contravenes the Core Strategy's stated aims of reducing carbon emissions by placing a reliance on car transport as a means of getting to work.

Though RDC are proposing to upgrade the nearest road to a dual carriageway, the main connecting road (the B1013), which runs through Hockley, will remain single-carriageway. This road is already horrendously busy and virtually grid locked at peak times, so this is quite unbelievable that with the predicted expansion of the airport and new industrial estate, there is no provision for the improvement of the B1013 through Hockley. The proposed development of the business estates for housing (and additional housing proposed for Hawkwell) also means an increase in the volume of traffic in the Hockley area with no provision for improvement or expansion to cope with the higher volume.

The site selected for the new industrial estate contravenes PPS4, which states that for "out-of-centre sites, preference is given to sites which are or will be well served by a choice of means of transport, especially public transport, walking and cycling, as well as by car and which are close to the centre and have a high likelihood of forming links with the centre. As there is no existing public transport, there is no obvious likelihood of forming links with any existing centres. In addition, because of its remote location, accessed by the narrow, busy B1013; it is not suitable for access by cycle or on foot.

It also contravenes PPS1, which states reducing the need to travel and encourage accessible public transport provision to secure more sustainable patterns of transport development. Planning should actively manage patterns of urban growth to make the fullest use of public transport and focus development in existing centres and near to major public transport interchanges".

PPS12 4.9 states the infrastructure planning process should identify, as far as possible: infrastructure needs and costs. Neither needs nor, especially, costs have been identified. The district's highways suffer from years of under investment and over use. The Core Strategy proposes to fund infrastructure improvements through use of Standard Charges. However, no detail is provided and no attempt made to identify the likely scale of such charges. It is therefore unclear if use of Standard Charges is financially viable.

16434 Object

CHAPTER 10 Policy T2 - Highways Improvements

Policy T2 provides a list of required highway improvements. The list contains most of the more major roads in the District including Rectory Lane, which has a single track, traffic light controlled railway bridge. 1200 dwellings are proposed for the northern end of Rectory Road and a further 175 at the southern end. The cost of addressing the railway bridge bottleneck will be significant but is not mentioned. No attempt is made to either cost these charges or explain how improvements not linked to any one specific development will be paid for (eg B1013; Ashingdon Road; a network of walking, cycling, bridleways).

The proposals also ignore the 95% rejection rate of respondents to RDC's own Hockley Area Plan (HAAP) Consultation (2009), which included specific proposals for Eldon Way (although HAAP did not even mention the adjoining Foundry Industrial Estate). Eldon Way and Foundry Industrial Estates form a significant part of the ongoing Hockley Area Action Plan (HAAP) consultation but the Core Strategy proposals pre-empt the next stage of the HAAP consultation. Neither the Core Strategy nor HAAP define its status relevant to the other plan and subsequent priorities. There no cross-referencing between concurrent plans affecting the exact same piece of land.

There are also inconsistencies between the Core Strategy & HAAP regarding the description of proposed uses for the two industrial estates. The Core Strategy refers to Leisure, Commercial and Residential whilst HAAP mentions a "village green, introducing a significant area of public open space". There is not sufficient space for both and the Core Strategy is again pre-empting the ongoing HAAP.

If a decision is taken now, as part of the Core Strategy, to relocate all the existing businesses on the two estates, it will set a legal precedent, which HAAP will need to follow, and renders the next stage of HAAP virtually redundant. Particularly given the 95% rejection rate of respondents to the previous round of HAAP such an approach is entirely undemocratic and unsound.

THE Core Strategy misrepresents the findings of The Retail & Leisure Study (R&LS) 2008. It states "The Retail & Leisure Study indicates Hockley has great potential. Hockley has been identified as having a need for additional convenience floor space".

What the R&LS actually states is:

- 1) (10.26) "the scale of need does not lend itself to a foodstore capable of retaining a significant proportion of main food shopping expenditure.
- 2) (10.28) "There is no immediate capacity for additional floor space."
- 3) (10.29) "we recommend that focus be maintained on developing Hockley's existing strengths, rather than retail expansion"
- 4) 10.31 "The current nature of Hockley does not lend itself to classification as a 'town centre' as defined by PPS6. Moreover, we have identified that it is a very small catchment population. Accordingly, the Council may wish to consider reclassifying Hockley from a town centre to a district centre".

Invest in what we already have rather than forcing upon us something none of us have asked for. Most people would agree that Hockley needs a facelift but it does not need changing beyond all recognition. This strategy does not propose to deal with the issues that affect this area now, and does not propose to deal with these same issues that will be exacerbated further by the proposals that are being made. Attached are some ideas for relatively quickly achievable solutions, which would enhance the village and deal with some of the traffic problems, without losing "Hockley". We live here because we like it - if we didn't we would have moved!

Make the Spa Pub the roundabout, which would greatly reduce the junction exit combinations that exist at the current mini roundabout.

Traffic will still be able to flow when the brewery lorry parks up - it is very dangerous trying to manoeuvre round it onto that mini roundabout, as you cannot see vehicles coming the other way.

Core Strategy Submission Document

O - 16434 - 13749 - Policy T2 - Highways Improvements - ii

16434 Object

CHAPTER 10 Policy T2 - Highways Improvements

Hockley Ideas:

Demolish the "Alldays" building and use that space to create the "village square", which could be landscaped or used in the way the Rayleigh Market car park is used - farmers markets, market days, parking on non market days. This would maintain the existing focal point of Hockley, the High Street, therefore not being detrimental to the shops on the other side of the road. It would also provide a possible link to the Leisure facilities in Eldon Way.

Summary:

Policy T2 provides a list of required highway improvements. The list contains most of the more major roads in the District including Rectory Lane, which has a single track, traffic light controlled railway bridge. 1200 dwellings are proposed for the northern end of Rectory Road and a further 175 at the southern end. The cost of addressing the railway bridge bottleneck will be significant but is not mentioned. No attempt is made to either cost these charges or explain how improvements not linked to any one specific development will be paid for (eg B1013; Ashingdon Road; a network of walking, cycling, bridleways).

Full Text:

Highway & Traffic Implications

Proposals for moving employment to out of town locations, at either end of the district, with no existing public transport links, are contrary to government policy PPG4. It also contravenes the Core Strategy's stated aims of reducing carbon emissions; reliance on car transport and providing "an integrated network of cycle paths".

The District of Rochford is predominately spread on a West/East axis along the railway line. Hockley is located in the middle of the district and the two estates are adjacent to the railway station. Bus services are poor with just 3* an hour (following a recent 50% reduction in services) and the operator has admitted they cannot compete with the railway making improvements to new sites away from major centres unlikely. (* one of the 3 services is paid for by ECC on a 6 mth trial and may be terminated in the new year).

However, the Core Strategy proposes to relocate these two estates to a greenfield site near the airport. This site is 2-3 miles from the nearest railway station and there are currently no bus services to the area. As a result, RDC are proposing to upgrade the nearest road to a dual-carriageway, although the main connecting road (the B1013), which runs through Hockley, will remain single-carriageway and is already at 72% of capacity (ECC Highways stats). This is despite extra traffic expected in the area as a result of the Joint Area Action Plan (JAAP) which proposes considerable growth at neighbouring Southend Airport, as well as the new industrial estate.

The site selected for the new industrial estate also contravenes PPS4 which states;
â€¢ (EC7.3C) "out-of-centre sites, with preference given to sites which are or will be well served by a choice of means of transport and which are close to the centre and have a high likelihood of forming links with the centre. There is no existing public transport and no obvious likelihood of forming links with any existing centres.
â€¢ EC7.5 1 "whether the site is or will be accessible and well served by a choice of means of transport, especially public transport, walking and cycling, as well as by car". Its remote location. Accessed by the narrow, busy B1013 is not suitable for access by cycle or on foot.

It also contravenes PPS1 (27 vii) "Reduce the need to travel and encourage accessible public transport provision to secure more sustainable patterns of transport development. Planning should actively manage patterns of urban growth to make the fullest use of public transport and focus development in existing centres and near to major public transport interchanges".

The Core Strategy also contravenes its own policy T1 and is unsound.

Summary:

Proposals for moving employment to out of town locations, at either end of the district, with no existing public transport links, are contrary to government policy PPG4 & PPS1. It also contravenes the Core Strategy's stated aims of reducing carbon emissions; reliance on car transport and providing "an integrated network of cycle paths".

The Core Strategy also contravenes its own policy T1 and is unsound.

The Transport Evidence Base has not been re-evaluated following the decision to impose extra housing on the Eldon Way & Foundry Industrial Estates. ECC Highways have confirmed that the B1013 is running at 72% of its maximum theoretical capacity) and the effect of extra housing in Hockley (as well as Hawkwell) has not been re-evaluated and it is unclear what improvements will be required and whether they can be physically achieved.

Thus the proposals are not founded on a robust and credible evidence base and are unsound
RDC are proposing to scatter housing across the district in around 12 or sites but no detailed consideration has been given to the implications for highways across the District. The "Core Strategy" is not a strategy but simply a collection of disparate sites. Many roads across the District are at or near capacity but no modelling has been undertaken to determine the impacts or the funding required to upgrade them. At the Central Area Committee on 25 June 2009, RDC stated (in response to a question):

"Rochford Council is not the highway authority, but is working closely with Essex County Council to identify highway infrastructure requirements. Highway infrastructure improvements will be set out in the Core Strategy and other subsequent Development Plan Documents as required. These will be fed into the next version of the Essex Local Transport Plan, which is effectively a bidding document for funds to implement highway infrastructure improvements, schemes to tackle congestion, etc.

The District Council is working closely with the Essex County Council to ensure that highway infrastructure identified in the Core Strategy can be delivered."

It is clear that (i) the combined impact of scattering houses across the District and (ii) relocating Eldon Way/Foundry Industrial Estates to the very edge of the District with no public transport services will exacerbate existing problems. It is

16440 Object

CHAPTER 10 Policy T2 - Highways Improvements

also clear that the extent of improvements required is both unknown and not funded and the proposal is unsound.

Summary:

RDC are proposing to scatter housing across the district in around 12 or sites but no detailed consideration has been given to the implications for highways across the District. Many roads across the District are at or near capacity but no modelling has been undertaken to determine the impacts

It is clear that (i) the combined impact of scattering houses across the District and (ii) relocating Eldon Way/Foundry Industrial Estates with no public transport services will exacerbate existing problems. It is clear that the extent of improvements required is both unknown and not funded and the proposal is unsound.

PPS12 4.9 states "The infrastructure planning process should identify, as far as possible: infrastructure needs and costs". Neither needs nor, especially, costs have been identified and the Core Strategy is therefore unsound.

The district's highways suffer from years of under investment and over use. The Core Strategy proposes to fund infrastructure improvements through use of Standard Charges. However, no detail is provided and no attempt made to identify the likely scale of such charges. It is therefore unclear if use of Standard Charges is financially viable.

Policy T2 provides a list of required highway improvements. The list contains most of the more major roads in the District including Rectory Lane, which has a single track, traffic light controlled railway bridge. 1200 dwellings are proposed for the northern end of Rectory Road and a further 175 at the southern end. The cost of addressing the railway bridge bottleneck will be significant but is not mentioned.

No attempt is made to either cost these charges or explain how improvements not linked to any one specific development will be paid for (eg B1013; Ashingdon Road; a network of walking, cycling, bridleways).

The concept of paying for improvements through use of Standard Charges is totally unproven and unsound.

Summary:

PPS12 4.9 states "The infrastructure planning process should identify, as far as possible: infrastructure needs and costs". Neither needs nor, especially, costs have been identified and the Core Strategy is therefore unsound.

The Core Strategy proposes to fund infrastructure improvements through use of Standard Charges. However, no detail is provided and no attempt made to identify the likely scale of such charges. It is therefore unclear if use of Standard Charges is financially viable.

SERT is put forward as a solution to reducing car use but it will only skirt the edge of the district and the Core Strategy acknowledges there is only "potential" to do so in the future. SERT is not realistic or reliable a solution and the proposal is therefore unsound.

Previous consultations ignored by RDC:

â€¢ The Hockley Parish Plan (dated 2007), clearly states that residents are strongly against any large scale housing development in Hockley, but if there has to be additional housing, then there should be no loss of greenbelt or open spaces, and no large housing estate developments. It was also stated that any developments must be matched by the appropriate levels of infrastructure.

â€¢ The proposals also ignore the 95% rejection rate of respondents to RDC's own Hockley Area Plan (HAAP) Consultation (2009), which included specific proposals for Eldon Way (although HAAP did not even mention the adjoining Foundry Industrial Estate). Why have a consultation and ignore it?

Thus the proposals are not founded on a robust and credible evidence base and are unsound.

Summary:

Previous consultations ignored by RDC:

The proposals ignore the 95% rejection rate of respondents to RDC's own Hockley Area Plan (HAAP) Consultation (2009), which included specific proposals for Eldon Way (although HAAP did not even mention the adjoining Foundry Industrial Estate). Why have a consultation and ignore it?

Thus the proposals are not founded on a robust and credible evidence base and are unsound

RDC have not consulted on the very specific proposals to relocate the Eldon Way and Foundry Industrial Estates
â€¢ The previous CS Strategy stated "we will look at opportunities for more valuable and appropriate uses of the industrial land" with absolutely no consultation at all on concept of moving existing EW businesses entirely
â€¢ the Foundry Industrial Estate has never even been previously mentioned in any plan version; A recent amendment to the Core Strategy states this omission was due to a typing error!
â€¢ The Urban Capacity study stated a "low probability" of housing and did not even mention the Foundry Estate

Thus the proposals are they are not founded on a robust and credible evidence base and are unsound.

Summary:

Core Strategy Submission Document

16440 Object

CHAPTER 10 Policy T2 - Highways Improvements

RDC have not consulted on the very specific proposals to relocate the Eldon Way and Foundry Industrial Estates
â€¢ The previous CS Strategy stated "we will look at opportunities for more valuable and appropriate uses of the industrial land" with absolutely no consultation at all on concept of moving existing EW businesses entirely
â€¢ the Foundry Industrial Estate has never even been previously mentioned;
â€¢ The Urban Capacity study stated a "low probability" of housing and did not even mention the Foundry Estate

Thus the proposals are they are not founded on a robust and credible evidence base and are unsound.

Eldon Way and Foundry Industrial Estates form a significant part of the ongoing Hockley Area Action Plan (HAAP) consultation but the Core Strategy proposals pre-empt the next stage of the HAAP consultation.

Neither the Core Strategy nor HAAP define its status relevant to the other plan and subsequent priorities. Why is there no cross-referencing between concurrent plans affecting the exact same piece of land?

There are also inconsistencies between the Core Strategy & HAAP regarding the description of proposed uses for the two industrial estates. The Core Strategy refers to Leisure, Commercial and Residential whilst HAAP mentions a "village green, introducing a significant area of public open space". There is not sufficient space for both and the Core Strategy is again pre-empting the ongoing HAAP.

If a decision is taken now, as part of the Core Strategy, to relocate all the existing businesses on the two estates, it will set a legal precedent which HAAP will need to follow and renders the next stage of HAAP virtually redundant. Particularly given the 95% rejection rate of respondents to the previous round of HAAP such an approach is entirely undemocratic and unsound.

Summary:

The Core Strategy proposals pre-empt the next stage of the HAAP consultation and neither defines its status relevant to the other plan and subsequent priorities.

There are also inconsistencies between the Core Strategy & HAAP.

If a decision is taken as part of the Core Strategy, to relocate all the existing businesses on the two estates, it will set a legal precedent which HAAP will need to follow and renders the next stage of HAAP virtually redundant. Particularly given the 95% rejection rate of respondents to the previous round of HAAP such an approach is entirely undemocratic and unsound.

PPS12, 4.6, states that Cores Strategies should be flexible and "should be able to show how they will handle contingencies". Several large planning applications have already been submitted to RDC proposing developments outside the Core Strategy which does not indicate how such applications will be handled and does not comply with PPS12. Neither have RDC been able to advise residents how such changes will be made and the strategy is unsound.

THE Core Strategy misrepresents the findings of The Retail & Leisure Study (R&LS) 2008.

The Core Strategy states (12.38) "The Retail & Leisure Study indicates Hockley has great potential. Hockley has been identified as having a need for additional convenience floorspace".

Whereas, the R&LS actually states:

- 1) (10.26) "the scale of need does not lend itself to a foodstore capable of retaining a significant proportion of main food shopping expenditure.
 - 2) (10.28) "There is no immediate capacity for additional floor space."
 - 3) (10.29) "we recommend that focus be maintained on developing Hockley's existing strengths, rather than retail expansion"
 - 4) 10.31 "The current nature of Hockley does not lend itself to classification as a 'town centre' as defined by PPS6. Moreover, we have identified that it is a very small catchment population. Accordingly, the Council may wish to consider reclassifying Hockley from a town centre to a district centre".
- The Core Strategy is inaccurate, misleading and unsound.

Summary:

The Core Strategy misrepresents the findings of The Retail & Leisure Study (R&LS) 2008. Objections to RDC's Core Strategy Submission DPD

Reason Unsound

1. Highway & Traffic Implications

Proposals for moving employment to out of town locations, at either end of the district, with no existing public transport links, are contrary to government policy PPG4. It also contravenes the Core Strategy's stated aims of reducing carbon emissions; reliance on car transport and providing "an integrated network of cycle paths".

The District of Rochford is predominately spread on a West/East axis along the railway line. Hockley is located in the middle of the district and the two estates are adjacent to the railway station. Bus service are poor with just 3* an hour (following a recent 50% reduction in services) and the operator has admitted they cannot compete with the railway making improvements to new sites away from major centres unlikely. (* one of the 3 services is paid for by ECC on a 6 mth trial and may be terminated in the new year).

However, the Core Strategy proposes to relocate these two estates to a greenfield site near the airport. This site is 2-3 miles from the nearest railway station and there are currently no bus services to the area. As a result, RDC are proposing to upgrade the nearest road to a dual-carriageway, although the main connecting road (the B1013), which runs through Hockley, will remain single-carriageway and is already at 72% of capacity (ECC Highways stats). This is despite extra traffic expected in the area as a result of the Joint Area Action Plan (JAAP) which proposes considerable growth at neighbouring Southend Airport, as well as the new industrial estate.

The site selected for the new industrial estate also contravenes PPS4 which states:

(EC7.3C) "out-of-centre site, with preference given to sites which are or will be well served by a choice of means of transport and which are close to the centre and have a high likelihood of forming links with the centre. There is no existing public transport and no obvious likelihood of forming links with any existing centres.

EC7.5 1 "whether the site is or will be accessible and well served by a choice of means of transport, especially public transport, walking and cycling, as well as by car". Its remote location. Accessed by the narrow, busy B1013 is not suitable for access by cycle or on foot.

It also contravenes PPS1 (27 vii) "Reduce the need to travel and encourage accessible public transport provision to secure more sustainable patterns of transport development. Planning should actively manage patterns of urban growth to make the fullest use of public transport and focus development in existing centres and near to major public transport interchanges".

The Core Strategy also contravenes its own policy T1 and is unsound.

2. The Transport Evidence Base has not been re-evaluated following the decision to impose extra housing on the Eldon Way & Foundry Industrial Estates. ECC Highways have confirmed that the B1013 is running at 72% of its maximum theoretical capacity) and the effect of extra housing in Hockley (as well as Hawkwell) has not been re-evaluated and it is unclear what improvements will be required and whether they can be physically achieved.

3. RCD are proposing to scatter housing across the district in around 12 or sites but no detailed consideration has been given to the implications for highways across the District. The "Core Strategy" is not a strategy but simply a collection of disparate sites. Many roads across the District are at or near capacity but no modelling has been undertaken to determine the impacts or the funding required to upgrade them. At the Central Area Committee on 25 June 2009, RDC stated (in response to a question):

"Rochford Council is not the highway authority, but is working closely with Essex County Council to identify highway infrastructure requirements. Highway infrastructure improvements will be set out in the Core Strategy and other subsequent Development Plan Documents as required. These will be fed into the next version of the Essex Local Transport Plan, which is effectively a bidding document for funds to implement highway infrastructure improvements, schemes to tackle congestion, etc.

The District Council is working closely with the Essex County Council to ensure that highway infrastructure identified in the Core Strategy can be delivered."

16487 Object

CHAPTER 10 Policy T2 - Highways Improvements

It is clear that (i) the combined impact of scattering houses across the District and (ii) relocating Eldon Way/Foundry Industrial Estates to the very edge of the District with no public transport services will exacerbate existing problems. It is also clear that the extent of improvements required is both unknown and not funded and the proposal is unsound.

4. PPS12 4.9 states "The infrastructure planning process should identify, as far as possible: infrastructure needs and costs". Neither needs not, especially, costs have been identified and the Core Strategy is therefore unsound.

The district's highways suffer from years of under investment and over use. The Core Strategy proposes to fund infrastructure improvements through use of Standard Charges. However, no detail is provided and no attempt made to identify the likely scale of such charges. Thus it is unclear if use of Standard Charges is financially viable.

Policy T2 provides a list of required highway improvements. The list contains most of the more major roads in the District including Rectory Lane, which has a single track, traffic light controlled railway bridge. 1200 dwellings are proposed for the northern end of Rectory Road and a further 175 at the southern end. The cost of address the railway bridge bottleneck will be significant but is not mentioned.

No attempt is made to either cost these charges or explain how improvements not linked to any one specific development will be paid for (eg B1013; Ashingdon Road; a network of walking, cycling, bridleways).

The concept of paying for improvements through use of Standard Charges is totally unproven and unsound.

5. SERT is put forward as a solution to reducing car use but it will only skirt the edge of the district and the Core Strategy acknowledges there is only "potential" to do so in the future. SERT is not realistic or reliable a solution and the proposal is therefore unsound.

6. Previous consultations ignored by RDC:

The Hockley Parish Plan (dated 2007), clearly states that residents are strongly against any large scale housing development in Hockley, but if there has to be additional housing, then there should be no loss of greenbelt or open spaces, and no large housing estate developments. It was also stated that any developments must be matched by the appropriate levels of infrastructure.

The proposals also ignore the 95% rejection rate of respondents to RDC's own Hockley Area Plan (HAAP) Consultation (2009), which included specific proposals for Eldon Way (although HAAP did not even mention the adjoining Foundry Industrial Estate). Why have a consultation and ignore it?

7. RDC have not consulted on the very specific proposals to relocate the Eldon Way and Foundry Industrial Estates

The previous CS Strategy stated "we will look at opportunities for more valuable and appropriate uses of the industrial land" with absolutely no consultation at all on concept of moving existing EW businesses entirely

The Foundry Industrial Estates has never even been previously mentioned in any plan version; A recent amendment to the Core Strategy acknowledges this omission was due to a typing error!

The Urban Capacity study stated a "low probability" of housing and did not even mention the Foundry Estate

Thus the proposals are they are not founded on a robust and credible evidence base and are unsound.

8. Eldon Way and Foundry Industrial Estates form a significant part of the ongoing HAAP consultation but the Core Strategy proposals pre-empt the next stage of the HAAP consultation.

Neither the Core Strategy or Hockley Area Action Plan (HAAP) defines its status relevant to the other plan and subsequent priorities. Why is there no cross-referencing between concurrent plans affecting the exact same piece of land?

There are also inconsistencies between the Core Strategy & HAAP regarding the description of proposed uses for the two industrial estates. The Core Strategy refers to Leisure, Commercial and Residential whilst HAAP mentions a "village green, introducing a significant area of public open space". There is not sufficient space for both and the Core Strategy is again pre-empting the ongoing HAAP.

If a decision is taken now, as part of the Core Strategy, to relocate all the existing businesses on the two estates, it will set a legal precedent which HAAP will need to follow and renders the next stage of HAAP virtually redundant. Particularly given the 95% rejection rate of respondents to the previous round of HAAP such an approach is entirely undemocratic and unsound.

9. PPS12, 4.6, states that Cores Strategies show be flexible and "should be able to show how they will handle contingencies". Several large planning applications have already been submitted to RDC proposing developments outside the Core Strategy which do not indicate how such applications will be handled and does not comply with

Core Strategy Submission Document

16487 Object

CHAPTER 10 Policy T2 - Highways Improvements

PPS12. Neither have RDC been able to advise residents how such changes will be made and the strategy is unsound.

10. The Core Strategy misrepresents the findings of The Retail & Leisure Study (R&LS) 2008.

The Core Strategy states (12.38) "The Retail & Leisure Study indicates Hockley has great potential. Hockley has been identified as having a need for additional convenience floorspace".

Whereas, the R&LS actually states:

1) (10.26) "the scale of need does not lend itself to a foodstore capable of retaining a significant proportion of main food shopping expenditure.

2) (10.28) "There is no immediate capacity for additional floor space."

3) (10.29) "we recommend that focus be maintained on developing Hockley's existing strengths, rather than retail expansion".

4) 10.31 "The current nature of Hockley does not lend itself to classification as a 'town centre' as defined by PPS6. Moreover, we have identified that it is a very small catchment population. Accordingly, the Council may wish to consider reclassifying Hockley from a town centre to a district centre".

The Core Strategy is inaccurate, misleading and unsound.

Summary:

2. The Transport Evidence Base has not been re-evaluated following the decision to impose extra housing on the Eldon Way & Foundry Industrial Estates. ECC Highways have confirmed that the B1013 is running at 72% of its maximum theoretical capacity) and the effect of extra housing in Hockley (as well as Hawkwell) has not been re-evaluated and it is unclear what improvements will be required and whether they can be physically achieved.

3. RCD are proposing to scatter housing across the district in around 12 or sites but no detailed consideration has been given to the implications for highways across the District. The "Core Strategy" is not a strategy but simply a collection of disparate sites. Many roads across the District are at or near capacity but no modelling has been undertaken to determine the impacts or the funding required to upgrade them. At the Central Area Committee on 25 June 2009, RDC stated (in response to a question):

"Rochford Council is not the highway authority, but is working closely with Essex County Council to identify highway infrastructure requirements. Highway infrastructure improvements will be set out in the Core Strategy and other subsequent Development Plan Documents as required. These will be fed into the next version of the Essex Local Transport Plan, which is effectively a bidding document for funds to implement highway infrastructure improvements, schemes to tackle congestion, etc.

The District Council is working closely with the Essex County Council to ensure that highway infrastructure identified in the Core Strategy can be delivered."

It is clear that (i) the combined impact of scattering houses across the District and (ii) relocating Eldon Way/Foundry Industrial Estates to the very edge of the District with no public transport services will exacerbate existing problems. It is also clear that the extent of improvements required is both unknown and not funded and the proposal is unsound.

Full Text:

1. Highway & Traffic Implications

Proposals for moving employment to out of town locations, at either end of the district, with no existing public transport links, are contrary to government policy PPG4. It also contravenes the Core Strategy's stated aims of reducing carbon emissions; reliance on car transport and providing "an integrated network of cycle paths".

The District of Rochford is predominately spread on a West/East axis along the railway line. Hockley is located in the middle of the district and the two estates are adjacent to the railway station. Bus service are poor with just 3* an hour (following a recent 50% reduction in services) and the operator has admitted they cannot compete with the railway making improvements to new sites away from major centres unlikely. (* one of the 3 services is paid for by ECC on a 6 mth trial and may be terminated in the new year).

However, the Core Strategy proposes to relocate these two estates to a greenfield site near the airport. This site is 2-3 miles from the nearest railway station and there are currently no bus services to the area. As a result, RDC are proposing to upgrade the nearest road to a dual-carriageway, although the main connecting road (the B1013), which runs through Hockley, will remain single-carriageway and is already at 72% of capacity (ECC Highways stats). This is despite extra traffic expected in the area as a result of the Joint Area Action Plan (JAAP) which proposes considerable growth at neighbouring Southend Airport, as well as the new industrial estate.

The site selected for the new industrial estate also contravenes PPS4 which states:

(EC7.3C) "out-of-centre site, with preference given to sites which are or will be well served by a choice of means of transport and which are close to the centre and have a high likelihood of forming links with the centre. There is no existing public transport and no obvious likelihood of forming links with any existing centres.

EC7.5 1 "whether the site is or will be accessible and well served by a choice of means of transport, especially public transport, walking and cycling, as well as by car". Its remote location. Accessed by the narrow, busy B1013 is not suitable for access by cycle or on foot.

It also contravenes PPS1 (27 vii) "Reduce the need to travel and encourage accessible public transport provision to secure more sustainable patterns of transport development. Planning should actively manage patterns of urban growth to make the fullest use of public transport and focus development in existing centres and near to major public transport interchanges".

The Core Strategy also contravenes its own policy T1 and is unsound.

2. The Transport Evidence Base has not been re-evaluated following the decision to impose extra housing on the Eldon Way & Foundry Industrial Estates. ECC Highways have confirmed that the B1013 is running at 72% of its maximum theoretical capacity) and the effect of extra housing in Hockley (as well as Hawkwell) has not been re-evaluated and it is unclear what improvements will be required and whether they can be physically achieved.

Thus the proposals are not founded on a robust and credible evidence base and are unsound.

3. RCD are proposing to scatter housing across the district in around 12 or sites but no detailed consideration has been given to the implications for highways across the District. The "Core Strategy" is not a strategy but simply a collection of disparate sites. Many roads across the District are at or near capacity but no modelling has been undertaken to determine the impacts or the funding required to upgrade them. At the Central Area Committee on 25 June 2009, RDC stated (in response to a question):

"Rochford Council is not the highway authority, but is working closely with Essex County Council to identify highway infrastructure requirements. Highway infrastructure improvements will be set out in the Core Strategy and other subsequent Development Plan Documents as required. These will be fed into the next version of the Essex Local Transport Plan, which is effectively a bidding document for funds to implement highway infrastructure improvements, schemes to tackle congestion, etc.

The District Council is working closely with the Essex County Council to ensure that highway infrastructure identified in the Core Strategy can be delivered."

It is clear that (i) the combined impact of scattering houses across the District and (ii) relocating Eldon Way/Foundry Industrial Estates to the very edge of the District with no public transport services will exacerbate existing problems. It is also clear that the extent of improvements required is both unknown and not funded and the proposal is unsound.

16527 Object

CHAPTER 10 Policy T2 - Highways Improvements

Summary:

RDC are proposing to scatter housing across the district in around 12 or sites but no detailed consideration has been given to the implications for highways across the District. Many roads across the District are at or near capacity but no modelling has been undertaken to determine the impacts.

It is clear that (i) the combined impact of scattering houses across the District and (ii) relocating Eldon Way/Foundry Industrial Estates with no public transport services will exacerbate existing problems. It is clear that the extent of improvements required is both unknown and not funded and the proposal is unsound.

4. PPS12 4.9 states "The infrastructure planning process should identify, as far as possible: infrastructure needs and costs". Neither needs nor, especially, costs have been identified and the Core Strategy is therefore unsound.

The district's highways suffer from years of under investment and over use. The Core Strategy proposes to fund infrastructure improvements through use of Standard Charges. However, no detail is provided and no attempt made to identify the likely scale of such charges. Thus it is unclear if use of Standard Charges is financially viable.

Policy T2 provides a list of required highway improvements. The list contains most of the more major roads in the District including Rectory Lane, which has a single track, traffic light controlled railway bridge. 1200 dwellings are proposed for the northern end of Rectory Road and a further 175 at the southern end. The cost of address the railway bridge bottleneck will be significant but is not mentioned.

No attempt is made to either cost these charges or explain how improvements not linked to any one specific development will be paid for (eg B1013; Ashingdon Road; a network of walking, cycling, bridleways).

The concept of paying for improvements through use of Standard Charges is totally unproven and unsound.

Summary:

PPS12 4.9 states "The infrastructure planning process should identify, as far as possible: infrastructure needs and costs". Neither needs nor, especially, costs have been identified and the Core Strategy is therefore unsound.

The Core Strategy proposes to fund infrastructure improvements through use of Standard Charges. However, no detail is provided and no attempt made to identify the likely scale of such charges. It is therefore unclear if use of Standard Charges is financially viable.

5. SERT is put forward as a solution to reducing car use but it will only skirt the edge of the district and the Core Strategy acknowledges there is only "potential" to do so in the future. SERT is not realistic or reliable a solution and the proposal is therefore unsound.

6. Previous consultations ignored by RDC:

The Hockley Parish Plan (dated 2007), clearly states that residents are strongly against any large scale housing development in Hockley, but if there has to be additional housing, then there should be no loss of greenbelt or open spaces, and no large housing estate developments. It was also stated that any developments must be matched by the appropriate levels of infrastructure.

The proposals also ignore the 95% rejection rate of respondents to RDC's own Hockley Area Plan (HAAP) Consultation (2009), which included specific proposals for Eldon Way (although HAAP did not even mention the adjoining Foundry Industrial Estate). Why have a consultation and ignore it?

Thus the proposals are not founded on a robust and credible evidence base and are unsound.

Summary:

Previous consultations ignored by RDC:

Thus the proposals are not founded on a robust and credible evidence base and are unsound.

7. RDC have not consulted on the very specific proposals to relocate the Eldon Way and Foundry Industrial Estates.

The previous CS Strategy stated "we will look at opportunities for more valuable and appropriate uses of the industrial land" with absolutely no consultation at all on concept of moving existing EW businesses entirely.

The Foundry Industrial Estates has never even been previously mentioned in any plan version; A recent amendment to

16527 Object

CHAPTER 10 Policy T2 - Highways Improvements

the Core Strategy acknowledges this omission was due to a typing error!

The Urban Capacity study stated a "low probability" of housing and did not even mention the Foundry Estate

Thus the proposals are they are not founded on a robust and credible evidence base and are unsound.

Summary:

RDC have not consulted on the very specific proposals to relocate the Eldon Way and Foundry Industrial Estates.

The previous CS Strategy stated "we will look at opportunities for more valuable and appropriate uses of the industrial land" with absolutely no consultation at all on concept of moving existing FW businesses entirely.

The Foundry Industrial Estate has never even been previously mentioned.

The Urban Capacity study stated a "low probability" of housing and did not even mention the Foundry Estate.

Thus the proposals are they are not founded on a robust and credible evidence base and are unsound.

8. Eldon Way and Foundry Industrial Estates form a significant part of the ongoing HAAP consultation but the Core Strategy proposals pre-empt the next stage of the HAAP consultation.

Neither the Core Strategy or Hockley Area Action Plan (HAAP) defines its status relevant to the other plan and subsequent priorities. Why is there no cross-referencing between concurrent plans affecting the exact same piece of land?

There are also inconsistencies between the Core Strategy & HAAP regarding the description of proposed uses for the two industrial estates. The Core Strategy refers to Leisure, Commercial and Residential whilst HAAP mentions a "village green, introducing a significant area of public open space". There is not sufficient space for both and the Core Strategy is again pre-empting the ongoing HAAP.

If a decision is taken now, as part of the Core Strategy, to relocate all the existing businesses on the two estates, it will set a legal precedent which HAAP will need to follow and renders the next stage of HAAP virtually redundant. Particularly given the 95% rejection rate of respondents to the previous round of HAAP such an approach is entirely undemocratic and unsound.

Summary

The Core Strategy proposals pre-empt the next stage of the HAAP consultation and neither defines its status relevant to the other plan and subsequent priorities.

There are also inconsistencies between the Core Strategy & HAAP.

If a decision is taken as part of the Core Strategy, to relocate all the existing businesses on the two estates, it will set a legal precedent which HAAP will need to follow and renders the next stage of HAAP virtually redundant. Particularly given the 95% rejection rate of respondents to the previous round of HAAP such an approach is entirely undemocratic and unsound.

9. PPS12, 4.6, states that Cores Strategies show be flexible and "should be able to show how they will handle contingencies". Several large planning applications have already been submitted to RDC proposing developments outside the Core Strategy which do not indicate how such applications will be handled and does not comply with PPS12. Neither have RDC been able to advise residents how such changes will be made and the strategy is unsound.

10. The Core Strategy misrepresent the findings of The Retail & Leisure Study (R&LS) 2008.

The Core Strategy states (12.38) "The Retail & Leisure Study indicates Hockley has great potential. Hockley has been identified as having a need for additional convenience floorspace".

Whereas, the R&LS actually states:

1) (10.26) "the scale of need does not lend itself to a foodstore capable of retaining a significant proportion of main food shopping expenditure.

2) (10.28) "There is no immediate capacity for additional floor space."

3) (10.29) "we recommend that focus be maintained on developing Hockley's existing strengths, rather than retail expansion".

4) 10.31 "The current nature of Hockley does not lend itself to classification as a 'town centre' as defined by PPS6.

1. Highway & Traffic Implications

Proposals for moving employment to out of town locations, at either end of the district, with no existing public transport links, are contrary to government policy PPG4. It also contravenes the Core Strategy's stated aims of reducing carbon emissions; reliance on car transport and providing "an integrated network of cycle paths".

The District of Rochford is predominately spread on a West/East axis along the railway line. Hockley is located in the middle of the district and the two estates are adjacent to the railway station. Bus service are poor with just 3* an hour (following a recent 50% reduction in services) and the operator has admitted they cannot compete with the railway making improvements to new sites away from major centres unlikely. (* one of the 3 services is paid for by ECC on a 6 mth trial and may be terminated in the new year).

However, the Core Strategy proposes to relocate these two estates to a greenfield site near the airport. This site is 2-3 miles from the nearest railway station and there are currently no bus services to the area. As a result, RDC are proposing to upgrade the nearest road to a dual-carriageway, although the main connecting road (the B1013), which runs through Hockley, will remain single-carriageway and is already at 72% of capacity (ECC Highways stats). This is despite extra traffic expected in the area as a result of the Joint Area Action Plan (JAAP) which proposes considerable growth at neighbouring Southend Airport, as well as the new industrial estate.

The site selected for the new industrial estate also contravenes PPS4 which states:

(EC7.3C) "out-of-centre site, with preference given to sites which are or will be well served by a choice of means of transport and which are close to the centre and have a high likelihood of forming links with the centre. There is no existing public transport and no obvious likelihood of forming links with any existing centres.

EC7.5 1 "whether the site is or will be accessible and well served by a choice of means of transport, especially public transport, walking and cycling, as well as by car". Its remote location. Accessed by the narrow, busy B1013 is not suitable for access by cycle or on foot.

It also contravenes PPS1 (27 vii) "Reduce the need to travel and encourage accessible public transport provision to secure more sustainable patterns of transport development. Planning should actively manage patterns of urban growth to make the fullest use of public transport and focus development in existing centres and near to major public transport interchanges".

The Core Strategy also contravenes its own policy T1 and is unsound.

2. The Transport Evidence Base has not been re-evaluated following the decision to impose extra housing on the Eldon Way & Foundry Industrial Estates. ECC Highways have confirmed that the B1013 is running at 72% of its maximum theoretical capacity) and the effect of extra housing in Hockley (as well as Hawkwell) has not been re-evaluated and it is unclear what improvements will be required and whether they can be physically achieved.

Thus the proposals are not founded on a robust and credible evidence base and are unsound.

3. RCD are proposing to scatter housing across the district in around 12 or sites but no detailed consideration has been given to the implications for highways across the District. The "Core Strategy" is not a strategy but simply a collection of disparate sites. Many roads across the District are at or near capacity but no modelling has been undertaken to determine the impacts or the funding required to upgrade them. At the Central Area Committee on 25 June 2009, RDC stated (in response to a question):

"Rochford Council is not the highway authority, but is working closely with Essex County Council to identify highway infrastructure requirements. Highway infrastructure improvements will be set out in the Core Strategy and other subsequent Development Plan Documents as required. These will be fed into the next version of the Essex Local Transport Plan, which is effectively a bidding document for funds to implement highway infrastructure improvements, schemes to tackle congestion, etc.

The District Council is working closely with the Essex County Council to ensure that highway infrastructure identified in the Core Strategy can be delivered."

It is clear that (i) the combined impact of scattering houses across the District and (ii) relocating Eldon Way/Foundry Industrial Estates to the very edge of the District with no public transport services will exacerbate existing problems. It is also clear that the extent of improvements required is both unknown and not funded and the proposal is unsound.

16529 Object

CHAPTER 10 Policy T2 - Highways Improvements

Summary:

RDC are proposing to scatter housing across the district in around 12 or sites but no detailed consideration has been given to the implications for highways across the District. Many roads across the District are at or near capacity but no modelling has been undertaken to determine the impacts.

It is clear that (i) the combined impact of scattering houses across the District and (ii) relocating Eldon Way/Foundry Industrial Estates with no public transport services will exacerbate existing problems. It is clear that the extent of improvements required is both unknown and not funded and the proposal is unsound.

4. PPS12 4.9 states "The infrastructure planning process should identify, as far as possible: infrastructure needs and costs". Neither needs nor, especially, costs have been identified and the Core Strategy is therefore unsound.

The district's highways suffer from years of under investment and over use. The Core Strategy proposes to fund infrastructure improvements through use of Standard Charges. However, no detail is provided and no attempt made to identify the likely scale of such charges. Thus it is unclear if use of Standard Charges is financially viable.

Policy T2 provides a list of required highway improvements. The list contains most of the more major roads in the District including Rectory Lane, which has a single track, traffic light controlled railway bridge. 1200 dwellings are proposed for the northern end of Rectory Road and a further 175 at the southern end. The cost of address the railway bridge bottleneck will be significant but is not mentioned.

No attempt is made to either cost these charges or explain how improvements not linked to any one specific development will be paid for (eg B1013; Ashingdon Road; a network of walking, cycling, bridleways).

The concept of paying for improvements through use of Standard Charges is totally unproven and unsound.

Summary:

PPS12 4.9 states "The infrastructure planning process should identify, as far as possible: infrastructure needs and costs". Neither needs nor, especially, costs have been identified and the Core Strategy is therefore unsound.

The Core Strategy proposes to fund infrastructure improvements through use of Standard Charges. However, no detail is provided and no attempt made to identify the likely scale of such charges. It is therefore unclear if use of Standard Charges is financially viable.

5. SERT is put forward as a solution to reducing car use but it will only skirt the edge of the district and the Core Strategy acknowledges there is only "potential" to do so in the future. SERT is not realistic or reliable a solution and the proposal is therefore unsound.

6. Previous consultations ignored by RDC:

The Hockley Parish Plan (dated 2007), clearly states that residents are strongly against any large scale housing development in Hockley, but if there has to be additional housing, then there should be no loss of greenbelt or open spaces, and no large housing estate developments. It was also stated that any developments must be matched by the appropriate levels of infrastructure.

The proposals also ignore the 95% rejection rate of respondents to RDC's own Hockley Area Plan (HAAP) Consultation (2009), which included specific proposals for Eldon Way (although HAAP did not even mention the adjoining Foundry Industrial Estate). Why have a consultation and ignore it?

Thus the proposals are not founded on a robust and credible evidence base and are unsound.

Proposals for moving employment to out of town locations, at either end of the district, with no existing public transport links, are contrary to government policy PPG4. It also contravenes the Core Strategy's stated aims of reducing carbon emissions; reliance on car transport and providing "an integrated network of cycle paths".

The District of Rochford is predominately spread on a West/East axis along the railway line. Hockley is located in the middle of the district and the two estates are adjacent to the railway station. Bus service are poor with just 3* an hour (following a recent 50% reduction in services) and the operator has admitted they cannot compete with the railway making improvements to new sites away from major centres unlikely. (* one of the 3 services is paid for by ECC on a 6 mth trial and may be terminated in the new year).

However, the Core Strategy proposes to relocate these two estates to a greenfield site near the airport. This site is 2-3 miles from the nearest railway station and there are currently no bus services to the area. As a result, RDC are proposing to upgrade the nearest road to a dual-carriageway, although the main connecting road (the B1013), which runs through Hockley, will remain single-carriageway and is already at 72% of capacity (ECC Highways stats). This is despite extra traffic expected in the area as a result of the Joint Area Action Plan (JAAP) which proposes considerable growth at neighbouring Southend Airport, as well as the new industrial estate.

The site selected for the new industrial estate also contravenes PPS4 which states:

(EC7.3C) "out-of-centre site, with preference given to sites which are or will be well served by a choice of means of transport and which are close to the centre and have a high likelihood of forming links with the centre. There is no existing public transport and no obvious likelihood of forming links with any existing centres.

EC7.5 1 "whether the site is or will be accessible and well served by a choice of means of transport, especially public transport, walking and cycling, as well as by car". Its remote location. Accessed by the narrow, busy B1013 is not suitable for access by cycle or on foot.

It also contravenes PPS1 (27 vii) "Reduce the need to travel and encourage accessible public transport provision to secure more sustainable patterns of transport development. Planning should actively manage patterns of urban growth to make the fullest use of public transport and focus development in existing centres and near to major public transport interchanges".

Summary:

Proposals for moving employment to of town locations, at either end of the district, with no existing public transport inks, are contrary to government policy PPG4 & PPS1. It also contravenes the Core Strategy's stated aims of reducing carbon emissions; reliance on car transport and providing "an integrated network of cycle paths".

The Core Strategy also contravenes its own policy T1 and is unsound.

2. The Transport Evidence Base has not been re-evaluated following the decision to impose extra housing on the Eldon Way & Foundry Industrial Estates. ECC Highways have confirmed that the B1013 is running at 72% of its maximum theoretical capacity) and the effect of extra housing in Hockley (as well as Hawkwell) has not been re-evaluated and it is unclear what improvements will be required and whether they can be physically achieved.

Thus the proposals are not founded on a robust and credible evidence base and are unsound.

3. RCD are proposing to scatter housing across the district in around 12 or sites but no detailed consideration has been given to the implications for highways across the District. The "Core Strategy" is not a strategy but simply a collection of disparate sites. Many roads across the District are at or near capacity but no modelling has been undertaken to determine the impacts or the funding required to upgrade them. At the Central Area Committee on 25 June 2009, RDC stated (in response to a question):

"Rochford Council is not the highway authority, but is working closely with Essex County Council to identify highway infrastructure requirements. Highway infrastructure improvements will be set out in the Core Strategy and other subsequent Development Plan Documents as required. These will be fed into the next version of the Essex Local Transport Plan, which is effectively a bidding document for funds to implement highway infrastructure improvements, schemes to tackle congestion, etc.

The District Council is working closely with the Essex County Council to ensure that highway infrastructure identified in

16545 Object

CHAPTER 10 Policy T2 - Highways Improvements

the Core Strategy can be delivered."

It is clear that (i) the combined impact of scattering houses across the District and (ii) relocating Eldon Way/Foundry Industrial Estates to the very edge of the District with no public transport services will exacerbate existing problems. It is also clear that the extent of improvements required is both unknown and not funded and the proposal is unsound.

Summary:

RDC are proposing to scatter housing across the district in around 12 or sites but no detailed consideration has been given to the implications for highways across the District. Many roads across the District are at or near capacity but no modelling has been undertaken to determine the impacts.

It is clear that (i) the combined impact of scattering houses across the District and (ii) relocating Eldon Way/Foundry Industrial Estates with no public transport services will exacerbate existing problems. It is clear that the extent of improvements required is both unknown and not funded and the proposal is unsound.

4. PPS12 4.9 states "The infrastructure planning process should identify, as far as possible: infrastructure needs and costs". Neither needs not, especially, costs have been identified and the Core Strategy is therefore unsound.

The district's highways suffer from years of under investment and over use. The Core Strategy proposes to fund infrastructure improvements through use of Standard Charges. However, no detail is provided and no attempt made to identify the likely scale of such charges. Thus it is unclear if use of Standard Charges is financially viable.

Policy T2 provides a list of required highway improvements. The list contains most of the more major roads in the District including Rectory Lane, which has a single track, traffic light controlled railway bridge. 1200 dwellings are proposed for the northern end of Rectory Road and a further 175 at the southern end. The cost of address the railway bridge bottleneck will be significant but is not mentioned.

No attempt is made to either cost these charges or explain how improvements not linked to any one specific development will be paid for (eg B1013; Ashingdon Road; a network of walking, cycling, bridleways).

The concept of paying for improvements through use of Standard Charges is totally unproven and unsound.

Summary:

PPS12 4.9 states "The infrastructure planning process should identify, as far as possible: infrastructure needs and costs". Neither needs nor, especially, costs have been identified and the Core Strategy is therefore unsound.

The Core Strategy proposes to fund infrastructure improvements through use of Standard Charges. However, no detail is provided and no attempt made to identify the likely scale of such charges. It is therefore unclear if use of Standard Charges is financially viable.

5. SERT is put forward as a solution to reducing car use but it will only skirt the edge of the district and the Core Strategy acknowledges there is only "potential" to do so in the future. SERT is not realistic or reliable a solution and the proposal is therefore unsound.

6. Previous consultations ignored by RDC:

The Hockley Parish Plan (dated 2007), clearly states that residents are strongly against any large scale housing development in Hockley, but if there has to be additional housing, then there should be no loss of greenbelt or open spaces, and no large housing estate developments. It was also stated that any developments must be matched by the appropriate levels of infrastructure.

The proposals also ignore the 95% rejection rate of respondents to RDC's own Hockley Area Plan (HAAP) Consultation (2009), which included specific proposals for Eldon Way (although HAAP did not even mention the adjoining Foundry Industrial Estate). Why have a consultation and ignore it?

Thus the proposals are not founded on a robust and credible evidence base and are unsound.

Summary:

Previous consultations ignored by RDC:

The proposals ignore the 95% rejection rate of respondents to RDC's own Hockley Area Plan (HAAP) Consultation (2009), which included specific proposals for Eldon Way (although HAAP did not even mention the adjoining Foundry Industrial Estate). Why have a consultation and ignore it?

Thus the proposals are not founded on a robust and credible evidence base and are unsound.

16545 Object

CHAPTER 10 Policy T2 - Highways Improvements

7. RDC have not consulted on the very specific proposals to relocate the Eldon Way and Foundry Industrial Estates.

The previous CS Strategy stated "we will look at opportunities for more valuable and appropriate uses of the industrial land" with absolutely no consultation at all on concept of moving existing EW businesses entirely.

The Foundry Industrial Estates has never even been previously mentioned in any plan version; A recent amendment to the Core Strategy acknowledges this omission was due to a typing error!

The Urban Capacity study stated a "low probability" of housing and did not even mention the Foundry Estate

Thus the proposals are they are not founded on a robust and credible evidence base and are unsound.

Summary:

RDC have not consulted on the very specific proposals to relocate the Eldon Way and Foundry Industrial Estates.

The previous CS Strategy stated "we will look at opportunities for more valuable and appropriate uses of the industrial land" with absolutely no consultation at all on concept of moving existing FW businesses entirely.

The Foundry Industrial Estate has never even been previously mentioned.

The Urban Capacity study stated a "low probability" of housing and did not even mention the Foundry Estate.

Thus the proposals are they are not founded on a robust and credible evidence base and are unsound.

8. Eldon Way and Foundry Industrial Estates form a significant part of the ongoing HAAP consultation but the Core Strategy proposals pre-empt the next stage of the HAAP consultation.

Neither the Core Strategy or Hockley Area Action Plan (HAAP) defines its status relevant to the other plan and subsequent priorities. Why is there no cross-referencing between concurrent plans affecting the exact same piece of land?

There are also inconsistencies between the Core Strategy & HAAP regarding the description of proposed uses for the two industrial estates. The Core Strategy refers to Leisure, Commercial and Residential whilst HAAP mentions a "village green, introducing a significant area of public open space". There is not sufficient space for both and the Core Strategy is again pre-empting the ongoing HAAP.

If a decision is taken now, as part of the Core Strategy, to relocate all the existing businesses on the two estates, it will set a legal precedent which HAAP will need to follow and renders the next stage of HAAP virtually redundant. Particularly given the 95% rejection rate of respondents to the previous round of HAAP such an approach is entirely undemocratic and unsound.

Summary

The Core Strategy proposals pre-empt the next stage of the HAAP consultation and neither defines its status relevant to the other plan and subsequent priorities.

There are also inconsistencies between the Core Strategy & HAAP.

If a decision is taken as part of the Core Strategy, to relocate all the existing businesses on the two estates, it will set a legal precedent which HAAP will need to follow and renders the next stage of HAAP virtually redundant. Particularly given the 95% rejection rate of respondents to the previous round of HAAP such an approach is entirely undemocratic and unsound.

9. PPS12, 4.6, states that Cores Strategies show be flexible and "should be able to show how they will handle contingencies". Several large planning applications have already been submitted to RDC proposing developments outside the Core Strategy which do not indicate how such applications will be handled and does not comply with PPS12. Neither have RDC been able to advise residents how such changes will be made and the strategy is unsound.

10. The Core Strategy misrepresent the findings of The Retail & Leisure Study (R&LS) 2008.

The Core Strategy states (12.38) "The Retail & Leisure Study indicates Hockley has great potential. Hockley has been identified as having a need for additional convenience floorspace".

Whereas, the R&LS actually states:

1) (10.26) "the scale of need does not lend itself to a foodstore capable of retaining a significant proportion of main food shopping expenditure.

Core Strategy Submission Document

16545 Object

CHAPTER 10 Policy T2 - Highways Improvements

2) (10.28) "There is no immediate capacity for additional floor space."

3) (10.29) "we recommend that focus be maintained on developing Hockley's existing strengths, rather than retail expansion".

4) 10.31 "The current nature of Hockley does not lend itself to classification as a 'town centre' as defined by PPS6. Moreover, we have identified that it is a very small catchment population. Accordingly, the Council may wish to consider reclassifying Hockley from a town centre to a district centre".

The Core Strategy is inaccurate, misleading and unsound.

Summary:

The Core Strategy misrepresents the findings of The Retail & Leisure Study (R&LS) 2008. The Core Strategy states "The Retail & Leisure Study states Hockley has great potential and has a need for additional convenience floorspace". Whereas, the R&LS states: 1) "does not lend itself to a foodstore capable of retaining a significant proportion of main food shopping expenditure. 2) "There is no immediate capacity for additional space." 3) "we recommend that focus be maintained on developing Hockley's existing strengths." 4) "the Council may wish to consider reclassifying Hockley from a town centre to a district centre.

1. Highway & Traffic Implications

Proposals for moving employment to out of town locations, at either end of the district, with no existing public transport links, are contrary to government policy PPG4. It also contravenes the Core Strategy's stated aims of reducing carbon emissions; reliance on car transport and providing "an integrated network of cycle paths".

The District of Rochford is predominately spread on a West/East axis along the railway line. Hockley is located in the middle of the district and the two estates are adjacent to the railway station. Bus service are poor with just 3* an hour (following a recent 50% reduction in services) and the operator has admitted they cannot compete with the railway making improvements to new sites away from major centres unlikely. (* one of the 3 services is paid for by ECC on a 6 mth trial and may be terminated in the new year).

However, the Core Strategy proposes to relocate these two estates to a greenfield site near the airport. This site is 2-3 miles from the nearest railway station and there are currently no bus services to the area. As a result, RDC are proposing to upgrade the nearest road to a dual-carriageway, although the main connecting road (the B1013), which runs through Hockley, will remain single-carriageway and is already at 72% of capacity (ECC Highways stats). This is despite extra traffic expected in the area as a result of the Joint Area Action Plan (JAAP) which proposes considerable growth at neighbouring Southend Airport, as well as the new industrial estate.

The site selected for the new industrial estate also contravenes PPS4 which states:

(EC7.3C) "out-of-centre site, with preference given to sites which are or will be well served by a choice of means of transport and which are close to the centre and have a high likelihood of forming links with the centre. There is no existing public transport and no obvious likelihood of forming links with any existing centres.

EC7.5 1 "whether the site is or will be accessible and well served by a choice of means of transport, especially public transport, walking and cycling, as well as by car". Its remote location. Accessed by the narrow, busy B1013 is not suitable for access by cycle or on foot.

It also contravenes PPS1 (27 vii) "Reduce the need to travel and encourage accessible public transport provision to secure more sustainable patterns of transport development. Planning should actively manage patterns of urban growth to make the fullest use of public transport and focus development in existing centres and near to major public transport interchanges".

Summary:

Highway & Traffic Implications

Proposals for moving employment to out of town locations, at either end of the district, with no existing public transport links, are contrary to government policy PPG4. It also contravenes the Core Strategy's stated aims of reducing carbon emissions; reliance on car transport and providing "an integrated network of cycle paths".

The District of Rochford is predominately spread on a West/East axis along the railway line. Hockley is located in the middle of the district and the two estates are adjacent to the railway station. Bus services are poor with just 3* an hour (following a recent 50% reduction in services) and the operator has admitted they cannot compete with the railway making improvements to new sites away from major centres unlikely. (* one of the 3 services is paid for by ECC on a 6 mth trial and may be terminated in the new year).

However, the Core Strategy proposes to relocate these two estates to a greenfield site near the airport. This site is 2-3 miles from the nearest railway station and there are currently no bus services to the area. As a result, RDC are proposing to upgrade the nearest road to a dual-carriageway, although the main connecting road (the B1013), which runs through Hockley, will remain single-carriageway and is already at 72% of capacity (ECC Highways stats). This is despite extra traffic expected in the area as a result of the Joint Area Action Plan (JAAP) which proposes considerable growth at neighboring Southend Airport, as well as the new industrial estate.

The site selected for the new industrial estate also contravenes PPS4 which states;
â€¢ (EC7.3C) "out-of-centre sites, with preference given to sites which are or will be well served by a choice of means of transport and which are close to the centre and have a high likelihood of forming links with the centre. There is no existing public transport and no obvious likelihood of forming links with any existing centres.
â€¢ EC7.5 1 "whether the site is or will be accessible and well served by a choice of means of transport, especially public transport, walking and cycling, as well as by car". Its remote location. Accessed by the narrow, busy B1013 is not suitable for access by cycle or on foot.

It also contravenes PPS1 (27 vii) "Reduce the need to travel and encourage accessible public transport provision to secure more sustainable patterns of transport development. Planning should actively manage patterns of urban growth to make the fullest use of public transport and focus development in existing centres and near to major public transport interchanges".

The Core Strategy also contravenes its own policy T1 and is unsound.

Summary:

Proposals for moving employment to out of town locations, at either end of the district, with no existing public transport links, are contrary to government policy PPG4 & PPS1. It also contravenes the Core Strategy's stated aims of reducing carbon emissions; reliance on car transport and providing "an integrated network of cycle paths".

The Core Strategy also contravenes its own policy T1 and is unsound.

The Transport Evidence Base has not been re-evaluated following the decision to impose extra housing on the Eldon Way & Foundry Industrial Estates. ECC Highways have confirmed that the B1013 is running at 72% of its maximum theoretical capacity) and the effect of extra housing in Hockley (as well as Hawkwell) has not been re-evaluated and it is unclear what improvements will be required and whether they can be physically achieved.

Thus the proposals are not founded on a robust and credible evidence base and are unsound

RDC are proposing to scatter housing across the district in around 12 or sites but no detailed consideration has been given to the implications for highways across the District. The "Core Strategy" is not a strategy but simply a collection of disparate sites. Many roads across the District are at or near capacity but no modelling has been undertaken to determine the impacts or the funding required to upgrade them. At the Central Area Committee on 25 June 2009, RDC stated (in response to a question):

"Rochford Council is not the highway authority, but is working closely with Essex County Council to identify highway infrastructure requirements. Highway infrastructure improvements will be set out in the Core Strategy and other subsequent Development Plan Documents as required. These will be fed into the next version of the Essex Local Transport Plan, which is effectively a bidding document for funds to implement highway infrastructure improvements, schemes to tackle congestion, etc.

CHAPTER 10 Policy T2 - Highways Improvements

Summary:

RDC are proposing to scatter housing across the district in around 12 or sites but no detailed consideration has been given to the implications for highways across the District. Many roads across the District are at or near capacity but no modeling has been undertaken to determine the impacts

It is clear that (i) the combined impact of scattering houses across the District and (ii) relocating Eldon Way/Foundry Industrial Estates with no public transport services will exacerbate existing problems. It is clear that the extent of improvements required is both unknown and not funded and the proposal is unsound.

PPS12 4.9 states "The infrastructure planning process should identify, as far as possible: infrastructure needs and costs". Neither needs nor, especially, costs have been identified and the Core Strategy is therefore unsound.

The district's highways suffer from years of under investment and over use. The Core Strategy proposes to fund infrastructure improvements through use of Standard Charges. However, no detail is provided and no attempt made to identify the likely scale of such charges. It is therefore unclear if use of Standard Charges is financially viable.

Policy T2 provides a list of required highway improvements. The list contains most of the more major roads in the District including Rectory Lane, which has a single track, traffic light controlled railway bridge. 1200 dwellings are proposed for the northern end of Rectory Road and a further 175 at the southern end. The cost of addressing the railway bridge bottleneck will be significant but is not mentioned.

No attempt is made to either cost these charges or explain how improvements not linked to any one specific development will be paid for (eg B1013; Ashingdon Road; a network of walking, cycling, bridleways).

The concept of paying for improvements through use of Standard Charges is totally unproven and unsound.

Summary:

PPS12 4.9 states "The infrastructure planning process should identify, as far as possible: infrastructure needs and costs". Neither needs nor, especially, costs have been identified and the Core Strategy is therefore unsound.

The Core Strategy proposes to fund infrastructure improvements through use of Standard Charges. However, no detail is provided and no attempt made to identify the likely scale of such charges. It is therefore unclear if use of Standard Charges is financially viable.

SERT is put forward as a solution to reducing car use but it will only skirt the edge of the district and the Core Strategy acknowledges there is only "potential" to do so in the future. SERT is not realistic or reliable a solution and the proposal is therefore unsound.

Previous consultations ignored by RDC:

• The Hockley Parish Plan (dated 2007), clearly states that residents are strongly against any large scale housing development in Hockley, but if there has to be additional housing, then there should be no loss of greenbelt or open spaces, and no large housing estate developments. It was also stated that any developments must be matched by the appropriate levels of infrastructure.

• The proposals also ignore the 95% rejection rate of respondents to RDC's own Hockley Area Plan (HAAP) Consultation (2009), which included specific proposals for Eldon Way (although HAAP did not even mention the adjoining Foundry Industrial Estate). Why have a consultation and ignore it?

Thus the proposals are not founded on a robust and credible evidence base and are unsound.

Summary:

Previous consultations ignored by RDC:

CHAPTER 10 Policy T2 - Highways Improvements

â€¢ the Foundry Industrial Estate has never even been previously mentioned;
â€¢ The Urban Capacity study stated a "low probability" of housing and did not even mention the Foundry Estate

Thus the proposals are they are not founded on a robust and credible evidence base and are unsound.

Eldon Way and Foundry Industrial Estates form a significant part of the ongoing Hockley Area Action Plan (HAAP) consultation but the Core Strategy proposals pre-empt the next stage of the HAAP consultation.

Neither the Core Strategy nor HAAP define its status relevant to the other plan and subsequent priorities. Why is there no cross-referencing between concurrent plans affecting the exact same piece of land?

There are also inconsistencies between the Core Strategy & HAAP regarding the description of proposed uses for the two industrial estates. The Core Strategy refers to Leisure, Commercial and Residential whilst HAAP mentions a "village green, introducing a significant area of public open space". There is not sufficient space for both and the Core Strategy is again pre-empting the ongoing HAAP.

If a decision is taken now, as part of the Core Strategy, to relocate all the existing businesses on the two estates, it will set a legal precedent which HAAP will need to follow and renders the next stage of HAAP virtually redundant. Particularly given the 95% rejection rate of respondents to the previous round of HAAP such an approach is entirely undemocratic and unsound.

Summary:

The Core Strategy proposals pre-empt the next stage of the HAAP consultation and neither defines its status relevant to the other plan and subsequent priorities.

There are also inconsistencies between the Core Strategy & HAAP.

If a decision is taken as part of the Core Strategy, to relocate all the existing businesses on the two estates, it will set a legal precedent which HAAP will need to follow and renders the next stage of HAAP virtually redundant. Particularly given the 95% rejection rate of respondents to the previous round of HAAP such an approach is entirely undemocratic and unsound.

PPS12, 4.6, states that Cores Strategies should be flexible and "should be able to show how they will handle contingencies". Several large planning applications have already been submitted to RDC proposing developments outside the Core Strategy which does not indicate how such applications will be handled and does not comply with PPS12. Neither have RDC been able to advise residents how such changes will be made and the strategy is unsound.

THE Core Strategy misrepresents the findings of The Retail & Leisure Study (R&LS) 2008.

The Core Strategy states (12.38) "The Retail & Leisure Study indicates Hockley has great potential. Hockley has been identified as having a need for additional convenience floorspace".

Whereas, the R&LS actually states:

- 1) (10.26) "the scale of need does not lend itself to a foodstore capable of retaining a significant proportion of main food shopping expenditure.
 - 2) (10.28) "There is no immediate capacity for additional floor space."
 - 3) (10.29) "we recommend that focus be maintained on developing Hockley's existing strengths, rather than retail expansion"
 - 4) 10.31 "The current nature of Hockley does not lend itself to classification as a 'town centre' as defined by PPS6. Moreover, we have identified that it is a very small catchment population. Accordingly, the Council may wish to consider reclassifying Hockley from a town centre to a district centre".
- The Core Strategy is inaccurate, misleading and unsound.

Summary:

The Core Strategy misrepresents the findings of The Retail & Leisure Study (R&LS) 2008. The Core Strategy states "The Retail & Leisure Study states Hockley has great potential and has a need for additional convenience floorspace". Whereas, the R&LS states: 1) "does not lend itself to a foodstore capable of retaining a significant proportion of main food shopping expenditure. 2) "There is no immediate capacity for additional floor space." 3) "we recommend that focus be maintained on developing Hockley's existing strengths." 4) " the Council may wish to consider reclassifying Hockley from a town centre to a district centre".

Summary:

The Transport Evidence Base has not been re-evaluated following the decision to impose extra housing on the Eldon Way & Foundry Industrial Estates. ECC Highways have confirmed that the B1013 is running at 72% of its maximum theoretical capacity) and the effect of extra housing in Hockley (as well as Hawkwell) has not been re-evaluated and it is unclear what improvements will be required and whether they can be physically achieved.

Thus the proposals are not founded on a robust and credible evidence base and are unsound

Full Text:

Highway & Traffic Implications

Proposals for moving employment to out of town locations, at either end of the district, with no existing public transport links, are contrary to government policy PPG4. It also contravenes the Core Strategy's stated aims of reducing carbon emissions; reliance on car transport and providing "an integrated network of cycle paths".

The District of Rochford is predominately spread on a West/East axis along the railway line. Hockley is located in the middle of the district and the two estates are adjacent to the railway station. Bus services are poor with just 3* an hour (following a recent 50% reduction in services) and the operator has admitted they cannot compete with the railway making improvements to new sites away from major centres unlikely. (* one of the 3 services is paid for by ECC on a 6 mth trial and may be terminated in the new year).

However, the Core Strategy proposes to relocate these two estates to a greenfield site near the airport. This site is 2-3 miles from the nearest railway station and there are currently no bus services to the area. As a result, RDC are proposing to upgrade the nearest road to a dual-carriageway, although the main connecting road (the B1013), which runs through Hockley, will remain single-carriageway and is already at 72% of capacity (ECC Highways stats). This is despite extra traffic expected in the area as a result of the Joint Area Action Plan (JAAP) which proposes considerable growth at neighboring Southend Airport, as well as the new industrial estate.

The site selected for the new industrial estate also contravenes PPS4 which states;
â€¢ (EC7.3C) "out-of-centre sites, with preference given to sites which are or will be well served by a choice of means of transport and which are close to the centre and have a high likelihood of forming links with the centre. There is no existing public transport and no obvious likelihood of forming links with any existing centres.
â€¢ EC7.5 1 "whether the site is or will be accessible and well served by a choice of means of transport, especially public transport, walking and cycling, as well as by car". Its remote location. Accessed by the narrow, busy B1013 is not suitable for access by cycle or on foot.

It also contravenes PPS1 (27 vii) "Reduce the need to travel and encourage accessible public transport provision to secure more sustainable patterns of transport development. Planning should actively manage patterns of urban growth to make the fullest use of public transport and focus development in existing centres and near to major public transport interchanges".

The Core Strategy also contravenes its own policy T1 and is unsound.

Summary:

Proposals for moving employment to out of town locations, at either end of the district, with no existing public transport links, are contrary to government policy PPG4 & PPS1. It also contravenes the Core Strategy's stated aims of reducing carbon emissions; reliance on car transport and providing "an integrated network of cycle paths".

The Core Strategy also contravenes its own policy T1 and is unsound.

The Transport Evidence Base has not been re-evaluated following the decision to impose extra housing on the Eldon Way & Foundry Industrial Estates. ECC Highways have confirmed that the B1013 is running at 72% of its maximum theoretical capacity) and the effect of extra housing in Hockley (as well as Hawkwell) has not been re-evaluated and it is unclear what improvements will be required and whether they can be physically achieved.

Thus the proposals are not founded on a robust and credible evidence base and are unsound

RDC are proposing to scatter housing across the district in around 12 or sites but no detailed consideration has been given to the implications for highways across the District. The "Core Strategy" is not a strategy but simply a collection of disparate sites. Many roads across the District are at or near capacity but no modelling has been undertaken to determine the impacts or the funding required to upgrade them. At the Central Area Committee on 25 June 2009, RDC stated (in response to a question):

"Rochford Council is not the highway authority, but is working closely with Essex County Council to identify highway infrastructure requirements. Highway infrastructure improvements will be set out in the Core Strategy and other subsequent Development Plan Documents as required. These will be fed into the next version of the Essex Local Transport Plan, which is effectively a bidding document for funds to implement highway infrastructure improvements, schemes to tackle congestion, etc.

The District Council is working closely with the Essex County Council to ensure that highway infrastructure identified in the Core Strategy can be delivered."

It is clear that (i) the combined impact of scattering houses across the District and (ii) relocating Eldon Way/Foundry Industrial Estates to the very edge of the District with no public transport services will exacerbate existing problems. It is also clear that the extent of improvements required is both unknown and not funded and the proposal is unsound.

16580 Object

CHAPTER 10 Policy T2 - Highways Improvements

Summary:

RDC are proposing to scatter housing across the district in around 12 or sites but no detailed consideration has been given to the implications for highways across the District. Many roads across the District are at or near capacity but no modeling has been undertaken to determine the impacts

It is clear that (i) the combined impact of scattering houses across the District and (ii) relocating Eldon Way/Foundry Industrial Estates with no public transport services will exacerbate existing problems. It is clear that the extent of improvements required is both unknown and not funded and the proposal is unsound.

PPS12 4.9 states "The infrastructure planning process should identify, as far as possible: infrastructure needs and costs". Neither needs nor, especially, costs have been identified and the Core Strategy is therefore unsound.

The district's highways suffer from years of under investment and over use. The Core Strategy proposes to fund infrastructure improvements through use of Standard Charges. However, no detail is provided and no attempt made to identify the likely scale of such charges. It is therefore unclear if use of Standard Charges is financially viable.

Policy T2 provides a list of required highway improvements. The list contains most of the more major roads in the District including Rectory Lane, which has a single track, traffic light controlled railway bridge. 1200 dwellings are proposed for the northern end of Rectory Road and a further 175 at the southern end. The cost of addressing the railway bridge bottleneck will be significant but is not mentioned.

No attempt is made to either cost these charges or explain how improvements not linked to any one specific development will be paid for (eg B1013; Ashingdon Road; a network of walking, cycling, bridleways).

The concept of paying for improvements through use of Standard Charges is totally unproven and unsound.

Summary:

PPS12 4.9 states "The infrastructure planning process should identify, as far as possible: infrastructure needs and costs". Neither needs nor, especially, costs have been identified and the Core Strategy is therefore unsound.

The Core Strategy proposes to fund infrastructure improvements through use of Standard Charges. However, no detail is provided and no attempt made to identify the likely scale of such charges. It is therefore unclear if use of Standard Charges is financially viable.

SERT is put forward as a solution to reducing car use but it will only skirt the edge of the district and the Core Strategy acknowledges there is only "potential" to do so in the future. SERT is not realistic or reliable a solution and the proposal is therefore unsound.

Previous consultations ignored by RDC:

• The Hockley Parish Plan (dated 2007), clearly states that residents are strongly against any large scale housing development in Hockley, but if there has to be additional housing, then there should be no loss of greenbelt or open spaces, and no large housing estate developments. It was also stated that any developments must be matched by the appropriate levels of infrastructure.

• The proposals also ignore the 95% rejection rate of respondents to RDC's own Hockley Area Plan (HAAP) Consultation (2009), which included specific proposals for Eldon Way (although HAAP did not even mention the adjoining Foundry Industrial Estate). Why have a consultation and ignore it?

Thus the proposals are not founded on a robust and credible evidence base and are unsound.

Whereas, the R&LS actually states:

- 1) (10.26) "the scale of need does not lend itself to a foodstore capable of retaining a significant proportion of main food shopping expenditure.
 - 2) (10.28) "There is no immediate capacity for additional floor space."
 - 3) (10.29) "we recommend that focus be maintained on developing Hockley's existing strengths, rather than retail expansion"
 - 4) 10.31 "The current nature of Hockley does not lend itself to classification as a 'town centre' as defined by PPS6. Moreover, we have identified that it is a very small catchment population. Accordingly, the Council may wish to consider reclassifying Hockley from a town centre to a district centre".
- The Core Strategy is inaccurate, misleading and unsound.

Summary:

The Core Strategy misrepresents the findings of The Retail & Leisure Study (R&LS) 2008. The Core Strategy states "The Retail & Leisure Study states Hockley has great potential and has a need for additional convenience floorspace". Whereas, the R&LS states: 1) "does not lend itself to a foodstore capable of retaining a significant proportion of main food shopping expenditure. 2) "There is no immediate capacity for additional floor space." 3) "we recommend that focus be maintained on developing Hockley's existing strengths." 4) " the Council may wish to consider reclassifying Hockley from a town centre to a district centre".

Summary:

The Transport Evidence Base has not been re-evaluated following the decision to impose extra housing on the Eldon Way & Foundry Industrial Estates. ECC Highways have confirmed that the B1013 is running at 72% of its maximum theoretical capacity) and the effect of extra housing in Hockley (as well as Hawkwell) has not been re-evaluated and it is unclear what improvements will be required and whether they can be physically achieved.

Thus the proposals are not founded on a robust and credible evidence base and are unsound

Full Text:

Highway & Traffic Implications

Proposals for moving employment to out of town locations, at either end of the district, with no existing public transport links, are contrary to government policy PPG4. It also contravenes the Core Strategy's stated aims of reducing carbon emissions; reliance on car transport and providing "an integrated network of cycle paths".

The District of Rochford is predominately spread on a West/East axis along the railway line. Hockley is located in the middle of the district and the two estates are adjacent to the railway station. Bus services are poor with just 3* an hour (following a recent 50% reduction in services) and the operator has admitted they cannot compete with the railway making improvements to new sites away from major centres unlikely. (* one of the 3 services is paid for by ECC on a 6 mth trial and may be terminated in the new year).

However, the Core Strategy proposes to relocate these two estates to a greenfield site near the airport. This site is 2-3 miles from the nearest railway station and there are currently no bus services to the area. As a result, RDC are proposing to upgrade the nearest road to a dual-carriageway, although the main connecting road (the B1013), which runs through Hockley, will remain single-carriageway and is already at 72% of capacity (ECC Highways stats). This is despite extra traffic expected in the area as a result of the Joint Area Action Plan (JAAP) which proposes considerable growth at neighboring Southend Airport, as well as the new industrial estate.

The site selected for the new industrial estate also contravenes PPS4 which states;
â€¢ (EC7.3C) "out-of-centre sites, with preference given to sites which are or will be well served by a choice of means of transport and which are close to the centre and have a high likelihood of forming links with the centre. There is no existing public transport and no obvious likelihood of forming links with any existing centres.

â€¢ EC7.5 1 "whether the site is or will be accessible and well served by a choice of means of transport, especially public transport, walking and cycling, as well as by car". Its remote location. Accessed by the narrow, busy B1013 is not suitable for access by cycle or on foot.

It also contravenes PPS1 (27 vii) "Reduce the need to travel and encourage accessible public transport provision to secure more sustainable patterns of transport development. Planning should actively manage patterns of urban growth to make the fullest use of public transport and focus development in existing centres and near to major public transport interchanges".

The Core Strategy also contravenes its own policy T1 and is unsound.

Summary:

Proposals for moving employment to out of town locations, at either end of the district, with no existing public transport links, are contrary to government policy PPG4 & PPS1. It also contravenes the Core Strategy's stated aims of reducing carbon emissions; reliance on car transport and providing "an integrated network of cycle paths".

The Core Strategy also contravenes its own policy T1 and is unsound.

The Transport Evidence Base has not been re-evaluated following the decision to impose extra housing on the Eldon Way & Foundry Industrial Estates. ECC Highways have confirmed that the B1013 is running at 72% of its maximum theoretical capacity) and the effect of extra housing in Hockley (as well as Hawkwell) has not been re-evaluated and it is unclear what improvements will be required and whether they can be physically achieved.

Thus the proposals are not founded on a robust and credible evidence base and are unsound

RDC are proposing to scatter housing across the district in around 12 or sites but no detailed consideration has been given to the implications for highways across the District. The "Core Strategy" is not a strategy but simply a collection of disparate sites. Many roads across the District are at or near capacity but no modelling has been undertaken to determine the impacts or the funding required to upgrade them. At the Central Area Committee on 25 June 2009, RDC stated (in response to a question):

"Rochford Council is not the highway authority, but is working closely with Essex County Council to identify highway infrastructure requirements. Highway infrastructure improvements will be set out in the Core Strategy and other subsequent Development Plan Documents as required. These will be fed into the next version of the Essex Local Transport Plan, which is effectively a bidding document for funds to implement highway infrastructure improvements, schemes to tackle congestion, etc.

The District Council is working closely with the Essex County Council to ensure that highway infrastructure identified in the Core Strategy can be delivered."

It is clear that (i) the combined impact of scattering houses across the District and (ii) relocating Eldon Way/Foundry Industrial Estates to the very edge of the District with no public transport services will exacerbate existing problems. It is also clear that the extent of improvements required is both unknown and not funded and the proposal is unsound.

16598 Object

CHAPTER 10 Policy T2 - Highways Improvements

Summary:

RDC are proposing to scatter housing across the district in around 12 or sites but no detailed consideration has been given to the implications for highways across the District. Many roads across the District are at or near capacity but no modeling has been undertaken to determine the impacts

It is clear that (i) the combined impact of scattering houses across the District and (ii) relocating Eldon Way/Foundry Industrial Estates with no public transport services will exacerbate existing problems. It is clear that the extent of improvements required is both unknown and not funded and the proposal is unsound.

PPS12 4.9 states "The infrastructure planning process should identify, as far as possible: infrastructure needs and costs". Neither needs nor, especially, costs have been identified and the Core Strategy is therefore unsound.

The district's highways suffer from years of under investment and over use. The Core Strategy proposes to fund infrastructure improvements through use of Standard Charges. However, no detail is provided and no attempt made to identify the likely scale of such charges. It is therefore unclear if use of Standard Charges is financially viable.

Policy T2 provides a list of required highway improvements. The list contains most of the more major roads in the District including Rectory Lane, which has a single track, traffic light controlled railway bridge. 1200 dwellings are proposed for the northern end of Rectory Road and a further 175 at the southern end. The cost of addressing the railway bridge bottleneck will be significant but is not mentioned.

No attempt is made to either cost these charges or explain how improvements not linked to any one specific development will be paid for (eg B1013; Ashingdon Road; a network of walking, cycling, bridleways).

The concept of paying for improvements through use of Standard Charges is totally unproven and unsound.

Summary:

PPS12 4.9 states "The infrastructure planning process should identify, as far as possible: infrastructure needs and costs". Neither needs nor, especially, costs have been identified and the Core Strategy is therefore unsound.

The Core Strategy proposes to fund infrastructure improvements through use of Standard Charges. However, no detail is provided and no attempt made to identify the likely scale of such charges. It is therefore unclear if use of Standard Charges is financially viable.

SERT is put forward as a solution to reducing car use but it will only skirt the edge of the district and the Core Strategy acknowledges there is only "potential" to do so in the future. SERT is not realistic or reliable a solution and the proposal is therefore unsound.

Previous consultations ignored by RDC:

• The Hockley Parish Plan (dated 2007), clearly states that residents are strongly against any large scale housing development in Hockley, but if there has to be additional housing, then there should be no loss of greenbelt or open spaces, and no large housing estate developments. It was also stated that any developments must be matched by the appropriate levels of infrastructure.

• The proposals also ignore the 95% rejection rate of respondents to RDC's own Hockley Area Plan (HAAP) Consultation (2009), which included specific proposals for Eldon Way (although HAAP did not even mention the adjoining Foundry Industrial Estate). Why have a consultation and ignore it?

Thus the proposals are not founded on a robust and credible evidence base and are unsound.

Summary:

Previous consultations ignored by RDC:

The proposals ignore the 95% rejection rate of respondents to RDC's own Hockley Area Plan (HAAP) Consultation (2009), which included specific proposals for Eldon Way (although HAAP did not even mention the adjoining Foundry Industrial Estate). Why have a consultation and ignore it?

Thus the proposals are not founded on a robust and credible evidence base and are unsound

RDC have not consulted on the very specific proposals to relocate the Eldon Way and Foundry Industrial Estates

• The previous CS Strategy stated "we will look at opportunities for more valuable and appropriate uses of the industrial land" with absolutely no consultation at all on concept of moving existing EW businesses entirely

• the Foundry Industrial Estate has never even been previously mentioned in any plan version; A recent amendment to the Core Strategy states this omission was due to a typing error!

• The Urban Capacity study stated a "low probability" of housing and did not even mention the Foundry Estate

Thus the proposals are they are not founded on a robust and credible evidence base and are unsound.

Summary:

RDC have not consulted on the very specific proposals to relocate the Eldon Way and Foundry Industrial Estates

• The previous CS Strategy stated "we will look at opportunities for more valuable and appropriate uses of the industrial land" with absolutely no consultation at all on concept of moving existing EW businesses entirely

Core Strategy Submission Document

16598 Object

CHAPTER 10 Policy T2 - Highways Improvements

â€¢ the Foundry Industrial Estate has never even been previously mentioned;
â€¢ The Urban Capacity study stated a "low probability" of housing and did not even mention the Foundry Estate

Thus the proposals are they are not founded on a robust and credible evidence base and are unsound.

Eldon Way and Foundry Industrial Estates form a significant part of the ongoing Hockley Area Action Plan (HAAP) consultation but the Core Strategy proposals pre-empt the next stage of the HAAP consultation.

Neither the Core Strategy nor HAAP define its status relevant to the other plan and subsequent priorities. Why is there no cross-referencing between concurrent plans affecting the exact same piece of land?

There are also inconsistencies between the Core Strategy & HAAP regarding the description of proposed uses for the two industrial estates. The Core Strategy refers to Leisure, Commercial and Residential whilst HAAP mentions a "village green, introducing a significant area of public open space". There is not sufficient space for both and the Core Strategy is again pre-empting the ongoing HAAP.

If a decision is taken now, as part of the Core Strategy, to relocate all the existing businesses on the two estates, it will set a legal precedent which HAAP will need to follow and renders the next stage of HAAP virtually redundant. Particularly given the 95% rejection rate of respondents to the previous round of HAAP such an approach is entirely undemocratic and unsound.

Summary:

The Core Strategy proposals pre-empt the next stage of the HAAP consultation and neither defines its status relevant to the other plan and subsequent priorities.

There are also inconsistencies between the Core Strategy & HAAP.

If a decision is taken as part of the Core Strategy, to relocate all the existing businesses on the two estates, it will set a legal precedent which HAAP will need to follow and renders the next stage of HAAP virtually redundant. Particularly given the 95% rejection rate of respondents to the previous round of HAAP such an approach is entirely undemocratic and unsound.

PPS12, 4.6, states that Cores Strategies should be flexible and "should be able to show how they will handle contingencies". Several large planning applications have already been submitted to RDC proposing developments outside the Core Strategy which does not indicate how such applications will be handled and does not comply with PPS12. Neither have RDC been able to advise residents how such changes will be made and the strategy is unsound.

THE Core Strategy misrepresents the findings of The Retail & Leisure Study (R&LS) 2008.

The Core Strategy states (12.38) "The Retail & Leisure Study indicates Hockley has great potential. Hockley has been identified as having a need for additional convenience floorspace".

Whereas, the R&LS actually states:

- 1) (10.26) "the scale of need does not lend itself to a foodstore capable of retaining a significant proportion of main food shopping expenditure.
 - 2) (10.28) "There is no immediate capacity for additional floor space."
 - 3) (10.29) "we recommend that focus be maintained on developing Hockley's existing strengths, rather than retail expansion"
 - 4) 10.31 "The current nature of Hockley does not lend itself to classification as a 'town centre' as defined by PPS6. Moreover, we have identified that it is a very small catchment population. Accordingly, the Council may wish to consider reclassifying Hockley from a town centre to a district centre".
- The Core Strategy is inaccurate, misleading and unsound.

Summary:

The Core Strategy misrepresents the findings of The Retail & Leisure Study (R&LS) 2008. CHAPTER 10 Policy T2 - Highways Improvements

Respondent: Ms G Yeadell [7834]

6 Southend Road
Hockley
Essex
SS5 4QQ
01702 205450

Agent: N/A

Full Text: Para 4.8 States sustainability underlines any decisions on housing location, primarily: current and future deliverability of infrastructure, eg roads, services, public transport, health.

Policy H1

Para.4.14 Some employment sites are considered more suitable for other uses (eg housing) including Eldon Way/Foundry, Hockley. This is all open to question.

Hockley-re Eldon Way/Foundry

In CS Preferred Options 2008 policy H2 you discarded N.E.Hockley as a housing option - whilst close to centre, station, "impact on highway network from traffic heading through Hockley..along Ashingdon Road..renders location unviable". Clearly the same principle applied to Eldon Way/Foundry for the same reasons.

Response to C.S Preferred Options 2008 and HAAP 2009

June 2009 issue C S Submission issue says Eldon Way will be used for housing, whereas Sept.2009 issue says "alternative uses, including residential.." to be decided by HAAP (Issues consultation done, Pref.Options issue awaited, but judging from JAAP Pref.Options decision - namely biggest option chosen against overriding opposition, it will be housing).

Need to be logical and even-handed in proposals

Health services GP surgeries are full and a PCT health centre will not occur in the foreseeable economic climate.

Ch.10: Highways and Transport

Policy T1, T2 RDC proposes working with ECC Highways, developers, but admits it has no authority, responsibility here. RDC will seek developer contributions, but this is neither detailed nor costed in CS Submission nor HAAP, and contravenes PPS 12.3 para.4.93 which states "The infrastructure planning process should identify as far as possible infrastructure needs and costs". Idea of paying for road & transport improvements through Standard Charges is unproven and unsound.

Establish likely level of Standard Charges. Accept you cannot turn district into motorways with wholesale demolition.

In neither CS Submission nor HAAP is there any highways improvement, except idea to replace Spa roundabout with traffic lights and 1 way system up Southend Road and Hockley Rise.

Para.10.5 "..highway improvements serving new developments..in a timely manner..ensuring developments delivered alongside necessary infrastructure".

These improvements cannot possibly be delivered. It should be realised: B1013 (Southend Rd), Rectory Road Hawkwell, Ashingdon, West Rochford - all in area proposed for large new developments are former winding, narrow country roads, tarmacked over for motorised traffic. Large housing increments are unsustainable off these roads, which cannot be altered without much destruction.

Reply to CS Pref. Options 2008 & HAAP Issues/Options 2009

Policy T3, CLT1 Appendix CLT1 Public transport RDC admits this is in the private sector. In Hockley, operator has cut No7 service to 1 per hour from Ashingdon Schools, claiming it is unviable beyond. This is unlikely to change as Hockley is car dependant. No8 bus through Hawkwell is cut to 1 per hour to Rayleigh, for same reason as No7. Proposed planning agreements with developers can't run: eg, a community centre or classroom given by a developer remains once he has moved on - how can that apply for an on-going bus service?

Reply to Infrastructure Transport in CS Pref. Opts. 2008 and to HAAP Issues Opts. 2009.

Ch.11 Economic development

Policy ED3 Core Strategy preferred Options 2008 hinted at possible housing in Eldon Way site. June 2009 Submission version, without consultation, said Eldon Way would be housing (map included Foundry, not the text). September 2009 Submission said redevelopment would be in HAAP (which apart from the Issues/Options version, is unfinished. Judging from results of JAAP Preferred Options where biggest option is chosen, though most respondents were against it, site will be housing, without consultation.

Core Strategy Submission Document

16713 Object

CHAPTER 10 Policy T2 - Highways Improvements

Para.1.25, Para.11.32 Note CH.1 Introduction to CS Submission 2009 para.1.25 East England Plan requires 3000 additional jobs, presumably to 2021. Revised Southend Airport is expected to drive Economic development. But at para. 11.32 Eldon Way-Foundry estate is planned to be more suitably utilized. "...alternative land will be required to accommodate employment uses so displaced" - ie jobs sent to eg new site near Southend Airport - not new jobs.

Reply to HAAP Issues Options 2009

Remove compulsory relocation

Policy ED4 Policy states Council will allocate 18ha of land to make up for de-allocations in ED3 - that proves point above.

Proposals for moving employment to out of town locations with no existing transport links are contrary to government policies PPG4, PPS1 and PPS4 and Core Strategy Policy T1.

Evidence Base is ignored by contravening Hockley Parish Plan 2007 and ignoring residents' views on HAAP Issues/Options. Next stage of HAAP Preferred Options is pre-empted and rendered irrelevant. Core Strategy plans to relocate Eldon Way Foundry estate to Greenfield site with no nearby bus or railway. RDC plans to upgrade the nearest road to dual carriageway, though the connecting B1013 (through Hockley) will stay single, said by ECC Highways statistics to be 72% capacity. Airport bosses and council cannot suggest there will be no traffic growth from JAAP and new industrial site.

Reply to Hockley Parish Plan 2007. HAAP Issues 2009

Move to new industrial site near airport contravenes PPS4:

- EC7.3C "out of centre sites, with preference given to sites...well served by choice of...transport and...close to centre and...high likelihood of forming links with centre". There is no current public transport and links with centres is unlikely".

- EC 7.5.1 "whether the site is or will be accessible and well served by choice of transport, public transport, walking and cycling, as well as by car...". Remote location, narrow busy B1013 makes the site unsuitable for access by cycle or on foot.

It also contravenes PPS1 (27vii)... "reduce need to travel, encourage accessible public transport provision to secure more sustainable patterns of transport...Planning should actively manage patterns of urban growth to make fullest use of public transport and focus development in existing centres, near to major public transport interchanges". Core Strategy undermines its own policy Transport and Highways policy T1 and is unsound.

Although shown on accompanying drawing in earlier versions, there was no prior textual mention of Foundry industrial estate (next to Eldon Way) for redevelopment until current CS 2009 Submission. This was stated to be a typing error, but does not inspire confidence in reliability of drafting.

Revise both 2009 Core Strategy and 2009 HAAP Issues/options

Chapter 12: Retail/Town centres

The Core Strategy misrepresents findings of the Retail and Leisure Study 2008.

Para.12.38 The Core Strategy states (para.12.38) "The Retail & Leisure Study indicates Hockley has great potential. Hockley has been identified as having a need for additional convenience floorspace."

Whereas the R&LS actually states:

1) (10.26) "the scale of need does not lend itself to a foodstore capable of retaining a significant proportion of main food shopping expenditure".

2) (10.28) "There is no immediate capacity for additional floorspace".

3) (10.29) "we recommend focus be maintained on developing Hockley's existing strengths, rather than retail expansion"

4) 10.31 "the current nature of Hockley does not lend itself to classification as a 'town centre' as defined by PPS6. Moreover, we have identified that it has a very small catchment population. Accordingly, the council may wish to consider reclassifying Hockley from a town centre to a district centre".

Defer whole of proposals for Hockley town centre to Hockley Area Action Plan.

The Council will work with landowners and its partners to deliver the HAAP.

Remove threat of compulsory purchase orders.

Core Strategy Submission Document

16713 Object

CHAPTER 10 Policy T2 - Highways Improvements

One doesn't perceive impartiality when the Planning Director replies to local HAAP survey with "The affluent people of Hockley are entitled to famous name shops".

Chapter 5: Character of Place and Local Lists

Para.5.4 "Rochford district has unique character..stems from traditional buildings..still dominate towns and villages".

Para.5.17 "Council believes many buildings..are of local distinctiveness..part of..cherished local scene".

This only applies to favoured places: Rochford, Rayleigh, greenbelt villages. Many Hockley conservable items have been systemically removed for supposedly lucrative development in face of widespread protect. This is for supposed need for housing. In fact heritage items have been replaced by dwellings most cannot afford, and/or are hard to sell due to unsuitability of massing and siting. Many other homes are jeopardised by this practice.

HAAP issues 2009. Core Strategy 2006, 2007,2008, SCI.2006

Fewer 'vested interests', more even handedness. No more pressing people out of businesses, homes for expediency.

A CPRE Fieldwork issue extolled Local Lists, citing refusal of 16 flats to replace character house, not on local list. Inspector said house, facade made a contribution to area character, even if English heritage decided it didn't warrant listing. Council worked to get the house grade listed and even made adjacent area conservation one.

Hockley had one such on a "significant site" faced with 13 flats. Ward Member omitted house from refusal proposal, so house could be demolished. RDC dropped Local List ahead of appeal: "Government frowned on such Lists" (Other LAs, unaware of supposed directive retained theirs. After demolition RDC restored Local Lists, saying Government now support them. When Inspector queried the complaint, the then policy officer said "just politics, lot of local interest, nothing of character in the area[!]. (A dozen such items had been removed). Some "distinctive" Hockley buildings are still condemned (in Greensward Lane.; others threatened (Spa Road). Whereas a modest hue and cry in Rayleigh will usually result in a building being saved.

Conclusion

Core Strategy Submission DPD is basically unsound in many respects

Incomplete information. Amongst others, it refers to Hockley AAP, the first stage of which is complete, but not other three. Rochford AAP first stage has been published in arrears of Core Strategy Submission. Rayleigh AAP is still awaited. Precise housing sites are absent, as Urban Capacity Study 2007 has been superseded by Strategic Housing Land Availability Assessment, not yet published. Traders, residents, are thus responding to Core Strategy Submission with incomplete information.

Lack of community involvement. Chapter 1, Introduction, para. 1.11 "Community involvement is an essential part of the plan making process".

In Statement of Community Involvement 2006 Rochford RDC "recognises need to enable people to have their voices heard".

Re Public Meetings: "Consideration will be had to timing and venue to ensure meeting is as accessible as possible".

Take Hockley Area Action Plan as an example of the opposite of all this:- Presentation of document was at Hullbridge, 7.30pm. It was also discussed with JAAP at Rochford Freight House (for traders only) at 7am, without publicity. Excuse made: HAAP on RDC website, which none will seek unless knowing it is there. Rochford District Matters newsheet had minute articles on p.3, half way through consultation period. Another excuse: a 2nd presentation by Hockley Residents Association with planning officer present: only because of complaints, and it is not the HRA's responsibility to RDC's job. Due to unavoidable haste of calling meeting, few knew and only 50 were present.

In Core Strategy Submission Hockley Parish Plan has been ignored. Proposals also ignore 95% rejection rate response to HAAP 2009, which included proposals for Eldon Way employment site.

Unfettered right of developers to carry on as if Core Strategy didn't exist. In PPS 12, Ch.4.6 states: "Core Strategies should be flexible and able to show how they handle contingencies". Several large planning applications have been submitted proposing developments outside the Core Strategy which does not indicate how such applications will be handled and does not comply with PPS 12.

Where are we? Finally, at Chapter 1, Introduction, para. 1.24: "the Core Strategy will have to be reviewed in the event of a new Local Area Agreement, post-2011, setting different priorities". So what purpose does all this work serve? So we have hardly finished this exercise, before it all starts again?

Summary:

Ch.10: Highways and Transport

Policy T1, T2 RDC proposes working with ECC Highways, developers, but admits it has no authority, responsibility here. RDC will seek developer contributions, but this is neither detailed nor costed in CS Submission nor HAAP, and

cannot be altered without much destruction.

Public transport RDC admits this is in the private sector. In Hockley, operator has cut No 7 service to one per hour from Ashingdon Schools, claiming it is unviable beyond. This is unlikely to change as Hockley is car dependant. No 8 bus through Hawkwell is cut to one per hour to Rayleigh, for same reason as No 7. Proposed planning agreements with developers can't run: e.g., a community centre or classroom given by a developer remains once he has moved on - how can that apply for an on-going bus service?

Ch.11 Economic development

Policy ED3 Core Strategy preferred Options 2008 hinted at possible housing in Eldon Way site. June 2009 Submission version, without consultation, said Eldon Way would be housing (map included Foundry, not the text). September 2009 Submission said redevelopment would be in HAAP (which apart from the Issues/Options version, is unfinished. Judging from results of JAAP Preferred Options where biggest option is chosen, though most respondents were against it, site will be housing, without consultation.

Para.1.25 Para.11.32

Policy ED4 T1 & T2 Note CH.1 Introduction to CS Submission 2009 para.1.25 East England Plan requires 3000 additional jobs, presumably to 2021. Revised Southend Airport is expected to drive Economic development. But at para. 11.32 Eldon Way-Foundry estate is planned to be more suitably utilized. "...alternative land will be required to accommodated employment uses so displaced" - ie jobs sent to eg new site near Southend Airport - not new jobs.

Remove compulsory relocation

Policy states Council will allocate 18ha of land to make up for de-allocations in ED3 - that proves point above.

Proposals for moving employment to out of town locations with no existing transport links are contrary to government policies PPG4, PPS1 and PPS4 and Core Strategy Policy T1.

Evidence Base is ignored by contravening Hockley Parish Plan 2007 and ignoring residents' views on HAAP Issues/Options. Next stage of HAAP Preferred Options is pre-empted and rendered irrelevant.

Core Strategy plans to relocate Eldon Way Foundry estate to Greenfield site with no nearby bus or railway. RDC plans to upgrade the nearest road to dual carriageway, though the connecting B1013 (through Hockley) will stay single, said by ECC Highways statistics to be 72% capacity. Airport bosses and council cannot suggest there will be no traffic growth from JAAP and new industrial site.

Revise both 2009 Core Strategy and 2009 HAAP Issues/options

Move to new industrial site near airport contravenes PPS4:

EC7.3C "out of centre sites, with preference given to sites..well served by choice of..transport and..close to centre and..high likelihood of forming links with centre". There is no current public transport and links with centres is unlikely".

EC 7.5.1 "whether the site is or will be accessible and well served by choice of transport, public transport, walking and cycling, as well as by car..". Remote location, narrow busy B1013 makes the site unsuitable for access by cycle or on foot.

It also contravenes PPS1 (27vii).. "reduce need to travel, encourage accessible public transport provision to secure more sustainable patterns of transport..Planning should actively manage patterns of urban growth to make fullest use of public transport and focus development in existing centres, near to major public transport interchanges". Core Strategy undermines its own policy Transport and Highways policy T1 and is unsound.

H1 & RTC6 Although shown on accompanying drawing in earlier versions, there was no prior textual mention of Foundry industrial estate (next to Eldon Way) for redevelopment until current CS 2009 Submission. In recent amendment to the CS this was stated to be due to a typing error!

Chapter 12: Retail/Town centres

The Core Strategy misrepresents findings of the Retail and Leisure Study 2008.

Defer whole of proposals for Hockley town centre to Hockley Area Action Plan.

Para.12.38 H1 & RTC6 The Core Strategy states (para.12.38) "The Retail & Leisure Study indicates Hockley has great potential. Hockley has been identified as having a need for additional convenience floorspace."

Whereas the R&LS actually states:

1) (10.26) "the scale of need does not lend itself to a foodstore capable of retaining a significant proportion of main food

Core Strategy Submission Document

16745 Object

CHAPTER 10 Policy T2 - Highways Improvements

shopping expenditure".

2) (10.28) "There is no immediate capacity for additional floorspace".

3) (10.29) "we recommend focus be maintained on developing Hockley's existing strengths, rather than retail expansion"

4) 10.31 "the current nature of Hockley does not lend itself to classification as a 'town centre' as defined by PPS6. Moreover, we have identified that it has a very small catchment population. Accordingly, the council may wish to consider reclassifying Hockley from a town centre to a district centre".

Remove threat of compulsory purchase orders.

The Council will work with landowners and its partners to deliver the HAAP.

Chapter 5: Character of Place and Local Lists

Para.5.4 "Rochford district has unique character..stems from traditional buildings..still dominate towns and villages".

Para.5.17 "Council believes many buildings..are of local distinctiveness..part of..cherished local scene".

This only appears to apply to certain places: Rochford, Rayleigh, greenbelt villages. Many Hockley conservable items have been systemically removed for supposedly lucrative development in face of widespread protect. This is for supposed need for housing. In fact heritage items have been replaced by dwellings most cannot afford, and/or are hard to sell due to unsuitability of massing and siting. Many other homes are jeopardised by this practice.

Conclusion

Core Strategy Submission DPD is basically unsound in many respects:

Incomplete information. Amongst others, it refers to Hockley AAP, the first stage of which is complete, but not other three. Rochford AAP first stage has been published in arrears of Core Strategy Submission. Rayleigh AAP is still awaited. Precise housing sites are absent, as Urban Capacity Study 2007 has been superseded by Strategic Housing Land Availability Assessment, not yet published. Traders, residents, are thus responding to Core Strategy Submission with incomplete information.

Lack of community involvement. Chapter 1, Introduction, para. 1.11 "Community involvement is an essential part of the plan making process". In Statement of Community Involvement 2006 Rochford RDC "recognises need to enable people..to have their voices heard".

Re Public Meetings: "Consideration will be had to timing and venue to ensure meeting is as accessible as possible".

Hockley Area Action Plan as an example of the opposite of all this:- Presentation of document was at Hullbridge, 7.30 p.m. It was also discussed with JAAP at Rochford Freight House (for traders only) at 7 a.m., without publicity. Excuse made: HAAP on RDC website, which none will seek unless knowing it is there. Rochford District Matters newssheet had minute articles on p.3, half way through consultation period. Another excuse: a second presentation by Hockley Residents Association with planning officer present: only because of complaints, and it is not the HRA's responsibility to RDC's job. Due to unavoidable haste of calling meeting, few knew and only 50 were present.

In Core Strategy Submission Hockley Parish Plan has been ignored. Proposals also ignore 95% rejection rate response to HAAP 2009, which included proposals for Eldon Way employment site.

Unfettered right of developers to carry on as if Core Strategy didn't exist. In PPS 12, Ch.4.6 states: "Core Strategies should be flexible and able to show how they handle contingencies". Several large planning applications have been submitted proposing developments outside the Core Strategy which does not indicate how such applications will be handled and does not comply with PPS 12.

Where are we? Finally, at Chapter 1, Introduction, para. 1.24: "the Core Strategy will have to be reviewed in the event of a new Local Area Agreement, post-2011, setting different priorities". So what purpose does all this work serve? So we have hardly finished this exercise, before it all starts again?

Summary:

Policy T1, T2 RDC proposes working with ECC Highways, developers, but admits it has no authority, responsibility here. RDC will seek developer contributions, but this is neither detailed nor costed in CS Submission nor HAAP, and contravenes PPS 12.3 para.4.93 which states "The infrastructure planning process should identify as far as possible infrastructure needs and costs". Idea of paying for road & transport improvements through Standard Charges is unproven and unsound.

In neither CS Submission nor HAAP is there any highways improvement, except idea to replace Spa roundabout with traffic lights and 1 way system up Southend Road and Hockley Rise.

RDC are proposing to scatter housing across the district in around 12 or sites but no detailed consideration has been given to the implications for highways across the District. Many roads across the District are at or near capacity but no modelling has been undertaken to determine the impacts.

Full Text: Ch. 4 Housing; Ch.10 Transport, Highways; Ch.11 Economic Development; Ch.12 Retail/town centres; Ch.5 Character of place & Local Lists

Chapter 4: Housing

Para 4.8 States sustainability underlines any decisions on housing location, primarily: current and future deliverability of infrastructure, eg roads, services, public transport, health.

Policy H1, Para.4.14 Some employment sites are considered more suitable for other uses (eg housing) including Eldon Way/Foundry, Hockley. This is all open to question.

Hockley-re Eldon Way/Foundry

In CS Preferred Options 2008 policy H2

N.E.Hockley was discarded as a housing option - whilst close to centre, station, "impact on highway network from traffic heading through Hockley...along Ashingdon Road..renders location unviable". Clearly the same principle applied to Eldon Way/Foundry for the same reasons.

Need to be logical and even-handed in proposals

June 2009 issue C S Submission issue says Eldon Way will be used for housing, whereas Sept.2009 issue says "alternative uses, including residential.." to be decided by HAAP (Issues consultation done, Pref.Options issue awaited, but judging from JAAP Pref.Options decision - namely biggest option chosen against overriding opposition, it will be housing).

Policy H1, T1 Proposals for moving employment to out of town locations, at either end of the district, with no existing public transport links, are contrary to government policy PPG14 & PPS1. it also contravenes the Core Strategy's stated aims of reducing carbon emissions; reliance on car transport and providing "an integrated network of cycle paths",

The Core Strategy also contravenes its own policy T1 and is unsound.

Health services GP surgeries are full and a PCT health centre will not occur in the foreseeable economic climate.

Ch.10: Highways and Transport

Policy T1, T2 RDC proposes working with ECC Highways, developers, but admits it has no authority, responsibility here. RDC will seek developer contributions, but this is neither detailed nor costed in CS Submission nor HAAP, and contravenes PPS 12.3 para.4.93 which states "The infrastructure planning process should identify as far as possible infrastructure needs and costs". Idea of paying for road & transport improvements through Standard Charges is unproven and unsound.

Establish like motorways with wholesale demolition.

In neither CS Submission nor HAAP is there any highways improvement, except idea to replace Spa roundabout with traffic lights and 1 way system up Southend Road and Hockley Rise.

RDC are proposing to scatter housing across the district in around 12 or sites but no detailed consideration has been given to the implications for highways across the District. Many roads across the District are at or near capacity but no modelling has been undertaken to determine the impacts.

It is clear that (i) the combined impact of scattering houses across the District and (ii) relocating Eldon Way/Foundry Industrial Estates with no public transport services will exacerbate existing problems. It is clear that the extent of improvements required is both unknown and not funded and the proposal is unsound.

Para.10.5

Policy T3, CLT1 Appendix CLT1

T1 & T2 "...highway improvements serving new developments..in a timely manner..ensuring developments delivered alongside necessary infrastructure".

These improvements cannot possibly be delivered. It should be realised: B1013 (Southend Rd), Rectory Road Hawkwell, Ashingdon, West Rochford - all in area proposed for large new developments are former winding, narrow country roads, tarmacked over for motorised traffic. Large housing increments are unsustainable off these roads, which

Core Strategy Submission Document

16751 Object

CHAPTER 10 Policy T2 - Highways Improvements

cannot be altered without much destruction.

Public transport RDC admits this is in the private sector. In Hockley, operator has cut No 7 service to one per hour from Ashingdon Schools, claiming it is unviable beyond. This is unlikely to change as Hockley is car dependant. No 8 bus through Hawkwell is cut to one per hour to Rayleigh, for same reason as No 7. Proposed planning agreements with developers can't run: e.g., a community centre or classroom given by a developer remains once he has moved on - how can that apply for an on-going bus service?

Ch.11 Economic development

Policy ED3 Core Strategy preferred Options 2008 hinted at possible housing in Eldon Way site. June 2009 Submission version, without consultation, said Eldon Way would be housing (map included Foundry, not the text). September 2009 Submission said redevelopment would be in HAAP (which apart from the Issues/Options version, is unfinished. Judging from results of JAAP Preferred Options where biggest option is chosen, though most respondents were against it, site will be housing, without consultation.

Para.1.25 Para.11.32

Policy ED4 T1 & T2 Note CH.1 Introduction to CS Submission 2009 para.1.25 East England Plan requires 3000 additional jobs, presumably to 2021. Policy states Council will allocate 18ha of land to make up for de-allocations in ED3 - that proves point above.

Proposals for moving employment to out of town locations with no existing transport links are contrary to government policies PPG4, PPS1 and PPS4 and Core Strategy Policy T1.

Evidence Base is ignored by contravening Hockley Parish Plan 2007 and ignoring residents' views on HAAP Issues/Options. Next stage of HAAP Preferred Options is pre-empted and rendered irrelevant.

Core Strategy plans to relocate Eldon Way Foundry estate to Greenfield site with no nearby bus or railway. RDC plans to upgrade the nearest road to dual carriageway, though the connecting B1013 (through Hockley) will stay single, said by ECC Highways statistics to be 72% capacity. Airport bosses and council cannot suggest there will be no traffic growth from JAAP and new industrial site.

Core Strategy Submission Document

O - 16757 - 14229 - Policy T2 - Highways Improvements - i, iii

16757 Object

CHAPTER 10 Policy T2 - Highways Improvements

Move to new industrial site near airport contravenes PPS4:

EC7.3C "out of centre sites, with preference given to sites..well served by choice of..transport and..close to centre and..high likelihood of forming links with centre". There is no current public transport and links with centres is unlikely".

EC 7.5.1 "whether the site is or will be accessible and well served by choice of transport, public transport, walking and cycling, as well as by car..". Remote location, narrow busy B1013 makes the site unsuitable for access by cycle or on foot.

It also contravenes PPS1 (27vii).. "reduce need to travel, encourage accessible public transport provision to secure more sustainable patterns of transport..Planning should actively manage patterns of urban growth to make fullest use of public transport and focus development in existing centres, near to major public transport interchanges". Core Strategy undermines its own policy Transport and Highways policy T1 and is unsound.

CHAPTER 10 Policy T3 - Public Transport

Respondent: Ms G Yeadell [7834]

6 Southend Road
Hockley
Essex
SS5 4QQ
01702 205450

Agent: N/A

Full Text: Para 4.8 States sustainability underlines any decisions on housing location, primarily: current and future deliverability of infrastructure, eg roads, services, public transport, health.

Policy H1

Para.4.14 Some employment sites are considered more suitable for other uses (eg housing) including Eldon Way/Foundry, Hockley. This is all open to question.

Hockley-re Eldon Way/Foundry

In CS Preferred Options 2008 policy H2 you discarded N.E.Hockley as a housing option - whilst close to centre, station, "impact on highway network from traffic heading through Hockley..along Ashingdon Road..renders location unviable". Clearly the same principle applied to Eldon Way/Foundry for the same reasons.

Response to C.S Preferred Options 2008 and HAAP 2009

June 2009 issue C S Submission issue says Eldon Way will be used for housing, whereas Sept.2009 issue says "alternative uses, including residential.." to be decided by HAAP (Issues consultation done, Pref.Options issue awaited, but judging from JAAP Pref.Options decision - namely biggest option chosen against overriding opposition, it will be housing).

Need to be logical and even-handed in proposals

Health services GP surgeries are full and a PCT health centre will not occur in the foreseeable economic climate.

Ch.10: Highways and Transport

Policy T1, T2 RDC proposes working with ECC Highways, developers, but admits it has no authority, responsibility here. RDC will seek developer contributions, but this is neither detailed nor costed in CS Submission nor HAAP, and contravenes PPS 12.3 para.4.93 which states "The infrastructure planning process should identify as far as possible infrastructure needs and costs". Idea of paying for road & transport improvements through Standard Charges is unproven and unsound.

Establish likely level of Standard Charges. Accept you cannot turn district into motorways with wholesale demolition.

In neither CS Submission nor HAAP is there any highways improvement, except idea to replace Spa roundabout with traffic lights and 1 way system up Southend Road and Hockley Rise.

Para.10.5 "..highway improvements serving new developments..in a timely manner..ensuring developments delivered alongside necessary infrastructure".

These improvements cannot possibly be delivered. It should be realised: B1013 (Southend Rd), Rectory Road Hawkwell, Ashingdon, West Rochford - all in area proposed for large new developments are former winding, narrow country roads, tarmacked over for motorised traffic. Large housing increments are unsustainable off these roads, which cannot be altered without much destruction.

Reply to CS Pref. Options 2008 & HAAP Issues/Options 2009

Policy T3, CLT1 Appendix CLT1 Public transport RDC admits this is in the private sector. In Hockley, operator has cut No7 service to 1 per hour from Ashingdon Schools, claiming it is unviable beyond. This is unlikely to change as Hockley is car dependant. No8 bus through Hawkwell is cut to 1 per hour to Rayleigh, for same reason as No7. Proposed planning agreements with developers can't run: eg, a community centre or classroom given by a developer remains once he has moved on - how can that apply for an on-going bus service?

Reply to Infrastructure Transport in CS Pref. Opts. 2008 and to HAAP Issues Opts. 2009.

Ch.11 Economic development

Policy ED3 Core Strategy preferred Options 2008 hinted at possible housing in Eldon Way site. June 2009 Submission version, without consultation, said Eldon Way would be housing (map included Foundry, not the text). September 2009 Submission said redevelopment would be in HAAP (which apart from the Issues/Options version, is unfinished. Judging from results of JAAP Preferred Options where biggest option is chosen, though most respondents were against it, site will be housing, without consultation.

Core Strategy Submission Document

O - 16715 - 7834 - Policy T3 - Public Transport - i

16715 Object

CHAPTER 10 Policy T3 - Public Transport

Para.1.25, Para.11.32 Note CH.1 Introduction to CS Submission 2009 para.1.25 East England Plan requires 3000 additional jobs, presumably to 2021. Revised Southend Airport is expected to drive Economic development. But at para. 11.32 Eldon Way-Foundry estate is planned to be more suitably utilized. "...alternative land will be required to accommodated employment uses so displaced" - ie jobs sent to eg new site near Southend Airport - not new jobs.

Reply to HAAP Issues Options 2009

Remove compulsory relocation

Policy ED4 Policy states Council will allocate 18ha of land to make up for de-allocations in ED3 - that proves point above.

Proposals for moving employment to out of town locations with no existing transport links are contrary to government policies PPG4, PPS1 and PPS4 and Core Strategy Policy T1.

Evidence Base is ignored by contravening Hockley Parish Plan 2007 and ignoring residents' views on HAAP Issues/Options. Next stage of HAAP Preferred Options is pre-empted and rendered irrelevant. Core Strategy plans to relocate Eldon Way Foundry estate to Greenfield site with no nearby bus or railway. RDC plans to upgrade the nearest road to dual carriageway, though the connecting B1013 (through Hockley) will stay single, said by ECC Highways statistics to be 72% capacity. Airport bosses and council cannot suggest there will be no traffic growth from JAAP and new industrial site.

Reply to Hockley Parish Plan 2007. HAAP Issues 2009

Move to new industrial site near airport contravenes PPS4:

- EC7.3C "out of centre sites, with preference given to sites...well served by choice of...transport and...close to centre and...high likelihood of forming links with centre". There is no current public transport and links with centres is unlikely".

- EC 7.5.1 "whether the site is or will be accessible and well served by choice of transport, public transport, walking and cycling, as well as by car...". Remote location, narrow busy B1013 makes the site unsuitable for access by cycle or on foot.

It also contravenes PPS1 (27vii)... "reduce need to travel, encourage accessible public transport provision to secure more sustainable patterns of transport...Planning should actively manage patterns of urban growth to make fullest use of public transport and focus development in existing centres, near to major public transport interchanges". Core Strategy undermines its own policy Transport and Highways policy T1 and is unsound.

Although shown on accompanying drawing in earlier versions, there was no prior textual mention of Foundry industrial estate (next to Eldon Way) for redevelopment until current CS 2009 Submission. This was stated to be a typing error, but does not inspire confidence in reliability of drafting.

Revise both 2009 Core Strategy and 2009 HAAP Issues/options

Chapter 12: Retail/Town centres

The Core Strategy misrepresents findings of the Retail and Leisure Study 2008.

Para.12.38 The Core Strategy states (para.12.38) "The Retail & Leisure Study indicates Hockley has great potential. Hockley has been identified as having a need for additional convenience floorspace."

Whereas the R&LS actually states:

1) (10.26) "the scale of need does not lend itself to a foodstore capable of retaining a significant proportion of main food shopping expenditure".

2) (10.28) "There is no immediate capacity for additional floorspace".

3) (10.29) "we recommend focus be maintained on developing Hockley's existing strengths, rather than retail expansion"

4) 10.31 "the current nature of Hockley does not lend itself to classification as a 'town centre' as defined by PPS6. Moreover, we have identified that it has a very small catchment population. Accordingly, the council may wish to consider reclassifying Hockley from a town centre to a district centre".

Defer whole of proposals for Hockley town centre to Hockley Area Action Plan.

The Council will work with landowners and its partners to deliver the HAAP.

Remove threat of compulsory purchase orders.

Core Strategy Submission Document

16715 Object

CHAPTER 10 Policy T3 - Public Transport

One doesn't perceive impartiality when the Planning Director replies to local HAAP survey with "The affluent people of Hockley are entitled to famous name shops".

Chapter 5: Character of Place and Local Lists

Para.5.4 "Rochford district has unique character..stems from traditional buildings..still dominate towns and villages".

Para.5.17 "Council believes many buildings..are of local distinctiveness..part of..cherished local scene".

This only applies to favoured places: Rochford, Rayleigh, greenbelt villages. Many Hockley conservable items have been systemically removed for supposedly lucrative development in face of widespread protect. This is for supposed need for housing. In fact heritage items have been replaced by dwellings most cannot afford, and/or are hard to sell due to unsuitability of massing and siting. Many other homes are jeopardised by this practice.

HAAP issues 2009. Core Strategy 2006, 2007,2008, SCI.2006

Fewer 'vested interests', more even handedness. No more pressing people out of businesses, homes for expediency.

A CPRE Fieldwork issue extolled Local Lists, citing refusal of 16 flats to replace character house, not on local list. Inspector said house, facade made a contribution to area character, even if English heritage decided it didn't warrant listing. Council worked to get the house grade listed and even made adjacent area conservation one.

Hockley had one such on a "significant site" faced with 13 flats. Ward Member omitted house from refusal proposal, so house could be demolished. RDC dropped Local List ahead of appeal: "Government frowned on such Lists" (Other LAs, unaware of supposed directive retained theirs. After demolition RDC restored Local Lists, saying Government now support them. When Inspector queried the complaint, the then policy officer said "just politics, lot of local interest, nothing of character in the area[!]. (A dozen such items had been removed). Some "distinctive" Hockley buildings are still condemned (in Greensward Lane.; others threatened (Spa Road). Whereas a modest hue and cry in Rayleigh will usually result in a building being saved.

Conclusion

Core Strategy Submission DPD is basically unsound in many respects

Incomplete information. Amongst others, it refers to Hockley AAP, the first stage of which is complete, but not other three. Rochford AAP first stage has been published in arrears of Core Strategy Submission. Rayleigh AAP is still awaited. Precise housing sites are absent, as Urban Capacity Study 2007 has been superseded by Strategic Housing Land Availability Assessment, not yet published. Traders, residents, are thus responding to Core Strategy Submission with incomplete information.

Lack of community involvement. Chapter 1, Introduction, para. 1.11 "Community involvement is an essential part of the plan making process".

In Statement of Community Involvement 2006 Rochford RDC "recognises need to enable people to have their voices heard".

Re Public Meetings: "Consideration will be had to timing and venue to ensure meeting is as accessible as possible".

Take Hockley Area Action Plan as an example of the opposite of all this:- Presentation of document was at Hullbridge, 7.30pm. It was also discussed with JAAP at Rochford Freight House (for traders only) at 7am, without publicity. Excuse made: HAAP on RDC website, which none will seek unless knowing it is there. Rochford District Matters newsheet had minute articles on p.3, half way through consultation period. Another excuse: a 2nd presentation by Hockley Residents Association with planning officer present: only because of complaints, and it is not the HRA's responsibility to RDC's job. Due to unavoidable haste of calling meeting, few knew and only 50 were present.

In Core Strategy Submission Hockley Parish Plan has been ignored. Proposals also ignore 95% rejection rate response to HAAP 2009, which included proposals for Eldon Way employment site.

Unfettered right of developers to carry on as if Core Strategy didn't exist. In PPS 12, Ch.4.6 states: "Core Strategies should be flexible and able to show how they handle contingencies". Several large planning applications have been submitted proposing developments outside the Core Strategy which does not indicate how such applications will be handled and does not comply with PPS 12.

Where are we? Finally, at Chapter 1, Introduction, para. 1.24: "the Core Strategy will have to be reviewed in the event of a new Local Area Agreement, post-2011, setting different priorities". So what purpose does all this work serve? So we have hardly finished this exercise, before it all starts again?

Summary:

Policy T3, CLT1 Appendix CLT1 Public transport RDC admits this is in the private sector. In Hockley, operator has cut No7 service to 1 per hour from Ashingdon Schools, claiming it is unviable beyond. This is unlikely to change as Hockley is car dependant. No8 bus through Hawkwell is cut to 1 per hour to Rayleigh, for same reason as No7. Proposed

Full Text:

Thank you for inviting the Highways Agency (HA) to comment on the Rochford Core Strategy (CS) Submission Document and Rochford Area Action plan (AAP) prepared by Rochford District Council

As you are aware the HA is an executive agency of the Department for Transport (DfT). We are responsible for operating, maintaining and improving England's motorway and all-purpose trunk road network, collectively known as the Strategic Road Network (SRN), on behalf of the Secretary of State for Transport.

In spatial planning and development control terms, we have a duty to safeguard the operation of the motorway and trunk road network as set out in the Department for Transport Circular: 02/2007: Planning and the Strategic Road Network. <http://www.dft.gov.uk/pgr/regional/strategy/policy/circular207planningandstrategic>. The circular encourages the HA to work co-operatively with Local Planning Authorities within the framework of the Government's policies for planning, growth areas, regeneration, integrated transport and sustainability. We look to your Council's Local Development Framework to promote strategies, policies and land allocations which would support alternatives to the private car.

In the case of Rochford there are no trunk roads within the District although there are two strategic corridors namely the A13 and A127/A1159 which connect into the M25 motorway network at Junctions 30 and 29 respectively. Sections of these areas are currently heavily congested, particularly during peak periods, and operate under considerable levels of network stress. Therefore it is important to the HA that the impact of major development proposals in the Rochford area is considered within the context of future impact on the M25 and the A13 Trunk Road.

Please see below some general comments regarding the soundness of the CS and SSA from a transport perspective, referring to specific proposed submission policies as necessary. This response has been completed with reference to paragraph 4.52 of PPS12 (2008) PPS12, paragraph 4.52 - To be 'sound' a core strategy should be JUSTIFIED, EFFECTIVE and consistent with NATIONAL POLICY.

CORE STRATEGY

Policy GB1 - Green Belt Protection

The HA acknowledges that only the minimum amount of Green Belt land will be allocated to meet the District's housing and employment needs as necessary. However, the HA is concerned that any proposed redevelopment of greenbelt sites could result in development in areas with limited access to sustainable transport modes therefore resulting in higher levels of car usage and subsequent impact on the SRN. Although the HA recognizes that new public transport hubs that would facilitate the use of non-car modes could be developed over time, this process is likely to require very substantial investment.

It is therefore important that an appropriate assessment of infrastructure requirements is performed for development sites on Green Belt land. Funding towards the necessary public transport infrastructure improvements must be sought and secured prior to occupation of any new development on greenbelt land. Furthermore, the occupation of such developments should be phased in line with necessary transport infrastructure. This will help the CS meet the PPS12 requirement that a sound DPD should be 'justified' and 'effective' and hence deliverable.

Policy T1 - Highways

Policy T1 highlights the need to reduce reliance on the private car but also observes that 'some impact on the highway network is inevitable'. In a District with such high levels of private car ownership and a limited public transport network, as stated in paragraph 10.2, it will be important to assess the potential impacts to the highway network and ensure that mitigation measures are proposed and implemented where necessary.

An emphasis should be placed on the provision and improvement of sustainable transport infrastructure, particularly where high trip-generating developments such as offices are proposed. In line with the DfT's Guidance on Transport Assessment (2007) - DfT GTA, paragraph 4.51 - 'The key issue is the need to ensure that development proposals strive to achieve nil detriment ('no worse off') to the strategic network, for the opening year and appropriate horizon year'. This emphasis will assist in mitigating potential increases in private vehicle trips and hence help ensure that there is a nil-detriment effect on the SRN.

Policy T3 - Public Transport

Core Strategy Submission Document

O - 16728 - 14244 - Policy T3 - Public Transport - i, ii

16728 Object

CHAPTER 10 Policy T3 - Public Transport

The recent Planning Inspectorate 'LDF - Learning from Experience' document (September 2009) suggests that a Core Strategy should identify a clear source of funding for infrastructure for at least the first 5 years of the plan - The Planning Inspectorate, LDF: Examining DPDs: Learning from experience, September 2009, Paragraph 22 - 'For at least the first 5 years of the plan it should be clear what infrastructure is required, who is going to fund and provide it and how it is to relate to the rate of development'.. Paragraph 10.15 of the CS highlights the importance of public transport links for new developments and implies that developers may be required to contribute towards public transport provision. However, it is noted that developer contributions cannot be expected to pay for all transport improvements and as such, in line with the recent Planning Inspectorate document outlined above additional sources of funding should be identified. It is recommended that alternative sources of funding for public transport improvements are clearly outlined within the CS to ensure that adequate infrastructure provision is made.

Policy T4 - South Essex Rapid Transit

As mentioned in our response to the Core Strategy Issues and options consultation the HA is supportive of this policy and the need to progress the route through South Essex. This has the potential to reduce the impact on the SRN (A13).

Policy T5 - Travel Plans

The HA welcomes the requirement for a travel plan for developments involving both destination and origin trips. However it is noted that no threshold for employment sites have been specified. Essex County Council requires the production of a workplace travel plan for developments with over 50 employees or where there will be a significant impact on the local road network. To avoid ambiguity for developers, the HA recommends that the Rochford District Core Strategy specifies a similar threshold within Policy T5. This will ensure the Core Strategy is in line with PPG13 paragraph 87 - PPG13 - 'Local authorities are expected to consider setting local targets for the adoption of travel plans by local businesses and other organizations..'

Policy ED2 - London Southend Airport

The HA previously responded to the London Southend and Environs Joint Area Action Plan Preferred Options Document (March 2009). As such, we have not repeated our comments here but instead refer you to our consultation response dated 31 March 2009.

Summary:

Policy T3 - Public Transport

The recent Planning Inspectorate 'LDF - Learning from Experience' document (September 2009) suggests that a Core Strategy should identify a clear source of funding for infrastructure for at least the first 5 years of the plan - The Planning Inspectorate, LDF: Examining DPDs: Learning from experience, September 2009, Paragraph 22 - 'For at least the first 5 years of the plan it should be clear what infrastructure is required, who is going to fund and provide it and how it is to relate to the rate of development'.. Paragraph 10.15 of the CS highlights the importance of public transport links for new developments and implies that developers may be required to contribute towards public transport provision. However, it is noted that developer contributions cannot be expected to pay for all transport improvements and as such, in line with the recent Planning Inspectorate document outlined above additional sources of funding should be identified. It is recommended that alternative sources of funding for public transport improvements are clearly outlined within the CS to ensure that adequate infrastructure provision is made.

Hockley-re Eldon Way/Foundry

In CS Preferred Options 2008 policy H2

N.E.Hockley was discarded as a housing option - whilst close to centre, station, "impact on highway network from traffic heading through Hockley...along Ashingdon Road..renders location unviable". Clearly the same principle applied to Eldon Way/Foundry for the same reasons.

Need to be logical and even-handed in proposals

June 2009 issue C S Submission issue says Eldon Way will be used for housing, whereas Sept.2009 issue says "alternative uses, including residential.." to be decided by HAAP (Issues consultation done, Pref.Options issue awaited, but judging from JAAP Pref.Options decision - namely biggest option chosen against overriding opposition, it will be housing).

Policy H1, T1 Proposals for moving employment to out of town locations, at either end of the district, with no existing public transport links, are contrary to government policy PPG14 & PPS1. it also contravenes the Core Strategy's stated aims of reducing carbon emissions; reliance on car transport and providing "an integrated network of cycle paths",

The Core Strategy also contravenes its own policy T1 and is unsound.

Health services GP surgeries are full and a PCT health centre will not occur in the foreseeable economic climate.

Ch.10: Highways and Transport

Policy T1, T2 RDC proposes working with ECC Highways, developers, but admits it has no authority, responsibility here. RDC will seek developer contributions, but this is neither detailed nor costed in CS Submission nor HAAP, and contravenes PPS 12.3 para.4.93 which states "The infrastructure planning process should identify as far as possible infrastructure needs and costs". Idea of paying for road & transport improvements through Standard Charges is unproven and unsound.

Establish like motorways with wholesale demolition.

In neither CS Submission nor HAAP is there any highways improvement, except idea to replace Spa roundabout with traffic lights and 1 way system up Southend Road and Hockley Rise.

RDC are proposing to scatter housing across the district in around 12 or sites but no detailed consideration has been given to the implications for highways across the District. Many roads across the District are at or near capacity but no modelling has been undertaken to determine the impacts.

It is clear that (i) the combined impact of scattering houses across the District and (ii) relocating Eldon Way/Foundry Industrial Estates with no public transport services will exacerbate existing problems. It is clear that the extent of improvements required is both unknown and not funded and the proposal is unsound.

Para.10.5

Policy T3, CLT1 Appendix CLT1

T1 & T2 "...highway improvements serving new developments..in a timely manner..ensuring developments delivered alongside necessary infrastructure".

These improvements cannot possibly be delivered. It should be realised: B1013 (Southend Rd), Rectory Road Hawkwell, Ashingdon, West Rochford - all in area proposed for large new developments are former winding, narrow country roads, tarmacked over for motorised traffic. Large housing increments are unsustainable off these roads, which

Core Strategy Submission Document

O - 16747 - 14229 - Policy T3 - Public Transport - i, iii

16747 Object

CHAPTER 10 Policy T3 - Public Transport

cannot be altered without much destruction.

Public transport RDC admits this is in the private sector. In Hockley, operator has cut No 7 service to one per hour from Ashingdon Schools, claiming it is unviable beyond. This is unlikely to change as Hockley is car dependant. No 8 bus through Hawkwell is cut to one per hour to Rayleigh, for same reason as No 7. Proposed planning agreements with developers can't run: e.g., a community centre or classroom given by a developer remains once he has moved on - how can that apply for an on-going bus service?

Ch.11 Economic development

Policy ED3 Core Strategy preferred Options 2008 hinted at possible housing in Eldon Way site. June 2009 Submission version, without consultation, said Eldon Way would be housing (map included Foundry, not the text). September 2009 Submission said redevelopment would be in HAAP (which apart from the Issues/Options version, is unfinished. Judging from results of JAAP Preferred Options where biggest option is chosen, though most respondents were against it, site will be housing, without consultation.

Para.1.25 Para.11.32

Policy ED4 T1 & T2 Note CH.1 Introduction to CS Submission 2009 para.1.25 East England Plan requires 3000 additional jobs, presumably to 2021. Revised Southend Airport is expected to drive Economic development. But at para. 11.32 Eldon Way-Foundry estate is planned to be more suitably utilized. "...alternative land will be required to accommodated employment uses so displaced" - ie jobs sent to eg new site near Southend Airport - not new jobs.

Remove compulsory relocation

Policy states Council will allocate 18ha of land to make up for de-allocations in ED3 - that proves point above.

Proposals for moving employment to out of town locations with no existing transport links are contrary to government policies PPG4, PPS1 and PPS4 and Core Strategy Policy T1.

Evidence Base is ignored by contravening Hockley Parish Plan 2007 and ignoring residents' views on HAAP Issues/Options. Next stage of HAAP Preferred Options is pre-empted and rendered irrelevant.

Core Strategy plans to relocate Eldon Way Foundry estate to Greenfield site with no nearby bus or railway. RDC plans to upgrade the nearest road to dual carriageway, though the connecting B1013 (through Hockley) will stay single, said by ECC Highways statistics to be 72% capacity. Airport bosses and council cannot suggest there will be no traffic growth from JAAP and new industrial site.

Revise both 2009 Core Strategy and 2009 HAAP Issues/options

Move to new industrial site near airport contravenes PPS4:

EC7.3C "out of centre sites, with preference given to sites..well served by choice of..transport and..close to centre and..high likelihood of forming links with centre". There is no current public transport and links with centres is unlikely".

EC 7.5.1 "whether the site is or will be accessible and well served by choice of transport, public transport, walking and cycling, as well as by car..". Remote location, narrow busy B1013 makes the site unsuitable for access by cycle or on foot.

It also contravenes PPS1 (27vii).. "reduce need to travel, encourage accessible public transport provision to secure more sustainable patterns of transport..Planning should actively manage patterns of urban growth to make fullest use of public transport and focus development in existing centres, near to major public transport interchanges". Core Strategy undermines its own policy Transport and Highways policy T1 and is unsound.

H1 & RTC6 Although shown on accompanying drawing in earlier versions, there was no prior textual mention of Foundry industrial estate (next to Eldon Way) for redevelopment until current CS 2009 Submission. In recent amendment to the CS this was stated to be due to a typing error!

Chapter 12: Retail/Town centres

The Core Strategy misrepresents findings of the Retail and Leisure Study 2008.

Defer whole of proposals for Hockley town centre to Hockley Area Action Plan.

Para.12.38 H1 & RTC6 The Core Strategy states (para.12.38) "The Retail & Leisure Study indicates Hockley has great potential. Hockley has been identified as having a need for additional convenience floorspace."

Whereas the R&LS actually states:

1) (10.26) "the scale of need does not lend itself to a foodstore capable of retaining a significant proportion of main food

Core Strategy Submission Document

16747 Object

CHAPTER 10 Policy T3 - Public Transport

shopping expenditure".

2) (10.28) "There is no immediate capacity for additional floorspace".

3) (10.29) "we recommend focus be maintained on developing Hockley's existing strengths, rather than retail expansion"

4) 10.31 "the current nature of Hockley does not lend itself to classification as a 'town centre' as defined by PPS6. Moreover, we have identified that it has a very small catchment population. Accordingly, the council may wish to consider reclassifying Hockley from a town centre to a district centre".

Remove threat of compulsory purchase orders.

The Council will work with landowners and its partners to deliver the HAAP.

Chapter 5: Character of Place and Local Lists

Para.5.4 "Rochford district has unique character..stems from traditional buildings..still dominate towns and villages".

Para.5.17 "Council believes many buildings..are of local distinctiveness..part of..cherished local scene".

This only appears to apply to certain places: Rochford, Rayleigh, greenbelt villages. Many Hockley conservable items have been systemically removed for supposedly lucrative development in face of widespread protect. This is for supposed need for housing. In fact heritage items have been replaced by dwellings most cannot afford, and/or are hard to sell due to unsuitability of massing and siting. Many other homes are jeopardised by this practice.

Conclusion

Core Strategy Submission DPD is basically unsound in many respects:

Incomplete information. Amongst others, it refers to Hockley AAP, the first stage of which is complete, but not other three. Rochford AAP first stage has been published in arrears of Core Strategy Submission. Rayleigh AAP is still awaited. Precise housing sites are absent, as Urban Capacity Study 2007 has been superseded by Strategic Housing Land Availability Assessment, not yet published. Traders, residents, are thus responding to Core Strategy Submission with incomplete information.

Lack of community involvement. Chapter 1, Introduction, para. 1.11 "Community involvement is an essential part of the plan making process". In Statement of Community Involvement 2006 Rochford RDC "recognises need to enable people..to have their voices heard".

Re Public Meetings: "Consideration will be had to timing and venue to ensure meeting is as accessible as possible".

Hockley Area Action Plan as an example of the opposite of all this:- Presentation of document was at Hullbridge, 7.30 p.m. It was also discussed with JAAP at Rochford Freight House (for traders only) at 7 a.m., without publicity. Excuse made: HAAP on RDC website, which none will seek unless knowing it is there. Rochford District Matters newssheet had minute articles on p.3, half way through consultation period. Another excuse: a second presentation by Hockley Residents Association with planning officer present: only because of complaints, and it is not the HRA's responsibility to RDC's job. Due to unavoidable haste of calling meeting, few knew and only 50 were present.

In Core Strategy Submission Hockley Parish Plan has been ignored. Proposals also ignore 95% rejection rate response to HAAP 2009, which included proposals for Eldon Way employment site.

Unfettered right of developers to carry on as if Core Strategy didn't exist. In PPS 12, Ch.4.6 states: "Core Strategies should be flexible and able to show how they handle contingencies". Several large planning applications have been submitted proposing developments outside the Core Strategy which does not indicate how such applications will be handled and does not comply with PPS 12.

Where are we? Finally, at Chapter 1, Introduction, para. 1.24: "the Core Strategy will have to be reviewed in the event of a new Local Area Agreement, post-2011, setting different priorities". So what purpose does all this work serve? So we have hardly finished this exercise, before it all starts again?

Summary:

Policy T3 CLT1 Appendix CLT1 T1 & T2

Public transport RDC admits this is in the private sector. In Hockley, operator has cut No 7 service to one per hour from Ashingdon Schools, claiming it is unviable beyond. This is unlikely to change as Hockley is car dependant. No 8 bus through Hawkwell is cut to one per hour to Rayleigh, for same reason as No 7. Proposed planning agreements with developers can't run: e.g., a community centre or classroom given by a developer remains once he has moved on - how can that apply for an on-going bus service?

1.0 Instruction and Introduction

1.1 Charles Planning Associates Limited (Chartered Town Planners) is Instructed by Swan Hill Homes Limited (Swan Hill) to prepare and submit representations on their behalf in respect of the Rochford District Local Development Framework: Core Strategy Submission (September 2009) Development Plan Document.

1.2 The comments refer to the relevant sections and policy designations in the Submission document, as appropriate.

1.3 The comments set out in this submission are intended to assist the District Council in taking forward its Local Development Framework. It is our intention to continue to be involved in the LDF preparation process and we look forward to the opportunity to comment further at the Examination to the Core Strategy.

1.4 If you have any queries regarding the content of this submission then please do not hesitate to contact:

Peter Kneen BSc (Hons) MSc MRTPI
Planner

2.0 Housing:
Policy H1 - The Efficient Use of Land for Housing

2.1 Swan Hill recognises the importance of seeking to concentrate new developments mainly in the existing urban areas, on previously developed land where possible, particularly in view of the Government seeking to ensure 60% of all such new developments are on previously development land (PDL).

2.2 However, given the character of the District, and the strategic housing requirement of the East of England Plan, Swan Hill supports the approach that the Council must also make provision for additional development on the edge of existing settlements on greenfield sites, particularly in the most sustainable locations. As such, Swan Hill supports that where feasible, the redevelopment of existing employment sites for residential/employment purposes can make a contribution towards the strategic housing requirement, provided that sufficient additional employment land is brought forward to ensure the stability of employment levels in the District, and to ensure employment growth meets the East of England Plan requirements.

2.3 Swan Hill considers that Policy H1 should include consideration that new extensions to existing settlements have regard to their potential impact on the wider characteristics and openness objectives of the Green Belt.

Policy H2 - Extensions to Residential Envelopes and Phasing

2.4 Swan Hill generally supports the approach taken by the Council in this policy. As set out above, Swan Hill consider the Council's acknowledgment that housing requirements should be met through the allocation of land on the edge of the existing settlements is the most suitable way forward to meeting the Council's strategic housing requirement and complies with the advice in PPS3.

2.5 The need for suitable greenfield urban extensions represents the best way forward for the Council to meet its strategic housing requirement, as set out in the East of England Plan. Swan Hill supports the recognition that the potential supply of alternative previously developed sites is limited, without detrimentally affecting the character of the District, and therefore the best way forward is the use of sustainable greenfield urban extensions to the existing settlements of the District.

2.6 However, Swan Hill consider that a fundamental consideration that the District Council should consider relates to the potential impact of the urban extensions on the Green Belt policy has been somewhat overlooked. The wider sustainability credentials of the settlements of the District should only be one of many key considerations for determining the level of expansion. In view of the proximity of Southend-on-Sea to all the main settlements of the District, and the influence this has on the likely location many people would travel for employment and leisure, sustainability of many of the settlements is not a key overarching factor, and greater weight should be placed on the potential impact on the openness of the Green Belt, as this cannot be remedied if development occurs in the wrong location.

2.7 As such, Swan Hill considers that determining the location of growth for the main settlements should be to identify

Core Strategy Submission Document

S - 16891 - 8329 - Policy T3 - Public Transport - None

16891 Support

CHAPTER 10 Policy T3 - Public Transport

those locations where the impact on the wider setting of the Green Belt can be minimised. Further justification for those general locations chosen should be identified in Policy H2. In this regard, Swan Hill has serious concerns regarding the removal of Land South West of Great Wakering as a viable option for the growth of the settlement. The development of this area of Great Wakering, in addition to the potential redevelopment of the Star Lane Industrial Estate could provide a more comprehensive development, whilst ensuring that the wider openness of the Green Belt is maintained. Land South West of Great Wakering is significantly better placed to limit the impact on the wider Green Belt than Land West of Great Wakering, and could contribute to the provision of an important amenity and wildlife site for the local community.

2.8 In addition, Swan Hill consider that the Council now has no reserve provision in the event that any of the existing employment sites set out in Policy H1 fail to come forward for development within the envisaged timescale. Further, Land West of Great Wakering has not been identified in the SHLAA as a deliverable site to help meet the strategic housing requirement, contrary to the requirement set out in PPS3.

2.9 As such, Swan Hill would support the provision of suitable sites which could be safeguarded for future development in the likelihood of a shortfall in supply.

Policy H3 - Extensions to Residential Envelopes Post 2021

2.10 As set out above, Swan Hill supports the overall approach the Council has taken towards the provision of sustainable urban extensions as a suitable means of meeting their strategic housing requirement. However, as set out for Policy H2 above, Swan Hill has serious concerns regarding the removal of several proposed sites set out in the October 2008 Preferred Options Core Strategy, without any guarantee of the ability to deliver those sites set out in Policy H1.

2.11 As also considered above, the inclusion of West of Great Wakering for 250 dwellings should not be included ahead of South West of Great Wakering, in view of the fact that the site is not identified in the SHLAA as available, suitable and achievable as required by PPS3, and thus is not supported by a robust and creditable evidence base for its inclusion as a strategic site for development.

2.12 Whilst Swan Hill acknowledge that alterations to Policy H1 has resulted in the removal of some locations for growth in Policy H3 (as set out in the Sustainability Appraisal), Swan Hill does not consider that the most appropriate locations have been chosen.

2.13 In addition to the matters raised above, the use of West of Great Wakering would also result in the loss of valuable agricultural land, which clearly in a Green Belt location, should be less suitable for development than other sites, such as South West of Great Wakering, which would have limited impact on the wider Green Belt policy, and not result in the loss of valuable agricultural land.

2.14 Finally, in respect of Policies H1, H2 and H3, all of the above comments are based on our interpretation of the Submission Version Core Strategy when compared to the October 2008 Version of the Core Strategy. Without the ability to undertake a detailed assessment of the Council's SHLAA, it is not possible to clarify the proposed Core Strategy position regarding the proposed direction of growth proposed for the settlements in the District. As such, Swan Hill reserves the right to make additional representations regarding the proposed Policies H1, H2 and H3 following the publication of the SHLAA in due course.

Policy H4 - Affordable Housing

2.15 In general terms, Swan Hill supports the approach taken by the Council towards the provision of affordable housing for new residential developments. The Policy accords with the advice of National Policy and is therefore considered sound by Swan Hill.

Policy H5 - Dwelling Types

2.16 Swan Hill supports the policy provision of H5, and considers that the approach taken by the Council for this policy represents a suitably flexible alternative to stipulating percentages of dwelling mix, sought by some local authorities. The Policy accords with the advice of National Policy and is therefore considered sound by Swan Hill.

Policy H6 - Lifetime Homes

2.17 In regard to this policy, Swan Hill objects to the Council's policy where all new dwellings should be provided to the Lifetime Homes Standard. Whilst it is acknowledged that the UK has an aging population, Swan Hill considers that seeking to provide Lifetime Homes on all sites is considered to be overly onerous for proposed developers, particularly when considering the requirement for all car parking spaces to be suitable for disabled users, which could result in more schemes becoming unviable. Therefore, the provision of a percentage of Lifetime Homes should be considered through negotiations with the Council at the planning application stage, and should be determined on a case-by-case basis.

3.0 Character of Place: Policy CP1 - Design

16891 Support

CHAPTER 10 Policy T3 - Public Transport

3.1 The Town and Country Planning (General Development Procedure) Order 1995 (As Amended) makes the submission of a Design and Access Statement for most types of planning applications a Statutory requirement, and as such, the provision of a Design Brief represents a pre-requisite of all major planning applications.

3.2 Policy CP1 seeks to ensure the provision of good, high quality developments that reflect local characteristics and distinctiveness, this ideology is supported by Swan Hill.

4.0 The Green Belt:
Policy GB1 - Green Belt Protection

4.1 Following the amendments to the wording of the Policy since the October 2008 Preferred Options Core Strategy, Swan Hill is now generally supportive of Policy GB1 and its supporting text. However, as expressed above, it is important that where alterations to the Green Belt boundary occur as a result of the extension of the settlements to meet the strategic housing requirement, both the minimal amount of land is taken and where that land is taken for development, it represents the best available land which has a minimal impact of the wider openness characteristic of the Green Belt.

5.0 Environmental Issues:
Policy ENV3 - Flood Risk

5.1 Swan Hill generally supports the approach set out in Policy ENV3 regarding ensuring development accords with the sequential test of PPS25. The Policy accords with the advice of National Policy and is therefore considered sound by Swan Hill.

Policy ENV4 - Sustainable Drainage Systems (SUDS)

5.2 Following the revisions from the October 2008 Preferred Options Core Strategy, Swan Hill now generally supports the approach set out in Policy ENV4. The Policy accords with the advice of National Policy and is therefore considered sound by Swan Hill.

Policy ENV8 - On-site Renewable and Low Carbon Energy Generation

5.3 Whilst Swan Hill recognises the importance of reducing carbon emissions, particularly in new housing developments, and the role this can play in reducing the nations overall Greenhouse emissions. As such Swan Hill is generally supportive of Policy ENV8. It is noted that Policy ENG1 of the East of England Plan sets out a threshold of developments comprising 10 or more dwellings. Swan Hill consider it important for the District Council to justify the reduction in the threshold level.

5.4 Further, no assessment of Policy ENV8 has been set out in the Sustainability Appraisal which justifies the change in threshold from that of Policy ENG1 of the RSS.

Policy ENV9 - Code for Sustainable Homes

5.5 Following the revisions from the October 2008 Preferred Options Core Strategy, Swan Hill now generally supports the approach set out in Policy ENV9. The Policy accords with the advice of National Policy and is therefore considered sound by Swan Hill.

6.0 Community Infrastructure, Leisure and Tourism:
Policy CLT1 - Planning Obligations and Standard Charges

6.1 Swan Hill generally supports the overall approach the Council has taken in Policy CLT1. It is considered Policy CLT1 sets out a degree of flexibility to ensure that all sites are considered on a site-by-site basis, assessing the individual merits of each planning application, in order to ensure the levels of contributions applicable meet the five tests of Circular 05/05. The Policy accords with the advice of National Policy and is therefore considered sound by Swan Hill.

Policies CLT5 - Open Space;
CLT7 - Play Space;
CLT8 - Youth Facilities; and,
CLT10 - Playing Pitches

6.2 Swan Hill supports the need for new residential developments to incorporate a degree of new publicly accessible open space, children's play space, youth facilities and playing pitches, and as such, generally supports the policy approaches taken by the Council.

6.3 However, it is important that whilst the Council may seek to undertake an assessment of providing standard charges for new development, which, as set out in Policy CLT1, this should be based on thorough public consultation and consideration and sound justification. Swan Hill consider that within the provision of a standard charge, it is important that such provision allows for a degree of flexibility to ensure that each site is assessed individually and on its own merits. This is particularly important for those sites close to existing open spaces and facilities. As such, the levels of

16891 Support

CHAPTER 10 Policy T3 - Public Transport

open space and recreation facilities required in the 'standard charge' should be based on an up-to-date PPG17 Open Space assessment, which should be used to form a key consideration in the levels of provision likely to be required in the standard charge system proposed.

7.0 Transport: Policy T1 - Highways

7.1 Swan Hill supports the overall objectives set out in Policy T1 requiring developments to be located and designed to reduce the reliance on the private car and to meet the infrastructure needs generated by development or seek to help achieve these needs is acceptable in principle.

7.2 Swan Hill recognises the importance of providing sufficient infrastructure provision to meet the requirements of development, and that where developments have insufficient consideration of impact on existing infrastructure, they should be considered unacceptable and contrary to National policy guidance. However, Swan Hill considers it important to emphasise that the developer's role should not be seen as a means to meet existing shortfalls in provision.

Policy T3 - Public Transport

7.3 Swan Hill is generally supportive of the policy approach set out in T3, however, as set out in paragraph 7.2 above, it is important that the District Council do not consider that it is the developer's responsibility to resolve existing shortfalls in provision of public transport, and any contribution towards additional public transportation provision should only be to mitigate against the additional level of demand likely from the development proposed.

Policy T5 - Cycling and Walking

7.4 Swan Hill supports the general approach to this policy, as Swan Hill recognises the importance of promoting the use of alternatives to the private car. The policy provision acknowledges the need to ensure relevant contributions in the event of additional travel demands generated by individual developments, whilst also setting out additional aspirations for the cycle network in the District.

7.5 As such, Swan Hill considers this policy accords with the advice of National Policy and is therefore considered sound by Swan Hill.

Policy T8 - Parking Standards

7.6 The Council has recently (January 2007) adopted SPD on the requirements for parking standards, and as such, Swan Hill generally supports the policy approach chosen by the Council. As set out in the SPD, whilst Swan Hill generally supports the approach taken by the District Council towards setting residential parking standards, in that the Council has recognised that in the suburban areas, even with some access to public transport, the majority of residents will rely on the use of private cars. However, Swan Hill has concerns over the failure of the District Council to comply with the provisions of PPG13: Transport (2001) which sets out that Local Planning Authorities should not set minimum standards for car parking. Whilst it is acknowledged that PPS3 sets out provision for the consideration of local circumstances, it is considered that the Council has not justified this deviation from PPG13's maximum standard.

7.7 Whilst it is acknowledged that such justification may become apparent through the work currently being undertaken by Essex County Council, until such time, the District Council should only seek to apply the maximum standards indicated in PPG13. However, Swan Hill recommends that the District Council make provisions in the wording of the Policy to allow for changes in the event that future policy on car parking standards need to reflect the County standard, following the completion of the County Council review.

8.0 Economic Development: Policies ED3 - Existing Employment Land ED4 - Future Employment Allocations

8.1 In respect of Policies ED3 and ED4, Swan Hill notes that they have changed considerably since the October 2008 Preferred Options document, in that they are site specific regarding the location of the proposed redevelopment of existing employment sites. These four sites are also identified in Policy H1 - Efficient Use of Land, and in general, Swan Hill supports the approach to the redevelopment of these sites (where feasible) based on the assessments of the sites set out in this version of the Core Strategy.

8.2 However, Swan Hill has concerns that these policies might not be considered suitably sound given that insufficient opportunity has been allocated for consultation on their redevelopment. Without the SHLAA being publically available prior to the consultation on this Core Strategy, an insufficient evidence base has been provided to corroborate that these sites are neither suitable or deliverable to meet the test of soundness requirements.

Summary:

Policy T3 - Public Transport

7.3 Swan Hill is generally supportive of the policy approach set out in T3, however, as set out in paragraph 7.2 above, it is important that the District Council do not consider that it is the developer's responsibility to resolve existing shortfalls in

Core Strategy Submission Document

Full Text: Highway & Traffic Implications

1. Proposals for moving employment to out of town locations, at either end of the district, with no existing public transport links, are contrary to government policy PPG4. It also contravenes the Core Strategy's stated aims of reducing carbon emissions; reliance on car transport and providing "an integrated network of cycle paths".

The District of Rochford is predominately spread on a West/East axis along the railway line. Hockley is located in the middle of the district and the two estates are adjacent to the railway station. Bus services are poor with just 3* an hour (following a recent 50% reduction in services) and the operator has admitted they cannot compete with the railway making improvements to new sites away from major centres unlikely. (* one of the 3 services is paid for by ECC on a 6 mth trial and may be terminated in the new year).

However, the Core Strategy proposes to relocate these two estates to a greenfield site near the airport. This site is 2-3 miles from the nearest railway station and there are currently no bus services to the area. As a result, RDC are proposing to upgrade the nearest road to a dual-carriageway, although the main connecting road (the B1013), which runs through Hockley, will remain single-carriageway and is already at 72% of capacity (ECC Highways stats). This is despite extra traffic expected in the area as a result of the Joint Area Action Plan (JAAP) which proposes considerable growth at neighbouring Southend Airport, as well as the new industrial estate.

The site selected for the new industrial estate also contravenes PPS4 which states;

* (EC7.3C) "out-of-centre sites, with preference given to sites which are or will be well served by a choice of means of transport and which are close to the centre and have a high likelihood of forming links with the centre. There is no existing public transport and no obvious likelihood of forming links with any existing centres.

* EC7.5 1 "whether the site is or will be accessible and well served by a choice of means of transport, especially public transport, walking and cycling, as well as by car". Its remote location. Accessed by the narrow, busy B1013 is not suitable for access by cycle or on foot.

It also contravenes PPS1 (27 vii) "Reduce the need to travel and encourage accessible public transport provision to secure more sustainable patterns of transport development. Planning should actively manage patterns of urban growth to make the fullest use of public transport and focus development in existing centres and near to major public transport interchanges".

The Core Strategy also contravenes its own policy T1 and is unsound.

Summary:

Proposals for moving employment to out of town locations, at either end of the district, with no existing public transport links, are contrary to government policy PPG4 & PPS1. It also contravenes the Core Strategy's stated aims of reducing carbon emissions; reliance on car transport and providing "an integrated network of cycle paths".

The Core Strategy also contravenes its own policy T1 and is unsound.

2. The Transport Evidence Base has not been re-evaluated following the decision to impose extra housing on the Eldon Way & Foundry Industrial Estates. ECC Highways have confirmed that the B1013 is running at 72% of its maximum theoretical capacity) and the effect of extra housing in Hockley (as well as Hawkwell) has not been re-evaluated and it is unclear what improvements will be required and whether they can be physically achieved.

Thus the proposals are not founded on a robust and credible evidence base and are unsound

3. RDC are proposing to scatter housing across the district in around 12 or sites but no detailed consideration has been given to the implications for highways across the District. The "Core Strategy" is not a strategy but simply a collection of disparate sites. Many roads across the District are at or near capacity but no modelling has been undertaken to determine the impacts or the funding required to upgrade them. At the Central Area Committee on 25 June 2009, RDC stated (in response to a question):

"Rochford Council is not the highway authority, but is working closely with Essex County Council to identify highway infrastructure requirements. Highway infrastructure improvements will be set out in the Core Strategy and other subsequent Development Plan Documents as required. These will be fed into the next version of the Essex Local

16288 Object

CHAPTER 10 Policy T4 - South Essex Rapid Transit (SERT)

Transport Plan, which is effectively a bidding document for funds to implement highway infrastructure improvements, schemes to tackle congestion, etc.

The District Council is working closely with the Essex County Council to ensure that highway infrastructure identified in the Core Strategy can be delivered."

It is clear that (i) the combined impact of scattering houses across the District and (ii) relocating Eldon Way/Foundry Industrial Estates to the very edge of the District with no public transport services will exacerbate existing problems. It is also clear that the extent of improvements required is both unknown and not funded and the proposal is unsound.

Summary:

RDC are proposing to scatter housing across the district in around 12 or sites but no detailed consideration has been given to the implications for highways across the District. Many roads across the District are at or near capacity but no modelling has been undertaken to determine the impacts

It is clear that (i) the combined impact of scattering houses across the District and (ii) relocating Eldon Way/Foundry Industrial Estates with no public transport services will exacerbate existing problems. It is clear that the extent of improvements required is both unknown and not funded and the proposal is unsound.

4. PPS12 4.9 states "The infrastructure planning process should identify, as far as possible: infrastructure needs and costs". Neither needs nor, especially, costs have been identified and the Core Strategy is therefore unsound.

The district's highways suffer from years of under investment and over use. The Core Strategy proposes to fund infrastructure improvements through use of Standard Charges. However, no detail is provided and no attempt made to identify the likely scale of such charges. It is therefore unclear if use of Standard Charges is financially viable.

Policy T2 provides a list of required highway improvements. The list contains most of the more major roads in the District including Rectory Lane, which has a single track, traffic light controlled railway bridge. 1200 dwellings are proposed for the northern end of Rectory Road and a further 175 at the southern end. The cost of addressing the railway bridge bottleneck will be significant but is not mentioned.

No attempt is made to either cost these charges or explain how improvements not linked to any one specific development will be paid for (eg B1013; Ashingdon Road; a network of walking, cycling, bridleways).

The concept of paying for improvements through use of Standard Charges is totally unproven and unsound.

Summary:

PPS12 4.9 states "The infrastructure planning process should identify, as far as possible: infrastructure needs and costs". Neither needs nor, especially, costs have been identified and the Core Strategy is therefore unsound.

The Core Strategy proposes to fund infrastructure improvements through use of Standard Charges. However, no detail is provided and no attempt made to identify the likely scale of such charges. It is therefore unclear if use of Standard Charges is financially viable.

5. SERT is put forward as a solution to reducing car use but it will only skirt the edge of the district and the Core Strategy acknowledges there is only "potential" to do so in the future. SERT is not realistic or reliable a solution and the proposal is therefore unsound.

6. Previous consultations ignored by RDC:

* The Hockley Parish Plan (dated 2007), clearly states that residents are strongly against any large scale housing development in Hockley, but if there has to be additional housing, then there should be no loss of greenbelt or open spaces, and no large housing estate developments. It was also stated that any developments must be matched by the appropriate levels of infrastructure.

* The proposals also ignore the 95% rejection rate of respondents to RDC's own Hockley Area Plan (HAAP) Consultation (2009), which included specific proposals for Eldon Way (although HAAP did not even mention the adjoining Foundry Industrial Estate). Why have a consultation and ignore it?

Thus the proposals are not founded on a robust and credible evidence base and are unsound.

Summary:

Previous consultations ignored by RDC:

The proposals ignore the 95% rejection rate of respondents to RDC's own Hockley Area Plan (HAAP) Consultation (2009), which included specific proposals for Eldon Way (although HAAP did not even mention the adjoining Foundry Industrial Estate). Why have a consultation and ignore it?

Core Strategy Submission Document

16288 Object

CHAPTER 10 Policy T4 - South Essex Rapid Transit (SERT)

Thus the proposals are not founded on a robust and credible evidence base and are unsound

7. RDC have not consulted on the very specific proposals to relocate the Eldon Way and Foundry Industrial Estates

* The previous CS Strategy stated "we will look at opportunities for more valuable and appropriate uses of the industrial land" with absolutely no consultation at all on concept of moving existing EW businesses entirely

* the Foundry Industrial Estate has never even been previously mentioned in any plan version; A recent amendment to the Core Strategy states this omission was due to a typing error!

* The Urban Capacity study stated a "low probability" of housing and did not even mention the Foundry Estate

Thus the proposals are they are not founded on a robust and credible evidence base and are unsound.

Summary:

RDC have not consulted on the very specific proposals to relocate the Eldon Way and Foundry Industrial Estates

The previous CS Strategy stated "we will look at opportunities for more valuable and appropriate uses of the industrial land" with absolutely no consultation at all on concept of moving existing EW businesses entirely

the Foundry Industrial Estate has never even been previously mentioned;

The Urban Capacity study stated a "low probability" of housing and did not even mention the Foundry Estate

Thus the proposals are they are not founded on a robust and credible evidence base and are unsound.

8. Eldon Way and Foundry Industrial Estates form a significant part of the ongoing Hockley Area Action Plan (HAAP) consultation but the Core Strategy proposals pre-empt the next stage of the HAAP consultation.

Neither the Core Strategy nor HAAP define its status relevant to the other plan and subsequent priorities. Why is there no cross-referencing between concurrent plans affecting the exact same piece of land?

There are also inconsistencies between the Core Strategy & HAAP regarding the description of proposed uses for the two industrial estates. The Core Strategy refers to Leisure, Commercial and Residential whilst HAAP mentions a "village green, introducing a significant area of public open space". There is not sufficient space for both and the Core Strategy is again pre-empting the ongoing HAAP.

If a decision is taken now, as part of the Core Strategy, to relocate all the existing businesses on the two estates, it will set a legal precedent which HAAP will need to follow and renders the next stage of HAAP virtually redundant. Particularly given the 95% rejection rate of respondents to the previous round of HAAP such an approach is entirely undemocratic and unsound.

Summary:

The Core Strategy proposals pre-empt the next stage of the HAAP consultation and neither defines its status relevant to the other plan and subsequent priorities.

There are also inconsistencies between the Core Strategy & HAAP.

If a decision is taken as part of the Core Strategy, to relocate all the existing businesses on the two estates, it will set a legal precedent which HAAP will need to follow and renders the next stage of HAAP virtually redundant. Particularly given the 95% rejection rate of respondents to the previous round of HAAP such an approach is entirely undemocratic and unsound.

9. PPS12, 4.6, states that Cores Strategies should be flexible and "should be able to show how they will handle contingencies". Several large planning applications have already been submitted to RDC proposing developments outside the Core Strategy which does not indicate how such applications will be handled and does not comply with PPS12. Neither have RDC been able to advise residents how such changes will be made and the strategy is unsound.

10. THE Core Strategy misrepresents the findings of The Retail & Leisure Study (R&LS) 2008.

The Core Strategy states (12.38) "The Retail & Leisure Study indicates Hockley has great potential. Hockley has been identified as having a need for additional convenience floorspace".

Whereas, the R&LS actually states:

1) (10.26) "the scale of need does not lend itself to a foodstore capable of retaining a significant proportion of main food

Core Strategy Submission Document

16288 Object

CHAPTER 10 Policy T4 - South Essex Rapid Transit (SERT)

shopping expenditure.

2) (10.28) "There is no immediate capacity for additional floor space."

3) (10.29) "we recommend that focus be maintained on developing Hockley's

existing strengths, rather than retail expansion"

4) 10.31 "The current nature of Hockley does not lend itself to classification as a 'town centre' as defined by PPS6. Moveover, we have identified that it is a very small catchment population. Accordingly, the Council may wish to consider reclassifying Hockley from a town centre to a district centre".

The Core Strategy is inaccurate, misleading and unsound.

Summary:

The Core Strategy misrepresents the findings of The Retail & Leisure Study (R&LS) 2008. The Core Strategy states "The Retail & Leisure Study states Hockley has great potential and has a need for additional convenience floorspace". Whereas, the R&LS states: 1) "does not lend itself to a foodstore capable of retaining a significant proportion of main food shopping expenditure. 2) "There is no immediate capacity for additional floor space." 3) "we recommend that focus be maintained on developing Hockley's existing strengths." 4) " the Council may wish to consider reclassifying Hockley from a town centre to a district centre".

Summary:

SERT is put forward as a solution to reducing car use but it will only skirt the edge of the district and the Core Strategy acknowledges there is only "potential" to do so in the future. SERT is not realistic or reliable a solution and the proposal is therefore unsound.

10 off Unsound Reasons.

1. Highway and Traffic Implications

Proposals for moving employment to out of town locations, at either end of the district, with no existing public transport links, are contrary to government policy PPG4 & PPS1. It also contravenes the Core Strategy's stated aims of reducing carbon emissions; reliance on car transport and providing "an integrated network of cycle paths".

The Core Strategy also contravenes its own policy T1 and is unsound.

2. The Transport Evidence Base has not been re-evaluated following the decision to impose extra housing on the Eldon Way & Foundry Industrial Estates. ECC Highways have confirmed that the B1013 is running at 72% of its maximum theoretical capacity) and the effect of extra housing in Hockley (as well as Hawkwell) has not been re-evaluated and it is unclear what improvements will be required and whether they can be physically achieved.

Thus the proposals are not founded on a robust and credible evidence base and are unsound

3. RDC are proposing to scatter housing across the district in around 12 or sites but no detailed consideration has been given to the implications for highways across the District. Many roads across the District are at or near capacity but no modelling has been undertaken to determine the impacts

It is clear that (i) the combined impact of scattering houses across the District and (ii) relocating Eldon Way/Foundry Industrial Estates with no public transport services will exacerbate existing problems. It is clear that the extent of improvements required is both unknown and not funded and the proposal is unsound.

4. PPS12 4.9 states "The infrastructure planning process should identify, as far as possible: infrastructure needs and costs". Neither needs nor, especially, costs have been identified and the Core Strategy is therefore unsound.

The Core Strategy proposes to fund infrastructure improvements through use of Standard Charges. However, no detail is provided and no attempt made to identify the likely scale of such charges. It is therefore unclear if use of Standard Charges is financially viable.

5. SERT is put forward as a solution to reducing car use but it will only skirt the edge of the district and the Core Strategy acknowledges there is only "potential" to do so in the future. SERT is not realistic or reliable a solution and the proposal is therefore unsound.

6. Previous consultations ignored by RDC:

The Hockley Parish Plan (dated 2007). The proposals ignore the 95% rejection rate of respondents to RDC's own Hockley Area Plan (HAAP) Consultation (2009), which included specific proposals for Eldon Way (although HAAP did not even mention the adjoining Foundry Industrial Estate). Why have a consultation and ignore it?

Thus the proposals are not founded on a robust and credible evidence base and are unsound

7. RDC not consulted on proposals to relocate the Eldon Way and Foundry Industrial Estates

EW; CS Strategy stated "we will look at opportunities for more valuable and appropriate uses of the industrial land" absolutely no consultation on concept of moving EW businesses entirely

FIE; has never even been previously mentioned in any plan version; CS states omission was due to typing error!

Urban Capacity study stated a "low probability" of housing and did not even mention the Foundry Estate

Thus proposals are not founded on a robust and credible evidence base and are unsound.

8. The Core Strategy proposals pre-empt the next stage of the HAAP consultation and neither defines its status relevant to the other plan and subsequent priorities.

Core Strategy Submission Document

16306 Object

CHAPTER 10 Policy T4 - South Essex Rapid Transit (SERT)

There are also inconsistencies between the Core Strategy & HAAP.

If a decision is taken as part of the Core Strategy, to relocate all the existing businesses on the two estates, it will set a legal precedent which HAAP will need to follow and renders the next stage of HAAP virtually redundant. Particularly given the 95% rejection rate of respondents to the previous round of HAAP such an approach is entirely undemocratic and unsound

9. PPS12, 4.6, states that Cores Strategies should be flexible and "should be able to show how they will handle contingencies"

Several large planning applications have already been submitted to RDC proposing developments outside the Core Strategy which

does not indicate how such applications will be handled and does not comply with PPS12. Neither have RDC been able to advise

residents how such changes will be made and the strategy is unsound.

10. The CS misrepresents the findings of The Retail & Leisure Study (R&LS) 2008.

The CS states "The R&LS states Hockley has great potential and has a need for additional convenience floorspace".

Whereas, the R&LS actually states:

- 1) "does not lend itself to a food store capable of retaining a significant proportion of main food shopping expenditure.
- 2) "there is no immediate capacity for additional floor space."
- 3) "recommend that focus be maintained on developing Hockley's existing strengths."
- 4) " the Council may wish to consider reclassifying Hockley from a town center, to a district center".

Summary:

5. SERT is put forward as a solution to reducing car use but it will only skirt the edge of the district and the Core Strategy acknowledges there is only "potential" to do so in the future. SERT is not realistic or reliable a solution and the proposal is therefore unsound.

Highway & Traffic Implications

Proposals for moving employment to out of town locations, at either end of the district, with no existing public transport links, are contrary to government policy PPG4. It also contravenes the Core Strategy's stated aims of reducing carbon emissions; reliance on car transport and providing "an integrated network of cycle paths".

The District of Rochford is predominately spread on a West/East axis along the railway line. Hockley is located in the middle of the district and the two estates are adjacent to the railway station. Bus services are poor with just 3* an hour (following a recent 50% reduction in services) and the operator has admitted they cannot compete with the railway making improvements to new sites away from major centres unlikely. (* one of the 3 services is paid for by ECC on a 6 mth trial and may be terminated in the new year).

However, the Core Strategy proposes to relocate these two estates to a greenfield site near the airport. This site is 2-3 miles from the nearest railway station and there are currently no bus services to the area. As a result, RDC are proposing to upgrade the nearest road to a dual-carriageway, although the main connecting road (the B1013), which runs through Hockley, will remain single-carriageway and is already at 72% of capacity (ECC Highways stats). This is despite extra traffic expected in the area as a result of the Joint Area Action Plan (JAAP) which proposes considerable growth at neighbouring Southend Airport, as well as the new industrial estate.

The site selected for the new industrial estate also contravenes PPS4 which states;
â€¢ (EC7.3C) "out-of-centre sites, with preference given to sites which are or will be well served by a choice of means of transport and which are close to the centre and have a high likelihood of forming links with the centre. There is no existing public transport and no obvious likelihood of forming links with any existing centres.
â€¢ EC7.5 1 "whether the site is or will be accessible and well served by a choice of means of transport, especially public transport, walking and cycling, as well as by car". Its remote location. Accessed by the narrow, busy B1013 is not suitable for access by cycle or on foot.

It also contravenes PPS1 (27 vii) "Reduce the need to travel and encourage accessible public transport provision to secure more sustainable patterns of transport development. Planning should actively manage patterns of urban growth to make the fullest use of public transport and focus development in existing centres and near to major public transport interchanges".

The Core Strategy also contravenes its own policy T1 and is unsound.

Summary:

Proposals for moving employment to out of town locations, at either end of the district, with no existing public transport links, are contrary to government policy PPG4 & PPS1. It also contravenes the Core Strategy's stated aims of reducing carbon emissions; reliance on car transport and providing "an integrated network of cycle paths".

The Core Strategy also contravenes its own policy T1 and is unsound.

The Transport Evidence Base has not been re-evaluated following the decision to impose extra housing on the Eldon Way & Foundry Industrial Estates. ECC Highways have confirmed that the B1013 is running at 72% of its maximum theoretical capacity) and the effect of extra housing in Hockley (as well as Hawkwell) has not been re-evaluated and it is unclear what improvements will be required and whether they can be physically achieved.

Thus the proposals are not founded on a robust and credible evidence base and are unsound

RDC are proposing to scatter housing across the district in around 12 or sites but no detailed consideration has been given to the implications for highways across the District. The "Core Strategy" is not a strategy but simply a collection of disparate sites. Many roads across the District are at or near capacity but no modelling has been undertaken to determine the impacts or the funding required to upgrade them. At the Central Area Committee on 25 June 2009, RDC stated (in response to a question):

"Rochford Council is not the highway authority, but is working closely with Essex County Council to identify highway infrastructure requirements. Highway infrastructure improvements will be set out in the Core Strategy and other subsequent Development Plan Documents as required. These will be fed into the next version of the Essex Local Transport Plan, which is effectively a bidding document for funds to implement highway infrastructure improvements, schemes to tackle congestion, etc.

The District Council is working closely with the Essex County Council to ensure that highway infrastructure identified in the Core Strategy can be delivered."

It is clear that (i) the combined impact of scattering houses across the District and (ii) relocating Eldon Way/Foundry Industrial Estates to the very edge of the District with no public transport services will exacerbate existing problems. It is

Core Strategy Submission Document

16444 Object

CHAPTER 10 Policy T4 - South Essex Rapid Transit (SERT)

also clear that the extent of improvements required is both unknown and not funded and the proposal is unsound.

Summary:

RDC are proposing to scatter housing across the district in around 12 or sites but no detailed consideration has been given to the implications for highways across the District. Many roads across the District are at or near capacity but no modelling has been undertaken to determine the impacts

It is clear that (i) the combined impact of scattering houses across the District and (ii) relocating Eldon Way/Foundry Industrial Estates with no public transport services will exacerbate existing problems. It is clear that the extent of improvements required is both unknown and not funded and the proposal is unsound.

PPS12 4.9 states "The infrastructure planning process should identify, as far as possible: infrastructure needs and costs". Neither needs nor, especially, costs have been identified and the Core Strategy is therefore unsound.

The district's highways suffer from years of under investment and over use. The Core Strategy proposes to fund infrastructure improvements through use of Standard Charges. However, no detail is provided and no attempt made to identify the likely scale of such charges. It is therefore unclear if use of Standard Charges is financially viable.

Policy T2 provides a list of required highway improvements. The list contains most of the more major roads in the District including Rectory Lane, which has a single track, traffic light controlled railway bridge. 1200 dwellings are proposed for the northern end of Rectory Road and a further 175 at the southern end. The cost of addressing the railway bridge bottleneck will be significant but is not mentioned.

No attempt is made to either cost these charges or explain how improvements not linked to any one specific development will be paid for (eg B1013; Ashingdon Road; a network of walking, cycling, bridleways).

The concept of paying for improvements through use of Standard Charges is totally unproven and unsound.

Summary:

PPS12 4.9 states "The infrastructure planning process should identify, as far as possible: infrastructure needs and costs". Neither needs nor, especially, costs have been identified and the Core Strategy is therefore unsound.

The Core Strategy proposes to fund infrastructure improvements through use of Standard Charges. However, no detail is provided and no attempt made to identify the likely scale of such charges. It is therefore unclear if use of Standard Charges is financially viable.

SERT is put forward as a solution to reducing car use but it will only skirt the edge of the district and the Core Strategy acknowledges there is only "potential" to do so in the future. SERT is not realistic or reliable a solution and the proposal is therefore unsound.

Previous consultations ignored by RDC:

â€¢ The Hockley Parish Plan (dated 2007), clearly states that residents are strongly against any large scale housing development in Hockley, but if there has to be additional housing, then there should be no loss of greenbelt or open spaces, and no large housing estate developments. It was also stated that any developments must be matched by the appropriate levels of infrastructure.

â€¢ The proposals also ignore the 95% rejection rate of respondents to RDC's own Hockley Area Plan (HAAP) Consultation (2009), which included specific proposals for Eldon Way (although HAAP did not even mention the adjoining Foundry Industrial Estate). Why have a consultation and ignore it?

Thus the proposals are not founded on a robust and credible evidence base and are unsound.

Summary:

Summary:

Core Strategy Submission Document

16444 Object

CHAPTER 10 Policy T4 - South Essex Rapid Transit (SERT)

RDC have not consulted on the very specific proposals to relocate the Eldon Way and Foundry Industrial Estates
• The previous CS Strategy stated "we will look at opportunities for more valuable and appropriate uses of the industrial land" with absolutely no consultation at all on concept of moving existing EW businesses entirely
• the Foundry Industrial Estate has never even been previously mentioned;
• The Urban Capacity study stated a "low probability" of housing and did not even mention the Foundry Estate

Thus the proposals are they are not founded on a robust and credible evidence base and are unsound.

Eldon Way and Foundry Industrial Estates form a significant part of the ongoing Hockley Area Action Plan (HAAP) consultation but the Core Strategy proposals pre-empt the next stage of the HAAP consultation.

Neither the Core Strategy nor HAAP define its status relevant to the other plan and subsequent priorities. Why is there no cross-referencing between concurrent plans affecting the exact same piece of land?

There are also inconsistencies between the Core Strategy & HAAP regarding the description of proposed uses for the two industrial estates. The Core Strategy refers to Leisure, Commercial and Residential whilst HAAP mentions a "village green, introducing a significant area of public open space". There is not sufficient space for both and the Core Strategy is again pre-empting the ongoing HAAP.

If a decision is taken now, as part of the Core Strategy, to relocate all the existing businesses on the two estates, it will set a legal precedent which HAAP will need to follow and renders the next stage of HAAP virtually redundant. Particularly given the 95% rejection rate of respondents to the previous round of HAAP such an approach is entirely undemocratic and unsound.

Summary:

The Core Strategy proposals pre-empt the next stage of the HAAP consultation and neither defines its status relevant to the other plan and subsequent priorities.

There are also inconsistencies between the Core Strategy & HAAP.

If a decision is taken as part of the Core Strategy, to relocate all the existing businesses on the two estates, it will set a legal precedent which HAAP will need to follow and renders the next stage of HAAP virtually redundant. Particularly given the 95% rejection rate of respondents to the previous round of HAAP such an approach is entirely undemocratic and unsound.

PPS12, 4.6, states that Cores Strategies should be flexible and "should be able to show how they will handle contingencies". Several large planning applications have already been submitted to RDC proposing developments outside the Core Strategy which does not indicate how such applications will be handled and does not comply with PPS12. Neither have RDC been able to advise residents how such changes will be made and the strategy is unsound.

THE Core Strategy misrepresents the findings of The Retail & Leisure Study (R&LS) 2008.

The Core Strategy states (12.38) "The Retail & Leisure Study indicates Hockley has great potential. Hockley has been identified as having a need for additional convenience floorspace".

Whereas, the R&LS actually states:

- 1) (10.26) "the scale of need does not lend itself to a foodstore capable of retaining a significant proportion of main food shopping expenditure.
 - 2) (10.28) "There is no immediate capacity for additional floor space."
 - 3) (10.29) "we recommend that focus be maintained on developing Hockley's existing strengths, rather than retail expansion"
 - 4) 10.31 "The current nature of Hockley does not lend itself to classification as a 'town centre' as defined by PPS6. Moreover, we have identified that it is a very small catchment population. Accordingly, the Council may wish to consider reclassifying Hockley from a town centre to a district centre".
- The Core Strategy is inaccurate, misleading and unsound.

Summary:

The Core Strategy misrepresents the findings of The Retail & Leisure Study (R&LS) 2008. The Core Strategy states "The Retail & Leisure Study states Hockley has great potential and has a need for additional convenience floorspace". Whereas, the R&LS states: 1) "does not lend itself to a foodstore capable of retaining a significant proportion of main food shopping expenditure. 2) "There is no immediate capacity for additional floor space." 3) "we recommend that focus be maintained on developing Hockley's existing strengths." 4) " the Council may wish to consider reclassifying Hockley from a town centre to a district centre".

Summary:

SERT is put forward as a solution to reducing car use but it will only skirt the edge of the district and the Core Strategy acknowledges there is only "potential" to do so in the future. SERT is not realistic or reliable a solution and the proposal is therefore unsound.

1. Highway & Traffic Implications

Proposals for moving employment to out of town locations, at either end of the district, with no existing public transport links, are contrary to government policy PPG4. It also contravenes the Core Strategy's stated aims of reducing carbon emissions; reliance on car transport and providing "an integrated network of cycle paths".

The District of Rochford is predominately spread on a West/East axis along the railway line. Hockley is located in the middle of the district and the two estates are adjacent to the railway station. Bus service are poor with just 3* an hour (following a recent 50% reduction in services) and the operator has admitted they cannot compete with the railway making improvements to new sites away from major centres unlikely. (* one of the 3 services is paid for by ECC on a 6 mth trial and may be terminated in the new year).

However, the Core Strategy proposes to relocate these two estates to a greenfield site near the airport. This site is 2-3 miles from the nearest railway station and there are currently no bus services to the area. As a result, RDC are proposing to upgrade the nearest road to a dual-carriageway, although the main connecting road (the B1013), which runs through Hockley, will remain single-carriageway and is already at 72% of capacity (ECC Highways stats). This is despite extra traffic expected in the area as a result of the Joint Area Action Plan (JAAP) which proposes considerable growth at neighbouring Southend Airport, as well as the new industrial estate.

The site selected for the new industrial estate also contravenes PPS4 which states:

(EC7.3C) "out-of-centre site, with preference given to sites which are or will be well served by a choice of means of transport and which are close to the centre and have a high likelihood of forming links with the centre. There is no existing public transport and no obvious likelihood of forming links with any existing centres.

EC7.5 1 "whether the site is or will be accessible and well served by a choice of means of transport, especially public transport, walking and cycling, as well as by car". Its remote location. Accessed by the narrow, busy B1013 is not suitable for access by cycle or on foot.

It also contravenes PPS1 (27 vii) "Reduce the need to travel and encourage accessible public transport provision to secure more sustainable patterns of transport development. Planning should actively manage patterns of urban growth to make the fullest use of public transport and focus development in existing centres and near to major public transport interchanges".

The Core Strategy also contravenes its own policy T1 and is unsound.

2. The Transport Evidence Base has not been re-evaluated following the decision to impose extra housing on the Eldon Way & Foundry Industrial Estates. ECC Highways have confirmed that the B1013 is running at 72% of its maximum theoretical capacity) and the effect of extra housing in Hockley (as well as Hawkwell) has not been re-evaluated and it is unclear what improvements will be required and whether they can be physically achieved.

Thus the proposals are not founded on a robust and credible evidence base and are unsound.

3. RCD are proposing to scatter housing across the district in around 12 or sites but no detailed consideration has been given to the implications for highways across the District. The "Core Strategy" is not a strategy but simply a collection of disparate sites. Many roads across the District are at or near capacity but no modelling has been undertaken to determine the impacts or the funding required to upgrade them. At the Central Area Committee on 25 June 2009, RDC stated (in response to a question):

"Rochford Council is not the highway authority, but is working closely with Essex County Council to identify highway infrastructure requirements. Highway infrastructure improvements will be set out in the Core Strategy and other subsequent Development Plan Documents as required. These will be fed into the next version of the Essex Local Transport Plan, which is effectively a bidding document for funds to implement highway infrastructure improvements, schemes to tackle congestion, etc.

The District Council is working closely with the Essex County Council to ensure that highway infrastructure identified in the Core Strategy can be delivered."

It is clear that (i) the combined impact of scattering houses across the District and (ii) relocating Eldon Way/Foundry Industrial Estates to the very edge of the District with no public transport services will exacerbate existing problems. It is also clear that the extent of improvements required is both unknown and not funded and the proposal is unsound.

Core Strategy Submission Document

16531 Object

CHAPTER 10 Policy T4 - South Essex Rapid Transit (SERT)

Summary:

RDC are proposing to scatter housing across the district in around 12 or sites but no detailed consideration has been given to the implications for highways across the District. Many roads across the District are at or near capacity but no modelling has been undertaken to determine the impacts.

It is clear that (i) the combined impact of scattering houses across the District and (ii) relocating Eldon Way/Foundry Industrial Estates with no public transport services will exacerbate existing problems. It is clear that the extent of improvements required is both unknown and not funded and the proposal is unsound.

4. PPS12 4.9 states "The infrastructure planning process should identify, as far as possible: infrastructure needs and costs". Neither needs nor, especially, costs have been identified and the Core Strategy is therefore unsound.

The district's highways suffer from years of under investment and over use. The Core Strategy proposes to fund infrastructure improvements through use of Standard Charges. However, no detail is provided and no attempt made to identify the likely scale of such charges. Thus it is unclear if use of Standard Charges is financially viable.

Policy T2 provides a list of required highway improvements. The list contains most of the more major roads in the District including Rectory Lane, which has a single track, traffic light controlled railway bridge. 1200 dwellings are proposed for the northern end of Rectory Road and a further 175 at the southern end. The cost of address the railway bridge bottleneck will be significant but is not mentioned.

No attempt is made to either cost these charges or explain how improvements not linked to any one specific development will be paid for (eg B1013; Ashingdon Road; a network of walking, cycling, bridleways).

The concept of paying for improvements through use of Standard Charges is totally unproven and unsound.

Summary:

PPS12 4.9 states "The infrastructure planning process should identify, as far as possible: infrastructure needs and costs". Neither needs nor, especially, costs have been identified and the Core Strategy is therefore unsound.

The Core Strategy proposes to fund infrastructure improvements through use of Standard Charges. However, no detail is provided and no attempt made to identify the likely scale of such charges. It is therefore unclear if use of Standard Charges is financially viable.

5. SERT is put forward as a solution to reducing car use but it will only skirt the edge of the district and the Core Strategy acknowledges there is only "potential" to do so in the future. SERT is not realistic or reliable a solution and the proposal is therefore unsound.

6. Previous consultations ignored by RDC:

The Hockley Parish Plan (dated 2007), clearly states that residents are strongly against any large scale housing development in Hockley, but if there has to be additional housing, then there should be no loss of greenbelt or open spaces, and no large housing estate developments. It was also stated that any developments must be matched by the appropriate levels of infrastructure.

The proposals also ignore the 95% rejection rate of respondents to RDC's own Hockley Area Plan (HAAP) Consultation (2009), which included specific proposals for Eldon Way (although HAAP did not even mention the adjoining Foundry Industrial Estate). Why have a consultation and ignore it?

Thus the proposals are not founded on a robust and credible evidence base and are unsound.

Summary:

Previous consultations ignored by RDC:

The proposals ignore the 95% rejection rate of respondents to RDC's own Hockley Area Plan (HAAP) Consultation (2009), which included specific proposals for Eldon Way (although HAAP did not even mention the adjoining Foundry Industrial Estate). Why have a consultation and ignore it?

Thus the proposals are not founded on a robust and credible evidence base and are unsound.

7. RDC have not consulted on the very specific proposals to relocate the Eldon Way and Foundry Industrial Estates.

The previous CS Strategy stated "we will look at opportunities for more valuable and appropriate uses of the industrial land" with absolutely no consultation at all on concept of moving existing EW businesses entirely.

The Foundry Industrial Estates has never even been previously mentioned in any plan version; A recent amendment to

Core Strategy Submission Document

16531 Object

CHAPTER 10 Policy T4 - South Essex Rapid Transit (SERT)

the Core Strategy acknowledges this omission was due to a typing error!

The Urban Capacity study stated a "low probability" of housing and did not even mention the Foundry Estate

Thus the proposals are they are not founded on a robust and credible evidence base and are unsound.

Summary:

RDC have not consulted on the very specific proposals to relocate the Eldon Way and Foundry Industrial Estates.

The previous CS Strategy stated "we will look at opportunities for more valuable and appropriate uses of the industrial land" with absolutely no consultation at all on concept of moving existing FW businesses entirely.

The Foundry Industrial Estate has never even been previously mentioned.

The Urban Capacity study stated a "low probability" of housing and did not even mention the Foundry Estate.

Thus the proposals are they are not founded on a robust and credible evidence base and are unsound.

8. Eldon Way and Foundry Industrial Estates form a significant part of the ongoing HAAP consultation but the Core Strategy proposals pre-empt the next stage of the HAAP consultation.

Neither the Core Strategy or Hockley Area Action Plan (HAAP) defines its status relevant to the other plan and subsequent priorities. Why is there no cross-referencing between concurrent plans affecting the exact same piece of land?

There are also inconsistencies between the Core Strategy & HAAP regarding the description of proposed uses for the two industrial estates. The Core Strategy refers to Leisure, Commercial and Residential whilst HAAP mentions a "village green, introducing a significant area of public open space". There is not sufficient space for both and the Core Strategy is again pre-empting the ongoing HAAP.

If a decision is taken now, as part of the Core Strategy, to relocate all the existing businesses on the two estates, it will set a legal precedent which HAAP will need to follow and renders the next stage of HAAP virtually redundant. Particularly given the 95% rejection rate of respondents to the previous round of HAAP such an approach is entirely undemocratic and unsound.

Summary

The Core Strategy proposals pre-empt the next stage of the HAAP consultation and neither defines its status relevant to the other plan and subsequent priorities.

There are also inconsistencies between the Core Strategy & HAAP.

If a decision is taken as part of the Core Strategy, to relocate all the existing businesses on the two estates, it will set a legal precedent which HAAP will need to follow and renders the next stage of HAAP virtually redundant. Particularly given the 95% rejection rate of respondents to the previous round of HAAP such an approach is entirely undemocratic and unsound.

9. PPS12, 4.6, states that Cores Strategies show be flexible and "should be able to show how they will handle contingencies". Several large planning applications have already been submitted to RDC proposing developments outside the Core Strategy which do not indicate how such applications will be handled and does not comply with PPS12. Neither have RDC been able to advise residents how such changes will be made and the strategy is unsound.

10. The Core Strategy misrepresent the findings of The Retail & Leisure Study (R&LS) 2008.

The Core Strategy states (12.38) "The Retail & Leisure Study indicates Hockley has great potential. Hockley has been identified as having a need for additional convenience floorspace".

Whereas, the R&LS actually states:

1) (10.26) "the scale of need does not lend itself to a foodstore capable of retaining a significant proportion of main food shopping expenditure.

2) (10.28) "There is no immediate capacity for additional floor space."

3) (10.29) "we recommend that focus be maintained on developing Hockley's existing strengths, rather than retail expansion".

4) 10.31 "The current nature of Hockley does not lend itself to classification as a 'town centre' as defined by PPS6.

Core Strategy Submission Document

1. Highway & Traffic Implications

Proposals for moving employment to out of town locations, at either end of the district, with no existing public transport links, are contrary to government policy PPG4. It also contravenes the Core Strategy's stated aims of reducing carbon emissions; reliance on car transport and providing "an integrated network of cycle paths".

The District of Rochford is predominately spread on a West/East axis along the railway line. Hockley is located in the middle of the district and the two estates are adjacent to the railway station. Bus service are poor with just 3* an hour (following a recent 50% reduction in services) and the operator has admitted they cannot compete with the railway making improvements to new sites away from major centres unlikely. (* one of the 3 services is paid for by ECC on a 6 mth trial and may be terminated in the new year).

However, the Core Strategy proposes to relocate these two estates to a greenfield site near the airport. This site is 2-3 miles from the nearest railway station and there are currently no bus services to the area. As a result, RDC are proposing to upgrade the nearest road to a dual-carriageway, although the main connecting road (the B1013), which runs through Hockley, will remain single-carriageway and is already at 72% of capacity (ECC Highways stats). This is despite extra traffic expected in the area as a result of the Joint Area Action Plan (JAAP) which proposes considerable growth at neighbouring Southend Airport, as well as the new industrial estate.

The site selected for the new industrial estate also contravenes PPS4 which states:

(EC7.3C) "out-of-centre site, with preference given to sites which are or will be well served by a choice of means of transport and which are close to the centre and have a high likelihood of forming links with the centre. There is no existing public transport and no obvious likelihood of forming links with any existing centres.

EC7.5 1 "whether the site is or will be accessible and well served by a choice of means of transport, especially public transport, walking and cycling, as well as by car". Its remote location. Accessed by the narrow, busy B1013 is not suitable for access by cycle or on foot.

It also contravenes PPS1 (27 vii) "Reduce the need to travel and encourage accessible public transport provision to secure more sustainable patterns of transport development. Planning should actively manage patterns of urban growth to make the fullest use of public transport and focus development in existing centres and near to major public transport interchanges".

Summary:

Proposals for moving employment to of town locations, at either end of the district, with no existing public transport inks, are contrary to government policy PPG4 & PPS1. It also contravenes the Core Strategy's stated aims of reducing carbon emissions; reliance on car transport and providing "an integrated network of cycle paths".

The Core Strategy also contravenes its own policy T1 and is unsound.

2. The Transport Evidence Base has not been re-evaluated following the decision to impose extra housing on the Eldon Way & Foundry Industrial Estates. ECC Highways have confirmed that the B1013 is running at 72% of its maximum theoretical capacity) and the effect of extra housing in Hockley (as well as Hawkwell) has not been re-evaluated and it is unclear what improvements will be required and whether they can be physically achieved.

Thus the proposals are not founded on a robust and credible evidence base and are unsound.

3. RCD are proposing to scatter housing across the district in around 12 or sites but no detailed consideration has been given to the implications for highways across the District. The "Core Strategy" is not a strategy but simply a collection of disparate sites. Many roads across the District are at or near capacity but no modelling has been undertaken to determine the impacts or the funding required to upgrade them. At the Central Area Committee on 25 June 2009, RDC stated (in response to a question):

"Rochford Council is not the highway authority, but is working closely with Essex County Council to identify highway infrastructure requirements. Highway infrastructure improvements will be set out in the Core Strategy and other subsequent Development Plan Documents as required. These will be fed into the next version of the Essex Local Transport Plan, which is effectively a bidding document for funds to implement highway infrastructure improvements, schemes to tackle congestion, etc.

The District Council is working closely with the Essex County Council to ensure that highway infrastructure identified in

Core Strategy Submission Document

16549 Object

CHAPTER 10 Policy T4 - South Essex Rapid Transit (SERT)

the Core Strategy can be delivered."

It is clear that (i) the combined impact of scattering houses across the District and (ii) relocating Eldon Way/Foundry Industrial Estates to the very edge of the District with no public transport services will exacerbate existing problems. It is also clear that the extent of improvements required is both unknown and not funded and the proposal is unsound.

Summary:

RDC are proposing to scatter housing across the district in around 12 or sites but no detailed consideration has been given to the implications for highways across the District. Many roads across the District are at or near capacity but no modelling has been undertaken to determine the impacts.

It is clear that (i) the combined impact of scattering houses across the District and (ii) relocating Eldon Way/Foundry Industrial Estates with no public transport services will exacerbate existing problems. It is clear that the extent of improvements required is both unknown and not funded and the proposal is unsound.

4. PPS12 4.9 states "The infrastructure planning process should identify, as far as possible: infrastructure needs and costs". Neither needs not, especially, costs have been identified and the Core Strategy is therefore unsound.

The district's highways suffer from years of under investment and over use. The Core Strategy proposes to fund infrastructure improvements through use of Standard Charges. However, no detail is provided and no attempt made to identify the likely scale of such charges. Thus it is unclear if use of Standard Charges is financially viable.

Policy T2 provides a list of required highway improvements. The list contains most of the more major roads in the District including Rectory Lane, which has a single track, traffic light controlled railway bridge. 1200 dwellings are proposed for the northern end of Rectory Road and a further 175 at the southern end. The cost of address the railway bridge bottleneck will be significant but is not mentioned.

No attempt is made to either cost these charges or explain how improvements not linked to any one specific development will be paid for (eg B1013; Ashingdon Road; a network of walking, cycling, bridleways).

The concept of paying for improvements through use of Standard Charges is totally unproven and unsound.

RDC have not consulted on the very specific proposals to relocate the Eldon Way and Foundry Industrial Estates

• The previous CS Strategy stated "we will look at opportunities for more valuable and appropriate uses of the industrial land" with absolutely no consultation at all on concept of moving existing EW businesses entirely

Core Strategy Submission Document

16582 Object

CHAPTER 10 Policy T4 - South Essex Rapid Transit (SERT)

â€¢ the Foundry Industrial Estate has never even been previously mentioned;
â€¢ The Urban Capacity study stated a "low probability" of housing and did not even mention the Foundry Estate

Thus the proposals are they are not founded on a robust and credible evidence base and are unsound.

Eldon Way and Foundry Industrial Estates form a significant part of the ongoing Hockley Area Action Plan (HAAP) consultation but the Core Strategy proposals pre-empt the next stage of the HAAP consultation.

Neither the Core Strategy nor HAAP define its status relevant to the other plan and subsequent priorities. Why is there no cross-referencing between concurrent plans affecting the exact same piece of land?

There are also inconsistencies between the Core Strategy & HAAP regarding the description of proposed uses for the two industrial estates. The Core Strategy refers to Leisure, Commercial and Residential whilst HAAP mentions a "village green, introducing a significant area of public open space". There is not sufficient space for both and the Core Strategy is again pre-empting the ongoing HAAP.

If a decision is taken now, as part of the Core Strategy, to relocate all the existing businesses on the two estates, it will set a legal precedent which HAAP will need to follow and renders the next stage of HAAP virtually redundant. Particularly given the 95% rejection rate of respondents to the previous round of HAAP such an approach is entirely undemocratic and unsound.

Summary:

The Core Strategy proposals pre-empt the next stage of the HAAP consultation and neither defines its status relevant to the other plan and subsequent priorities.

There are also inconsistencies between the Core Strategy & HAAP.

If a decision is taken as part of the Core Strategy, to relocate all the existing businesses on the two estates, it will set a legal precedent which HAAP will need to follow and renders the next stage of HAAP virtually redundant. Particularly given the 95% rejection rate of respondents to the previous round of HAAP such an approach is entirely undemocratic and unsound.

PPS12, 4.6, states that Cores Strategies should be flexible and "should be able to show how they will handle contingencies". Several large planning applications have already been submitted to RDC proposing developments outside the Core Strategy which does not indicate how such applications will be handled and does not comply with PPS12. Neither have RDC been able to advise residents how such changes will be made and the strategy is unsound.

THE Core Strategy misrepresents the findings of The Retail & Leisure Study (R&LS) 2008.

The Core Strategy states (12.38) "The Retail & Leisure Study indicates Hockley has great potential. Hockley has been identified as having a need for additional convenience floorspace".

Whereas, the R&LS actually states:

- 1) (10.26) "the scale of need does not lend itself to a foodstore capable of retaining a significant proportion of main food shopping expenditure.
 - 2) (10.28) "There is no immediate capacity for additional floor space."
 - 3) (10.29) "we recommend that focus be maintained on developing Hockley's existing strengths, rather than retail expansion"
 - 4) 10.31 "The current nature of Hockley does not lend itself to classification as a 'town centre' as defined by PPS6. Moreover, we have identified that it is a very small catchment population. Accordingly, the Council may wish to consider reclassifying Hockley from a town centre to a district centre".
- The Core Strategy is inaccurate, misleading and unsound.

Summary:

The Core Strategy misrepresents the findings of The Retail & Leisure Study (R&LS) 2008. The Core Strategy states "The Retail & Leisure Study states Hockley has great potential and has a need for additional convenience floorspace". Whereas, the R&LS states: 1) "does not lend itself to a foodstore capable of retaining a significant proportion of main food shopping expenditure. 2) "There is no immediate capacity for additional floor space." 3) "we recommend that focus be maintained on developing Hockley's existing strengths." 4) " the Council may wish to consider reclassifying Hockley from a town centre to a district centre".

Summary: SERT is put forward as a solution to reducing car use but it will only skirt the edge of the district and the Core Strategy acknowledges there is only "potential" to do so in the future. SERT is not realistic or reliable a solution and the proposal is therefore unsound.

Thank you for inviting the Highways Agency (HA) to comment on the Rochford Core Strategy (CS) Submission Document and Rochford Area Action plan (AAP) prepared by Rochford District Council

As you are aware the HA is an executive agency of the Department for Transport (DfT). We are responsible for operating, maintaining and improving England's motorway and all-purpose trunk road network, collectively known as the Strategic Road Network (SRN), on behalf of the Secretary of State for Transport.

In spatial planning and development control terms, we have a duty to safeguard the operation of the motorway and trunk road network as set out in the Department for Transport Circular: 02/2007: Planning and the Strategic Road Network. <http://www.dft.gov.uk/pgr/regional/strategy/policy/circular207planningandstrategic>. The circular encourages the HA to work co-operatively with Local Planning Authorities within the framework of the Government's policies for planning, growth areas, regeneration, integrated transport and sustainability. We look to your Council's Local Development Framework to promote strategies, policies and land allocations which would support alternatives to the private car.

In the case of Rochford there are no trunk roads within the District although there are two strategic corridors namely the A13 and A127/A1159 which connect into the M25 motorway network at Junctions 30 and 29 respectively. Sections of these areas are currently heavily congested, particularly during peak periods, and operate under considerable levels of network stress. Therefore it is important to the HA that the impact of major development proposals in the Rochford area is considered within the context of future impact on the M25 and the A13 Trunk Road.

Please see below some general comments regarding the soundness of the CS and SSA from a transport perspective, referring to specific proposed submission policies as necessary. This response has been completed with reference to paragraph 4.52 of PPS12 (2008) PPS12, paragraph 4.52 - To be 'sound' a core strategy should be JUSTIFIED, EFFECTIVE and consistent with NATIONAL POLICY.

CORE STRATEGY

Policy GB1 - Green Belt Protection

The HA acknowledges that only the minimum amount of Green Belt land will be allocated to meet the District's housing and employment needs as necessary. However, the HA is concerned that any proposed redevelopment of greenbelt sites could result in development in areas with limited access to sustainable transport modes therefore resulting in higher levels of car usage and subsequent impact on the SRN. Although the HA recognizes that new public transport hubs that would facilitate the use of non-car modes could be developed over time, this process is likely to require very substantial investment.

It is therefore important that an appropriate assessment of infrastructure requirements is performed for development sites on Green Belt land. Funding towards the necessary public transport infrastructure improvements must be sought and secured prior to occupation of any new development on greenbelt land. Furthermore, the occupation of such developments should be phased in line with necessary transport infrastructure. This will help the CS meet the PPS12 requirement that a sound DPD should be 'justified' and 'effective' and hence deliverable.

Policy T1 - Highways

Policy T1 highlights the need to reduce reliance on the private car but also observes that 'some impact on the highway network is inevitable'. In a District with such high levels of private car ownership and a limited public transport network, as stated in paragraph 10.2, it will be important to assess the potential impacts to the highway network and ensure that mitigation measures are proposed and implemented where necessary.

An emphasis should be placed on the provision and improvement of sustainable transport infrastructure, particularly where high trip-generating developments such as offices are proposed. In line with the DfT's Guidance on Transport Assessment (2007) - DfT GTA, paragraph 4.51 - 'The key issue is the need to ensure that development proposals strive to achieve nil detriment ('no worse off') to the strategic network, for the opening year and appropriate horizon year'. This emphasis will assist in mitigating potential increases in private vehicle trips and hence help ensure that there is a nil-detriment effect on the SRN.

Policy T3 - Public Transport

Core Strategy Submission Document

16729 Support

CHAPTER 10 Policy T4 - South Essex Rapid Transit (SERT)

The recent Planning Inspectorate 'LDF - Learning from Experience' document (September 2009) suggests that a Core Strategy should identify a clear source of funding for infrastructure for at least the first 5 years of the plan - The Planning Inspectorate, LDF: Examining DPDs: Learning from experience, September 2009, Paragraph 22 - 'For at least the first 5 years of the plan it should be clear what infrastructure is required, who is going to fund and provide it and how it is to relate to the rate of development'.. Paragraph 10.15 of the CS highlights the importance of public transport links for new developments and implies that developers may be required to contribute towards public transport provision. However, it is noted that developer contributions cannot be expected to pay for all transport improvements and as such, in line with the recent Planning Inspectorate document outlined above additional sources of funding should be identified. It is recommended that alternative sources of funding for public transport improvements are clearly outlined within the CS to ensure that adequate infrastructure provision is made.

Policy T4 - South Essex Rapid Transit

As mentioned in our response to the Core Strategy Issues and options consultation the HA is supportive of this policy and the need to progress the route through South Essex. This has the potential to reduce the impact on the SRN (A13).

Policy T5 - Travel Plans

The HA welcomes the requirement for a travel plan for developments involving both destination and origin trips. However it is noted that no threshold for employment sites have been specified. Essex County Council requires the production of a workplace travel plan for developments with over 50 employees or where there will be a significant impact on the local road network. To avoid ambiguity for developers, the HA recommends that the Rochford District Core Strategy specifies a similar threshold within Policy T5. This will ensure the Core Strategy is in line with PPG13 paragraph 87 - PPG13 - 'Local authorities are expected to consider setting local targets for the adoption of travel plans by local businesses and other organizations..'

Policy ED2 - London Southend Airport

The HA previously responded to the London Southend and Environs Joint Area Action Plan Preferred Options Document (March 2009). As such, we have not repeated our comments here but instead refer you to our consultation response dated 31 March 2009.

Summary:

Policy T4 - South Essex Rapid Transit

As mentioned in our response to the Core Strategy Issues and options consultation the HA is supportive of this policy and the need to progress the route through South Essex. This has the potential to reduce the impact on the SRN (A13).

Representations on the Core Strategy
Submission Document, November 2009
On behalf of Barratts Eastern Counties

Introduction

The requirements of Core Strategies are enshrined in the 2004 Planning and Compensation Act, the Town & Country Planning (Local Development) England (Regulations) 2004 and the 2008 policy guidance in PPS12. The requirements of Coe Strategies are clear. And they are legal requirements. The Core Strategy must comply with the Local Development Scheme, Statement of Community Involvement and the Regulations. The Core Strategy must be subject to a sustainability appraisal, have regard to national guidance, conform generally with the Regional Spatial Strategy and have regard to any Sustainable Community Strategy. A Core strategy must be sound - justified, effective and consistent with national policy. The following representations therefore focus on these legal requirements.

HOUSING

Paragraph 4.6 - Evidence Base

To meet the soundness test Submission Core Strategies (SCS) must be justified, that is to say it must be founded on robust and credible evidence base and comprise the most appropriate strategy when considered against reasonable alternatives. The housing strategy in as far as it identifies a need for Green belt sites is sound, however, there are other elements which are unsound.

Paragraph 4.6 notes that the Strategic Housing Land Availability Assessment (SHLAA) has examined the supply of housing. It is presumed that the Table at paragraph 4.6 is the outcome of this examination. Whilst the SHLAA has some legitimacy in that it identifies various sites that are apparently available, we are concerned that because the SHLAA was only published in November 2009 it post dates the SCS. This implies that the SCS is driving the SHLAA exercise rather than the other way round. Whilst this may have no real practical effect on the outcome of the SCS and the identified need for Green Belt sites, the Inspector will be mindful of the advice in paragraphs 33 and 54 of PPS3 that SCS draw on the evidence in SHLAA. It may be that the SCS should explain how the evidence base has been used to justify the strategy.

PPS12 explains at paragraph 4.37 that Core Strategies are based on thorough evidence. Since the SHLAA has only recently been published it is considered that the SCS is unsound as it is not justifiable. This, together with other comments on the SCS, indicates that the process should be delayed to ensure that a more robust document is placed in front of the EiP Inspector.

Table at Paragraph 4.6 - Evidence base

From our review of the available evidence it would appear that the housing land supply is insufficient and that Green Belt release are required. From the wider strategy being promoted we note that some of the sites that the District Council consider to be 'appropriate' are likely to relate to existing employment areas. As set out elsewhere in our representations, we maintain severe reservations that the redevelopment of existing employment sites for alternative uses and particularly the Eldon Way Industrial Estate is unsustainable. We will make reference to the effectiveness of this strategy in relation to sustainability, whether it is justified in the context of National Policy and the deliverability of such a strategy elsewhere.

In particular, paragraph 11.32 of the SCS refers to existing employment land and sites within the UCS. It does not refer the SHLAA and as such it appears that an evidence base to support the re-use of employment land for residential is not reported in the SCS.

Having reviewed the 2008 Annual Monitoring Report, as we did when commenting on the 2008 Preferred Options Core Strategy, we maintain severe doubts as to the appropriateness of some of the previously developed sites identified as potential housing sites and their expected housing yield. Whilst we cannot at this stage ascertain whether the SHLAA

Core Strategy Submission Document

16926 Object

CHAPTER 10 Policy T4 - South Essex Rapid Transit (SERT)

sites referred to in this table correlate with the Annual Monitoring Report and indeed the 2007 Urban Capacity Study, it is our view that there will be some commonality and so the reliance on these sites is likely to be at odds with Government Policy. We shall elaborate on this objection in relation to the specific housing policy below.

We note that the last two rows in the Table at paragraph 4.6 set out figures with and without Green Belt releases. The text to this section of the Core Strategy should, for reasons of clarity, explain that Green belt review will be necessary in order to deliver the required housing.

Paragraph 4.9

The table on page 40, which sets out the settlement tiers, is supported. Rayleigh, Rochford/Ashingdon, Hockley/Hawkwell are clearly the largest settlements in the District and they benefit from good employment, housing, leisure, community and public transport provision. These settlements are the most sustainable ones with the greatest mix of uses. Consequently, it is sensible that the Core Strategy identifies these as top tier settlements and is able to target them with growth accordingly. This component of the strategy is justified by reference to sustainability data and is effective, since targeting development at these locations will ensure a more sustainable pattern of development.

Paragraph 4.14

We maintain that the strategy for redeveloping the Eldon Way Industrial Estate for housing and other alternative uses to employment is unsound. It is neither justified nor effective. The Industrial Land Availability Study 2006 sets out on page 7 strategic objectives. The 3rd objective seeks to Support town centre and industrial estate enhancement initiatives aimed at improving the environment ensuring the area is economically prosperous and competitive. Clearly the strategy as currently drafted envisages major changes to existing industrial estates, including alternative uses. This strategy is not consistent with other strategies and evidence based studies and so cannot be justified in the context of the tests set out in PPS12. It is also an ineffective strategy since the new employment locations that would free up the Eldon Way site for redevelopment relies on transport infrastructure that has no certainty of being delivered. Principally, the erosion of employment uses at Eldon Way could make the settlement of Hockley/Hawkwell less sustainable and thus conflict with the tiered approach on page 40, paragraph 4.9.

Policy H1

Prioritising the use of previously developed land ("pdl") is supported in principle. It is a justified strategy in the context of PPS3 and effective as sequential choices can be made by implementing the policy. However, the District Council is also promoting a strategy which seeks the redevelopment of existing employment locations to alternative uses and by consequence is identifying green field sites for new employment development elsewhere (Policy ED4 refers). This 'land swapping' is not considered consistent with PPS3, nor is it considered to be justified or effective in delivering the desired strategy. This is particularly the case as most of the existing employment sites are occupied and therefore unavailable for redevelopment. In addition, the new Greenfield sites are in an arguably less sustainable locations away from the top tier settlements identified on page 40 of the Submission Core Strategy. Clearly this element of the strategy is inconsistent with the wider strategy.

The Industrial Land Availability Study 2006 is included as an evidence base by the District Council. It includes an introductory section, which explains that the authority wishes to make Rochford the place of choice for new business. It includes several strategic objectives on page 7 including "Support town centre and industrial estate enhancement initiatives aimed at improving the environment ensuring the area is economically prosperous and competitive." It reviews existing employment areas and identifies vacant land, including land available from allocations. It does not include any assessment of new sites or potential opportunities for new sites that might have been expected to feed into the Core Strategy. The strategy for identifying Green Belt site employment allocation does not appear to be based on any evidence in this document and in that context cannot be justified. The strategy being promoted potentially conflicts with Government policy in PPG13, PPG2 and emerging PPS4.

The Employment Land Study 2008 is a much later document. It has a key recommendation on page ii "we recommend that Rochford District Council adopts strong policies to protect existing employment land." Furthermore under recommendations for existing sites on page iii-iv of that document it states "In our view, Hockley Trading Centre is a strategically well placed employment location. However, we recognise the ambitions of the Hockley Town Centre masterplan and that within this the Council should consider it to be allocated for other uses. However, we recommend that this reallocation happen only if provision is made within the masterplan for office use within Hockley Town Centre as part of a mixed use scheme." The view of the writers of this document is clear - the Eldon Way Industrial estate (Hockley Trading Centre) is a good employment site and that it is for other reasons that alternative uses are being considered and only then if office development is supported. This supports our representations that new future uses at the Eldon Way site should be employment dominated and that alternative uses should relate to the objectives of the Town Centre which is to enhance the shopping and leisure facilities. Residential is not an appropriate alternative.

This document recommends the use of land to the west of Rayleigh for employment and envisages Green belt release. However, the SCS does not explain through the evidence base why existing employment sites should be 'deallocated' and Green belt land unnecessarily used.

Core Strategy Submission Document

16926 Object

CHAPTER 10 Policy T4 - South Essex Rapid Transit (SERT)

In addition to these key issues we have some specific concerns. As a consequence we maintain an objection to the second paragraph of Policy H1. This policy states that the Council will seek the redevelopment of various industrial estates including Eldon Way. The Policy says that alternative uses will be sought (presumably alternative to the existing employment offer) and that new land will be allocated elsewhere. This policy statement, in relation to Eldon Way in particular, is unsound for a number of reasons:

The emerging Hockley Area Action Plan consulted upon in 2008 states that the Eldon Way Industrial Estate is strategically well placed. In a sense this statement underplays the true importance of this highly sustainable employment location and only major employment area in Hockley/Hawkwell. The employment area is adjacent to the railway station and located a short distance from the main bus routes that run along Spa Road. Some of the residential areas of the town are also within walking distance of this commercial area, thus providing a potential for sustainable travel by employees. The Eldon Way Industrial Estate is therefore right at the heart of the settlement of Hockley/Hawkwell and provides an opportunity to meet sustainable transport objectives by reducing the need to travel by car. Consequently, this employment area should be highlighted as a premier employment site in sustainability terms, both in the context of PPG13, PPG4 and PPS6. To encourage alternative uses as set out in Policy H1 implies the removal of the majority of employment based activity at Hockley/Hawkwell and this would be contrary to National policy, would not be the most appropriate strategy when considered against alternatives and is therefore unsound.

Whilst it is acknowledged that improvement to the Eldon Way Industrial Estate can and should take place, the extent to which the mix of employment uses should be altered in favour of alternative land uses requires careful consideration. It is our view that a mix of existing or indeed new employment land uses with some Town Centre type uses should dominate the Eldon Way site. A mix of employment types between offices, light industry and other high technology industries should be encouraged as this will provide many locational advantages to the firms that agglomerate together. The Council says that the existing uses on this site are harmful to amenity. However, the site has operated for many years without any significant issues and if renewal for B1 type uses are encouraged then the employment area can be maintained without harm to amenity. Renewal of the employment stock can help develop and improve trade, improve the sustainability of businesses as a whole and make for a more flexible labour market as skill levels are varied. A singularly different use altogether or a variety of uses which excludes employment could undermine the long term sustainability of the area and Town Centre. As such Policy H1 is not an effective strategy and should be amended to acknowledge the importance of Eldon Way and the need to renew the employment stock to ensure that the site maintains its important role as a employment site, albeit with some ancillary alternative use development where appropriate.

The 2008 Retail Study notes that Hockley Town Centre is not strong and there is trade leakage. Eldon Way Industrial Estate provides a customer base for existing town centre uses. Weekday spending within town centres is an important contributor to the viability of many retail and leisure businesses either through expenditure by employees during the lunchtime trade or expenditure by employers, on necessary goods and services. This relationship helps sustain the critical mass of a centre and provides a platform for new retail and leisure growth. It is important to have a balanced centre with a variety of uses. Policy H1, as currently drafted, implies the removal of employment related development and this is likely to harm the vitality and viability of Hockley Town Centre. The Council has presented no evidence to suggest that this is not the case. Importantly, the 2008 Retail Study explains that there is a need for additional retail and office space. In principle we would support additional office and other B1 type uses plus retail but employment uses should always dominate for the sustainability reasons given above. Retail and office development are likely to present a viable alternative to some of the more industrial type uses.

Consequently, we do not support the phrasing of the third paragraph of Policy H1 and maintain that the most appropriate strategy is to seek renewal of the employment stock with employment based uses and with some new retail development. Removal of employment land uses completely as currently implied-which was the approach adopted in the emerging Hockley Area Action Plan - is not a justifiable strategy.

One of the key tests of a Core Strategy is consistency between policies in the emerging Plan and this strikes at the heart of demonstrating an effective strategy. Policy H1 implies alternative uses to employment and the relocation of Eldon Way to a site identified under Policy ED4. However, Policy RTC6 sets out a suite of policy criteria for Hockley Town Centre which includes employment and commercial activities. In addition Policy ED3 seeks the protection of sustainable employment sites (Eldon Way) and notes that some reallocation of existing employment sites will include a proportion of employment. It notes that in the case of Eldon Way employment development will form a component. The policies appear at odds with one another. The third paragraph of Policy H1 should be deleted as the second paragraph is sufficient to set a strategic context for delivering new housing development. The employment policies and Hockley specific policies should be left to consider the type and quantum of land uses appropriate in the area. If the third paragraph of H1 is to be retained then it should tie in more with Policy RTC6 and in our view explain that employment uses should dominate any redevelopment proposals for the Eldon Way site and that retail and leisure uses should be a supporting proportion.

Implementation, Monitoring and Delivery - page 132 onwards

One of the key tests of soundness is that the Core Strategy should be effective - it should be able to deliver its strategy. The Implementation strategy set out at page 132 onwards of the Core Strategy does not explain how Policy H1, RTC6 and the strategy for redeveloping Eldon Way (Policy ED2 and ED3) will be delivered. The comment at Policy ED3 on

16926 Object

CHAPTER 10 Policy T4 - South Essex Rapid Transit (SERT)

page 161 identifies it as a potential risk and alludes to land assembly difficulties and the choices to be made by owner/occupiers. In order to deliver the strategy there should be a clear understanding as to whether the new land use values being promoted are sufficient to encourage relocation voluntarily. Secondly there is a need for more information to be gathered and presented to show that current occupiers and landowners are willing to relocate and the timescales likely for this. For example, do the building lease contracts enable early review or are there any break out clauses. There should be some commentary on whether the Council will engage in compulsory purchase orders to pursue their strategy should the 'encouragement' route fail. As currently drafted there is no clear path to deliver the strategy and the danger is that despite reallocation, the sites identified for redevelopment will not come forward in the plan period. In this regard, evidence to satisfy the test of soundness is not provided.

Policy H2 - General Locations

We support the strategy that new housing growth should be targeted at land South of Hawkwell. This area is suitably located to the urban area of Hockley/Hawkwell and to tie in with the settlement tiers on page 40 of the Submission Core Strategy the same terminology for settlement should be used. This ensures a consistency within the SCS. The choice of this location as a housing growth area is appropriate as it would not contribute to the coalescence of the urban area with Ashingdon (there is existing development between this identified housing area at Rectory Road and Ashingdon and moreover, Rectory Road can form a natural physical boundary for the new Green belt boundary. This area is also well located to the existing road network. Cherry Orchard Way has recently been improved and provides much better accessibility to the proposed housing growth area than any other location around Hockley/Hawkwell. The existing bus routes along Rectory Road also make this location sustainable and the additional housing proposed will help underpin the financial viability of bus routes in this area. Locally there are employment opportunities, including the small commercial estate off Main Road. The Eldon Way Industrial Estate adjacent to the Town Centre also provides the opportunity for employment locally. Extensive public open space, play pitches and built leisure facilities are located just to the north of this area and a community hall is located off Briar Close, nearby. The area to the south of Hockley/Hawkwell is close to local shops on the corner of Heycroft Road and Main Road and there are numerous footpath links between this area and the local community including links via Thorpe Road, Thorpe Close, Briar Close, Hawkwell Park and Park Gardens. The area therefore provides the opportunity to enhance existing links, including cycle links, and contribute towards community integration - more so than other sites on the south side of this settlement. The site is also in the control of one house builder and deliverable.

However, we find that the Policy is not fully consistent with national policy and furthermore needs to be reviewed in order to be justified and effective. We have concerns as to how the Green Belt review strategy set out at Policy H3 and in the Local Development Scheme integrates with this policy and feel that Green Belt review should be more explicit throughout the SCS. We note that it is only Policy H3 which indicates the need for Green Belt land review. In fact Policy H3 only pays lip service to the need for a Green Belt review and provides, at best, loose advice in this regard. It says that prior to 2021 Green Belt will be safeguarded save for the releases noted under Policy H2. Policy H3 then goes on to talk about land release for development after 2021 but no time period is set out to provide a framework for any Green Belt review in this latter period. In our view Policy H2 and certainly Policy H3 and Policy GB1 should explain fully the need for a Green Belt review and that such a review should take place for a defined period. That such a review has not taken place in advance of the SCS is a serious matter for the Inspector to consider in the context of soundness. That said, it is considered that any review of Green Belt should have regard to a period beyond 2021 as indicated by draft Policy H3. Paragraph 1.9 of the East of England Plan explains "this RSS covers the period to 2021 but sets a vision, objectives and core strategy for the longer term". 2026 is therefore considered a minimum suitable period that any Green Belt review must have regard to in order to meet the 5 year land supply requirements in PPS3 for the period after 2021. However, Policy SS7 of the East of England Plan talks about Green Belt reviews up to 2031. In view of this and the need to explore the circumstances of Rochford - that existing settlements cannot contain future housing growth; that Green Belt is necessary to provide housing; and that these provide exceptional reasons to vary the Green Belt locally (paragraph 2.6 to 2.7 of PPG2) the policies and strategy for the SCS should identify a Green Belt review covering the period to 2031 and set out why a review is necessary.

Policy H2 - Phasing and Quantum

The 2008 Preferred Core Strategy document indicated that the area south of Hawkwell should deliver 330 dwellings over a phasing period to post 2021 (see Policy H2 and H3 of that document). The SCS reduces the quantum of housing in this area to 175 but expects delivery by 2015. At a broader level the Preferred Options Core Strategy of 2008, (Policy H2) required 1,450 dwellings to 2015 and a further 1,050 by 2021. In the SCS the figures are now 775 and 1,010 respectively.

Since the SHLAA post dates the publication of the SCS, we are uncertain as to the reason why such a significant reduction in quantum of housing and extensions to the residential envelope is considered necessary. Presumably it is the 'new' strategy to redevelop existing employment areas within the settlements that has led to this change. Our representations on this strategy and specifically the Eldon Way Industrial Estate are included elsewhere within our representations. Previously we have commented on the Table at paragraph 4.6 of the Submission Core Strategy and the lack of evidence to underpin that table. It seems odd that in the space of a year the expected requirement for Greenfield sites has effectively halved on the basis of a SHLAA exercise. The community is therefore not able to effectively

16926 Object

CHAPTER 10 Policy T4 - South Essex Rapid Transit (SERT)

comment on the housing land supply and at this stage the Submission Core Strategy is legally unsound.

That said, we are of the view that the quantum of housing envisaged south of Hockley/Hawkwell should be more than the 175 currently envisage. In coming to this view we have reviewed the Urban Capacity Study and the latest housing figures in the Annual Monitoring Report 2008. We conclude that the shortfall in housing land supply is such that 330 dwellings in this location is appropriate.

The recently published SHLAA is based upon the data obtained from the Urban Capacity Study 2007, a call for sites exercise and data from the Annual Monitoring Report 2008.

The 2007 Urban Capacity Study (UCS)

1. 2007 is widely recognised as being the peak level of house prices in the UK and it was acknowledged by Government and practitioners alike that 2007 house prices were at an unsustainable level. It is our view that utilising the 2007 UCS as an evidence base without reference to the market does not pick up the depressed demand that is likely to now exist. Recent corrections to the housing market now mean that housing land prices are at a much lower and arguably more affordable level than before. The implications are that some pdl may not be viable for housing development. Often brownfield sites have much higher development costs than Greenfield sites and so the yield from urban capacity will be much lower than anticipated in the 2007 study. One example is the employment allocation of the Adopted Local Plan located at 76-92 Main Road, Hawkwell. This site has been allocated for several years and has been available during the most recent rises in residential property prices during 2006-07. As a consequence the lack of progress on the site can only be described by its current occupancy and perhaps it comprises high value uses that do not encourage redevelopment. Despite this the site is identified as having high potential for alternative use and high potential demand. The SHLAA form notes that there is no information on legal constraints (e.g., tenancy agreements) As a consequence it is difficult to see how this could continue to be a potential site and as a consequence the allowance for green field releases should be increased.

2. There are considered to be other instances in the UCS and the recently published SHLAA where the assumptions and calculations would indicate that the 1301 urban capacity figure is over optimistic and the SHLAA assessment is limited. In the assessment of 'non-residential sites in appropriate locations' within the UCS assumptions are made as to the probability of sites coming forward for new housing. 68-72 West Street, Rochford is identified as a high probability site but we note that it has been subject to 7 refusals of planning permission/conservation consent. There is a significant gap between the urban capacity identified as being suitable by the Council and the capacity applied for by the owners. Given its alternate use value, it is debateable whether the two capacity figures can be reconciled. No 247 London Road is another example of a site allocated in the Local Plan but which hasn't come forward. This is now the subject of a proposal for a care home and if approved would further limit the scope for market/affordable housing capacity on the site. A striking example of how the urban capacity study has underestimated is also evidence by 2-4 Alderman's Hill, Hockley - described as a disused service station. There has been no residential development application on this site since 2004 and most recent applications have sought commercial use of the site. Rather than being evidence of housing land deliverability, this particular site evidences the need for commercial uses in the area. There are therefore deliverability doubts over these 'high probability' categories which amount to some 40 units.

3. In relation to the assessment in the UCS entitled 'intensification of existing residential uses' we note that the assessment is premised on an assessment of recent trends taking into account net completions between 2001-2006 and 2005-06. This is effectively an assessment of windfall trends and not an approach that PPS3 encourages. Importantly Table 3-12 in the urban capacity study seeks to project forward urban capacity from residential redevelopment - a period that benefited from high house prices and PPG3 guidance encouraging redevelopment. These two circumstances have markedly changed and so the assumptions and conclusions drawn would also have changed. Even taking into account the UCS discounting, the reliability of the 404 units from this source must be questioned and in our view the 1301 figure cannot be a sound basis for urban capacity and further Greenfield releases are necessary.

4. In the section of the UCS entitled 'subdivision of dwellings' and 'living above the shop' it is estimated that recent trends would result in 7 and 15 units. Our concerns with using trends as a basis for urban capacity are detailed above - PPS3 does not encourage this. Rather, local authorities are charged with surveying their areas, identifying which areas may yield urban capacity and how much and developing policies to achieve that. Government guidance does not encourage the estimation of windfalls in the way the UCS does.

5. Redevelopment of established employment land is a separate section within the UCS. At 1 above we identify the low probability of the Main Road residential allocation coming forward. This remaining section of the UCS considers 11 further employment sites which were first identified in the 2000 UCS. Three of these are considered to have a high probability of coming forward. We have looked at these three sites and can find no evidence that they are likely to come forward. In the 8 years between 2000 and 2008 the three identified high probability employment sites have not been developed and there is no reason to assume that the next 5-10 years will be any different. For example the Rawreth Industrial Estate is identified as being well used in the UCS and although it has some unneighbourly uses there is no indication that the site is available, suitable or deliverable for residential. Land between 39-69 Lower Lambricks, Rayleigh is identified as having a high probability of residential uses. Yet there is no

16926 Object

CHAPTER 10 Policy T4 - South Essex Rapid Transit (SERT)

evidence of any pre-application advice or planning applications for this area. Stambridge Mills, Mill Lane, Stambridge is a further example. This site is separated from the urban area, in a flood risk zone and protected in the 2006 Replacement Local Plan by Policy EB9 which promotes B1 uses. Against this background there is only two relevant planning applications affecting this area both date from the early 1990's and relate to a plant room and loading bay. There is no evidence that this is likely to come forward for residential purposes in the next 5-10 years.

6. In the UCS extant permissions are identified as 856 dwellings. It is important to note that this figure needs to be continually reassessed so that from the point of adoption of the Core Strategy a 5 and 10 year housing land supply is available. The SHLAA notes extant permissions for 2009-14 being 106. As noted below extant permissions do not necessarily translate into deliverable sites. There is therefore a contingency that needs to be built in. Further allocations on greenfield land need to be increased and as such the quantum of housing in the area south of Hockley/Hawkwell should be increased to 330 dwellings in order to begin to meet the shortfall identified.

The District Council's 5 year housing supply assessment

7. The District Council's Annual Monitoring Report ("AMR") 2008 purports to demonstrate a 5 year housing land supply. The preamble to Table 4.10 in the AMR 2008 explains that Rochford District Council ("RDC") has included units under construction, units with full permission, units with outline permission, units with a resolution to grant, units subject to preapplication discussion/Urban Capacity Assessment and land allocations in its trajectory. The reader is referred to Appendix B which breaks down the sites in more detail. The recently published SHLAA also includes a table showing a potential 1273 dwellings deliverable. However, it refers to "appropriate brownfield sites." Since these 'appropriate sites' are do not benefit from an application or a planning permission it is difficult to programme them into the housing delivery trajectory.

8. In the full planning permission category of the AMR 2008 where work has not yet started there can be no guarantee that all these sites will be delivered in the 5 years. This comment relates to the one above in relation to the recently published SHLAA. It is not uncommon for permissions to be obtained to provide a means for valuing a site where the owner has no immediate plans to sell the site or develop housing. Delivery may also be hampered by funding constraints, or site assembly problems (where sites are in an alternative use or relocation constraints). Appendix B of the AMR 2008 does not set out the intentions of the landowner or whether the sites are truly achievable in the 5 year period as per PPS3 requirements. The SHLAA purports to show developer intentions at Appendix C but the assessment by the local authority into the legitimacy of some of the claims is not presented. The evidence base is not as full as it should be to demonstrate the robustness of Table 4.6 of the SCS. It is also unclear the extent to which this table is based on either the UCS 2007, AMR 2008, SHLAA 2009 or a combination of all three. This should be set out clearly.

9. In addition, to the 'non delivery' of a proportion of new homes in the AMR 2008, there is concern at the timings of delivery in that data set, for example, 10 units in 2008-2009 relates to outline planning permissions and it is doubtful whether reserved matters can be turned round quick enough to begin delivering housing in this year period. There could well be examples in that set of data where the delivery of units in the first year of the 5 is unlikely, thus delivery is reduced for that period and pushed back and this process is then compounded throughout the data set up to and beyond year 5. Statistical evidence from the Department of Communities and Local Government ("CLG") reveals that building starts are 43% down on the quarter to March 2009 compared with March 2008. It is not clear whether the recently published SHLAA has taken this into account and unless it does the data in the Table at 4.6 of the SCS cannot be relied upon, particularly given the current recessionary circumstances. In relation to the Table at Paragraph 4.6 a refinement is therefore needed to take into account this effect on phasing.

10. This problem is compounded for other units relied upon where permission has been granted but no start on site has been made; this accounts for a considerable number of sites in 2009-10 period (100 dwellings) which is (year 2 of the 5 year period). A delay in these will require more Greenfield sites to be identified in order to meet the shortfall.

11. Finally we note that the East of England Plan expresses its land supply requirement as a minimum. This strategy is not reflected in the

Core Strategy Submission Document

16926 Object

CHAPTER 10 Policy T4 - South Essex Rapid Transit (SERT)

Submission version of the Core Strategy policy H2.

12. In summary since neither the UCS nor the Annual Monitoring Report form a SHLAA, reservations are maintained about the degree to which sufficient housing land has been identified.

Policy H3

In the Preferred Options Core Strategy 2008 more locations were identified for housing growth in the post 2021 phase. Whilst it is our view that land south of Hockley/Hawkwell should benefit from a greater number of dwellings than the 175 currently identified (330) in order to make the strategy effective. We are concerned at the significant change in strategy between the Preferred Option Core Strategy and the Submission version, which has significantly less housing growth on green field sites. This change in strategy is so significant that we would question whether it is appropriate in the context of soundness and the consultation processes that have taken place so far.

We also have concerns as to how the Green Belt review strategy set out at Policy H3 and in the Local Development Scheme integrates with other policies in the SCS and feel that Green Belt review should be more explicit throughout the SCS. As it currently stands there is a potential conflict with national policies and limited justification for the Green belt strategy. We note that in Policy H3, which indicates the need for Green Belt land review, the advice is limited and unclear. In fact Policy H3 only pays lip service to the need for a Green Belt review and provides, at best, loose advice in this regard. It says that prior to 2021 Green Belt will be safeguarded save for the releases noted under Policy H2. Policy H3 then goes on to talk about land release for development after 2021 but no time period is set out to provide a framework for any Green Belt review in this latter period. In our view Policy H3 and Policy GB1/H2 should explain fully the need for a Green Belt review and that such a review should take place for a defined period. That such a review has not taken place in advance of the SCS is a serious matter for the Inspector to consider in the context of soundness. That said, it is considered that any review of Green Belt should have regard to a period beyond 2021 as indicated by draft Policy H3. Paragraph 1.9 of the East of England Plan explains "this RSS covers the period to 2021 but sets a vision, objectives and core strategy for the longer term". 2026 is therefore considered a minimum suitable period that any Green Belt review must have regard to in order to meet the 5 year land supply requirements in PPS3 for the period after 2021. However, Policy SS7 of the East of England Plan talks about Green Belt reviews up to 2031. In view of this and the need to explore the circumstances of Rochford - that existing settlements cannot contain future housing growth; that Green Belt is necessary to provide housing; and that these provide exceptional reasons to vary the Green Belt locally (paragraph 2.6 to 2.7 of PPG2) the policies and strategy for the SCS should identify a Green Belt review covering the period to 2031 and set out why a review is necessary. Not to do so is unsound for justification and effectiveness reasons.

Policy H4 - Affordable Housing

As currently drafted we feel that the policy is not concise enough and that the policy does not reflect current guidance. The phrase 'at least' would indicate that in most cases affordable housing above 35% will be sought. Our understanding is that the 35% figure is recommended in the SHMA and that to provide a policy framework which seeks to go beyond that figure would potentially be unworkable as many sites could not financially bare the burden of over a third of the net developable area not yielding a value. The policy should be redrafted so that "a target of 35% affordable housing shall be provided on all developments of 15 or more units..."

The last policy paragraph provides some scope to relax this policy, if there are clear site constraints that make on site provision impossible. The policy, though, is not particularly clear on what would constitute exceptional circumstances. For example, physical site constraints, which unusually raise development costs, would be one such reason and this should be specified. There may be other reasons including the nature of housing needs in the part of the District the site is located which justify affordable housing below the 35% target. Design reasons may also have a bearing on how provision is made and in what form, particularly if the site is in an historic area where design might override housing need argument. It is therefore recommended that the policy expand on the type of circumstances where affordable housing may be relaxed and the type of information that will be sought of applicant's who have a need to invoke this part of the policy.

Policy H5

In support of the policy, it is advantageous that no percentages requiring a specific mix are included. This flexibility will enable developers and the Council to respond directly to changing circumstances in the local housing market. In the past some authorities have set out a percentage for the type of housing they require only to find that after a few years of strict implementation there is an oversupply of property of that type and no flexibility in the policy to address the problem.

Policy ED2 - London Southend Airport

It is considered that to grow non aviation related employment at a location north of Southend Airport where sustainable access from the rest of Rochford District requires careful consideration. Most Airports are serviced by aviation related employment development and as such a location close to the airport is sensible and sustainable. However, for surface access reasons it would be inappropriate to encourage travel from Rochford's main settlements to what essentially

Core Strategy Submission Document

16926 Object

CHAPTER 10 Policy T4 - South Essex Rapid Transit (SERT)

would be a rural location for general employment uses. Whilst sustainable access would be improved by a railway station and better bus links, there is no evidence to suggest that a sustainable surface access strategy for non related employment development at the Airport can be achieved. Paragraph 11.22 explains the critical importance of a railway station to the delivery of the strategy yet the Transport Chapter and Implementation Chapter provide neither a policy nor an assessment of deliverability. It is also notable that the South Essex Rapid Transit Policy T4, as set out at paragraph 10.16, notes that Rochford is not proposed to be served but may be served in future phases. This uncertainty is no way to plan for a major employment land supply strategy in the District. In relation to PPS12, the ability to deliver sustainable green field employment sites away from the top tier settlements of Hockley/Hawkwell, Rochford and Rayleigh is unsound.

Policy ED3

We fully support the first sentence of the Policy and note the apparent contradiction with the statements in Policy H1 and elsewhere which seeks to develop on alternative uses at industrial estates such as Eldon Way.

This contradiction is evidence in the second paragraph of Policy ED3. In our representations on Policy H1 we have explained why it is not sound to diminish the employment stock at Eldon Way and the importance of maintaining a dominance of employment type uses at this estate. These arguments are not repeated here.

We note the sentiments of the third paragraph and in accordance with our representations elsewhere are of the view that this sentence should be revised to explain that Eldon Way will accommodate principally employment type uses. As noted elsewhere uses which are an alternative to employment would diminish this highly sustainable employment site and this is unsound when assessed against National Policy.

Policy ED4 - Future Employment Allocations

In part, the de-allocation strategy is not supported as it is considered unsound when set against sustainability criteria. In relation to the Eldon Way Industrial Estate it is considered critical to the ongoing sustainability of this settlement that employment uses are maintained at this location. It is close to the railway station, bus routes and local residential areas from which the opportunity exists for employees to walk or cycle to work. Its location adjacent to the Town Centre offers opportunity for some retail and leisure development to complement the centre and to maintain a supporting function. These sustainable benefits would not occur with the deallocation of Eldon Way or the significant erosion of its employment floorspace. Whilst redevelopment of the employment site to achieve new employment is supported, the dominant land use should continue to be employment use. As a consequence, the 18ha of land required for employment in this policy is considered to be excessive and the policy should be reviewed to explain that redevelopment of existing employment sites for primarily new employment development will be encouraged.

Policy T4

It is noted that the South Essex Rapid Transit policy, as elaborated upon at paragraph 10.16 notes that Rochford is not served but may be served in future phases. This uncertainty is contrary to the delivery principles of soundness and directly puts at issue the employment land supply strategy in the District which is founded on sustainable access to new sites. In relation to PPS12, the ability to deliver sustainable green field employment sites away from the top tier settlements of Hockley, Rochford and Rayleigh is unsound.

Appendix H1, CTL1 - Infrastructure

It is recognised that necessary infrastructure provision is an important part of creating a sustainable development and in that context appendix H1 is supported. The supporting text notes that the table at Appendix H1 is not exhaustive and in that context it is very important that the framework properly distinguishes between what should be provided as part of new development schemes and what shouldn't. It is therefore essential that the framework acknowledges the importance of Circular 05/05 and the tests which say that provision of infrastructure and/or contributions should be:

- * Relevant to planning
- * Necessary to make the proposed development acceptable in planning terms
- * Directly related to the proposed development
- * Fairly and reasonably related in scale and kind to the proposed development
- * Reasonable in all other respects

As is made clear (Paragraph B9 of Circular 5/05) contributions should not be used to make good existing deficiencies in infrastructure provision. Nor are they to be used to secure contributions to the achievement of wider planning objectives that are not necessary for consent to be granted. In that context the Core Strategy should set this out as its policy framework.

Policy GB1 - Green Belt

Core Strategy Submission Document

16926 Object

CHAPTER 10 Policy T4 - South Essex Rapid Transit (SERT)

The objectives of this policy are supported, although as noted in other representations the SCS is unsound as it does not meet the tests in relation to justification, compliance with national policy or effectiveness of strategy.

Policy GB1 mentions the objective to allocate the minimum amount of Green Belt land necessary. The policy should link to the requirements of PPG2 and RSS which are discussed in relation to the representations on Policy H2 and H3. The policy should set out a timeframe for the review and why Rochford requires a Green Belt review (what the exceptional circumstances are in this District that justify a review of local boundaries. The policy should be amended to set out a 2031 time frame and this may require the SCS to have an extended life span beyond 2021.

We would recommend the deletion of the word character since Green Belt designation is not related to landscape character as currently drafted. For clarity we would also recommend that the Policy or its supporting text explain that a Green Belt review will take place in support of an allocations document (paragraph 6.6) in order to identify an appropriate new boundary. This is particularly necessary given the commitment to a Green belt review in the adopted Local Development Scheme.

Policy CLT1 - Planning Obligations and Standard Charges

In view of the need to test fully the basis on which standard charges are based it is important that any document produced is in a development plan document that enables an examination in public. The policy should explain this in order that when the document is produced it accords with Policy and is based on sound evidence.

ENV9 - Code for Sustainable Homes

Object. The advice from the Department of Communities and Local Government is that the new requirement to have a rating against the Code does not make it mandatory to build a Code home or to have each new home assessed against the Code. It does however mean that all buyers of new homes be given clear information about the sustainability of the new home. A house builder can do this in one of two ways:

- they can choose to build a Code home, have that home assessed against the Code and provide the home buyer with a Code certificate stating the star rating the home has achieved
- or, they can choose to build to current building regulations standards, not to pay for an assessment and instead download a nil-rated certificate of non-assessment (also referred to as a nil-rating) to provide to the home buyer.

As such the Rochford policy requirement that coding 3 be achieved by 2010 and Code 6 by 2013 is out of step with Government advice. The policy wording should explain that it is just the coding that is a requirement of new homes and not necessarily that new homes should be constructed to achieve a standard.

The current Government objectives are for the code to be introduced over a reasonable period with development to be code 3 by 2010, code level 4 by 2013 and code level 5 by 2016. In this regard the policy, as drafted, seeks to achieve code 6 by 2013 and consequently compresses the code requirements into a shorter time scale with the costs associated expected to be subsumed within the housing market through higher prices. This is not a realistic strategy for the delivery of sustainable homes and we consider that the policy should be revised to extend the period of compliance but to also make it more flexible based on local circumstances.

Research undertaken on behalf of the Housing Corporation and English Partnerships, published in February 2007 'A cost review of the code for sustainable homes' reveals that code 6 is unlikely to be unattainable given existing technologies and that achieving code 5 could result in a 12% to 20% increase in costs that would have to be passed onto the consumer. Given the variability of the housing market with peaks and troughs, it is unlikely that the housing market would be able to subsume this level of price increase.

The code system policy as currently drafted does not have regard to site circumstances and so many of the requirements could be difficult to meet. For example, micro electricity generation on site may be difficult to achieve where local circumstances deter the capture of wind or solar power. If more expensive technologies are required to generate power than is the norm then costs will rise. There may be other competing reasons why designs cannot include certain sustainability measures if housing sites are in sensitive landscape and historic locations. Alternatively there may be significant development costs associated with site specific circumstances and so viability of the site's development becomes a valid consideration. By insisting on the code for sustainable homes other policy objectives such as affordable housing at particular rates and other contributions may need to be reconsidered. Consequently, we are of the view that this policy should be drafted in a manner which enables site specific circumstances to be taken into account. As noted above the Government explains that the code is a certification requirement and does not necessarily mean that buildings are constructed in accordance with a code level.

It is also important to note that it is not the purpose of planning legislation to duplicate other legislation. In this regard, the policy should accept that the Building Regulations will be the main vehicle for implementing this policy and that unless the coding requires external development then there will be no need to specify what is to be carried out in a planning application.

Full Text:

Thank you for inviting the Highways Agency (HA) to comment on the Rochford Core Strategy (CS) Submission Document and Rochford Area Action plan (AAP) prepared by Rochford District Council

As you are aware the HA is an executive agency of the Department for Transport (DfT). We are responsible for operating, maintaining and improving England's motorway and all-purpose trunk road network, collectively known as the Strategic Road Network (SRN), on behalf of the Secretary of State for Transport.

In spatial planning and development control terms, we have a duty to safeguard the operation of the motorway and trunk road network as set out in the Department for Transport Circular: 02/2007: Planning and the Strategic Road Network. <http://www.dft.gov.uk/pgr/regional/strategy/policy/circular207planningandstrategic>. The circular encourages the HA to work co-operatively with Local Planning Authorities within the framework of the Government's policies for planning, growth areas, regeneration, integrated transport and sustainability. We look to your Council's Local Development Framework to promote strategies, policies and land allocations which would support alternatives to the private car.

In the case of Rochford there are no trunk roads within the District although there are two strategic corridors namely the A13 and A127/A1159 which connect into the M25 motorway network at Junctions 30 and 29 respectively. Sections of these areas are currently heavily congested, particularly during peak periods, and operate under considerable levels of network stress. Therefore it is important to the HA that the impact of major development proposals in the Rochford area is considered within the context of future impact on the M25 and the A13 Trunk Road.

Please see below some general comments regarding the soundness of the CS and SSA from a transport perspective, referring to specific proposed submission policies as necessary. This response has been completed with reference to paragraph 4.52 of PPS12 (2008) PPS12, paragraph 4.52 - To be 'sound' a core strategy should be JUSTIFIED, EFFECTIVE and consistent with NATIONAL POLICY.

CORE STRATEGY

Policy GB1 - Green Belt Protection

The HA acknowledges that only the minimum amount of Green Belt land will be allocated to meet the District's housing and employment needs as necessary. However, the HA is concerned that any proposed redevelopment of greenbelt sites could result in development in areas with limited access to sustainable transport modes therefore resulting in higher levels of car usage and subsequent impact on the SRN. Although the HA recognizes that new public transport hubs that would facilitate the use of non-car modes could be developed over time, this process is likely to require very substantial investment.

It is therefore important that an appropriate assessment of infrastructure requirements is performed for development sites on Green Belt land. Funding towards the necessary public transport infrastructure improvements must be sought and secured prior to occupation of any new development on greenbelt land. Furthermore, the occupation of such developments should be phased in line with necessary transport infrastructure. This will help the CS meet the PPS12 requirement that a sound DPD should be 'justified' and 'effective' and hence deliverable.

Policy T1 - Highways

Policy T1 highlights the need to reduce reliance on the private car but also observes that 'some impact on the highway network is inevitable'. In a District with such high levels of private car ownership and a limited public transport network, as stated in paragraph 10.2, it will be important to assess the potential impacts to the highway network and ensure that mitigation measures are proposed and implemented where necessary.

An emphasis should be placed on the provision and improvement of sustainable transport infrastructure, particularly where high trip-generating developments such as offices are proposed. In line with the DfT's Guidance on Transport Assessment (2007) - DfT GTA, paragraph 4.51 - 'The key issue is the need to ensure that development proposals strive to achieve nil detriment ('no worse off') to the strategic network, for the opening year and appropriate horizon year'. This emphasis will assist in mitigating potential increases in private vehicle trips and hence help ensure that there is a nil-detriment effect on the SRN.

Policy T3 - Public Transport

Core Strategy Submission Document

O - 16730 - 14244 - Policy T5 - Travel Plans - i, ii

16730 Object

CHAPTER 10 Policy T5 - Travel Plans

The recent Planning Inspectorate 'LDF - Learning from Experience' document (September 2009) suggests that a Core Strategy should identify a clear source of funding for infrastructure for at least the first 5 years of the plan - The Planning Inspectorate, LDF: Examining DPDs: Learning from experience, September 2009, Paragraph 22 - 'For at least the first 5 years of the plan it should be clear what infrastructure is required, who is going to fund and provide it and how it is to relate to the rate of development'.. Paragraph 10.15 of the CS highlights the importance of public transport links for new developments and implies that developers may be required to contribute towards public transport provision. However, it is noted that developer contributions cannot be expected to pay for all transport improvements and as such, in line with the recent Planning Inspectorate document outlined above additional sources of funding should be identified. It is recommended that alternative sources of funding for public transport improvements are clearly outlined within the CS to ensure that adequate infrastructure provision is made.

Policy T4 - South Essex Rapid Transit

As mentioned in our response to the Core Strategy Issues and options consultation the HA is supportive of this policy and the need to progress the route through South Essex. This has the potential to reduce the impact on the SRN (A13).

Policy T5 - Travel Plans

The HA welcomes the requirement for a travel plan for developments involving both destination and origin trips. However it is noted that no threshold for employment sites have been specified. Essex County Council requires the production of a workplace travel plan for developments with over 50 employees or where there will be a significant impact on the local road network. To avoid ambiguity for developers, the HA recommends that the Rochford District Core Strategy specifies a similar threshold within Policy T5. This will ensure the Core Strategy is in line with PPG13 paragraph 87 - PPG13 - 'Local authorities are expected to consider setting local targets for the adoption of travel plans by local businesses and other organizations..'

Policy ED2 - London Southend Airport

The HA previously responded to the London Southend and Environs Joint Area Action Plan Preferred Options Document (March 2009). As such, we have not repeated our comments here but instead refer you to our consultation response dated 31 March 2009.

Summary:

Policy T5 - Travel Plans

The HA welcomes the requirement for a travel plan for developments involving both destination and origin trips. However it is noted that no threshold for employment sites have been specified. Essex County Council requires the production of a workplace travel plan for developments with over 50 employees or where there will be a significant impact on the local road network.

Change to Plan

To avoid ambiguity for developers, the HA recommends that the Rochford District Core Strategy specifies a similar threshold within Policy T5. This will ensure the Core Strategy is in line with PPG13 paragraph 87 - PPG13 - 'Local authorities are expected to consider setting local targets for the adoption of travel plans by local businesses and other organizations..'

1.0 Instruction and Introduction

1.1 Charles Planning Associates Limited (Chartered Town Planners) is Instructed by Swan Hill Homes Limited (Swan Hill) to prepare and submit representations on their behalf in respect of the Rochford District Local Development Framework: Core Strategy Submission (September 2009) Development Plan Document.

1.2 The comments refer to the relevant sections and policy designations in the Submission document, as appropriate.

1.3 The comments set out in this submission are intended to assist the District Council in taking forward its Local Development Framework. It is our intention to continue to be involved in the LDF preparation process and we look forward to the opportunity to comment further at the Examination to the Core Strategy.

1.4 If you have any queries regarding the content of this submission then please do not hesitate to contact:

Peter Kneen BSc (Hons) MSc MRTPI
Planner

2.0 Housing:
Policy H1 - The Efficient Use of Land for Housing

2.1 Swan Hill recognises the importance of seeking to concentrate new developments mainly in the existing urban areas, on previously developed land where possible, particularly in view of the Government seeking to ensure 60% of all such new developments are on previously development land (PDL).

2.2 However, given the character of the District, and the strategic housing requirement of the East of England Plan, Swan Hill supports the approach that the Council must also make provision for additional development on the edge of existing settlements on greenfield sites, particularly in the most sustainable locations. As such, Swan Hill supports that where feasible, the redevelopment of existing employment sites for residential/employment purposes can make a contribution towards the strategic housing requirement, provided that sufficient additional employment land is brought forward to ensure the stability of employment levels in the District, and to ensure employment growth meets the East of England Plan requirements.

2.3 Swan Hill considers that Policy H1 should include consideration that new extensions to existing settlements have regard to their potential impact on the wider characteristics and openness objectives of the Green Belt.

Policy H2 - Extensions to Residential Envelopes and Phasing

2.4 Swan Hill generally supports the approach taken by the Council in this policy. As set out above, Swan Hill consider the Council's acknowledgment that housing requirements should be met through the allocation of land on the edge of the existing settlements is the most suitable way forward to meeting the Council's strategic housing requirement and complies with the advice in PPS3.

2.5 The need for suitable greenfield urban extensions represents the best way forward for the Council to meet its strategic housing requirement, as set out in the East of England Plan. Swan Hill supports the recognition that the potential supply of alternative previously developed sites is limited, without detrimentally affecting the character of the District, and therefore the best way forward is the use of sustainable greenfield urban extensions to the existing settlements of the District.

2.6 However, Swan Hill consider that a fundamental consideration that the District Council should consider relates to the potential impact of the urban extensions on the Green Belt policy has been somewhat overlooked. The wider sustainability credentials of the settlements of the District should only be one of many key considerations for determining the level of expansion. In view of the proximity of Southend-on-Sea to all the main settlements of the District, and the influence this has on the likely location many people would travel for employment and leisure, sustainability of many of the settlements is not a key overarching factor, and greater weight should be placed on the potential impact on the openness of the Green Belt, as this cannot be remedied if development occurs in the wrong location.

2.7 As such, Swan Hill considers that determining the location of growth for the main settlements should be to identify

16892 Support

CHAPTER 10 Policy T5 - Travel Plans

those locations where the impact on the wider setting of the Green Belt can be minimised. Further justification for those general locations chosen should be identified in Policy H2. In this regard, Swan Hill has serious concerns regarding the removal of Land South West of Great Wakering as a viable option for the growth of the settlement. The development of this area of Great Wakering, in addition to the potential redevelopment of the Star Lane Industrial Estate could provide a more comprehensive development, whilst ensuring that the wider openness of the Green Belt is maintained. Land South West of Great Wakering is significantly better placed to limit the impact on the wider Green Belt than Land West of Great Wakering, and could contribute to the provision of an important amenity and wildlife site for the local community.

2.8 In addition, Swan Hill consider that the Council now has no reserve provision in the event that any of the existing employment sites set out in Policy H1 fail to come forward for development within the envisaged timescale. Further, Land West of Great Wakering has not been identified in the SHLAA as a deliverable site to help meet the strategic housing requirement, contrary to the requirement set out in PPS3.

2.9 As such, Swan Hill would support the provision of suitable sites which could be safeguarded for future development in the likelihood of a shortfall in supply.

Policy H3 - Extensions to Residential Envelopes Post 2021

2.10 As set out above, Swan Hill supports the overall approach the Council has taken towards the provision of sustainable urban extensions as a suitable means of meeting their strategic housing requirement. However, as set out for Policy H2 above, Swan Hill has serious concerns regarding the removal of several proposed sites set out in the October 2008 Preferred Options Core Strategy, without any guarantee of the ability to deliver those sites set out in Policy H1.

2.11 As also considered above, the inclusion of West of Great Wakering for 250 dwellings should not be included ahead of South West of Great Wakering, in view of the fact that the site is not identified in the SHLAA as available, suitable and achievable as required by PPS3, and thus is not supported by a robust and creditable evidence base for its inclusion as a strategic site for development.

2.12 Whilst Swan Hill acknowledge that alterations to Policy H1 has resulted in the removal of some locations for growth in Policy H3 (as set out in the Sustainability Appraisal), Swan Hill does not consider that the most appropriate locations have been chosen.

2.13 In addition to the matters raised above, the use of West of Great Wakering would also result in the loss of valuable agricultural land, which clearly in a Green Belt location, should be less suitable for development than other sites, such as South West of Great Wakering, which would have limited impact on the wider Green Belt policy, and not result in the loss of valuable agricultural land.

2.14 Finally, in respect of Policies H1, H2 and H3, all of the above comments are based on our interpretation of the Submission Version Core Strategy when compared to the October 2008 Version of the Core Strategy. Without the ability to undertake a detailed assessment of the Council's SHLAA, it is not possible to clarify the proposed Core Strategy position regarding the proposed direction of growth proposed for the settlements in the District. As such, Swan Hill reserves the right to make additional representations regarding the proposed Policies H1, H2 and H3 following the publication of the SHLAA in due course.

Policy H4 - Affordable Housing

2.15 In general terms, Swan Hill supports the approach taken by the Council towards the provision of affordable housing for new residential developments. The Policy accords with the advice of National Policy and is therefore considered sound by Swan Hill.

Policy H5 - Dwelling Types

2.16 Swan Hill supports the policy provision of H5, and considers that the approach taken by the Council for this policy represents a suitably flexible alternative to stipulating percentages of dwelling mix, sought by some local authorities. The Policy accords with the advice of National Policy and is therefore considered sound by Swan Hill.

Policy H6 - Lifetime Homes

2.17 In regard to this policy, Swan Hill objects to the Council's policy where all new dwellings should be provided to the Lifetime Homes Standard. Whilst it is acknowledged that the UK has an aging population, Swan Hill considers that seeking to provide Lifetime Homes on all sites is considered to be overly onerous for proposed developers, particularly when considering the requirement for all car parking spaces to be suitable for disabled users, which could result in more schemes becoming unviable. Therefore, the provision of a percentage of Lifetime Homes should be considered through negotiations with the Council at the planning application stage, and should be determined on a case-by-case basis.

3.0 Character of Place: Policy CP1 - Design

16892 Support

CHAPTER 10 Policy T5 - Travel Plans

3.1 The Town and Country Planning (General Development Procedure) Order 1995 (As Amended) makes the submission of a Design and Access Statement for most types of planning applications a Statutory requirement, and as such, the provision of a Design Brief represents a pre-requisite of all major planning applications.

3.2 Policy CP1 seeks to ensure the provision of good, high quality developments that reflect local characteristics and distinctiveness, this ideology is supported by Swan Hill.

4.0 The Green Belt:
Policy GB1 - Green Belt Protection

4.1 Following the amendments to the wording of the Policy since the October 2008 Preferred Options Core Strategy, Swan Hill is now generally supportive of Policy GB1 and its supporting text. However, as expressed above, it is important that where alterations to the Green Belt boundary occur as a result of the extension of the settlements to meet the strategic housing requirement, both the minimal amount of land is taken and where that land is taken for development, it represents the best available land which has a minimal impact of the wider openness characteristic of the Green Belt.

5.0 Environmental Issues:
Policy ENV3 - Flood Risk

5.1 Swan Hill generally supports the approach set out in Policy ENV3 regarding ensuring development accords with the sequential test of PPS25. The Policy accords with the advice of National Policy and is therefore considered sound by Swan Hill.

Policy ENV4 - Sustainable Drainage Systems (SUDS)

5.2 Following the revisions from the October 2008 Preferred Options Core Strategy, Swan Hill now generally supports the approach set out in Policy ENV4. The Policy accords with the advice of National Policy and is therefore considered sound by Swan Hill.

Policy ENV8 - On-site Renewable and Low Carbon Energy Generation

5.3 Whilst Swan Hill recognises the importance of reducing carbon emissions, particularly in new housing developments, and the role this can play in reducing the nations overall Greenhouse emissions. As such Swan Hill is generally supportive of Policy ENV8. It is noted that Policy ENG1 of the East of England Plan sets out a threshold of developments comprising 10 or more dwellings. Swan Hill consider it important for the District Council to justify the reduction in the threshold level.

5.4 Further, no assessment of Policy ENV8 has been set out in the Sustainability Appraisal which justifies the change in threshold from that of Policy ENG1 of the RSS.

Policy ENV9 - Code for Sustainable Homes

5.5 Following the revisions from the October 2008 Preferred Options Core Strategy, Swan Hill now generally supports the approach set out in Policy ENV9. The Policy accords with the advice of National Policy and is therefore considered sound by Swan Hill.

6.0 Community Infrastructure, Leisure and Tourism:
Policy CLT1 - Planning Obligations and Standard Charges

6.1 Swan Hill generally supports the overall approach the Council has taken in Policy CLT1. It is considered Policy CLT1 sets out a degree of flexibility to ensure that all sites are considered on a site-by-site basis, assessing the individual merits of each planning application, in order to ensure the levels of contributions applicable meet the five tests of Circular 05/05. The Policy accords with the advice of National Policy and is therefore considered sound by Swan Hill.

Policies CLT5 - Open Space;
CLT7 - Play Space;
CLT8 - Youth Facilities; and,
CLT10 - Playing Pitches

6.2 Swan Hill supports the need for new residential developments to incorporate a degree of new publicly accessible open space, children's play space, youth facilities and playing pitches, and as such, generally supports the policy approaches taken by the Council.

6.3 However, it is important that whilst the Council may seek to undertake an assessment of providing standard charges for new development, which, as set out in Policy CLT1, this should be based on thorough public consultation and consideration and sound justification. Swan Hill consider that within the provision of a standard charge, it is important that such provision allows for a degree of flexibility to ensure that each site is assessed individually and on its own merits. This is particularly important for those sites close to existing open spaces and facilities. As such, the levels of

16892 Support

CHAPTER 10 Policy T5 - Travel Plans

open space and recreation facilities required in the 'standard charge' should be based on an up-to-date PPG17 Open Space assessment, which should be used to form a key consideration in the levels of provision likely to be required in the standard charge system proposed.

7.0 Transport: Policy T1 - Highways

7.1 Swan Hill supports the overall objectives set out in Policy T1 requiring developments to be located and designed to reduce the reliance on the private car and to meet the infrastructure needs generated by development or seek to help achieve these needs is acceptable in principle.

7.2 Swan Hill recognises the importance of providing sufficient infrastructure provision to meet the requirements of development, and that where developments have insufficient consideration of impact on existing infrastructure, they should be considered unacceptable and contrary to National policy guidance. However, Swan Hill considers it important to emphasise that the developer's role should not be seen as a means to meet existing shortfalls in provision.

Policy T3 - Public Transport

7.3 Swan Hill is generally supportive of the policy approach set out in T3, however, as set out in paragraph 7.2 above, it is important that the District Council do not consider that it is the developer's responsibility to resolve existing shortfalls in provision of public transport, and any contribution towards additional public transportation provision should only be to mitigate against the additional level of demand likely from the development proposed.

Policy T5 - Cycling and Walking

7.4 Swan Hill supports the general approach to this policy, as Swan Hill recognises the importance of promoting the use of alternatives to the private car. The policy provision acknowledges the need to ensure relevant contributions in the event of additional travel demands generated by individual developments, whilst also setting out additional aspirations for the cycle network in the District.

7.5 As such, Swan Hill considers this policy accords with the advice of National Policy and is therefore considered sound by Swan Hill.

Policy T8 - Parking Standards

7.6 The Council has recently (January 2007) adopted SPD on the requirements for parking standards, and as such, Swan Hill generally supports the policy approach chosen by the Council. As set out in the SPD, whilst Swan Hill generally supports the approach taken by the District Council towards setting residential parking standards, in that the Council has recognised that in the suburban areas, even with some access to public transport, the majority of residents will rely on the use of private cars. However, Swan Hill has concerns over the failure of the District Council to comply with the provisions of PPG13: Transport (2001) which sets out that Local Planning Authorities should not set minimum standards for car parking. Whilst it is acknowledged that PPS3 sets out provision for the consideration of local circumstances, it is considered that the Council has not justified this deviation from PPG13's maximum standard.

7.7 Whilst it is acknowledged that such justification may become apparent through the work currently being undertaken by Essex County Council, until such time, the District Council should only seek to apply the maximum standards indicated in PPG13. However, Swan Hill recommends that the District Council make provisions in the wording of the Policy to allow for changes in the event that future policy on car parking standards need to reflect the County standard, following the completion of the County Council review.

8.0 Economic Development: Policies ED3 - Existing Employment Land ED4 - Future Employment Allocations

8.1 In respect of Policies ED3 and ED4, Swan Hill notes that they have changed considerably since the October 2008 Preferred Options document, in that they are site specific regarding the location of the proposed redevelopment of existing employment sites. These four sites are also identified in Policy H1 - Efficient Use of Land, and in general, Swan Hill supports the approach to the redevelopment of these sites (where feasible) based on the assessments of the sites set out in this version of the Core Strategy.

8.2 However, Swan Hill has concerns that these policies might not be considered suitably sound given that insufficient opportunity has been allocated for consultation on their redevelopment. Without the SHLAA being publically available prior to the consultation on this Core Strategy, an insufficient evidence base has been provided to corroborate that these sites are neither suitable or deliverable to meet the test of soundness requirements.

Summary:

Policy T5 - Cycling and Walking

7.4 Swan Hill supports the general approach to this policy, as Swan Hill recognises the importance of promoting the use of alternatives to the private car. The policy provision acknowledges the need to ensure relevant contributions in the

Core Strategy Submission Document

event of additional travel demands generated by individual developments, whilst also setting out additional aspirations for the cycle network in the District.

7.5 As such, Swan Hill considers this policy accords with the advice of National Policy and is therefore considered sound by Swan Hill.

Full Text: ROCHFORD DISTRICT COUNCIL - LOCAL DEVELOPMENT FRAMEWORK CORE STRATEGY SUBMISSION
SEPTEMBER 2009

Icen Projects Ltd (Icen) has been instructed by Colonnade Land LLP (Colonnade) to submit representations to the Rochford Local Development Framework Core Strategy Submission (CSS).

a) Overview

It is our conclusion that the CSS is not justified, effective or consistent with national policy, as required by Planning Policy Statement 12: Creating Strong Safe and Prosperous Communities through Local Spatial Planning (PPS12) and is therefore vulnerable to being found unsound by an Inspector through the Examination in Public.

b) Background and Summary

These representations follow those made by Icen on behalf of Colonnade to the Preferred Options Core Strategy, submitted via letter dated 17 December 2008. In this regard, we would request that the Council confirms that the representations made to the Preferred Options Core Strategy will be taken into account alongside the current representations, particularly as there are a number of cross references between the two sets of representations.

It is not considered necessary to reiterate the content of the previous representations, as they were made at the appropriate stage and will be considered by the Planning Inspectorate in due course, but it is inevitable that certain elements will require restating where it is not clear that they have been taken into account in the production of the CSS. For clarity, therefore, Colonnade feel that it is appropriate to clarify the 'in-principle' issues that were raised in the representations to the Preferred Options Core Strategy, recognising that these issues were raised in the context of a wider and more coherent justification made within the representations:

- â€¢ Further cross-referencing of the recommendations made within the evidence base is required;
- â€¢ Greater focus should be placed on promoting Rochford as the principal settlement within the District;
- â€¢ Coombes Farm is the most logical location for residential development abutting the urban area of Rochford and as such warrants recognition as a general location for residential development;
- â€¢ The allocation of Three Ashes Farm for employment generating uses will be pursued;
- â€¢ Recognition that it is not realistic to expect residential allocations to be met mainly on Brownfield sites, nor should the intensification of smaller sites in residential areas be pursued;
- â€¢ Many of the sites identified as suitable for residential development will not be viable and will not come forward for development within the timescales anticipated;
- â€¢ The failure to provide the necessary justification for the proposed infrastructure improvements sought in Appendix H1;
- â€¢ The inclusion of an affordable housing exception policy was sought; and
- â€¢ The need to identify sites capable of delivering employment growth in the short term.

Following assessment of the CSS presented by the Council for consultation prior to submission to the Secretary of State, Colonnade considers the Plan to be 'unsound' as the document consistently fails to meet the tests of soundness set out in the table following Paragraph 4.52 of PPS12. For clarity, PPS12 confirms that to be 'sound' a Core Strategy should be JUSTIFIED, EFFECTIVE and consistent with NATIONAL POLICY and defines 'justified' as "founded on a robust and credible evidence base" and "the most appropriate strategy when considered against the reasonable alternatives" and 'effective' as "deliverable", "flexible" and "able to be monitored".

The rationale for the above is identified in the remainder of these representations, which are provided in the interests of ensuring the Council delivers a strong, robust and logical Core Strategy that guides the future development of the District in a justified and effective manner.

b) Colonnade

As the Council is aware from previous submissions to the Local Development Framework, Colonnade is a strategic land company with a particular interest in the future development of the District as a consequence of a number of sites that it controls, particularly around Rochford.

The Council will also be aware that Colonnade has recently submitted an outline planning application for the residential development of the land at Coombes Farm, Rochford to provide a sustainable urban extension comprising up to 326

16258 Object

CHAPTER 10 Policy T8 - Parking Standards

residential dwellings, with associated accesses and community uses. Whilst the planning application process is clearly separate from the Local Development Framework production process, Colonnade wishes to continue the promotion of the site as a suitable location for residential development.

Accordingly, these representations focus on the legal requirements and tests of soundness associated principally with the Housing and Employment chapters of the CSS, with reference where appropriate to the sites that are controlled by Colonnade, the outline planning application at Coombes Farm and other issues where relevant.

c) Housing

i. Date of Adoption

The CSS assumes an adoption date of 2010 and plans for the provision of housing to 2025.

Taking account of the potential delays to the adoption of the Plan, including the Examination process, it would be more appropriate for the CSS to provide sufficient flexibility to allow for delays in its adoption. Colonnade considers an adoption date of 2011 for the CSS is a more realistic target.

Taking account of the advice in Paragraph 4.13 of PPS12, which states that the time horizon for the Core Strategy should be "at least 15 years from the date of adoption" it would be appropriate for the CSS to plan for the provision of housing to 2026 at the earliest. As such, Colonnade does not consider the CSS to be 'flexible' in the context of the tests of soundness in the table following Paragraph 4.52 of PPS12.

ii. Housing Delivery

However, setting the above aside, the Housing Chapter identifies the minimum housing delivery target for the period 2001 to 2021 of 4,600 dwellings as set out in the East of England Plan, with the annual average requirement of 250 dwellings per annum to extend provision from 2021 to 2025. It also confirms that the residual target for the period 2006 to 2021 is 3,790 dwellings, taking account of the delivery of 810 dwellings in the period 2001 to 2006, and a further 618 dwellings have been completed between 2006 and 2008.

This leaves a residual housing provision target of a minimum of 3,172 dwellings in the period 2008 to 2021. Taking into account the required provision beyond 2021, the residual housing provision target in the period 2008 to 2025 is a minimum of 4,172 dwellings. The disparity between these figures and those provided within the CSS are explained by the rounding down of the annual average delivery requirement in the period 2006 to 2021 to 250 dwellings per annum, compared with the actual figure of 252.67.

The table at Paragraph 4.6 of the CSS identifies the source of housing provision that will meet the identified minimum requirements and includes figures for 'Extant Planning Permissions' and 'Existing allocations/other appropriate sites identified in Strategic Housing Land Availability Assessment'. These figures, along with the actual completions within the period are combined to produce the figure for the 'Total without Green Belt release' figure.

Setting aside the concern regarding under-provision associated with the rounding down of the annual average delivery requirement in the period 2006 to 2021, the CSS fails to identify the sites that will contribute to the 'Extant Planning Permissions' provision. The identification of the sites that will contribute to the 'Extant Planning Permissions' should be provided in the context of the findings of the Inspector in the appeal by Asprey Homes [APP/G5180/A/07/2043219/NWF] who determined that the reliance on a delivery rate of 100% is unsafe [IR287].

Furthermore, at the time of writing these representations, the Strategic Housing Land Availability Assessment 2009 has not been published. It is impossible therefore for a full assessment of the proposed housing provision to be undertaken to confirm whether the CSS is 'founded on a robust and credible evidence base' [test of soundness in the table following Paragraph 4.52 of PPS12].

iii. Redevelopment of Employment Sites

Paragraph 4.14 of the CSS refers to the identification of the four employment sites that are considered by the Council to be suitable for redevelopment to residential use. However, the failure to publish the Strategic Housing Land Availability Assessment 2009 either before or alongside the publication of the CSS means that the assumptions made by the Council as to the suitability, availability, viability and deliverability of the sites cannot be assessed.

It has been necessary, therefore, to review the assumptions made in the Rochford Urban Capacity Study 2007 (UCS) regarding the sites. Within the section of the UCS entitled 'Redevelopment of Established Employment Land' [pages 22 & 23] includes a list of those sites assessed, their indicative capacities and the probability of residential development coming forward at the sites within the plan period (identified elsewhere as 2001 - 2021). The list includes the four sites identified in the CSS of Eldon Way/Foundry Estate, Hockley; Rawreth Lane Industrial Estate, Rayleigh; Stambridge Mills; and Star Lane Industrial Estate, Great Wakering.

In total, the UCS identifies an indicative residential redevelopment capacity of 486 units on the four sites (118, 220, 60 and 88 respectively). Of these, it identifies the Rawreth Lane Industrial Estate and Stambridge Mills as having a 'high'

16258 Object

CHAPTER 10 Policy T8 - Parking Standards

probability of coming forward for development in the Plan period (2001 - 2021), which would deliver 280 residential dwellings using the Council's own figures. The Star Lane Industrial Estate (referred to in the UCS as the Star Lane Brickworks) is identified as having a 'medium' probability of coming forward for development in the Plan period, with capacity to deliver 88 residential dwellings. It is unclear, therefore, where the figure for 'Existing allocations/other appropriate sites identified in Strategic Housing Land Availability Assessment'.

Set against this is the identification of these four sites in the CSS as being capable of delivery for residential development within the Plan period, with 671 units delivered between 2006 and 2015 and a further 506 units between 2015 and 2021.

The UCS also states in the same section that:

"There are considerable areas of land in the district that are currently allocated for, and in use as, employment land. The redevelopment of such sites for residential use would reduce demand for residential development on greenfield sites, but would at the same time create a need for alternative sites to be found for employment. Such an approach, which would be likely to require the decontamination of existing employment land to make it fit for residential use, together with development of a greenfield site and implementation of additional infrastructure to serve the new employment area, may well be unsustainable." [our emphasis]

The UCS appears to confirm therefore, that not only would the redevelopment of the four sites listed in the CSS be unlikely within the Plan period, but also potentially unsustainable. In this regard, it is notable that the promoters of Stambridge Mills sought the Screening Opinion of the Council as to whether Environmental Impact Assessment of the planning application for the redevelopment of the site for residential use was required in 2007, but to date are yet to submit a planning application for the redevelopment of the site.

In light of this, Colonnade does not consider the CSS is 'the most appropriate strategy when considered against the reasonable alternatives' [test of soundness in the table following Paragraph 4.52 of PPS12], which include the provision of residential development in East Rochford.

iv. Strategic Housing Growth to the East of Rochford

Furthermore, whilst paragraph 2.62 of the CSS identifies concern relating to the identification of locations to the east of Rochford for development on the basis that 'vehicular movements would inevitably be directed through Rochford's historic core', the CSS later identifies Stambridge Mills as a suitable site for residential redevelopment.

In light of the evident conflicts between the evidence base provided in support of the CSS and the absence of other evidence, the CSS is not considered 'sound' in the context of the tests of soundness in the table following Paragraph 4.52 of PPS12.

v. Housing Trajectory

Paragraph 4.28 of the CSS confirms that policies H1, H2 and H3 of the CSS will deliver housing supply as illustrated in the Housing Trajectory at Appendix H2. This Housing Trajectory is transposed from the 2008 Annual Monitoring Report (AMR).

Whilst on the face of it, the Housing Trajectory appears to confirm that the Council can meet its requirement to identify a five year housing supply, many of the sites identified within the AMR do not conform to the guidance issued by CLG in August 2008, on the assessment of a five year land supply. The guidance identifies sites that can be included within the five year assessment of housing supply as:

"those that are allocated for housing in the Development Plan, sites that have planning permission (outline or full planning permission that has not been implemented) and specific, unallocated brownfield sites that have the potential to make a significant contribution to housing delivery during the 5 year period".

Table 4.10: Projected Net Completions of the AMR confirms that the five year housing land supply figure includes sites from 'other land allocated for residential purposes', which are based on land allocations outside existing settlements. However, it should be clarified that these land allocations are not currently allocated for housing development in an adopted Development Plan. As such, these unallocated greenfield sites that are yet to make significant progress through the planning system should be discounted and the five year housing land supply recalculated.

The table below has been prepared to confirm the extent of the shortfall should the sites from 'other land allocated for residential purposes' be removed from the calculation of the Rochford five year housing land supply, in accordance with the guidance issued by CLG:

Recalculated Five Year Housing Land Supply (2009 - 2014):

Year
1st April 2009 to 31st March 2010
Predicted Delivery (A)

Core Strategy Submission Document

16258 Object

CHAPTER 10 Policy T8 - Parking Standards

106 dwellings
Allocations on 'other land allocated for residential purposes' (B)
0
Residual delivery (A-B)
106 dwellings
Delivery Shortfall
0

Year
1st April 2010 to 31st March 2011
Predicted Delivery (A)
217 dwellings
Allocations on 'other land allocated for residential purposes' (B)
150
Residual delivery (A-B)
67 dwellings
Delivery Shortfall
150

Year
1st April 2011 to 31st March 2012
Predicted Delivery (A)
544 dwellings
Allocations on 'other land allocated for residential purposes' (B)
300
Residual delivery (A-B)
244 dwellings
Delivery Shortfall
300

Year
1st April 2012 to 31st March 2013
Predicted Delivery (A)
395 dwellings
Allocations on 'other land allocated for residential purposes' (B)
375
Residual delivery (A-B)
20 dwellings
Delivery Shortfall
375

Year
1st April 2013 to 31st March 2014
Predicted Delivery (A)
300 dwellings
Allocations on 'other land allocated for residential purposes' (B)
300
Residual delivery (A-B)
0 dwellings
Delivery Shortfall
300

TOTAL

Predicted Delivery (A)
1,562 dwellings

Allocations on 'other land allocated for residential purposes' (B)
1,125 dwellings

Residual delivery (A-B)
437 dwellings

Delivery Shortfall
1,125 dwellings

The above table confirms that the removal of the 'other land allocated for residential purposes' from the calculation of the Rochford five year housing land supply leaves the Council with a minimum net additional housing delivery of 437 dwellings, which equates to a supply of 1.7 years based on the adjusted annual delivery target of a minimum of 255 net

16258 Object

CHAPTER 10 Policy T8 - Parking Standards

additional dwellings per annum. As such, the Council is failing to meet its requirement to demonstrate a five year housing land supply in accordance with PPS3 and the supporting guidance provided by CLG. It is notable that the recent application by David Wilson Homes at Land between Main Road and Rectory Road and Clements Hall Way, Hawkwell identifies an even greater shortfall in the Council's five year housing land supply.

In addition to the above, the AMR does not include a commentary on how deliverability has been assessed against the requirements of paragraph 54 of PPS3.

Furthermore, the guidance from CLG confirms that the windfall sites cannot be relied upon in demonstrating a five year supply unless a Local Planning Authority can demonstrate genuine local circumstances exist to allow this exception. However, the second paragraph of the section entitled 'Housing Trajectory and Five Year Housing Supply' confirms that the estimated completions in the years 2008 to 2013 includes estimated yields through 'intensification' coming forward in future years. With reference to the definition of 'intensification' on page 13 of the AMR, it appears that the 'Housing Trajectory and Five Year Housing Supply' also includes provision for windfall sites. As such, the Council is required to demonstrate the 'genuine local circumstances exist to allow this exception'.

The pressures on delivery and need for additional sites are more acute when it is considered that an average delivery rate of 204 dwellings per annum was achieved during a strong period of housing market growth. In view of the current economic downturn, and significant problems faced within the housing market, the Council should seek to identify appropriate and deliverable sites to meet its regional housing target provision commitments. Suitable sites would include Coombes Farm, which has been positively promoted for development through the LDF process.

It may, therefore, be more appropriate for the Council not merely to allocate sufficient sites to meet the minimum targets set down by the East of England Plan, but to identify a reservoir of land capable of coming forward for development should the sites identified through the CSS and Allocations Development Plan Documents (DPD) fail to come forward for development within the anticipated timescales.

vi. Appendix H1

As set out in the representations to the Preferred Options Core Strategy, there is continuing concern that the list of improvements to infrastructure required in support of residential development as set out in Appendix H1 fails to provide the necessary justification for its inclusion. Whilst the preamble seeks to clarify why the infrastructure is sought, the inclusion of this list should be fully justified, otherwise it is of little value. Furthermore, it would be of benefit to provide further details of the existing community infrastructure provision and capacity within the evidence base.

The failure to provide the necessary justification for its inclusion means that the CSS will not be 'founded on a robust and credible evidence base' [test of soundness in the table following Paragraph 4.52 of PPS12].

d) Character of Place

As set out in the representations to the Preferred Options Core Strategy, Colonnade considers that, with respect to the requirement to produce and adhere to Development Briefs for large residential developments, as set out in Policy CP1, the Council should not seek to impose further demands on developers where existing regulations provide sufficient requirements regarding design. In this instance, Design and Access Statements provide sufficient design guidelines for developments and there is no additional information provided in the policy or supporting text that clearly sets out the justification for this requirement.

e) Green Belt

With reference to the comments regarding the redevelopment of employment sites under the 'Housing' section above and the requirement to allocate sufficient land to meet the minimum housing provision targets as required by the East of England Plan, Colonnade considers that the chapter on Green Belt, and policy GB1 in particular, fails to provide the necessary evidence base that will allow it to be monitored effectively.

It is inherent that the proposed redevelopment of previously developed employment sites for residential use in order to reduce the requirement to allocate previously undeveloped land for residential use will displace these employment uses. In turn, therefore, the separate allocation of previously undeveloped Green Belt to accommodate the compensatory employment provision is required. This is accepted in principle at paragraph 11.11 of the CSS.

Without providing clarification of the anticipated quantum of land required to accommodate the provision of housing and compensatory and new employment land, it is not possible to monitor the performance of policy GB1.

However, using the Council's figures in the table setting out the breakdown of the housing provision figures in Chapter 4 of the CSS (assuming that actual completions and extant permissions are all on previously developed land), setting aside the displacement of employment uses referred to above, approximately 42% of the required minimum housing provision target is capable of being accommodated on previously developed land (2,005 units from a total of 4,750). As such, the Council is required to provide at least 58% of the required minimum housing provision target on the Green Belt (2,745 units from a total of 4,750).

16258 Object

CHAPTER 10 Policy T8 - Parking Standards

If these figures are adjusted to take account of the displacement of employment uses (assuming the provision of an equal quantity of land is required to compensate for the employment land that is redeveloped), this figure changes to 17.5% on previously developed land and 82.5% on Green Belt (828 and 3,922 units from a total of 4,750 respectively). Even allowing for the achievement of higher densities of employment on new developments, the figures above are unlikely to change significantly.

Furthermore, the table in Chapter 4 also confirms that no previously developed land will be available for development beyond 2021, or 2015 if account is taken of the displacement of the employment uses.

In light of this, not only does Chapter 6 fail to provide the necessary evidence base that will allow it to be monitored effectively, it is also necessary to consider whether it presents the most appropriate strategy for addressing the required release of Green Belt land to accommodate the defined housing and employment delivery targets to 2025 and beyond as necessary. Colonnade considers a more robust approach that is flexible and capable of being monitored, would be to clearly identify those sites capable of delivery in the short term, which for the avoidance of doubt includes those sites being promoted by Colonnade, with a reservoir of alternative sites set aside for future growth.

As set out in the representations to the Preferred Options Core Strategy, Colonnade considers that the inclusion of an affordable housing exception policy within the CSS will aid the delivery of community housing within rural areas. However, the CSS does not contain such a policy, or adequately address the issue of community housing within rural areas and the CSS is not considered to provide sufficient flexibility to allow for the delivery of essential rural housing.

f) Environmental Issues

Colonnade has concerns regarding the justification for and effectiveness of a number of the policies contained within the Environmental Issues chapter, as follows:

â€¢ Policy ENV1: The Council fails to identify how it will "maintain, restore and enhance" the sites of nature conservation importance that are identified, or how the performance of this policy will be monitored;

â€¢ Policy ENV3: In the context of the advice at paragraph 4.32 of PPS12 regarding the reformulation of national policies, Colonnade does not consider that this policy is required; and

â€¢ Policy ENV9: As set out in the representations to the Preferred Options Core Strategy, Colonnade does not consider that the necessary evidence base has been provided to justify a policy that seeks to go above and beyond the policy targets for the Code for Sustainable Homes as set out by Central Government.

g) Community Infrastructure, Leisure and Tourism

Policy CLT1 refers to the requirement for residential and employment development to contribute to the infrastructure identified in Appendix CLT1 through Standard Charges.

However, whilst the general principle of securing planning obligations through the application of standard charges is broadly accepted, the list of infrastructure requirements set out in Appendix CLT1 is not supported by sufficient evidence base to identify its robustness and credibility. As such, Colonnade does not consider either policy CLT1 or Appendix CLT1 is justified in the context of PPS12.

It is also noted that, despite the clarification sought by Colonnade at the Core Strategy Preferred Options stage, the CSS fails to confirm what information should be contained within Health Impact Assessments, which are required by policy CLT4. Once again, Colonnade requests further clarification of what is involved in the assessment and the expected outputs, which will provide greater clarity and will allow the policy to be monitored.

h) Transport

Policy T8 confirms that the Council will apply minimum parking standards. As set out in the representations to the Preferred Options Core Strategy, the guidance in Planning Policy Guidance Note 13: Transport (PPG13) is clear regarding the imposition of parking standards.

Paragraphs 52-56 of PPG13 confirm that the Local Planning Authorities should apply maximum not minimum parking standards. In order to satisfy the legal requirements set out in PPS12, the policy must reflect PPG13 to promote sustainable transport choices and further provide incentives for developers to locate further residential land closer to local service centres by requiring maximum parking standards for residential developments.

i) Economic Development

As set out in the representations to the Preferred Options Core Strategy, the land at Three Ashes Farm provides an excellent opportunity to deliver employment growth in the short term and may be a suitable site for the 'Eco-Innovation Centre' that is being promoted by the Council. Its identification as a suitable location for strategic employment growth, or the provision of an Eco-Innovation Centre, would accord with the general principles of the policies contained within Chapter 11.

16258 Object

CHAPTER 10 Policy T8 - Parking Standards

The identification of Purdeys Industrial Estate as fit for purpose (in paragraph 11.32 and the Council's 2008 Employment Land Study 2008) and therefore it should be maintained and if possible expanded, is welcomed and Colonnade considers that Three Ashes Farm could deliver this expansion, providing a natural extension to Purdeys Industrial Estate and being strategically located close to the Airport.

Three Ashes would address the negative impacts that the nearby residential area experiences from the existing Industrial Estate by providing a buffer between established uses and the residential area with less intensive employment activities. The highways analysis that has been carried out has suggested that it would not have an adverse impact on roads and congestion. Furthermore, there are very few opportunities for businesses to expand and Three Ashes could provide this opportunity.

j) Conclusions

Following the submission of representations to the Preferred Options Core Strategy, Colonnade is disappointed to note that the CSS fails to take account of the majority of the issues raised in their representations.

In addition, Colonnade considers the plan to be 'unsound' as the document consistently fails to meet the tests of soundness set out in the table following Paragraph 4.52 of PPS12 and respectfully requests that the Council notifies Icen, on behalf of Colonnade, of the future arrangements for the Examination of the Core Strategy. Furthermore, Colonnade wishes to take this opportunity to formally register a request to appear at all stages of the Examination in Public, including the pre-hearing meeting and any planned hearing sessions whereby issues raised in the context of this letter are to be discussed. Please confirm this request, and that the representations made to the Preferred Options Core Strategy will be taken into account alongside the current representations, by way of return to this letter.

Icen Projects, on behalf of Colonnade Land LLP trusts that the Council will find these representations to be constructive and helpful in taking forward the Core Strategy. Should you wish to discuss any aspect of these representations further, please do not hesitate to contact us.

Summary:

Policy T8 confirms that the Council will apply minimum parking standards. As set out in the representations to the Preferred Options Core Strategy, the guidance in Planning Policy Guidance Note 13: Transport (PPG13) is clear regarding the imposition of parking standards.

Paragraphs 52-56 of PPG13 confirm that the Local Planning Authorities should apply maximum not minimum parking standards. In order to satisfy the legal requirements set out in PPS12, the policy must reflect PPG13 to promote sustainable transport choices and further provide incentives for developers to locate further residential land closer to local service centres by requiring maximum parking standards for residential developments.

Full Text: The use of minimum parking standards for residential developments is not only contrary to the advice contained within PPG13, which states that maximum parking standards should be used, but also contradicts the aim to reduce reliance on private vehicle by encouraging residents to have more cars.

It is not considered to be appropriate to just limit parking at destinations, as residents will drive from their homes to the town centre, work place etc, which have maximum parking standards. This will put undue stress on these spaces and result in people parking elsewhere, including on-street and illegally, which could adversely affect traffic flows and road safety.

Summary: The use of minimum parking standards for residential developments is not only contrary to the advice contained within PPG13, which states that maximum parking standards should be used, but also contradicts the aim to reduce reliance on private vehicle by encouraging residents to have more cars.

It is not considered to be appropriate to just limit parking at destinations, as residents will drive from their homes to the town centre, work place etc, which have maximum parking standards. This will put undue stress on these spaces and result in people parking elsewhere, including on-street and illegally, which could adversely affect traffic flows and road safety.

Change to Plan Reword policy as follows:

'Maximum parking standards will be applied to all forms of development, however, within accessible locations (e.g. town centres or areas that have high levels of public transport accessibility), a relaxation of these standards may be appropriate. As part of the overall parking provision, all new developments shall contain conveniently located reserved spaces for disabled persons in accordance with the Council's adopted car parking standards.

In addition, all developments should provide adequate provision for the parking, turning, loading and unloading of service vehicles.'

Full Text: Representations on behalf of Fairview New Homes

1. We are instructed by our client, Fairview New Homes, to submit comments on the published Core Strategy Submission Document. For ease specific reference has been made in accordance with the paragraph and policy numbers as contained in the published document. We would like the opportunity to represent our Client at the forthcoming Examination of the Core Strategy DPD and would be grateful for confirmation that this is possible.

2. Fairview New Homes have an interest in a parcel of land to the South West of Rayleigh Town Centre, as indicated on the attached site location plan. This land was previously identified in the Core Strategy Preferred Options documents to provide an urban extension to the south west of Rayleigh. This option has now been withdrawn in the Core Strategy Submission document and it is on this basis these representations are provided to the Council.

3. The Submission Core Strategy has been considered against the requirements set out at Paragraph 4.36 of PPS12 requiring core strategies to be justifiable and effective in order to be found sound, as follows:

Justified:

- i. Founded on a robust and credible evidence base
- ii. The most appropriate strategy when considered against the reasonable alternatives

Effective:

- i. Deliverable - the Core Strategy should show how the vision, objectives and strategy for the area will be delivered and by whom, and when, including who is responsible for implementing different elements of the strategy and when
- ii. Flexible - a strategy is unlikely to be effective if it cannot deal with changing circumstances. Plans should show how they will handle contingencies.
- iii. Able to be monitored - monitoring is essential for an effective strategy and will provide the basis on which the contingency plans within the strategy would be triggered.

4. To summarise our comments, Fairview New Homes strongly object to the Core Strategy as is currently presented on the basis the document is currently unsound for a number of reasons:

â€¢ The lack of robust and credible evidence base

â€¢ Failure to clearly discount reasonable alternatives

â€¢ The effectiveness of the plan is also considered to be flawed and the Council's approach to deliverability and flexibility is questioned.

5. Fundamentally, we question the soundness of the Core Strategy due to the lack of available evidence to support the choices made by the Council. In particular, there is a strong reliance on the findings of the 2009 Strategic Housing Land Availability Assessment (SHLAA) although it is understood this document is not due to be published for consideration alongside the Core Strategy. We, therefore, reserve the right to submit additional comments to the Core Strategy consultation following the publication of the SHLAA.

6. The 2009 SHLAA is clearly listed at Paragraph 1.29 of the submission Core Strategy as one of the evidence base documents the Council have drawn upon when drafting the Core Strategy. The documents listed are all considered to have played an important role in informing the Core Strategy. PPS12 also recognises at Paragraph 4.37 the importance of demonstrating how choices made in the plan are backed up by factual evidence identified in evidence base documents.

7. As a starting point it is important to state it is Fairview New Homes greatest concern there is no background provided within the Core Strategy document, or indeed any of the available evidence base documents, identifying why the Local Planning Authority has chosen to remove some of the sites previously proposed for housing development. In addition, there is also no justification as to why the retained urban extension sites are more suitable than those removed from the draft plan.

8. The following provides specific comments in response to the relevant areas of the Core Strategy.

Housing

9. It is stated at Paragraphs 4.10-4.12 that the Council have adopted a balanced approach when locating new housing between higher tier settlements and lower tier settlements. Although there is no detail provided as to how the Council

16618 Object

CHAPTER 10 Policy T8 - Parking Standards

intend on implementing this balanced approach or how the strategic allocation of housing contributes to the balance required. Our Client cannot support this approach until further detail is understood as to the proportion of housing being allocated to each settlement tier.

10. The proposed distribution of housing development during the plan period does not appear to be proportionately allocated between the various settlement tiers. We would argue that development should be distributed proportionately in line with the size of the settlement in order to benefit for available services and facilities. Rayleigh recognised as having best access to services within the district at Paragraph 2.68 of the Core Strategy. On this basis it is considered the development should primarily be directed to Rayleigh with a proportionate level of housing to the remaining settlements in the District.

Policy H1 - The efficient use of land for housing

11. In general the use of residential extensions to meet the remaining housing requirement that cannot be delivered through the redevelopment of appropriate previously developed land is supported by Fairview New Homes.

12. It is understood there is a need to prioritise use of brownfield land in line with national policy requirements but this needs to be a carefully balanced and realistic approach in identifying appropriate urban extensions to accommodate the majority of the District's housing, as identified in the table at Paragraph 4.6 and later at Paragraph 4.15.

13. Policy H1 sets out that the Council will seek the redevelopment of Rawreth Lane Industrial Estate, Foundry Industrial Estate, Stambridge Mills and Star Lane Industrial Estate. Without sight of the 2009 SHLAA it is not possible to understand whether the Council's choice to release employment land for housing is appropriate and Fairview New Homes cannot, therefore, support this element of Policy H1. This objection is further amplified by the fact additional employment land is required but is yet to be identified.

Policy H2 - Extensions to residential envelopes and phasing

14. The Council's intention to provide a balanced strategy for housing provision is mentioned again at Paragraph 4.18. The comments made at Paragraphs 9 and 10 above are also relevant in this respect.

15. In comparing the Preferred Options Core Strategy Document and Submission Core Strategy Document there is a significant reduction in the number of housing units being provided in urban extensions pre 2015, from 1450 dwellings to 775. From discussions with the Local Planning Authority it is understood the Council are seeking to provide the District's housing requirements by increased development densities. From the evidence available in the Submission Core Strategy and summary of SHLAA sites a number of the sites identified as urban extensions have in fact been allocated a reduced number of dwellings, including the land to the north of London Road, Rayleigh. We would, therefore, consider the approach taken by the Local Planning Authority to provide the required level of housing is untenable and unjustified.

16. In discounting preferred options PPS12 makes clear at Paragraph 4.38 the requirement for Local Planning Authorities to consider and evaluate reasonable alternatives. As set out above, the choices the Council have pursued have not been substantiated and without the consideration of reasonable alternatives the Core Strategy cannot be considered justified and therefore unsound.

17. However, this is our opinion based only on discussions with the Local Planning Authority rather than a thorough evidence base and we will consider the evidence in detail when it become available and provide further comment.

18. Paragraph 4.19 of the draft Core Strategy details the Council's primary factors in determining the location of future urban extensions. It is presumed the Council have assessed each of the proposed urban extension sites against the following criteria and that this information is contained within the SHLAA, although we have not been provided with any evidence of this to assess. It can be demonstrated that the land identified on the attached site location plan meets all of the requirements set out below.

â€¢ The proximity and relationship to existing centres, facilities, services

â€¢ The availability of infrastructure and/or the potential for additional infrastructure to be provided for development in such areas

â€¢ The potential to reduce private car dependency

â€¢ The potential to avoid areas of constraint (such as areas at risk of flooding, sites of ecological importance, public safety zone etc)

â€¢ The historical, agricultural and ecological value of land

â€¢ The impact on highway network (including availability and impact on existing network, as well as potential for improvements to be delivered)

â€¢ The relationship of development locations to the District's area of employment growth

â€¢ The potential to create a defensible Green Belt boundary

â€¢ The avoidance of coalescence with neighbouring settlements

19. In summary, Fairview's land is sustainably located in particularly close proximity to Rayleigh Town Centre and train station. In addition, the location of the land provides a natural extension and rounding of settlement boundary. An extension to Rayleigh in this location offers no opportunity for coalescence with neighbouring settlements nor does it constitute urban sprawl.

16618 Object

CHAPTER 10 Policy T8 - Parking Standards

Policy H2 - Extensions to residential envelopes and phasing

20. Although it is stated a flexible approach to the timings of the release of land will be maintain no explanation is provided as to why some sites are considered suitable for development pre 2015 and others post 2015. Paragraph 4.22 elaborates further to state a number of factors have been considered when determining the phasing of strategic housing sites although this information is not clearly available to assess.

21. As stated above the principle of releasing certain areas of greenbelt land is considered the best approach to meeting the Council's housing provision requirements. However, Fairview New Homes object to the omission of the land to the South West of Rayleigh for housing development as previously identified in the Core Strategy Preferred Options document. The site identified on the attached site location plan has been assessed against the Council's criteria, as set out at Paragraph 18 above and each requirement can be met. Without any clear explanation as to why this site has been discounted and the only other strategic housing site identified in Rayleigh is located further away from Rayleigh Town Centre and the associated services and facilities including the train station, Fairview New Homes object to Policy H2.

22. As considered at the outset of these representations the draft Core Strategy cannot be considered robust, and therefore sound, without clear justification and evidence base.

Policy H3 - Extension to residential envelopes post-2021

23. Policy H3 is supported on the basis that the release of greenbelt land is required for housing and this is the most appropriate approach to meet the Council's housing requirements, as set out at Paragraph 21 above.

24. However, it is unclear why some of the sites previously identified for housing development pre 2015 up until 2021 in the Preferred Options Core Strategy document have now been allocated for development post 2021, such as South East Ashingdon. It is stated at Paragraph 4.24 of the Submission Core Strategy document those areas identified for post 2021 development may not be immediately deliverable. However, there is no information available to understand why these sites are now no longer considered suitable for pre 2015 development as they were in December 2008. As a result, Fairview New Homes consider Policy H3 to be unjustified and therefore unsound.

Affordable Housing

25. The acute need for additional affordable housing is recognised at Paragraph 4.30. It is unclear from the draft Core Strategy document exactly how much affordable housing is required in the District in the plan period.

26. However, taking the starting point as set out at Paragraph 4.30 that the Thames Gateway South Essex Strategic Housing Market Assessment requires 131 net additional affordable dwellings per year which constitutes 52% of the District's overall annual housing target. In order to achieve this target using the Council's proposed policy requirement that new housing developments are to provide 35% affordable housing, 375 new dwellings would need to be developed each year. This calculation does not account for those developments with fewer than 15 dwellings which have no requirement to provide affordable housing or developments which cannot viably afford to provide non-market housing.

27. An annual requirement of 250 dwellings is identified at Paragraph 4.2 of the Core Strategy which would leave a significant short fall of affordable housing and act to compound the current situation. The approach taken by the Council ultimately accepts there will always be a shortfall in affordable housing provision and does not seek to redress this. We do not, therefore, consider this to be a robust or justified approach to achieving affordable housing in the District.

28. It is, therefore, considered in order to meet the District's affordable housing requirement additional housing land should be identified in order to ensure a wholesale increase in housing provision to address the Council's shortfall in affordable housing and meet the targets set for the plan period. The most appropriate and effective method by which to secure affordable housing provision is through developing large sites that are viably able to offer affordable housing units.

29. During the consultation of the submission Core Strategy the Council's Housing Strategy (2009) was not available and we reserve the right to make further comment on this document following the publication of this evidence.

The Green Belt

30. It is fully accepted by the Council that the Green Belt boundary is currently too tightly drawn and the release of some Green Belt land is necessary to meet the District's development requirements. However, it needs to be demonstrated that the areas of Green Belt land to be lost are justified and located in the most appropriate area and that areas of release land do not undermine the principle of the Green Belt.

31. It is understood from Paragraph 6.7 of the Submission Core Strategy the Council will seek to examine the degree to which current Green Belt land is helping to achieve the purposes of the Green Belt when considering reallocating land. However, areas of Green Belt are proposed to be reallocated for urban extensions prior to this research being undertaken.

Core Strategy Submission Document

16618 Object

CHAPTER 10 Policy T8 - Parking Standards

32. Fairview New Homes fully support the justified retention of the areas of Green Belt where appropriate and the release of Green Belt land where needed. However, at present the proposed Housing policies and Green Belt policies are not coherent and the reallocation of certain areas of Green Belt is not based on a credible evidence base.

Environmental Issues

Policy ENV4 - Sustainable Drainage Systems (SUDS)

33. Fairview New Homes would like to support the flexibility contained within Policy ENV4 which recognises it is not always viably possible to incorporate SUDS in all developments.

Policy ENV8 - On Site Renewable and Low Carbon Energy Generation

34. We would also like to support Policy ENV8 on the same basis as Policy ENV4 in that it is important that the production of energy from renewable or low carbon sources is only required where it is viably possible so as not to resulting in developments not coming forward.

Transport

Policy T8 - Parking Standards

35. Fairview New Homes object to Policy T8 as it is currently contrary to National Policy requirements as set out in PPG13 which contains maximum parking standards. Indeed, this is recognised at Paragraph 10.27 of the Submission Core Strategy document. Enforcing minimum parking standards is not consistent with local or national sustainability aims and should not be an approach pursued by the Council.

Summary:

Transport

Policy T8 - Parking Standards

35. Fairview New Homes object to Policy T8 as it is currently contrary to National Policy requirements as set out in PPG13 which contains maximum parking standards. Indeed, this is recognised at Paragraph 10.27 of the Submission Core Strategy document. Enforcing minimum parking standards is not consistent with local or national sustainability aims and should not be an approach pursued by the Council.

1.0 Instruction and Introduction

1.1 Charles Planning Associates Limited (Chartered Town Planners) is Instructed by Swan Hill Homes Limited (Swan Hill) to prepare and submit representations on their behalf in respect of the Rochford District Local Development Framework: Core Strategy Submission (September 2009) Development Plan Document.

1.2 The comments refer to the relevant sections and policy designations in the Submission document, as appropriate.

1.3 The comments set out in this submission are intended to assist the District Council in taking forward its Local Development Framework. It is our intention to continue to be involved in the LDF preparation process and we look forward to the opportunity to comment further at the Examination to the Core Strategy.

1.4 If you have any queries regarding the content of this submission then please do not hesitate to contact:

Peter Kneen BSc (Hons) MSc MRTPI
Planner

2.0 Housing:
Policy H1 - The Efficient Use of Land for Housing

2.1 Swan Hill recognises the importance of seeking to concentrate new developments mainly in the existing urban areas, on previously developed land where possible, particularly in view of the Government seeking to ensure 60% of all such new developments are on previously development land (PDL).

2.2 However, given the character of the District, and the strategic housing requirement of the East of England Plan, Swan Hill supports the approach that the Council must also make provision for additional development on the edge of existing settlements on greenfield sites, particularly in the most sustainable locations. As such, Swan Hill supports that where feasible, the redevelopment of existing employment sites for residential/employment purposes can make a contribution towards the strategic housing requirement, provided that sufficient additional employment land is brought forward to ensure the stability of employment levels in the District, and to ensure employment growth meets the East of England Plan requirements.

2.3 Swan Hill considers that Policy H1 should include consideration that new extensions to existing settlements have regard to their potential impact on the wider characteristics and openness objectives of the Green Belt.

Policy H2 - Extensions to Residential Envelopes and Phasing

2.4 Swan Hill generally supports the approach taken by the Council in this policy. As set out above, Swan Hill consider the Council's acknowledgment that housing requirements should be met through the allocation of land on the edge of the existing settlements is the most suitable way forward to meeting the Council's strategic housing requirement and complies with the advice in PPS3.

2.5 The need for suitable greenfield urban extensions represents the best way forward for the Council to meet its strategic housing requirement, as set out in the East of England Plan. Swan Hill supports the recognition that the potential supply of alternative previously developed sites is limited, without detrimentally affecting the character of the District, and therefore the best way forward is the use of sustainable greenfield urban extensions to the existing settlements of the District.

2.6 However, Swan Hill consider that a fundamental consideration that the District Council should consider relates to the potential impact of the urban extensions on the Green Belt policy has been somewhat overlooked. The wider sustainability credentials of the settlements of the District should only be one of many key considerations for determining the level of expansion. In view of the proximity of Southend-on-Sea to all the main settlements of the District, and the influence this has on the likely location many people would travel for employment and leisure, sustainability of many of the settlements is not a key overarching factor, and greater weight should be placed on the potential impact on the openness of the Green Belt, as this cannot be remedied if development occurs in the wrong location.

2.7 As such, Swan Hill considers that determining the location of growth for the main settlements should be to identify

16893 Support

CHAPTER 10 Policy T8 - Parking Standards

those locations where the impact on the wider setting of the Green Belt can be minimised. Further justification for those general locations chosen should be identified in Policy H2. In this regard, Swan Hill has serious concerns regarding the removal of Land South West of Great Wakering as a viable option for the growth of the settlement. The development of this area of Great Wakering, in addition to the potential redevelopment of the Star Lane Industrial Estate could provide a more comprehensive development, whilst ensuring that the wider openness of the Green Belt is maintained. Land South West of Great Wakering is significantly better placed to limit the impact on the wider Green Belt than Land West of Great Wakering, and could contribute to the provision of an important amenity and wildlife site for the local community.

2.8 In addition, Swan Hill consider that the Council now has no reserve provision in the event that any of the existing employment sites set out in Policy H1 fail to come forward for development within the envisaged timescale. Further, Land West of Great Wakering has not been identified in the SHLAA as a deliverable site to help meet the strategic housing requirement, contrary to the requirement set out in PPS3.

2.9 As such, Swan Hill would support the provision of suitable sites which could be safeguarded for future development in the likelihood of a shortfall in supply.

Policy H3 - Extensions to Residential Envelopes Post 2021

2.10 As set out above, Swan Hill supports the overall approach the Council has taken towards the provision of sustainable urban extensions as a suitable means of meeting their strategic housing requirement. However, as set out for Policy H2 above, Swan Hill has serious concerns regarding the removal of several proposed sites set out in the October 2008 Preferred Options Core Strategy, without any guarantee of the ability to deliver those sites set out in Policy H1.

2.11 As also considered above, the inclusion of West of Great Wakering for 250 dwellings should not be included ahead of South West of Great Wakering, in view of the fact that the site is not identified in the SHLAA as available, suitable and achievable as required by PPS3, and thus is not supported by a robust and creditable evidence base for its inclusion as a strategic site for development.

2.12 Whilst Swan Hill acknowledge that alterations to Policy H1 has resulted in the removal of some locations for growth in Policy H3 (as set out in the Sustainability Appraisal), Swan Hill does not consider that the most appropriate locations have been chosen.

2.13 In addition to the matters raised above, the use of West of Great Wakering would also result in the loss of valuable agricultural land, which clearly in a Green Belt location, should be less suitable for development than other sites, such as South West of Great Wakering, which would have limited impact on the wider Green Belt policy, and not result in the loss of valuable agricultural land.

2.14 Finally, in respect of Policies H1, H2 and H3, all of the above comments are based on our interpretation of the Submission Version Core Strategy when compared to the October 2008 Version of the Core Strategy. Without the ability to undertake a detailed assessment of the Council's SHLAA, it is not possible to clarify the proposed Core Strategy position regarding the proposed direction of growth proposed for the settlements in the District. As such, Swan Hill reserves the right to make additional representations regarding the proposed Policies H1, H2 and H3 following the publication of the SHLAA in due course.

Policy H4 - Affordable Housing

2.15 In general terms, Swan Hill supports the approach taken by the Council towards the provision of affordable housing for new residential developments. The Policy accords with the advice of National Policy and is therefore considered sound by Swan Hill.

Policy H5 - Dwelling Types

2.16 Swan Hill supports the policy provision of H5, and considers that the approach taken by the Council for this policy represents a suitably flexible alternative to stipulating percentages of dwelling mix, sought by some local authorities. The Policy accords with the advice of National Policy and is therefore considered sound by Swan Hill.

Policy H6 - Lifetime Homes

2.17 In regard to this policy, Swan Hill objects to the Council's policy where all new dwellings should be provided to the Lifetime Homes Standard. Whilst it is acknowledged that the UK has an aging population, Swan Hill considers that seeking to provide Lifetime Homes on all sites is considered to be overly onerous for proposed developers, particularly when considering the requirement for all car parking spaces to be suitable for disabled users, which could result in more schemes becoming unviable. Therefore, the provision of a percentage of Lifetime Homes should be considered through negotiations with the Council at the planning application stage, and should be determined on a case-by-case basis.

3.0 Character of Place: Policy CP1 - Design

16893 Support

CHAPTER 10 Policy T8 - Parking Standards

3.1 The Town and Country Planning (General Development Procedure) Order 1995 (As Amended) makes the submission of a Design and Access Statement for most types of planning applications a Statutory requirement, and as such, the provision of a Design Brief represents a pre-requisite of all major planning applications.

3.2 Policy CP1 seeks to ensure the provision of good, high quality developments that reflect local characteristics and distinctiveness, this ideology is supported by Swan Hill.

4.0 The Green Belt:
Policy GB1 - Green Belt Protection

4.1 Following the amendments to the wording of the Policy since the October 2008 Preferred Options Core Strategy, Swan Hill is now generally supportive of Policy GB1 and its supporting text. However, as expressed above, it is important that where alterations to the Green Belt boundary occur as a result of the extension of the settlements to meet the strategic housing requirement, both the minimal amount of land is taken and where that land is taken for development, it represents the best available land which has a minimal impact of the wider openness characteristic of the Green Belt.

5.0 Environmental Issues:
Policy ENV3 - Flood Risk

5.1 Swan Hill generally supports the approach set out in Policy ENV3 regarding ensuring development accords with the sequential test of PPS25. The Policy accords with the advice of National Policy and is therefore considered sound by Swan Hill.

Policy ENV4 - Sustainable Drainage Systems (SUDS)

5.2 Following the revisions from the October 2008 Preferred Options Core Strategy, Swan Hill now generally supports the approach set out in Policy ENV4. The Policy accords with the advice of National Policy and is therefore considered sound by Swan Hill.

Policy ENV8 - On-site Renewable and Low Carbon Energy Generation

5.3 Whilst Swan Hill recognises the importance of reducing carbon emissions, particularly in new housing developments, and the role this can play in reducing the nations overall Greenhouse emissions. As such Swan Hill is generally supportive of Policy ENV8. It is noted that Policy ENG1 of the East of England Plan sets out a threshold of developments comprising 10 or more dwellings. Swan Hill consider it important for the District Council to justify the reduction in the threshold level.

5.4 Further, no assessment of Policy ENV8 has been set out in the Sustainability Appraisal which justifies the change in threshold from that of Policy ENG1 of the RSS.

Policy ENV9 - Code for Sustainable Homes

5.5 Following the revisions from the October 2008 Preferred Options Core Strategy, Swan Hill now generally supports the approach set out in Policy ENV9. The Policy accords with the advice of National Policy and is therefore considered sound by Swan Hill.

6.0 Community Infrastructure, Leisure and Tourism:
Policy CLT1 - Planning Obligations and Standard Charges

6.1 Swan Hill generally supports the overall approach the Council has taken in Policy CLT1. It is considered Policy CLT1 sets out a degree of flexibility to ensure that all sites are considered on a site-by-site basis, assessing the individual merits of each planning application, in order to ensure the levels of contributions applicable meet the five tests of Circular 05/05. The Policy accords with the advice of National Policy and is therefore considered sound by Swan Hill.

Policies CLT5 - Open Space;
CLT7 - Play Space;
CLT8 - Youth Facilities; and,
CLT10 - Playing Pitches

6.2 Swan Hill supports the need for new residential developments to incorporate a degree of new publicly accessible open space, children's play space, youth facilities and playing pitches, and as such, generally supports the policy approaches taken by the Council.

6.3 However, it is important that whilst the Council may seek to undertake an assessment of providing standard charges for new development, which, as set out in Policy CLT1, this should be based on thorough public consultation and consideration and sound justification. Swan Hill consider that within the provision of a standard charge, it is important that such provision allows for a degree of flexibility to ensure that each site is assessed individually and on its own merits. This is particularly important for those sites close to existing open spaces and facilities. As such, the levels of

16893 Support

CHAPTER 10 Policy T8 - Parking Standards

open space and recreation facilities required in the 'standard charge' should be based on an up-to-date PPG17 Open Space assessment, which should be used to form a key consideration in the levels of provision likely to be required in the standard charge system proposed.

7.0 Transport: Policy T1 - Highways

7.1 Swan Hill supports the overall objectives set out in Policy T1 requiring developments to be located and designed to reduce the reliance on the private car and to meet the infrastructure needs generated by development or seek to help achieve these needs is acceptable in principle.

7.2 Swan Hill recognises the importance of providing sufficient infrastructure provision to meet the requirements of development, and that where developments have insufficient consideration of impact on existing infrastructure, they should be considered unacceptable and contrary to National policy guidance. However, Swan Hill considers it important to emphasise that the developer's role should not be seen as a means to meet existing shortfalls in provision.

Policy T3 - Public Transport

7.3 Swan Hill is generally supportive of the policy approach set out in T3, however, as set out in paragraph 7.2 above, it is important that the District Council do not consider that it is the developer's responsibility to resolve existing shortfalls in provision of public transport, and any contribution towards additional public transportation provision should only be to mitigate against the additional level of demand likely from the development proposed.

Policy T5 - Cycling and Walking

7.4 Swan Hill supports the general approach to this policy, as Swan Hill recognises the importance of promoting the use of alternatives to the private car. The policy provision acknowledges the need to ensure relevant contributions in the event of additional travel demands generated by individual developments, whilst also setting out additional aspirations for the cycle network in the District.

7.5 As such, Swan Hill considers this policy accords with the advice of National Policy and is therefore considered sound by Swan Hill.

Policy T8 - Parking Standards

7.6 The Council has recently (January 2007) adopted SPD on the requirements for parking standards, and as such, Swan Hill generally supports the policy approach chosen by the Council. As set out in the SPD, whilst Swan Hill generally supports the approach taken by the District Council towards setting residential parking standards, in that the Council has recognised that in the suburban areas, even with some access to public transport, the majority of residents will rely on the use of private cars. However, Swan Hill has concerns over the failure of the District Council to comply with the provisions of PPG13: Transport (2001) which sets out that Local Planning Authorities should not set minimum standards for car parking. Whilst it is acknowledged that PPS3 sets out provision for the consideration of local circumstances, it is considered that the Council has not justified this deviation from PPG13's maximum standard.

7.7 Whilst it is acknowledged that such justification may become apparent through the work currently being undertaken by Essex County Council, until such time, the District Council should only seek to apply the maximum standards indicated in PPG13. However, Swan Hill recommends that the District Council make provisions in the wording of the Policy to allow for changes in the event that future policy on car parking standards need to reflect the County standard, following the completion of the County Council review.

8.0 Economic Development: Policies ED3 - Existing Employment Land ED4 - Future Employment Allocations

8.1 In respect of Policies ED3 and ED4, Swan Hill notes that they have changed considerably since the October 2008 Preferred Options document, in that they are site specific regarding the location of the proposed redevelopment of existing employment sites. These four sites are also identified in Policy H1 - Efficient Use of Land, and in general, Swan Hill supports the approach to the redevelopment of these sites (where feasible) based on the assessments of the sites set out in this version of the Core Strategy.

8.2 However, Swan Hill has concerns that these policies might not be considered suitably sound given that insufficient opportunity has been allocated for consultation on their redevelopment. Without the SHLAA being publically available prior to the consultation on this Core Strategy, an insufficient evidence base has been provided to corroborate that these sites are neither suitable or deliverable to meet the test of soundness requirements.

Summary:

Policy T8 - Parking Standards

7.6 The Council has recently (January 2007) adopted SPD on the requirements for parking standards, and as such, Swan Hill generally supports the policy approach chosen by the Council. As set out in the SPD, whilst Swan Hill

Core Strategy Submission Document

S - 16893 - 8329 - Policy T8 - Parking Standards - None

16893 Support

CHAPTER 10 Policy T8 - Parking Standards

generally supports the approach taken by the District Council towards setting residential parking standards, in that the Council has recognised that in the suburban areas, even with some access to public transport, the majority of residents will rely on the use of private cars. However, Swan Hill has concerns over the failure of the District Council to comply with the provisions of PPG13: Transport (2001) which sets out that Local Planning Authorities should not set minimum standards for car parking. Whilst it is acknowledged that PPS3 sets out provision for the consideration of local circumstances, it is considered that the Council has not justified this deviation from PPG13's maximum standard.

7.7 Whilst it is acknowledged that such justification may become apparent through the work currently being undertaken by Essex County Council, until such time, the District Council should only seek to apply the maximum standards indicated in PPG13. However, Swan Hill recommends that the District Council make provisions in the wording of the Policy to allow for changes in the event that future policy on car parking standards need to reflect the County standard, following the completion of the County Council review.

In order to reduce the amount of Green Belt land released for residential, the Council are proposing to reallocate a number of existing employment sites for either residential or mixed use proposals.

However, in order to meet the number of jobs required in the RSS, additional employment sites will be required, as the supply of employment land within the District is tight, this will require the release of Green Belt land.

The Employment Land Study recommends that any de-allocations of employment land be compensated for by the allocation of 18 hectares of new employment sites.

The idea of not releasing land for residential and then releasing it for employment purposes is a contradiction, as it still requires the release of Green Belt.

Amend Second Sentence of Paragraph 11.6:

'...The Council consider it necessary to review some of these allocations, particularly in light of changes to the economy and the decline of the manufacturing sectors. As part of this review existing employment sites, where these sites are in sustainable locations, they will be protected to ensure that they continue to provide employment generated opportunities, including the redevelopment for other employment uses. Only in instances when the site offers both outdated accommodation and is not located in a sustainable location, will it be considered for mixed use, residential development, and/or community uses.'

Reword Paragraph 11.11:

'In order to address the recommendations of the Employment Land Study an assessment should be made of the existing employment sites, in conjunction with the requirement for new housing to consider whether any of the existing employment land should be de-allocated, and if so whether any new employment sites should be allocated.'

Summary:

In order to reduce the amount of Green Belt land released for residential, the Council are proposing to reallocate a number of existing employment sites for either residential or mixed use proposals.

However, in order to meet the number of jobs required in the RSS, additional employment sites will be required, as the supply of employment land within the District is tight, this will require the release of Green Belt land.

The Employment Land Study recommends that any de-allocations of employment land be compensated for by the allocation of 18 hectares of new employment sites.

The idea of not releasing land for residential and then releasing it for employment purposes is a contradiction, as it still requires the release of Green Belt.

Amend Second Sentence of Paragraph 11.6:

'...The Council consider it necessary to review some of these allocations, particularly in light of changes to the economy and the decline of the manufacturing sectors. As part of this review existing employment sites, where these sites are in sustainable locations, they will be protected to ensure that they continue to provide employment generated opportunities, including the redevelopment for other employment uses. Only in instances when the site offers both outdated accommodation and is not located in a sustainable location, will it be considered for mixed use, residential development, and/or community uses.'

Reword Paragraph 11.11:

'In order to address the recommendations of the Employment Land Study an assessment should be made of the existing employment sites, in conjunction with the requirement for new housing to consider whether any of the existing employment land should be de-allocated, and if so whether any new employment sites should be allocated.'

Summary:

In order to reduce the amount of Green Belt land released for residential, the Council are proposing to reallocate a number of existing employment sites for either residential or mixed use proposals.

However, in order to meet the number of jobs required in the RSS, additional employment sites will be required, as the supply of employment land within the District is tight, this will require the release of Green Belt land.

The Employment Land Study recommends that any de-allocations of employment land be compensated for by the allocation of 18 hectares of new employment sites.

The idea of not releasing land for residential and then releasing it for employment purposes is a contradiction, as it still requires the release of Green Belt.

Change to Plan

Reword Paragraph 11.11:

'In order to address the recommendations of the Employment Land Study an assessment should be made of the existing employment sites, in conjunction with the requirement for new housing to consider whether any of the existing employment land should be de-allocated, and if so whether any new employment sites should be allocated.'

The Core Strategy identifies that Rochford has a small but productive and enterprising economy albeit with an employment market of basic and intermediate skills, rather than high skills. A significant proportion of the Rochford workforce commute of the district however the location of Southend Airport has the potential to be a focus and catalyst for economic growth. EEDA support policy ED1 which seeks to diversify and modernise the economy through the growth of existing new business providing high value employment.

By addressing these key elements of the Regional Economic Strategy, the Core Strategy will provide the context needed to maintain the prosperity of the East of England, enhancing regional competitiveness and giving support to business growth. The Council's aspiration for an Eco Enterprise Centre as a focal point for business in the form of an enterprise or incubation hub would increase the offer for start up businesses within the district. Its aim to be an exemplar in sustainable construction and act as flagship building further enhances this offer both in terms of high specification office space and the benefits relating to this in terms of low energy costs. It should further encourage the inward investment of businesses whilst aiding in the creation of higher value jobs.

Full Text: As it is currently drafted, Policy ED1 is unsound because it is not justified. Specifically, the sixth bullet point should be redrafted to include the words "London Southend Airport and its Environs"

This change in wording would acknowledge the relevance of the whole of the defined JAAP area, and will reflect the proposed title of the "London Southend Airport & environs Joint Area Action Plan (JAAP)".

The amended wording will also provide support for the redevelopment of sites, such as the Brickworks site, which is identified within the draft JAAP as an area of change, the redevelopment of which will bring many benefits. The site is previously developed land and currently lies derelict and detracts from the surrounding landscape. Redevelopment will enhance the area and enable the clean up of the site which is likely to incur significant costs.

The amendment to the sixth bullet point to 'London Southend Airport and its Environs' is justified as the growth of both the Airport and its environs are taken into account in the Rochford Employment Land Study and the London Southend Airport & Environs study by Halcrow Group Ltd. (June 2008). Thus this proposed change of wording will make the draft policy sound, whilst enabling the policy to be effective in accordance with paragraphs 4.44 - 4.45 of PPS12.

Summary: As it is currently drafted, Policy ED1 is unsound because it is not justified. Specifically, the sixth bullet point should be redrafted to include the words "London Southend Airport and its Environs"

Change to Plan Amend the sixth bullet point to include the words "London Southend Airport and its Environs".

Full Text: ROCHFORD CORE STRATEGY SUBMISSION DOCUMENT, SEPTEMBER 2009
RESPONSE OF ESSEX COUNTY COUNCIL

1. General Comment

Essex County Council welcomes and broadly supports the Core Strategy prepared by Rochford District Council. The Strategy contains policies and proposals that address the spatial characteristics, issues and opportunities facing the District whilst respecting the distinctive qualities of the different settlements and parts of the District.

The County Council fully supports the maintenance of a strong policy approach to protection of the Green Belt and of the quality of environmental assets in the District whilst making adequate housing and employment provision within the District. The Core Strategy presents an approach that emphasises a balance of opportunity through the District and recognition of emerging economic prospects in the District and neighbouring areas. The intended preparation of more detailed Action Area Plans for London Southend Airport and its environs and for each of the three town centres of Rayleigh, Rochford and Hockley will further enhance the approach of the Core Strategy. The emphasis on the three town centres is particularly welcomed as offering a stimulus to improvement in the services and facilities available locally within the District whilst also affording possibilities of increased community focus.

2. Housing Distribution and Locations

The East of England Plan requires Rochford to provide a minimum of 3,790 additional dwellings between 2006 and 2021. In addition, provision for a further 1,000 dwellings should be made between 2021 and 2025 to ensure delivery of housing for at least 15 years from adoption of the Core Strategy (expected in 2010). Of this total requirement the District Council has identified a capacity of 2,000 dwellings through a Strategic Housing Land Availability Assessment. This means that the Core Strategy has to identify locations for about 1,750 dwellings to be delivered before 2021 and a further 1,000 dwellings between 2021 and 2025.

Policy H1 (The efficient use of land for housing) is supported. However, prioritisation of the reuse of previously developed land within settlements for additional housing is unlikely to provide a sufficient source of provision due to the generally residential nature of existing settlements in the district and the absence of potentially large sites of previously developed land. The assessment of potential for additional housing provision within settlements already includes the proposed re-allocation to substantially residential use of 4 existing employment areas.

Within Policy H2 (Extensions to residential envelopes and phasing) and Policy H3 (Extension to residential envelopes post-2021) the District Council has adopted a balanced approach to the distribution of additional housing locations, which is based on identification of tiers of settlements defined by reference to their accessibility to jobs, services and facilities (some of which lie outside the District) and the need to protect the valued environments within the District. This approach is generally supported, although implementation and delivery of individual schemes should give further thought to securing sustainable functional relationships between proposed development locations and availability of jobs, services and facilities.

The proposed scale and phasing of development at each of the identified locations in Policy H2 and Policy H3 should be capable of being supported by County Council service groups, provided that adequate and timely funding is available. The County Council would wish to work with the District Council to ensure that future infrastructure and facilities would serve and give benefit to the existing adjoining community as well as to the new development. In this respect it is noted that the Core Strategy proposes preparation by the District Council of a Planning Obligations and Standard Charges document (Policy CLT1). The District Council's document should fully reflect the County Council's own approach to this matter as set out in the County Council's 'Developer's Guide to Infrastructure Contributions'.

3. Economic Development

The approach to Employment Growth (Policy ED1) is supported. Given the economic structure of Rochford District the support to be given to protection and enhancement of the role of small and medium sized businesses; enhancement of the District's commercial centres; and development of a skills training academy is particularly welcome. These measures will assist in building on the existing economic resource of the District.

Proposals for the comprehensive development of London Southend Airport and its environs (Policy ED2) are supported.

16689 Support

CHAPTER 11 Policy ED1 - Employment Growth

The further elaboration of proposals through an Area Action Plan will provide a firm foundation to realise the economic regeneration and growth opportunities presented by effective use of the Airport. The recognition of the potential environmental impact of the Airport and the commitment to work to mitigate any adverse impacts on the environment and local amenities is fully supported.

The location of the proposed Eco-Enterprise Centre to the North of London Southend Airport (Policy ED4) is supported. Creation of the Centre would assist reduction of the rate of business start-up failure in the district. Further the proposed location for the Centre would afford a clear offer to businesses within an area of varied business activity.

The continued protection and enhancement of existing employment land (Policy ED3) is supported, as is the identification of 4 existing employment sites for appropriate alternative, substantially residential, uses. Each of the 4 sites affords particular issues and opportunities whereby their redevelopment for other uses and relocation of existing occupiers would confer advantage for the immediately neighbouring areas and for the District as a whole.

4. Town Centres

The town centres of Rayleigh, Rochford and Hockley, and future plans for them, are closely linked to the economic development of the District but also present the opportunity to offer greater community focus within the District. The varied approach being taken to each of these town centres is supported (Policy RTC4, RTC5 and RTC6), notably the recognition of the role and purpose of the town centres beyond retail uses.

The contribution that the County Library service could make to plans for the town centres should not be overlooked. The 5 libraries in the District are substantial footfall draws in their localities and act as a 'community anchor store'. This has knock-on effects in encouraging use of neighbouring retail and service facilities. Further the Library service is currently looking at co-location opportunities for other services within the libraries which would enable them to act as a community focus.

5. Transport

The transport aspects of the Core Strategy are well balanced in identifying potential measures that would meet the needs of existing residents and businesses in the District as well as needs arising from future development. The approach reflects and makes good reference to the transportation aspirations of the County Council. The policy emphasis on close working between the District Council and the County Council to advance the transport aspirations is welcomed and fully supported.

In relation to parking standards (Policy T8 and Paragraph 10.30) the review undertaken by Essex County Council in conjunction with the Essex Planning Officers Association has now been completed. Revised parking standards have been agreed and signed off as County Supplementary Guidance, in accordance with PPS12, and is being applied by the County Council as Local Highways Authority.

6. Coastal Protection Belt

Policy ENV2 (Coastal Protection Belt) is not supported because in its current form it is not a suitable or effective replacement policy for Policy CC1 of the Replacement Structure Plan. Structure Plan Policy CC1 (The Undeveloped Coast - Coastal Protection Belt) currently remains a 'saved' policy of the Essex and Southend-on-Sea Replacement Structure Plan, April 2001 (following a direction of the Secretary of State, dated 27th September 2007, under paragraph 1(3) of Schedule 8 to the Planning and Compulsory Purchase Act 2004). The existing Policy CC1 reads, 'Within the Coastal Protection Belt defined in adopted local plans there shall be the most stringent restrictions on development within the rural and undeveloped coastline situated outside existing built-up areas, and any development which is exceptionally permitted within this Belt shall not adversely affect the open and rural character, historic features or wildlife.'

Core Strategy Policy ENV2 should be revised to include specific reference to,

- * Definition of the boundary of the Coastal Protection Belt in another Development Plan Document;
- * the application of the most stringent restrictions on development within the rural and undeveloped coastline;
- * any development exceptionally permitted not adversely affecting the open and rural character, historic features or wildlife.

7. Historic Environment

The importance of the historic environment in Rochford District is clearly identified within the Core Strategy document. Nevertheless, the policy guidance could be usefully enhanced to promote consideration and enhancement of the historic environment and use of the historic environment to shape place. This would be achieved by the following amendments to the Core Strategy,

- * Policy ENV1 (Protection and Enhancement of the Natural Landscape and Habitats and the Protection of Historical and Archaeological Sites) should be amended by deletion of the final sentence and its replacement with, 'The Council is committed to the protection, promotion and enhancement of the diverse historic landscape and extensive surviving archaeological deposits of the District.'

16689 Support

CHAPTER 11 Policy ED1 - Employment Growth

* Paragraph 8.15 of the supporting text should be amended to better support the suggested amendment to Policy ENV1. The existing text of Paragraph 8.15 should be deleted in its entirety and replaced by,
The historic environment of Rochford District has developed through a history of human activity that spans over 450,000 years. Much of the resource lies hidden beneath the ground in the form of archaeological deposits. Other elements such as the historic landscape, the pattern of field, farms, woods and grazing marsh which characterise the District, are a highly visible record of millennia of agriculture, industry and commerce. Of particular significance are the coastal, island and estuarine areas where multi-period landscapes reflecting the exploitation of coastal and marshland resource survive. The District also includes the important historic medieval market towns of Rochford and Rayleigh.

* Page 16 (Sustainable Community Strategy Priority: Promoting a Greener District) should be amended to further support the approach to the Historic Environment. The fourth bullet of the Key Section/Policies of the Core Strategy should be amended to include the word 'historic', so that the first sentence of the bullet would read,
The Environment chapter seeks to protect and enhance the biodiversity, historic and natural environment of the District by protecting sites of local, national and international importance.

8. Community Infrastructure

The approach to Community Infrastructure is supported. The County Council would wish to work with the District Council to ensure that future community infrastructure and facilities would serve and give benefit to the existing adjoining community as well as to the new development. In this respect it is noted that the Core Strategy proposes preparation by the District Council of a Planning Obligations and Standard Charges document (Policy CLT1). The District Council's document should fully reflect the County Council's own approach to this matter as set out in the County Council's 'Developer's Guide to Infrastructure Contributions'.

In addition, it should be noted that,

* Some County Council services are not highly visible despite being regarded as highly desirable community services by local residents. The need to ensure adequate funding and contributions to enable these services to meet community expectations should be recognised and acknowledged in consideration of planning obligations and standard charges.

* The Adult Community Learning Centre at Rocheway, Rochford could be better located with regard to the wider Rochford/Castle Point area of service. Relocation of the Centre could provide opportunities both at the new location and for the current site.

* The Core Strategy should make specific reference to,

o Appendix H1, Location at South Canewdon: new Early Years and Childcare facilities;

o Policy CLT2, final sentence: insert after the words 'primary schools' the words 'and Early Years and Childcare facilities';

o Appendix CLT1, Other issues/comment: for Early years and childcare facilities add 'Land to be allocated within new residential areas, as appropriate'.

9. Implementation, Delivery and Monitoring

The inclusion in the Core Strategy of a section considering Implementation, Delivery and Monitoring is welcomed and supported. Nevertheless, the District Council, in moving towards implementation and delivery of the individual elements of the Core Strategy, should highlight those schemes and projects that are critical to achievement of other aspects of the Strategy.

Further, the monitoring proposal for Policy H6 (Lifetime Homes) and for Policy CP1 (Design) should be amended,

* Policy H6 (Lifetime Homes) - the identified monitoring tool is Core Indicator H6 Housing Quality Building for Life Assessments. The Building for Life Assessment methodology was devised to measure the overall design/layout quality of housing developments. It was not devised to measure compliance with Lifetime Homes, which is largely, but not exclusively, concerned with internal space standards and the provision of internal arrangements within dwellings to meet needs of all residents.

* Policy CP1 (Design) - the monitoring indicator proposed by the Core Strategy is not supported because it is unclear what the indicator would actually be measuring. The proposed indicator should be replaced by the Core Indicator, Housing Quality - Building for Life Assessments, as suggested by the County Council in its response to the Core Strategy Preferred Options, October 2008. A better approach would be to base evaluation and monitoring of Policy CP1 on the Commission for Architecture and the Built Environment's (CABE) 20 Building for Life principles, particularly as Government has endorsed these principles and is urging local authorities to use them to assess design quality. It is suggested that the monitoring arrangements for Preferred Option CP1 be deleted and replaced by the following text, 'The success of the implementation of this policy will be monitored by assessing schemes, or an appropriate sample of schemes, against the Commission for Architecture and the Built Environment's (CABE) Building for Life principles.'

10. Access to Housing

The Core Strategy notes the higher prevalence of older people in Rochford District and the need to support them. However, a more broadly based approach to access to housing should be adopted by Policies H4, H5 and H6. It should recognise the presence of other vulnerable adults in the community, for example, those with learning or mental health disability, and the range of possible forms of accommodation, including supported, sheltered and extra care accommodation. The high level of owner occupation in the District further emphasises the need for a broader approach. The emphasis on Lifetime Homes would not address the variety of future needs, whilst the potential exemptions to the

Core Strategy Submission Document

Hockley Residents Association
2 Tonbridge Road
Hockley
Essex
SS5 5HL

Full Text: Proposals for moving employment to out of town locations, at either end of the district, with no existing public transport links, are contrary to government policy PPG4. It also contravenes the Core Strategy's stated aims of reducing carbon emissions; reliance on car transport and providing "an integrated network of cycle paths".

The District of Rochford is predominately spread on a West/East axis along the railway line. Hockley is located in the middle of the district and the two estates are adjacent to the railway station. Bus services are poor with just 3* an hour (following a recent 50% reduction in services) and the operator has admitted they cannot compete with the railway making improvements to new sites away from major centres unlikely. (* one of the 3 services is paid for by ECC on a 6 mth trial and may be terminated in the new year).

However, the Core Strategy proposes to relocate these two estates to a greenfield site near the airport. This site is 2-3 miles from the nearest railway station and there are currently no bus services to the area. As a result, RDC are proposing to upgrade the nearest road to a dual-carriageway, although the main connecting road (the B1013), which runs through Hockley, will remain single-carriageway and is already at 72% of capacity (ECC Highways stats). This is despite extra traffic expected in the area as a result of the Joint Area Action Plan (JAAP) which proposes considerable growth at neighbouring Southend Airport, as well as the new industrial estate.

The site selected for the new industrial estate also contravenes PPS4 which states;
i. (EC7.3C) "out-of-centre sites, with preference given to sites which are or will be well served by a choice of means of transport and which are close to the centre and have a high likelihood of forming links with the centre. There is no existing public transport and no obvious likelihood of forming links with any existing centres.
i. EC7.5 1 "whether the site is or will be accessible and well served by a choice of means of transport, especially public transport, walking and cycling, as well as by car". Its remote location. Accessed by the narrow, busy B1013 is not suitable for access by cycle or on foot.

It also contravenes PPS1 (27 vii) "Reduce the need to travel and encourage accessible public transport provision to secure more sustainable patterns of transport development. Planning should actively manage patterns of urban growth to make the fullest use of public transport and focus development in existing centres and near to major public transport interchanges".

The Core Strategy also contravenes its own policy T1 and is unsound.

Summary: Proposals for moving employment to out of town locations, at either end of the district, with no existing public transport links, are contrary to government policy PPG4 and RDC policy T1. It also contravenes the Core Strategy's stated aims of reducing carbon emissions; reliance on car transport and providing "an integrated network of cycle paths".

Bus services are poor with just 3* an hour.

The site selected for the new industrial estate also contravenes PPS4.

It also contravenes PPS1 (27 vii) "Reduce the need to travel and encourage accessible public transport provision to secure more sustainable patterns of transport development."

Hockley
SS55HL
United Kingdom
07736211248

Agent: N/A

Full Text:

Proposals for moving employment to out of town locations, at either end of the district, with no existing public transport links, are contrary to government policy PPG4. It also contravenes the Core Strategy's stated aims of reducing carbon emissions; reliance on car transport and providing "an integrated network of cycle paths".

The District of Rochford is predominately spread on a West/East axis along the railway line. Hockley is located in the middle of the district and the two estates are adjacent to the railway station. Bus services are poor with just 3* an hour (following a recent 50% reduction in services) and the operator has admitted they cannot compete with the railway making improvements to new sites away from major centres unlikely. (* one of the 3 services is paid for by ECC on a 6 mth trial and may be terminated in the new year).

However, the Core Strategy proposes to relocate these two estates to a greenfield site near the airport. This site is 2-3 miles from the nearest railway station and there are currently no bus services to the area. As a result, RDC are proposing to upgrade the nearest road to a dual-carriageway, although the main connecting road (the B1013), which runs through Hockley, will remain single-carriageway and is already at 72% of capacity (ECC Highways stats). This is despite extra traffic expected in the area as a result of the Joint Area Action Plan (JAAP) which proposes considerable growth at neighbouring Southend Airport, as well as the new industrial estate.

The site selected for the new industrial estate also contravenes PPS4 which states;

i. (EC7.3C) "out-of-centre sites, with preference given to sites which are or will be well served by a choice of means of transport and which are close to the centre and have a high likelihood of forming links with the centre. There is no existing public transport and no obvious likelihood of forming links with any existing centres.

i. EC7.5 1 "whether the site is or will be accessible and well served by a choice of means of transport, especially public transport, walking and cycling, as well as by car". Its remote location. Accessed by the narrow, busy B1013 is not suitable for access by cycle or on foot.

It also contravenes PPS1 (27 vii) "Reduce the need to travel and encourage accessible public transport provision to secure more sustainable patterns of transport development. Planning should actively manage patterns of urban growth to make the fullest use of public transport and focus development in existing centres and near to major public transport interchanges".

The Core Strategy also contravenes its own policy T1 and is unsound.

Summary:

Proposals for moving employment to out of town locations, at either end of the district, with no existing public transport links, are contrary to government policy PPG4 and RDC policy T1. It also contravenes the Core Strategy's stated aims of reducing carbon emissions; reliance on car transport and providing "an integrated network of cycle paths". Bus services are poor with just 3* an hour. The site selected for the new industrial estate also contravenes PPS4. It also contravenes PPS1 (27 vii) "Reduce the need to travel and encourage accessible public transport provision to secure more sustainable patterns of transport development."

Highway & Traffic Implications

Proposals for moving employment to out of town locations, at either end of the district, with no existing public transport links, are contrary to government policy PPG4. It also contravenes the Core Strategy's stated aims of reducing carbon emissions; reliance on car transport and providing "an integrated network of cycle paths".

The District of Rochford is predominately spread on a West/East axis along the railway line. Hockley is located in the middle of the district and the two estates are adjacent to the railway station. Bus services are poor with just 3* an hour (following a recent 50% reduction in services) and the operator has admitted they cannot compete with the railway making improvements to new sites away from major centres unlikely. (* one of the 3 services is paid for by ECC on a 6 mth trial and may be terminated in the new year).

However, the Core Strategy proposes to relocate these two estates to a greenfield site near the airport. This site is 2-3 miles from the nearest railway station and there are currently no bus services to the area. As a result, RDC are proposing to upgrade the nearest road to a dual-carriageway, although the main connecting road (the B1013), which runs through Hockley, will remain single-carriageway and is already at 72% of capacity (ECC Highways stats). This is despite extra traffic expected in the area as a result of the Joint Area Action Plan (JAAP) which proposes considerable growth at neighbouring Southend Airport, as well as the new industrial estate.

The site selected for the new industrial estate also contravenes PPS4 which states;

â€¢ (EC7.3C) "out-of-centre sites, with preference given to sites which are or will be well served by a choice of means of transport and which are close to the centre and have a high likelihood of forming links with the centre. There is no existing public transport and no obvious likelihood of forming links with any existing centres.

â€¢ EC7.5 1 "whether the site is or will be accessible and well served by a choice of means of transport, especially public transport, walking and cycling, as well as by car". Its remote location. Accessed by the narrow, busy B1013 is not suitable for access by cycle or on foot.

It also contravenes PPS1 (27 vii) "Reduce the need to travel and encourage accessible public transport provision to secure more sustainable patterns of transport development. Planning should actively manage patterns of urban growth to make the fullest use of public transport and focus development in existing centres and near to major public transport interchanges".

The Core Strategy also contravenes its own policy T1 and is unsound.

Summary:

Proposals for moving employment to out of town locations, at either end of the district, with no existing public transport links, are contrary to government policy PPG4 and PPS1. It also contravenes the Core Strategy's stated aims of reducing carbon emissions; reliance on car transport and providing "an integrated network of cycle paths".

Summary: This is too difficult a process for many people.
Evaluating how the proposed expansion fits into the national targets for carbon emission reduction.
Please give the people of this area further help to reduce air and noise pollution.

Change to Plan In my view the development of Southend Airport will adversely impact on the quality of life and general health for a large number of residents in the Rochford and Southend area. The Councils should be trying to reduce air and noise pollution, not increase it. My main objection is that if air traffic is allowed to increase from current levels then an increased amount to current levels of "spent" aviation fuel will be breathed in by the general population. It is my opinion that our general health will suffer. I think that any required increase in air traffic must be from a lowly populated site, not a densely populated area such as Southend and Rochford. I oppose the plan.

Full Text: Draft Policy ED2 is currently unsound as it is not justified. Specifically, the title of the policy should be amended to read "London Southend Airport and its Environs"

This change in wording acknowledges the whole of the defined JAAP area is relevant, and reflects the proposed title of the "London Southend Airport & environs Joint Area Action Plan (JAAP)".

The amendment to the title to 'London Southend Airport and its Environs' is justified as the growth of both the Airport and its environs are taken into account in the Rochford Employment Land Study and the London Southend Airport & Environs study by Halcrow Group Ltd. (June 2008). Thus this proposed change of wording is sound, whilst enabling the policy to be effective in accordance with paragraphs 4.44 - 4.45 of PPS12

Overall, the draft policy will provide for the emerging Southend Airport Joint Area Action Plan (JAAP), and will enable the area surrounding London Southend Airport to be appropriately developed, including our clients site.

Summary: Draft Policy ED2 is currently unsound as it is not justified. Specifically, the title of the policy should be amended to read "London Southend Airport and its Environs"

Planning and Transport
County Hall
Chelmsford
CM1 4JU
01245-437578

Full Text: ROCHFORD CORE STRATEGY SUBMISSION DOCUMENT, SEPTEMBER 2009
RESPONSE OF ESSEX COUNTY COUNCIL

1. General Comment

Essex County Council welcomes and broadly supports the Core Strategy prepared by Rochford District Council. The Strategy contains policies and proposals that address the spatial characteristics, issues and opportunities facing the District whilst respecting the distinctive qualities of the different settlements and parts of the District.

The County Council fully supports the maintenance of a strong policy approach to protection of the Green Belt and of the quality of environmental assets in the District whilst making adequate housing and employment provision within the District. The Core Strategy presents an approach that emphasises a balance of opportunity through the District and recognition of emerging economic prospects in the District and neighbouring areas. The intended preparation of more detailed Action Area Plans for London Southend Airport and its environs and for each of the three town centres of Rayleigh, Rochford and Hockley will further enhance the approach of the Core Strategy. The emphasis on the three town centres is particularly welcomed as offering a stimulus to improvement in the services and facilities available locally within the District whilst also affording possibilities of increased community focus.

2. Housing Distribution and Locations

The East of England Plan requires Rochford to provide a minimum of 3,790 additional dwellings between 2006 and 2021. In addition, provision for a further 1,000 dwellings should be made between 2021 and 2025 to ensure delivery of housing for at least 15 years from adoption of the Core Strategy (expected in 2010). Of this total requirement the District Council has identified a capacity of 2,000 dwellings through a Strategic Housing Land Availability Assessment. This means that the Core Strategy has to identify locations for about 1,750 dwellings to be delivered before 2021 and a further 1,000 dwellings between 2021 and 2025.

Policy H1 (The efficient use of land for housing) is supported. However, prioritisation of the reuse of previously developed land within settlements for additional housing is unlikely to provide a sufficient source of provision due to the generally residential nature of existing settlements in the district and the absence of potentially large sites of previously developed land. The assessment of potential for additional housing provision within settlements already includes the proposed re-allocation to substantially residential use of 4 existing employment areas.

Within Policy H2 (Extensions to residential envelopes and phasing) and Policy H3 (Extension to residential envelopes post-2021) the District Council has adopted a balanced approach to the distribution of additional housing locations, which is based on identification of tiers of settlements defined by reference to their accessibility to jobs, services and facilities (some of which lie outside the District) and the need to protect the valued environments within the District. This approach is generally supported, although implementation and delivery of individual schemes should give further thought to securing sustainable functional relationships between proposed development locations and availability of jobs, services and facilities.

The proposed scale and phasing of development at each of the identified locations in Policy H2 and Policy H3 should be capable of being supported by County Council service groups, provided that adequate and timely funding is available. The County Council would wish to work with the District Council to ensure that future infrastructure and facilities would serve and give benefit to the existing adjoining community as well as to the new development. In this respect it is noted that the Core Strategy proposes preparation by the District Council of a Planning Obligations and Standard Charges document (Policy CLT1). The District Council's document should fully reflect the County Council's own approach to this matter as set out in the County Council's 'Developer's Guide to Infrastructure Contributions'.

3. Economic Development

The approach to Employment Growth (Policy ED1) is supported. Given the economic structure of Rochford District the support to be given to protection and enhancement of the role of small and medium sized businesses; enhancement of the District's commercial centres; and development of a skills training academy is particularly welcome. These measures will assist in building on the existing economic resource of the District.

Proposals for the comprehensive development of London Southend Airport and its environs (Policy ED2) are supported.

Core Strategy Submission Document

S - 16690 - 9072 - Policy ED2 - London Southend Airport - None

16690 Support

CHAPTER 11 Policy ED2 - London Southend Airport

The further elaboration of proposals through an Area Action Plan will provide a firm foundation to realise the economic regeneration and growth opportunities presented by effective use of the Airport. The recognition of the potential environmental impact of the Airport and the commitment to work to mitigate any adverse impacts on the environment and local amenities is fully supported.

The location of the proposed Eco-Enterprise Centre to the North of London Southend Airport (Policy ED4) is supported. Creation of the Centre would assist reduction of the rate of business start-up failure in the district. Further the proposed location for the Centre would afford a clear offer to businesses within an area of varied business activity.

The continued protection and enhancement of existing employment land (Policy ED3) is supported, as is the identification of 4 existing employment sites for appropriate alternative, substantially residential, uses. Each of the 4 sites affords particular issues and opportunities whereby their redevelopment for other uses and relocation of existing occupiers would confer advantage for the immediately neighbouring areas and for the District as a whole.

4. Town Centres

The town centres of Rayleigh, Rochford and Hockley, and future plans for them, are closely linked to the economic development of the District but also present the opportunity to offer greater community focus within the District. The varied approach being taken to each of these town centres is supported (Policy RTC4, RTC5 and RTC6), notably the recognition of the role and purpose of the town centres beyond retail uses.

The contribution that the County Library service could make to plans for the town centres should not be overlooked. The 5 libraries in the District are substantial footfall draws in their localities and act as a 'community anchor store'. This has knock-on effects in encouraging use of neighbouring retail and service facilities. Further the Library service is currently looking at co-location opportunities for other services within the libraries which would enable them to act as a community focus.

5. Transport

The transport aspects of the Core Strategy are well balanced in identifying potential measures that would meet the needs of existing residents and businesses in the District as well as needs arising from future development. The approach reflects and makes good reference to the transportation aspirations of the County Council. The policy emphasis on close working between the District Council and the County Council to advance the transport aspirations is welcomed and fully supported.

In relation to parking standards (Policy T8 and Paragraph 10.30) the review undertaken by Essex County Council in conjunction with the Essex Planning Officers Association has now been completed. Revised parking standards have been agreed and signed off as County Supplementary Guidance, in accordance with PPS12, and is being applied by the County Council as Local Highways Authority.

6. Coastal Protection Belt

Policy ENV2 (Coastal Protection Belt) is not supported because in its current form it is not a suitable or effective replacement policy for Policy CC1 of the Replacement Structure Plan. Structure Plan Policy CC1 (The Undeveloped Coast - Coastal Protection Belt) currently remains a 'saved' policy of the Essex and Southend-on-Sea Replacement Structure Plan, April 2001 (following a direction of the Secretary of State, dated 27th September 2007, under paragraph 1(3) of Schedule 8 to the Planning and Compulsory Purchase Act 2004). The existing Policy CC1 reads, 'Within the Coastal Protection Belt defined in adopted local plans there shall be the most stringent restrictions on development within the rural and undeveloped coastline situated outside existing built-up areas, and any development which is exceptionally permitted within this Belt shall not adversely affect the open and rural character, historic features or wildlife.'

Core Strategy Policy ENV2 should be revised to include specific reference to,

- * Definition of the boundary of the Coastal Protection Belt in another Development Plan Document;
- * the application of the most stringent restrictions on development within the rural and undeveloped coastline;
- * any development exceptionally permitted not adversely affecting the open and rural character, historic features or wildlife.

7. Historic Environment

The importance of the historic environment in Rochford District is clearly identified within the Core Strategy document. Nevertheless, the policy guidance could be usefully enhanced to promote consideration and enhancement of the historic environment and use of the historic environment to shape place. This would be achieved by the following amendments to the Core Strategy,

- * Policy ENV1 (Protection and Enhancement of the Natural Landscape and Habitats and the Protection of Historical and Archaeological Sites) should be amended by deletion of the final sentence and its replacement with, The Council is committed to the protection, promotion and enhancement of the diverse historic landscape and extensive surviving archaeological deposits of the District.

Core Strategy Submission Document

S - 16690 - 9072 - Policy ED2 - London Southend Airport - None

16690 Support

CHAPTER 11 Policy ED2 - London Southend Airport

* Paragraph 8.15 of the supporting text should be amended to better support the suggested amendment to Policy ENV1. The existing text of Paragraph 8.15 should be deleted in its entirety and replaced by,
The historic environment of Rochford District has developed through a history of human activity that spans over 450,000 years. Much of the resource lies hidden beneath the ground in the form of archaeological deposits. Other elements such as the historic landscape, the pattern of field, farms, woods and grazing marsh which characterise the District, are a highly visible record of millennia of agriculture, industry and commerce. Of particular significance are the coastal, island and estuarine areas where multi-period landscapes reflecting the exploitation of coastal and marshland resource survive. The District also includes the important historic medieval market towns of Rochford and Rayleigh.

* Page 16 (Sustainable Community Strategy Priority: Promoting a Greener District) should be amended to further support the approach to the Historic Environment. The fourth bullet of the Key Section/Policies of the Core Strategy should be amended to include the word 'historic', so that the first sentence of the bullet would read,
The Environment chapter seeks to protect and enhance the biodiversity, historic and natural environment of the District by protecting sites of local, national and international importance.

8. Community Infrastructure

The approach to Community Infrastructure is supported. The County Council would wish to work with the District Council to ensure that future community infrastructure and facilities would serve and give benefit to the existing adjoining community as well as to the new development. In this respect it is noted that the Core Strategy proposes preparation by the District Council of a Planning Obligations and Standard Charges document (Policy CLT1). The District Council's document should fully reflect the County Council's own approach to this matter as set out in the County Council's 'Developer's Guide to Infrastructure Contributions'.

In addition, it should be noted that,

* Some County Council services are not highly visible despite being regarded as highly desirable community services by local residents. The need to ensure adequate funding and contributions to enable these services to meet community expectations should be recognised and acknowledged in consideration of planning obligations and standard charges.

* The Adult Community Learning Centre at Rocheway, Rochford could be better located with regard to the wider Rochford/Castle Point area of service. Relocation of the Centre could provide opportunities both at the new location and for the current site.

* The Core Strategy should make specific reference to,

o Appendix H1, Location at South Canewdon: new Early Years and Childcare facilities;

o Policy CLT2, final sentence: insert after the words 'primary schools' the words 'and Early Years and Childcare facilities';

o Appendix CLT1, Other issues/comment: for Early years and childcare facilities add 'Land to be allocated within new residential areas, as appropriate'.

9. Implementation, Delivery and Monitoring

The inclusion in the Core Strategy of a section considering Implementation, Delivery and Monitoring is welcomed and supported. Nevertheless, the District Council, in moving towards implementation and delivery of the individual elements of the Core Strategy, should highlight those schemes and projects that are critical to achievement of other aspects of the Strategy.

Further, the monitoring proposal for Policy H6 (Lifetime Homes) and for Policy CP1 (Design) should be amended,

* Policy H6 (Lifetime Homes) - the identified monitoring tool is Core Indicator H6 Housing Quality Building for Life Assessments. The Building for Life Assessment methodology was devised to measure the overall design/layout quality of housing developments. It was not devised to measure compliance with Lifetime Homes, which is largely, but not exclusively, concerned with internal space standards and the provision of internal arrangements within dwellings to meet needs of all residents.

* Policy CP1 (Design) - the monitoring indicator proposed by the Core Strategy is not supported because it is unclear what the indicator would actually be measuring. The proposed indicator should be replaced by the Core Indicator, Housing Quality - Building for Life Assessments, as suggested by the County Council in its response to the Core Strategy Preferred Options, October 2008. A better approach would be to base evaluation and monitoring of Policy CP1 on the Commission for Architecture and the Built Environment's (CABE) 20 Building for Life principles, particularly as Government has endorsed these principles and is urging local authorities to use them to assess design quality. It is suggested that the monitoring arrangements for Preferred Option CP1 be deleted and replaced by the following text, 'The success of the implementation of this policy will be monitored by assessing schemes, or an appropriate sample of schemes, against the Commission for Architecture and the Built Environment's (CABE) Building for Life principles.'

10. Access to Housing

The Core Strategy notes the higher prevalence of older people in Rochford District and the need to support them. However, a more broadly based approach to access to housing should be adopted by Policies H4, H5 and H6. It should recognise the presence of other vulnerable adults in the community, for example, those with learning or mental health disability, and the range of possible forms of accommodation, including supported, sheltered and extra care accommodation. The high level of owner occupation in the District further emphasises the need for a broader approach. The emphasis on Lifetime Homes would not address the variety of future needs, whilst the potential exemptions to the

Core Strategy Submission Document

16690 Support

CHAPTER 11 Policy ED2 - London Southend Airport

Summary: Lifetime Homes policy standard in Policy H6 are likely to act against demographic trends. Proposals for the comprehensive development of London Southend Airport and its environs (Policy ED2) are supported. The further elaboration of proposals through an Area Action Plan will provide a firm foundation to realise the economic regeneration and growth opportunities presented by effective use of the Airport. The recognition of the potential environmental impact of the Airport and the commitment to work to mitigate any adverse impacts on the environment and local amenities is fully supported.

Representations on the Core Strategy
Submission Document, November 2009
On behalf of Barratts Eastern Counties

Introduction

The requirements of Core Strategies are enshrined in the 2004 Planning and Compensation Act, the Town & Country Planning (Local Development) England (Regulations) 2004 and the 2008 policy guidance in PPS12. The requirements of Coe Strategies are clear. And they are legal requirements. The Core Strategy must comply with the Local Development Scheme, Statement of Community Involvement and the Regulations. The Core Strategy must be subject to a sustainability appraisal, have regard to national guidance, conform generally with the Regional Spatial Strategy and have regard to any Sustainable Community Strategy. A Core strategy must be sound - justified, effective and consistent with national policy. The following representations therefore focus on these legal requirements.

HOUSING

Paragraph 4.6 - Evidence Base

To meet the soundness test Submission Core Strategies (SCS) must be justified, that is to say it must be founded on robust and credible evidence base and comprise the most appropriate strategy when considered against reasonable alternatives. The housing strategy in as far as it identifies a need for Green belt sites is sound, however, there are other elements which are unsound.

Paragraph 4.6 notes that the Strategic Housing Land Availability Assessment (SHLAA) has examined the supply of housing. It is presumed that the Table at paragraph 4.6 is the outcome of this examination. Whilst the SHLAA has some legitimacy in that it identifies various sites that are apparently available, we are concerned that because the SHLAA was only published in November 2009 it post dates the SCS. This implies that the SCS is driving the SHLAA exercise rather than the other way round. Whilst this may have no real practical effect on the outcome of the SCS and the identified need for Green Belt sites, the Inspector will be mindful of the advice in paragraphs 33 and 54 of PPS3 that SCS draw on the evidence in SHLAA. It may be that the SCS should explain how the evidence base has been used to justify the strategy.

PPS12 explains at paragraph 4.37 that Core Strategies are based on thorough evidence. Since the SHLAA has only recently been published it is considered that the SCS is unsound as it is not justifiable. This, together with other comments on the SCS, indicates that the process should be delayed to ensure that a more robust document is placed in front of the EiP Inspector.

Table at Paragraph 4.6 - Evidence base

From our review of the available evidence it would appear that the housing land supply is insufficient and that Green Belt release are required. From the wider strategy being promoted we note that some of the sites that the District Council consider to be 'appropriate' are likely to relate to existing employment areas. As set out elsewhere in our representations, we maintain severe reservations that the redevelopment of existing employment sites for alternative uses and particularly the Eldon Way Industrial Estate is unsustainable. We will make reference to the effectiveness of this strategy in relation to sustainability, whether it is justified in the context of National Policy and the deliverability of such a strategy elsewhere.

In particular, paragraph 11.32 of the SCS refers to existing employment land and sites within the UCS. It does not refer the SHLAA and as such it appears that an evidence base to support the re-use of employment land for residential is not reported in the SCS.

Having reviewed the 2008 Annual Monitoring Report, as we did when commenting on the 2008 Preferred Options Core Strategy, we maintain severe doubts as to the appropriateness of some of the previously developed sites identified as potential housing sites and their expected housing yield. Whilst we cannot at this stage ascertain whether the SHLAA

16923 Object

CHAPTER 11 Policy ED2 - London Southend Airport

sites referred to in this table correlate with the Annual Monitoring Report and indeed the 2007 Urban Capacity Study, it is our view that there will be some commonality and so the reliance on these sites is likely to be at odds with Government Policy. We shall elaborate on this objection in relation to the specific housing policy below.

We note that the last two rows in the Table at paragraph 4.6 set out figures with and without Green Belt releases. The text to this section of the Core Strategy should, for reasons of clarity, explain that Green belt review will be necessary in order to deliver the required housing.

Paragraph 4.9

The table on page 40, which sets out the settlement tiers, is supported. Rayleigh, Rochford/Ashingdon, Hockley/Hawkwell are clearly the largest settlements in the District and they benefit from good employment, housing, leisure, community and public transport provision. These settlements are the most sustainable ones with the greatest mix of uses. Consequently, it is sensible that the Core Strategy identifies these as top tier settlements and is able to target them with growth accordingly. This component of the strategy is justified by reference to sustainability data and is effective, since targeting development at these locations will ensure a more sustainable pattern of development.

Paragraph 4.14

We maintain that the strategy for redeveloping the Eldon Way Industrial Estate for housing and other alternative uses to employment is unsound. It is neither justified nor effective. The Industrial Land Availability Study 2006 sets out on page 7 strategic objectives. The 3rd objective seeks to Support town centre and industrial estate enhancement initiatives aimed at improving the environment ensuring the area is economically prosperous and competitive. Clearly the strategy as currently drafted envisages major changes to existing industrial estates, including alternative uses. This strategy is not consistent with other strategies and evidence based studies and so cannot be justified in the context of the tests set out in PPS12. It is also an ineffective strategy since the new employment locations that would free up the Eldon Way site for redevelopment relies on transport infrastructure that has no certainty of being delivered. Principally, the erosion of employment uses at Eldon Way could make the settlement of Hockley/Hawkwell less sustainable and thus conflict with the tiered approach on page 40, paragraph 4.9.

Policy H1

Prioritising the use of previously developed land ("pdl") is supported in principle. It is a justified strategy in the context of PPS3 and effective as sequential choices can be made by implementing the policy. However, the District Council is also promoting a strategy which seeks the redevelopment of existing employment locations to alternative uses and by consequence is identifying green field sites for new employment development elsewhere (Policy ED4 refers). This 'land swapping' is not considered consistent with PPS3, nor is it considered to be justified or effective in delivering the desired strategy. This is particularly the case as most of the existing employment sites are occupied and therefore unavailable for redevelopment. In addition, the new Greenfield sites are in an arguably less sustainable locations away from the top tier settlements identified on page 40 of the Submission Core Strategy. Clearly this element of the strategy is inconsistent with the wider strategy.

The Industrial Land Availability Study 2006 is included as an evidence base by the District Council. It includes an introductory section, which explains that the authority wishes to make Rochford the place of choice for new business. It includes several strategic objectives on page 7 including "Support town centre and industrial estate enhancement initiatives aimed at improving the environment ensuring the area is economically prosperous and competitive." It reviews existing employment areas and identifies vacant land, including land available from allocations. It does not include any assessment of new sites or potential opportunities for new sites that might have been expected to feed into the Core Strategy. The strategy for identifying Green Belt site employment allocation does not appear to be based on any evidence in this document and in that context cannot be justified. The strategy being promoted potentially conflicts with Government policy in PPG13, PPG2 and emerging PPS4.

The Employment Land Study 2008 is a much later document. It has a key recommendation on page ii "we recommend that Rochford District Council adopts strong policies to protect existing employment land." Furthermore under recommendations for existing sites on page iii-iv of that document it states "In our view, Hockley Trading Centre is a strategically well placed employment location. However, we recognise the ambitions of the Hockley Town Centre masterplan and that within this the Council should consider it to be allocated for other uses. However, we recommend that this reallocation happen only if provision is made within the masterplan for office use within Hockley Town Centre as part of a mixed use scheme." The view of the writers of this document is clear - the Eldon Way Industrial estate (Hockley Trading Centre) is a good employment site and that it is for other reasons that alternative uses are being considered and only then if office development is supported. This supports our representations that new future uses at the Eldon Way site should be employment dominated and that alternative uses should relate to the objectives of the Town Centre which is to enhance the shopping and leisure facilities. Residential is not an appropriate alternative.

This document recommends the use of land to the west of Rayleigh for employment and envisages Green belt release. However, the SCS does not explain through the evidence base why existing employment sites should be 'deallocated' and Green belt land unnecessarily used.

16923 Object

CHAPTER 11 Policy ED2 - London Southend Airport

In addition to these key issues we have some specific concerns. As a consequence we maintain an objection to the second paragraph of Policy H1. This policy states that the Council will seek the redevelopment of various industrial estates including Eldon Way. The Policy says that alternative uses will be sought (presumably alternative to the existing employment offer) and that new land will be allocated elsewhere. This policy statement, in relation to Eldon Way in particular, is unsound for a number of reasons:

The emerging Hockley Area Action Plan consulted upon in 2008 states that the Eldon Way Industrial Estate is strategically well placed. In a sense this statement underplays the true importance of this highly sustainable employment location and only major employment area in Hockley/Hawkwell. The employment area is adjacent to the railway station and located a short distance from the main bus routes that run along Spa Road. Some of the residential areas of the town are also within walking distance of this commercial area, thus providing a potential for sustainable travel by employees. The Eldon Way Industrial Estate is therefore right at the heart of the settlement of Hockley/Hawkwell and provides an opportunity to meet sustainable transport objectives by reducing the need to travel by car. Consequently, this employment area should be highlighted as a premier employment site in sustainability terms, both in the context of PPG13, PPG4 and PPS6. To encourage alternative uses as set out in Policy H1 implies the removal of the majority of employment based activity at Hockley/Hawkwell and this would be contrary to National policy, would not be the most appropriate strategy when considered against alternatives and is therefore unsound.

Whilst it is acknowledged that improvement to the Eldon Way Industrial Estate can and should take place, the extent to which the mix of employment uses should be altered in favour of alternative land uses requires careful consideration. It is our view that a mix of existing or indeed new employment land uses with some Town Centre type uses should dominate the Eldon Way site. A mix of employment types between offices, light industry and other high technology industries should be encouraged as this will provide many locational advantages to the firms that agglomerate together. The Council says that the existing uses on this site are harmful to amenity. However, the site has operated for many years without any significant issues and if renewal for B1 type uses are encouraged then the employment area can be maintained without harm to amenity. Renewal of the employment stock can help develop and improve trade, improve the sustainability of businesses as a whole and make for a more flexible labour market as skill levels are varied. A singularly different use altogether or a variety of uses which excludes employment could undermine the long term sustainability of the area and Town Centre. As such Policy H1 is not an effective strategy and should be amended to acknowledge the importance of Eldon Way and the need to renew the employment stock to ensure that the site maintains its important role as a employment site, albeit with some ancillary alternative use development where appropriate.

The 2008 Retail Study notes that Hockley Town Centre is not strong and there is trade leakage. Eldon Way Industrial Estate provides a customer base for existing town centre uses. Weekday spending within town centres is an important contributor to the viability of many retail and leisure businesses either through expenditure by employees during the lunchtime trade or expenditure by employers, on necessary goods and services. This relationship helps sustain the critical mass of a centre and provides a platform for new retail and leisure growth. It is important to have a balanced centre with a variety of uses. Policy H1, as currently drafted, implies the removal of employment related development and this is likely to harm the vitality and viability of Hockley Town Centre. The Council has presented no evidence to suggest that this is not the case. Importantly, the 2008 Retail Study explains that there is a need for additional retail and office space. In principle we would support additional office and other B1 type uses plus retail but employment uses should always dominate for the sustainability reasons given above. Retail and office development are likely to present a viable alternative to some of the more industrial type uses.

Consequently, we do not support the phrasing of the third paragraph of Policy H1 and maintain that the most appropriate strategy is to seek renewal of the employment stock with employment based uses and with some new retail development. Removal of employment land uses completely as currently implied-which was the approach adopted in the emerging Hockley Area Action Plan - is not a justifiable strategy.

One of the key tests of a Core Strategy is consistency between policies in the emerging Plan and this strikes at the heart of demonstrating an effective strategy. Policy H1 implies alternative uses to employment and the relocation of Eldon Way to a site identified under Policy ED4. However, Policy RTC6 sets out a suite of policy criteria for Hockley Town Centre which includes employment and commercial activities. In addition Policy ED3 seeks the protection of sustainable employment sites (Eldon Way) and notes that some reallocation of existing employment sites will include a proportion of employment. It notes that in the case of Eldon Way employment development will form a component. The policies appear at odds with one another. The third paragraph of Policy H1 should be deleted as the second paragraph is sufficient to set a strategic context for delivering new housing development. The employment policies and Hockley specific policies should be left to consider the type and quantum of land uses appropriate in the area. If the third paragraph of H1 is to be retained then it should tie in more with Policy RTC6 and in our view explain that employment uses should dominate any redevelopment proposals for the Eldon Way site and that retail and leisure uses should be a supporting proportion.

Implementation, Monitoring and Delivery - page 132 onwards

One of the key tests of soundness is that the Core Strategy should be effective - it should be able to deliver its strategy. The Implementation strategy set out at page 132 onwards of the Core Strategy does not explain how Policy H1, RTC6 and the strategy for redeveloping Eldon Way (Policy ED2 and ED3) will be delivered. The comment at Policy ED3 on

16923 Object

CHAPTER 11 Policy ED2 - London Southend Airport

page 161 identifies it as a potential risk and alludes to land assembly difficulties and the choices to be made by owner/occupiers. In order to deliver the strategy there should be a clear understanding as to whether the new land use values being promoted are sufficient to encourage relocation voluntarily. Secondly there is a need for more information to be gathered and presented to show that current occupiers and landowners are willing to relocate and the timescales likely for this. For example, do the building lease contracts enable early review or are there any break out clauses. There should be some commentary on whether the Council will engage in compulsory purchase orders to pursue their strategy should the 'encouragement' route fail. As currently drafted there is no clear path to deliver the strategy and the danger is that despite reallocation, the sites identified for redevelopment will not come forward in the plan period. In this regard, evidence to satisfy the test of soundness is not provided.

Policy H2 - General Locations

We support the strategy that new housing growth should be targeted at land South of Hawkwell. This area is suitably located to the urban area of Hockley/Hawkwell and to tie in with the settlement tiers on page 40 of the Submission Core Strategy the same terminology for settlement should be used. This ensures a consistency within the SCS. The choice of this location as a housing growth area is appropriate as it would not contribute to the coalescence of the urban area with Ashingdon (there is existing development between this identified housing area at Rectory Road and Ashingdon and moreover, Rectory Road can form a natural physical boundary for the new Green belt boundary. This area is also well located to the existing road network. Cherry Orchard Way has recently been improved and provides much better accessibility to the proposed housing growth area than any other location around Hockley/Hawkwell. The existing bus routes along Rectory Road also make this location sustainable and the additional housing proposed will help underpin the financial viability of bus routes in this area. Locally there are employment opportunities, including the small commercial estate off Main Road. The Eldon Way Industrial Estate adjacent to the Town Centre also provides the opportunity for employment locally. Extensive public open space, play pitches and built leisure facilities are located just to the north of this area and a community hall is located off Briar Close, nearby. The area to the south of Hockley/Hawkwell is close to local shops on the corner of Heycroft Road and Main Road and there are numerous footpath links between this area and the local community including links via Thorpe Road, Thorpe Close, Briar Close, Hawkwell Park and Park Gardens. The area therefore provides the opportunity to enhance existing links, including cycle links, and contribute towards community integration - more so than other sites on the south side of this settlement. The site is also in the control of one house builder and deliverable.

However, we find that the Policy is not fully consistent with national policy and furthermore needs to be reviewed in order to be justified and effective. We have concerns as to how the Green Belt review strategy set out at Policy H3 and in the Local Development Scheme integrates with this policy and feel that Green Belt review should be more explicit throughout the SCS. We note that it is only Policy H3 which indicates the need for Green Belt land review. In fact Policy H3 only pays lip service to the need for a Green Belt review and provides, at best, loose advice in this regard. It says that prior to 2021 Green Belt will be safeguarded save for the releases noted under Policy H2. Policy H3 then goes on to talk about land release for development after 2021 but no time period is set out to provide a framework for any Green Belt review in this latter period. In our view Policy H2 and certainly Policy H3 and Policy GB1 should explain fully the need for a Green Belt review and that such a review should take place for a defined period. That such a review has not taken place in advance of the SCS is a serious matter for the Inspector to consider in the context of soundness. That said, it is considered that any review of Green Belt should have regard to a period beyond 2021 as indicated by draft Policy H3. Paragraph 1.9 of the East of England Plan explains "this RSS covers the period to 2021 but sets a vision, objectives and core strategy for the longer term". 2026 is therefore considered a minimum suitable period that any Green Belt review must have regard to in order to meet the 5 year land supply requirements in PPS3 for the period after 2021. However, Policy SS7 of the East of England Plan talks about Green Belt reviews up to 2031. In view of this and the need to explore the circumstances of Rochford - that existing settlements cannot contain future housing growth; that Green Belt is necessary to provide housing; and that these provide exceptional reasons to vary the Green Belt locally (paragraph 2.6 to 2.7 of PPG2) the policies and strategy for the SCS should identify a Green Belt review covering the period to 2031 and set out why a review is necessary.

Policy H2 - Phasing and Quantum

The 2008 Preferred Core Strategy document indicated that the area south of Hawkwell should deliver 330 dwellings over a phasing period to post 2021 (see Policy H2 and H3 of that document). The SCS reduces the quantum of housing in this area to 175 but expects delivery by 2015. At a broader level the Preferred Options Core Strategy of 2008, (Policy H2) required 1,450 dwellings to 2015 and a further 1,050 by 2021. In the SCS the figures are now 775 and 1,010 respectively.

Since the SHLAA post dates the publication of the SCS, we are uncertain as to the reason why such a significant reduction in quantum of housing and extensions to the residential envelope is considered necessary. Presumably it is the 'new' strategy to redevelop existing employment areas within the settlements that has led to this change. Our representations on this strategy and specifically the Eldon Way Industrial Estate are included elsewhere within our representations. Previously we have commented on the Table at paragraph 4.6 of the Submission Core Strategy and the lack of evidence to underpin that table. It seems odd that in the space of a year the expected requirement for Greenfield sites has effectively halved on the basis of a SHLAA exercise. The community is therefore not able to effectively

16923 Object

CHAPTER 11 Policy ED2 - London Southend Airport

comment on the housing land supply and at this stage the Submission Core Strategy is legally unsound.

That said, we are of the view that the quantum of housing envisaged south of Hockley/Hawkwell should be more than the 175 currently envisage. In coming to this view we have reviewed the Urban Capacity Study and the latest housing figures in the Annual Monitoring Report 2008. We conclude that the shortfall in housing land supply is such that 330 dwellings in this location is appropriate.

The recently published SHLAA is based upon the data obtained from the Urban Capacity Study 2007, a call for sites exercise and data from the Annual Monitoring Report 2008.

The 2007 Urban Capacity Study (UCS)

1. 2007 is widely recognised as being the peak level of house prices in the UK and it was acknowledged by Government and practitioners alike that 2007 house prices were at an unsustainable level. It is our view that utilising the 2007 UCS as an evidence base without reference to the market does not pick up the depressed demand that is likely to now exist. Recent corrections to the housing market now mean that housing land prices are at a much lower and arguably more affordable level than before. The implications are that some pdl may not be viable for housing development. Often brownfield sites have much higher development costs than Greenfield sites and so the yield from urban capacity will be much lower than anticipated in the 2007 study. One example is the employment allocation of the Adopted Local Plan located at 76-92 Main Road, Hawkwell. This site has been allocated for several years and has been available during the most recent rises in residential property prices during 2006-07. As a consequence the lack of progress on the site can only be described by its current occupancy and perhaps it comprises high value uses that do not encourage redevelopment. Despite this the site is identified as having high potential for alternative use and high potential demand. The SHLAA form notes that there is no information on legal constraints (e.g., tenancy agreements) As a consequence it is difficult to see how this could continue to be a potential site and as a consequence the allowance for green field releases should be increased.

2. There are considered to be other instances in the UCS and the recently published SHLAA where the assumptions and calculations would indicate that the 1301 urban capacity figure is over optimistic and the SHLAA assessment is limited. In the assessment of 'non-residential sites in appropriate locations' within the UCS assumptions are made as to the probability of sites coming forward for new housing. 68-72 West Street, Rochford is identified as a high probability site but we note that it has been subject to 7 refusals of planning permission/conservation consent. There is a significant gap between the urban capacity identified as being suitable by the Council and the capacity applied for by the owners. Given its alternate use value, it is debateable whether the two capacity figures can be reconciled. No 247 London Road is another example of a site allocated in the Local Plan but which hasn't come forward. This is now the subject of a proposal for a care home and if approved would further limit the scope for market/affordable housing capacity on the site. A striking example of how the urban capacity study has underestimated is also evidence by 2-4 Alderman's Hill, Hockley - described as a disused service station. There has been no residential development application on this site since 2004 and most recent applications have sought commercial use of the site. Rather than being evidence of housing land deliverability, this particular site evidences the need for commercial uses in the area. There are therefore deliverability doubts over these 'high probability' categories which amount to some 40 units.

3. In relation to the assessment in the UCS entitled 'intensification of existing residential uses' we note that the assessment is premised on an assessment of recent trends taking into account net completions between 2001-2006 and 2005-06. This is effectively an assessment of windfall trends and not an approach that PPS3 encourages. Importantly Table 3-12 in the urban capacity study seeks to project forward urban capacity from residential redevelopment - a period that benefited from high house prices and PPG3 guidance encouraging redevelopment. These two circumstances have markedly changed and so the assumptions and conclusions drawn would also have changed. Even taking into account the UCS discounting, the reliability of the 404 units from this source must be questioned and in our view the 1301 figure cannot be a sound basis for urban capacity and further Greenfield releases are necessary.

4. In the section of the UCS entitled 'subdivision of dwellings' and 'living above the shop' it is estimated that recent trends would result in 7 and 15 units. Our concerns with using trends as a basis for urban capacity are detailed above - PPS3 does not encourage this. Rather, local authorities are charged with surveying their areas, identifying which areas may yield urban capacity and how much and developing policies to achieve that. Government guidance does not encourage the estimation of windfalls in the way the UCS does.

5. Redevelopment of established employment land is a separate section within the UCS. At 1 above we identify the low probability of the Main Road residential allocation coming forward. This remaining section of the UCS considers 11 further employment sites which were first identified in the 2000 UCS. Three of these are considered to have a high probability of coming forward. We have looked at these three sites and can find no evidence that they are likely to come forward. In the 8 years between 2000 and 2008 the three identified high probability employment sites have not been developed and there is no reason to assume that the next 5-10 years will be any different. For example the Rawreth Industrial Estate is identified as being well used in the UCS and although it has some unneighbourly uses there is no indication that the site is available, suitable or deliverable for residential. Land between 39-69 Lower Lambricks, Rayleigh is identified as having a high probability of residential uses. Yet there is no

16923 Object

CHAPTER 11 Policy ED2 - London Southend Airport

evidence of any pre-application advice or planning applications for this area. Stambridge Mills, Mill Lane, Stambridge is a further example. This site is separated from the urban area, in a flood risk zone and protected in the 2006 Replacement Local Plan by Policy EB9 which promotes B1 uses. Against this background there is only two relevant planning applications affecting this area both date from the early 1990's and relate to a plant room and loading bay. There is no evidence that this is likely to come forward for residential purposes in the next 5-10 years.

6. In the UCS extant permissions are identified as 856 dwellings. It is important to note that this figure needs to be continually reassessed so that from the point of adoption of the Core Strategy a 5 and 10 year housing land supply is available. The SHLAA notes extant permissions for 2009-14 being 106. As noted below extant permissions do not necessarily translate into deliverable sites. There is therefore a contingency that needs to be built in. Further allocations on greenfield land need to be increased and as such the quantum of housing in the area south of Hockley/Hawkwell should be increased to 330 dwellings in order to begin to meet the shortfall identified.

The District Council's 5 year housing supply assessment

7. The District Council's Annual Monitoring Report ("AMR") 2008 purports to demonstrate a 5 year housing land supply. The preamble to Table 4.10 in the AMR 2008 explains that Rochford District Council ("RDC") has included units under construction, units with full permission, units with outline permission, units with a resolution to grant, units subject to preapplication discussion/Urban Capacity Assessment and land allocations in its trajectory. The reader is referred to Appendix B which breaks down the sites in more detail. The recently published SHLAA also includes a table showing a potential 1273 dwellings deliverable. However, it refers to "appropriate brownfield sites." Since these 'appropriate sites' are do not benefit from an application or a planning permission it is difficult to programme them into the housing delivery trajectory.

8. In the full planning permission category of the AMR 2008 where work has not yet started there can be no guarantee that all these sites will be delivered in the 5 years. This comment relates to the one above in relation to the recently published SHLAA. It is not uncommon for permissions to be obtained to provide a means for valuing a site where the owner has no immediate plans to sell the site or develop housing. Delivery may also be hampered by funding constraints, or site assembly problems (where sites are in an alternative use or relocation constraints). Appendix B of the AMR 2008 does not set out the intentions of the landowner or whether the sites are truly achievable in the 5 year period as per PPS3 requirements. The SHLAA purports to show developer intentions at Appendix C but the assessment by the local authority into the legitimacy of some of the claims is not presented. The evidence base is not as full as it should be to demonstrate the robustness of Table 4.6 of the SCS. It is also unclear the extent to which this table is based on either the UCS 2007, AMR 2008, SHLAA 2009 or a combination of all three. This should be set out clearly.

9. In addition, to the 'non delivery' of a proportion of new homes in the AMR 2008, there is concern at the timings of delivery in that data set, for example, 10 units in 2008-2009 relates to outline planning permissions and it is doubtful whether reserved matters can be turned round quick enough to begin delivering housing in this year period. There could well be examples in that set of data where the delivery of units in the first year of the 5 is unlikely, thus delivery is reduced for that period and pushed back and this process is then compounded throughout the data set up to and beyond year 5. Statistical evidence from the Department of Communities and Local Government ("CLG") reveals that building starts are 43% down on the quarter to March 2009 compared with March 2008. It is not clear whether the recently published SHLAA has taken this into account and unless it does the data in the Table at 4.6 of the SCS cannot be relied upon, particularly given the current recessionary circumstances. In relation to the Table at Paragraph 4.6 a refinement is therefore needed to take into account this effect on phasing.

10. This problem is compounded for other units relied upon where permission has been granted but no start on site has been made; this accounts for a considerable number of sites in 2009-10 period (100 dwellings) which is (year 2 of the 5 year period). A delay in these will require more Greenfield sites to be identified in order to meet the shortfall.

11. Finally we note that the East of England Plan expresses its land supply requirement as a minimum. This strategy is not reflected in the

16923 Object

CHAPTER 11 Policy ED2 - London Southend Airport

Submission version of the Core Strategy policy H2.

12. In summary since neither the UCS nor the Annual Monitoring Report form a SHLAA, reservations are maintained about the degree to which sufficient housing land has been identified.

Policy H3

In the Preferred Options Core Strategy 2008 more locations were identified for housing growth in the post 2021 phase. Whilst it is our view that land south of Hockley/Hawkwell should benefit from a greater number of dwellings than the 175 currently identified (330) in order to make the strategy effective. We are concerned at the significant change in strategy between the Preferred Option Core Strategy and the Submission version, which has significantly less housing growth on green field sites. This change in strategy is so significant that we would question whether it is appropriate in the context of soundness and the consultation processes that have taken place so far.

We also have concerns as to how the Green Belt review strategy set out at Policy H3 and in the Local Development Scheme integrates with other policies in the SCS and feel that Green Belt review should be more explicit throughout the SCS. As it currently stands there is a potential conflict with national policies and limited justification for the Green belt strategy. We note that in Policy H3, which indicates the need for Green Belt land review, the advice is limited and unclear. In fact Policy H3 only pays lip service to the need for a Green Belt review and provides, at best, loose advice in this regard. It says that prior to 2021 Green Belt will be safeguarded save for the releases noted under Policy H2. Policy H3 then goes on to talk about land release for development after 2021 but no time period is set out to provide a framework for any Green Belt review in this latter period. In our view Policy H3 and Policy GB1/H2 should explain fully the need for a Green Belt review and that such a review should take place for a defined period. That such a review has not taken place in advance of the SCS is a serious matter for the Inspector to consider in the context of soundness. That said, it is considered that any review of Green Belt should have regard to a period beyond 2021 as indicated by draft Policy H3. Paragraph 1.9 of the East of England Plan explains "this RSS covers the period to 2021 but sets a vision, objectives and core strategy for the longer term". 2026 is therefore considered a minimum suitable period that any Green Belt review must have regard to in order to meet the 5 year land supply requirements in PPS3 for the period after 2021. However, Policy SS7 of the East of England Plan talks about Green Belt reviews up to 2031. In view of this and the need to explore the circumstances of Rochford - that existing settlements cannot contain future housing growth; that Green Belt is necessary to provide housing; and that these provide exceptional reasons to vary the Green Belt locally (paragraph 2.6 to 2.7 of PPG2) the policies and strategy for the SCS should identify a Green Belt review covering the period to 2031 and set out why a review is necessary. Not to do so is unsound for justification and effectiveness reasons.

Policy H4 - Affordable Housing

As currently drafted we feel that the policy is not concise enough and that the policy does not reflect current guidance. The phrase 'at least' would indicate that in most cases affordable housing above 35% will be sought. Our understanding is that the 35% figure is recommended in the SHMA and that to provide a policy framework which seeks to go beyond that figure would potentially be unworkable as many sites could not financially bare the burden of over a third of the net developable area not yielding a value. The policy should be redrafted so that "a target of 35% affordable housing shall be provided on all developments of 15 or more units..."

The last policy paragraph provides some scope to relax this policy, if there are clear site constraints that make on site provision impossible. The policy, though, is not particularly clear on what would constitute exceptional circumstances. For example, physical site constraints, which unusually raise development costs, would be one such reason and this should be specified. There may be other reasons including the nature of housing needs in the part of the District the site is located which justify affordable housing below the 35% target. Design reasons may also have a bearing on how provision is made and in what form, particularly if the site is in an historic area where design might override housing need argument. It is therefore recommended that the policy expand on the type of circumstances where affordable housing may be relaxed and the type of information that will be sought of applicant's who have a need to invoke this part of the policy.

Policy H5

In support of the policy, it is advantageous that no percentages requiring a specific mix are included. This flexibility will enable developers and the Council to respond directly to changing circumstances in the local housing market. In the past some authorities have set out a percentage for the type of housing they require only to find that after a few years of strict implementation there is an oversupply of property of that type and no flexibility in the policy to address the problem.

Policy ED2 - London Southend Airport

It is considered that to grow non aviation related employment at a location north of Southend Airport where sustainable access from the rest of Rochford District requires careful consideration. Most Airports are serviced by aviation related employment development and as such a location close to the airport is sensible and sustainable. However, for surface access reasons it would be inappropriate to encourage travel from Rochford's main settlements to what essentially

16923 Object

CHAPTER 11 Policy ED2 - London Southend Airport

would be a rural location for general employment uses. Whilst sustainable access would be improved by a railway station and better bus links, there is no evidence to suggest that a sustainable surface access strategy for non related employment development at the Airport can be achieved. Paragraph 11.22 explains the critical importance of a railway station to the delivery of the strategy yet the Transport Chapter and Implementation Chapter provide neither a policy nor an assessment of deliverability. It is also notable that the South Essex Rapid Transit Policy T4, as set out at paragraph 10.16, notes that Rochford is not proposed to be served but may be served in future phases. This uncertainty is no way to plan for a major employment land supply strategy in the District. In relation to PPS12, the ability to deliver sustainable green field employment sites away from the top tier settlements of Hockley/Hawkwell, Rochford and Rayleigh is unsound.

Policy ED3

We fully support the first sentence of the Policy and note the apparent contradiction with the statements in Policy H1 and elsewhere which seeks to develop on alternative uses at industrial estates such as Eldon Way.

This contradiction is evidence in the second paragraph of Policy ED3. In our representations on Policy H1 we have explained why it is not sound to diminish the employment stock at Eldon Way and the importance of maintaining a dominance of employment type uses at this estate. These arguments are not repeated here.

We note the sentiments of the third paragraph and in accordance with our representations elsewhere are of the view that this sentence should be revised to explain that Eldon Way will accommodate principally employment type uses. As noted elsewhere uses which are an alternative to employment would diminish this highly sustainable employment site and this is unsound when assessed against National Policy.

Policy ED4 - Future Employment Allocations

In part, the de-allocation strategy is not supported as it is considered unsound when set against sustainability criteria. In relation to the Eldon Way Industrial Estate it is considered critical to the ongoing sustainability of this settlement that employment uses are maintained at this location. It is close to the railway station, bus routes and local residential areas from which the opportunity exists for employees to walk or cycle to work. Its location adjacent to the Town Centre offers opportunity for some retail and leisure development to complement the centre and to maintain a supporting function. These sustainable benefits would not occur with the deallocation of Eldon Way or the significant erosion of its employment floorspace. Whilst redevelopment of the employment site to achieve new employment is supported, the dominant land use should continue to be employment use. As a consequence, the 18ha of land required for employment in this policy is considered to be excessive and the policy should be reviewed to explain that redevelopment of existing employment sites for primarily new employment development will be encouraged.

Policy T4

It is noted that the South Essex Rapid Transit policy, as elaborated upon at paragraph 10.16 notes that Rochford is not served but may be served in future phases. This uncertainty is contrary to the delivery principles of soundness and directly puts at issue the employment land supply strategy in the District which is founded on sustainable access to new sites. In relation to PPS12, the ability to deliver sustainable green field employment sites away from the top tier settlements of Hockley, Rochford and Rayleigh is unsound.

Appendix H1, CTL1 - Infrastructure

It is recognised that necessary infrastructure provision is an important part of creating a sustainable development and in that context appendix H1 is supported. The supporting text notes that the table at Appendix H1 is not exhaustive and in that context it is very important that the framework properly distinguishes between what should be provided as part of new development schemes and what shouldn't. It is therefore essential that the framework acknowledges the importance of Circular 05/05 and the tests which say that provision of infrastructure and/or contributions should be:

- * Relevant to planning
- * Necessary to make the proposed development acceptable in planning terms
- * Directly related to the proposed development
- * Fairly and reasonably related in scale and kind to the proposed development
- * Reasonable in all other respects

As is made clear (Paragraph B9 of Circular 5/05) contributions should not be used to make good existing deficiencies in infrastructure provision. Nor are they to be used to secure contributions to the achievement of wider planning objectives that are not necessary for consent to be granted. In that context the Core Strategy should set this out as its policy framework.

Policy GB1 - Green Belt

16923 Object

CHAPTER 11 Policy ED2 - London Southend Airport

The objectives of this policy are supported, although as noted in other representations the SCS is unsound as it does not meet the tests in relation to justification, compliance with national policy or effectiveness of strategy.

Policy GB1 mentions the objective to allocate the minimum amount of Green Belt land necessary. The policy should link to the requirements of PPG2 and RSS which are discussed in relation to the representations on Policy H2 and H3. The policy should set out a timeframe for the review and why Rochford requires a Green Belt review (what the exceptional circumstances are in this District that justify a review of local boundaries. The policy should be amended to set out a 2031 time frame and this may require the SCS to have an extended life span beyond 2021.

We would recommend the deletion of the word character since Green Belt designation is not related to landscape character as currently drafted. For clarity we would also recommend that the Policy or its supporting text explain that a Green Belt review will take place in support of an allocations document (paragraph 6.6) in order to identify an appropriate new boundary. This is particularly necessary given the commitment to a Green belt review in the adopted Local Development Scheme.

Policy CLT1 - Planning Obligations and Standard Charges

In view of the need to test fully the basis on which standard charges are based it is important that any document produced is in a development plan document that enables an examination in public. The policy should explain this in order that when the document is produced it accords with Policy and is based on sound evidence.

ENV9 - Code for Sustainable Homes

Object. The advice from the Department of Communities and Local Government is that the new requirement to have a rating against the Code does not make it mandatory to build a Code home or to have each new home assessed against the Code. It does however mean that all buyers of new homes be given clear information about the sustainability of the new home. A house builder can do this in one of two ways:

- they can choose to build a Code home, have that home assessed against the Code and provide the home buyer with a Code certificate stating the star rating the home has achieved
- or, they can choose to build to current building regulations standards, not to pay for an assessment and instead download a nil-rated certificate of non-assessment (also referred to as a nil-rating) to provide to the home buyer.

As such the Rochford policy requirement that coding 3 be achieved by 2010 and Code 6 by 2013 is out of step with Government advice. The policy wording should explain that it is just the coding that is a requirement of new homes and not necessarily that new homes should be constructed to achieve a standard.

The current Government objectives are for the code to be introduced over a reasonable period with development to be code 3 by 2010, code level 4 by 2013 and code level 5 by 2016. In this regard the policy, as drafted, seeks to achieve code 6 by 2013 and consequently compresses the code requirements into a shorter time scale with the costs associated expected to be subsumed within the housing market through higher prices. This is not a realistic strategy for the delivery of sustainable homes and we consider that the policy should be revised to extend the period of compliance but to also make it more flexible based on local circumstances.

Research undertaken on behalf of the Housing Corporation and English Partnerships, published in February 2007 'A cost review of the code for sustainable homes' reveals that code 6 is unlikely to be unattainable given existing technologies and that achieving code 5 could result in a 12% to 20% increase in costs that would have to be passed onto the consumer. Given the variability of the housing market with peaks and troughs, it is unlikely that the housing market would be able to subsume this level of price increase.

The code system policy as currently drafted does not have regard to site circumstances and so many of the requirements could be difficult to meet. For example, micro electricity generation on site may be difficult to achieve where local circumstances deter the capture of wind or solar power. If more expensive technologies are required to generate power than is the norm then costs will rise. There may be other competing reasons why designs cannot include certain sustainability measures if housing sites are in sensitive landscape and historic locations. Alternatively there may be significant development costs associated with site specific circumstances and so viability of the site's development becomes a valid consideration. By insisting on the code for sustainable homes other policy objectives such as affordable housing at particular rates and other contributions may need to be reconsidered. Consequently, we are of the view that this policy should be drafted in a manner which enables site specific circumstances to be taken into account. As noted above the Government explains that the code is a certification requirement and does not necessarily mean that buildings are constructed in accordance with a code level.

It is also important to note that it is not the purpose of planning legislation to duplicate other legislation. In this regard, the policy should accept that the Building Regulations will be the main vehicle for implementing this policy and that unless the coding requires external development then there will be no need to specify what is to be carried out in a planning application.

CHAPTER 11 Policy ED2 - London Southend Airport

Summary: Policy ED2 - London Southend Airport

It is considered that to grow non aviation related employment at a location north of Southend Airport where sustainable access from the rest of Rochford District requires careful consideration. Most Airports are serviced by aviation related employment development and as such a location close to the airport is sensible and sustainable. However, for surface access reasons it would be inappropriate to encourage travel from Rochford's main settlements to what essentially would be a rural location for general employment uses. Whilst sustainable access would be improved by a railway station and better bus links, there is no evidence to suggest that a sustainable surface access strategy for non related employment development at the Airport can be achieved. Paragraph 11.22 explains the critical importance of a railway station to the delivery of the strategy yet the Transport Chapter and Implementation Chapter provide neither a policy nor an assessment of deliverability. It is also notable that the South Essex Rapid Transit Policy T4, as set out at paragraph 10.16, notes that Rochford is not proposed to be served but may be served in future phases. This uncertainty is no way to plan for a major employment land supply strategy in the District. In relation to PPS12, the ability to deliver sustainable green field employment sites away from the top tier settlements of Hockley/Hawkwell, Rochford and Rayleigh is unsound.

Full Text: ROCHFORD DISTRICT COUNCIL - LOCAL DEVELOPMENT FRAMEWORK CORE STRATEGY SUBMISSION
SEPTEMBER 2009

Icen Projects Ltd (Icen) has been instructed by Colonnade Land LLP (Colonnade) to submit representations to the Rochford Local Development Framework Core Strategy Submission (CSS).

a) Overview

It is our conclusion that the CSS is not justified, effective or consistent with national policy, as required by Planning Policy Statement 12: Creating Strong Safe and Prosperous Communities through Local Spatial Planning (PPS12) and is therefore vulnerable to being found unsound by an Inspector through the Examination in Public.

b) Background and Summary

These representations follow those made by Icen on behalf of Colonnade to the Preferred Options Core Strategy, submitted via letter dated 17 December 2008. In this regard, we would request that the Council confirms that the representations made to the Preferred Options Core Strategy will be taken into account alongside the current representations, particularly as there are a number of cross references between the two sets of representations.

It is not considered necessary to reiterate the content of the previous representations, as they were made at the appropriate stage and will be considered by the Planning Inspectorate in due course, but it is inevitable that certain elements will require restating where it is not clear that they have been taken into account in the production of the CSS. For clarity, therefore, Colonnade feel that it is appropriate to clarify the 'in-principle' issues that were raised in the representations to the Preferred Options Core Strategy, recognising that these issues were raised in the context of a wider and more coherent justification made within the representations:

- â€¢ Further cross-referencing of the recommendations made within the evidence base is required;
- â€¢ Greater focus should be placed on promoting Rochford as the principal settlement within the District;
- â€¢ Coombes Farm is the most logical location for residential development abutting the urban area of Rochford and as such warrants recognition as a general location for residential development;
- â€¢ The allocation of Three Ashes Farm for employment generating uses will be pursued;
- â€¢ Recognition that it is not realistic to expect residential allocations to be met mainly on Brownfield sites, nor should the intensification of smaller sites in residential areas be pursued;
- â€¢ Many of the sites identified as suitable for residential development will not be viable and will not come forward for development within the timescales anticipated;
- â€¢ The failure to provide the necessary justification for the proposed infrastructure improvements sought in Appendix H1;
- â€¢ The inclusion of an affordable housing exception policy was sought; and
- â€¢ The need to identify sites capable of delivering employment growth in the short term.

Following assessment of the CSS presented by the Council for consultation prior to submission to the Secretary of State, Colonnade considers the Plan to be 'unsound' as the document consistently fails to meet the tests of soundness set out in the table following Paragraph 4.52 of PPS12. For clarity, PPS12 confirms that to be 'sound' a Core Strategy should be JUSTIFIED, EFFECTIVE and consistent with NATIONAL POLICY and defines 'justified' as "founded on a robust and credible evidence base" and "the most appropriate strategy when considered against the reasonable alternatives" and 'effective' as "deliverable", "flexible" and "able to be monitored".

The rationale for the above is identified in the remainder of these representations, which are provided in the interests of ensuring the Council delivers a strong, robust and logical Core Strategy that guides the future development of the District in a justified and effective manner.

b) Colonnade

As the Council is aware from previous submissions to the Local Development Framework, Colonnade is a strategic land company with a particular interest in the future development of the District as a consequence of a number of sites that it controls, particularly around Rochford.

The Council will also be aware that Colonnade has recently submitted an outline planning application for the residential development of the land at Coombes Farm, Rochford to provide a sustainable urban extension comprising up to 326

16259 Object

CHAPTER 11 Existing Employment Land, 11.32

residential dwellings, with associated accesses and community uses. Whilst the planning application process is clearly separate from the Local Development Framework production process, Colonnade wishes to continue the promotion of the site as a suitable location for residential development.

Accordingly, these representations focus on the legal requirements and tests of soundness associated principally with the Housing and Employment chapters of the CSS, with reference where appropriate to the sites that are controlled by Colonnade, the outline planning application at Coombes Farm and other issues where relevant.

c) Housing

i. Date of Adoption

The CSS assumes an adoption date of 2010 and plans for the provision of housing to 2025.

Taking account of the potential delays to the adoption of the Plan, including the Examination process, it would be more appropriate for the CSS to provide sufficient flexibility to allow for delays in its adoption. Colonnade considers an adoption date of 2011 for the CSS is a more realistic target.

Taking account of the advice in Paragraph 4.13 of PPS12, which states that the time horizon for the Core Strategy should be "at least 15 years from the date of adoption" it would be appropriate for the CSS to plan for the provision of housing to 2026 at the earliest. As such, Colonnade does not consider the CSS to be 'flexible' in the context of the tests of soundness in the table following Paragraph 4.52 of PPS12.

ii. Housing Delivery

However, setting the above aside, the Housing Chapter identifies the minimum housing delivery target for the period 2001 to 2021 of 4,600 dwellings as set out in the East of England Plan, with the annual average requirement of 250 dwellings per annum to extend provision from 2021 to 2025. It also confirms that the residual target for the period 2006 to 2021 is 3,790 dwellings, taking account of the delivery of 810 dwellings in the period 2001 to 2006, and a further 618 dwellings have been completed between 2006 and 2008.

This leaves a residual housing provision target of a minimum of 3,172 dwellings in the period 2008 to 2021. Taking into account the required provision beyond 2021, the residual housing provision target in the period 2008 to 2025 is a minimum of 4,172 dwellings. The disparity between these figures and those provided within the CSS are explained by the rounding down of the annual average delivery requirement in the period 2006 to 2021 to 250 dwellings per annum, compared with the actual figure of 252.67.

The table at Paragraph 4.6 of the CSS identifies the source of housing provision that will meet the identified minimum requirements and includes figures for 'Extant Planning Permissions' and 'Existing allocations/other appropriate sites identified in Strategic Housing Land Availability Assessment'. These figures, along with the actual completions within the period are combined to produce the figure for the 'Total without Green Belt release' figure.

Setting aside the concern regarding under-provision associated with the rounding down of the annual average delivery requirement in the period 2006 to 2021, the CSS fails to identify the sites that will contribute to the 'Extant Planning Permissions' provision. The identification of the sites that will contribute to the 'Extant Planning Permissions' should be provided in the context of the findings of the Inspector in the appeal by Asprey Homes [APP/G5180/A/07/2043219/NWF] who determined that the reliance on a delivery rate of 100% is unsafe [IR287].

Furthermore, at the time of writing these representations, the Strategic Housing Land Availability Assessment 2009 has not been published. It is impossible therefore for a full assessment of the proposed housing provision to be undertaken to confirm whether the CSS is 'founded on a robust and credible evidence base' [test of soundness in the table following Paragraph 4.52 of PPS12].

iii. Redevelopment of Employment Sites

Paragraph 4.14 of the CSS refers to the identification of the four employment sites that are considered by the Council to be suitable for redevelopment to residential use. However, the failure to publish the Strategic Housing Land Availability Assessment 2009 either before or alongside the publication of the CSS means that the assumptions made by the Council as to the suitability, availability, viability and deliverability of the sites cannot be assessed.

It has been necessary, therefore, to review the assumptions made in the Rochford Urban Capacity Study 2007 (UCS) regarding the sites. Within the section of the UCS entitled 'Redevelopment of Established Employment Land' [pages 22 & 23] includes a list of those sites assessed, their indicative capacities and the probability of residential development coming forward at the sites within the plan period (identified elsewhere as 2001 - 2021). The list includes the four sites identified in the CSS of Eldon Way/Foundry Estate, Hockley; Rawreth Lane Industrial Estate, Rayleigh; Stambridge Mills; and Star Lane Industrial Estate, Great Wakering.

In total, the UCS identifies an indicative residential redevelopment capacity of 486 units on the four sites (118, 220, 60 and 88 respectively). Of these, it identifies the Rawreth Lane Industrial Estate and Stambridge Mills as having a 'high'

16259 Object

CHAPTER 11 Existing Employment Land, 11.32

probability of coming forward for development in the Plan period (2001 - 2021), which would deliver 280 residential dwellings using the Council's own figures. The Star Lane Industrial Estate (referred to in the UCS as the Star Lane Brickworks) is identified as having a 'medium' probability of coming forward for development in the Plan period, with capacity to deliver 88 residential dwellings. It is unclear, therefore, where the figure for 'Existing allocations/other appropriate sites identified in Strategic Housing Land Availability Assessment'.

Set against this is the identification of these four sites in the CSS as being capable of delivery for residential development within the Plan period, with 671 units delivered between 2006 and 2015 and a further 506 units between 2015 and 2021.

The UCS also states in the same section that:

"There are considerable areas of land in the district that are currently allocated for, and in use as, employment land. The redevelopment of such sites for residential use would reduce demand for residential development on greenfield sites, but would at the same time create a need for alternative sites to be found for employment. Such an approach, which would be likely to require the decontamination of existing employment land to make it fit for residential use, together with development of a greenfield site and implementation of additional infrastructure to serve the new employment area, may well be unsustainable." [our emphasis]

The UCS appears to confirm therefore, that not only would the redevelopment of the four sites listed in the CSS be unlikely within the Plan period, but also potentially unsustainable. In this regard, it is notable that the promoters of Stambridge Mills sought the Screening Opinion of the Council as to whether Environmental Impact Assessment of the planning application for the redevelopment of the site for residential use was required in 2007, but to date are yet to submit a planning application for the redevelopment of the site.

In light of this, Colonnade does not consider the CSS is 'the most appropriate strategy when considered against the reasonable alternatives' [test of soundness in the table following Paragraph 4.52 of PPS12], which include the provision of residential development in East Rochford.

iv. Strategic Housing Growth to the East of Rochford

Furthermore, whilst paragraph 2.62 of the CSS identifies concern relating to the identification of locations to the east of Rochford for development on the basis that 'vehicular movements would inevitably be directed through Rochford's historic core', the CSS later identifies Stambridge Mills as a suitable site for residential redevelopment.

In light of the evident conflicts between the evidence base provided in support of the CSS and the absence of other evidence, the CSS is not considered 'sound' in the context of the tests of soundness in the table following Paragraph 4.52 of PPS12.

v. Housing Trajectory

Paragraph 4.28 of the CSS confirms that policies H1, H2 and H3 of the CSS will deliver housing supply as illustrated in the Housing Trajectory at Appendix H2. This Housing Trajectory is transposed from the 2008 Annual Monitoring Report (AMR).

Whilst on the face of it, the Housing Trajectory appears to confirm that the Council can meet its requirement to identify a five year housing supply, many of the sites identified within the AMR do not conform to the guidance issued by CLG in August 2008, on the assessment of a five year land supply. The guidance identifies sites that can be included within the five year assessment of housing supply as:

"those that are allocated for housing in the Development Plan, sites that have planning permission (outline or full planning permission that has not been implemented) and specific, unallocated brownfield sites that have the potential to make a significant contribution to housing delivery during the 5 year period".

Table 4.10: Projected Net Completions of the AMR confirms that the five year housing land supply figure includes sites from 'other land allocated for residential purposes', which are based on land allocations outside existing settlements. However, it should be clarified that these land allocations are not currently allocated for housing development in an adopted Development Plan. As such, these unallocated greenfield sites that are yet to make significant progress through the planning system should be discounted and the five year housing land supply recalculated.

The table below has been prepared to confirm the extent of the shortfall should the sites from 'other land allocated for residential purposes' be removed from the calculation of the Rochford five year housing land supply, in accordance with the guidance issued by CLG:

Recalculated Five Year Housing Land Supply (2009 - 2014):

Year
1st April 2009 to 31st March 2010
Predicted Delivery (A)

Core Strategy Submission Document

16259 Object

CHAPTER 11 Existing Employment Land, 11.32

106 dwellings
Allocations on 'other land allocated for residential purposes' (B)
0
Residual delivery (A-B)
106 dwellings
Delivery Shortfall
0

Year
1st April 2010 to 31st March 2011
Predicted Delivery (A)
217 dwellings
Allocations on 'other land allocated for residential purposes' (B)
150
Residual delivery (A-B)
67 dwellings
Delivery Shortfall
150

Year
1st April 2011 to 31st March 2012
Predicted Delivery (A)
544 dwellings
Allocations on 'other land allocated for residential purposes' (B)
300
Residual delivery (A-B)
244 dwellings
Delivery Shortfall
300

Year
1st April 2012 to 31st March 2013
Predicted Delivery (A)
395 dwellings
Allocations on 'other land allocated for residential purposes' (B)
375
Residual delivery (A-B)
20 dwellings
Delivery Shortfall
375

Year
1st April 2013 to 31st March 2014
Predicted Delivery (A)
300 dwellings
Allocations on 'other land allocated for residential purposes' (B)
300
Residual delivery (A-B)
0 dwellings
Delivery Shortfall
300

TOTAL

Predicted Delivery (A)
1,562 dwellings

Allocations on 'other land allocated for residential purposes' (B)
1,125 dwellings

Residual delivery (A-B)
437 dwellings

Delivery Shortfall
1,125 dwellings

The above table confirms that the removal of the 'other land allocated for residential purposes' from the calculation of the Rochford five year housing land supply leaves the Council with a minimum net additional housing delivery of 437 dwellings, which equates to a supply of 1.7 years based on the adjusted annual delivery target of a minimum of 255 net

16259 Object

CHAPTER 11 Existing Employment Land, 11.32

additional dwellings per annum. As such, the Council is failing to meet its requirement to demonstrate a five year housing land supply in accordance with PPS3 and the supporting guidance provided by CLG. It is notable that the recent application by David Wilson Homes at Land between Main Road and Rectory Road and Clements Hall Way, Hawkwell identifies an even greater shortfall in the Council's five year housing land supply.

In addition to the above, the AMR does not include a commentary on how deliverability has been assessed against the requirements of paragraph 54 of PPS3.

Furthermore, the guidance from CLG confirms that the windfall sites cannot be relied upon in demonstrating a five year supply unless a Local Planning Authority can demonstrate genuine local circumstances exist to allow this exception. However, the second paragraph of the section entitled 'Housing Trajectory and Five Year Housing Supply' confirms that the estimated completions in the years 2008 to 2013 includes estimated yields through 'intensification' coming forward in future years. With reference to the definition of 'intensification' on page 13 of the AMR, it appears that the 'Housing Trajectory and Five Year Housing Supply' also includes provision for windfall sites. As such, the Council is required to demonstrate the 'genuine local circumstances exist to allow this exception'.

The pressures on delivery and need for additional sites are more acute when it is considered that an average delivery rate of 204 dwellings per annum was achieved during a strong period of housing market growth. In view of the current economic downturn, and significant problems faced within the housing market, the Council should seek to identify appropriate and deliverable sites to meet its regional housing target provision commitments. Suitable sites would include Coombes Farm, which has been positively promoted for development through the LDF process.

It may, therefore, be more appropriate for the Council not merely to allocate sufficient sites to meet the minimum targets set down by the East of England Plan, but to identify a reservoir of land capable of coming forward for development should the sites identified through the CSS and Allocations Development Plan Documents (DPD) fail to come forward for development within the anticipated timescales.

vi. Appendix H1

As set out in the representations to the Preferred Options Core Strategy, there is continuing concern that the list of improvements to infrastructure required in support of residential development as set out in Appendix H1 fails to provide the necessary justification for its inclusion. Whilst the preamble seeks to clarify why the infrastructure is sought, the inclusion of this list should be fully justified, otherwise it is of little value. Furthermore, it would be of benefit to provide further details of the existing community infrastructure provision and capacity within the evidence base.

The failure to provide the necessary justification for its inclusion means that the CSS will not be 'founded on a robust and credible evidence base' [test of soundness in the table following Paragraph 4.52 of PPS12].

d) Character of Place

As set out in the representations to the Preferred Options Core Strategy, Colonnade considers that, with respect to the requirement to produce and adhere to Development Briefs for large residential developments, as set out in Policy CP1, the Council should not seek to impose further demands on developers where existing regulations provide sufficient requirements regarding design. In this instance, Design and Access Statements provide sufficient design guidelines for developments and there is no additional information provided in the policy or supporting text that clearly sets out the justification for this requirement.

e) Green Belt

With reference to the comments regarding the redevelopment of employment sites under the 'Housing' section above and the requirement to allocate sufficient land to meet the minimum housing provision targets as required by the East of England Plan, Colonnade considers that the chapter on Green Belt, and policy GB1 in particular, fails to provide the necessary evidence base that will allow it to be monitored effectively.

It is inherent that the proposed redevelopment of previously developed employment sites for residential use in order to reduce the requirement to allocate previously undeveloped land for residential use will displace these employment uses. In turn, therefore, the separate allocation of previously undeveloped Green Belt to accommodate the compensatory employment provision is required. This is accepted in principle at paragraph 11.11 of the CSS.

Without providing clarification of the anticipated quantum of land required to accommodate the provision of housing and compensatory and new employment land, it is not possible to monitor the performance of policy GB1.

However, using the Council's figures in the table setting out the breakdown of the housing provision figures in Chapter 4 of the CSS (assuming that actual completions and extant permissions are all on previously developed land), setting aside the displacement of employment uses referred to above, approximately 42% of the required minimum housing provision target is capable of being accommodated on previously developed land (2,005 units from a total of 4,750). As such, the Council is required to provide at least 58% of the required minimum housing provision target on the Green Belt (2,745 units from a total of 4,750).

16259 Object

CHAPTER 11 Existing Employment Land, 11.32

If these figures are adjusted to take account of the displacement of employment uses (assuming the provision of an equal quantity of land is required to compensate for the employment land that is redeveloped), this figure changes to 17.5% on previously developed land and 82.5% on Green Belt (828 and 3,922 units from a total of 4,750 respectively). Even allowing for the achievement of higher densities of employment on new developments, the figures above are unlikely to change significantly.

Furthermore, the table in Chapter 4 also confirms that no previously developed land will be available for development beyond 2021, or 2015 if account is taken of the displacement of the employment uses.

In light of this, not only does Chapter 6 fail to provide the necessary evidence base that will allow it to be monitored effectively, it is also necessary to consider whether it presents the most appropriate strategy for addressing the required release of Green Belt land to accommodate the defined housing and employment delivery targets to 2025 and beyond as necessary. Colonnade considers a more robust approach that is flexible and capable of being monitored, would be to clearly identify those sites capable of delivery in the short term, which for the avoidance of doubt includes those sites being promoted by Colonnade, with a reservoir of alternative sites set aside for future growth.

As set out in the representations to the Preferred Options Core Strategy, Colonnade considers that the inclusion of an affordable housing exception policy within the CSS will aid the delivery of community housing within rural areas. However, the CSS does not contain such a policy, or adequately address the issue of community housing within rural areas and the CSS is not considered to provide sufficient flexibility to allow for the delivery of essential rural housing.

f) Environmental Issues

Colonnade has concerns regarding the justification for and effectiveness of a number of the policies contained within the Environmental Issues chapter, as follows:

â€¢ Policy ENV1: The Council fails to identify how it will "maintain, restore and enhance" the sites of nature conservation importance that are identified, or how the performance of this policy will be monitored;

â€¢ Policy ENV3: In the context of the advice at paragraph 4.32 of PPS12 regarding the reformulation of national policies, Colonnade does not consider that this policy is required; and

â€¢ Policy ENV9: As set out in the representations to the Preferred Options Core Strategy, Colonnade does not consider that the necessary evidence base has been provided to justify a policy that seeks to go above and beyond the policy targets for the Code for Sustainable Homes as set out by Central Government.

g) Community Infrastructure, Leisure and Tourism

Policy CLT1 refers to the requirement for residential and employment development to contribute to the infrastructure identified in Appendix CLT1 through Standard Charges.

However, whilst the general principle of securing planning obligations through the application of standard charges is broadly accepted, the list of infrastructure requirements set out in Appendix CLT1 is not supported by sufficient evidence base to identify its robustness and credibility. As such, Colonnade does not consider either policy CLT1 or Appendix CLT1 is justified in the context of PPS12.

It is also noted that, despite the clarification sought by Colonnade at the Core Strategy Preferred Options stage, the CSS fails to confirm what information should be contained within Health Impact Assessments, which are required by policy CLT4. Once again, Colonnade requests further clarification of what is involved in the assessment and the expected outputs, which will provide greater clarity and will allow the policy to be monitored.

h) Transport

Policy T8 confirms that the Council will apply minimum parking standards. As set out in the representations to the Preferred Options Core Strategy, the guidance in Planning Policy Guidance Note 13: Transport (PPG13) is clear regarding the imposition of parking standards.

Paragraphs 52-56 of PPG13 confirm that the Local Planning Authorities should apply maximum not minimum parking standards. In order to satisfy the legal requirements set out in PPS12, the policy must reflect PPG13 to promote sustainable transport choices and further provide incentives for developers to locate further residential land closer to local service centres by requiring maximum parking standards for residential developments.

i) Economic Development

As set out in the representations to the Preferred Options Core Strategy, the land at Three Ashes Farm provides an excellent opportunity to deliver employment growth in the short term and may be a suitable site for the 'Eco-Innovation Centre' that is being promoted by the Council. Its identification as a suitable location for strategic employment growth, or the provision of an Eco-Innovation Centre, would accord with the general principles of the policies contained within Chapter 11.

Core Strategy Submission Document

O - 16259 - 9177 - Existing Employment Land, 11.32 - i

16259 Object

CHAPTER 11 Existing Employment Land, 11.32

The identification of Purdeys Industrial Estate as fit for purpose (in paragraph 11.32 and the Council's 2008 Employment Land Study 2008) and therefore it should be maintained and if possible expanded, is welcomed and Colonnade considers that Three Ashes Farm could deliver this expansion, providing a natural extension to Purdeys Industrial Estate and being strategically located close to the Airport.

Three Ashes would address the negative impacts that the nearby residential area experiences from the existing Industrial Estate by providing a buffer between established uses and the residential area with less intensive employment activities. The highways analysis that has been carried out has suggested that it would not have an adverse impact on roads and congestion. Furthermore, there are very few opportunities for businesses to expand and Three Ashes could provide this opportunity.

j) Conclusions

Following the submission of representations to the Preferred Options Core Strategy, Colonnade is disappointed to note that the CSS fails to take account of the majority of the issues raised in their representations.

In addition, Colonnade considers the plan to be 'unsound' as the document consistently fails to meet the tests of soundness set out in the table following Paragraph 4.52 of PPS12 and respectfully requests that the Council notifies Icen, on behalf of Colonnade, of the future arrangements for the Examination of the Core Strategy. Furthermore, Colonnade wishes to take this opportunity to formally register a request to appear at all stages of the Examination in Public, including the pre-hearing meeting and any planned hearing sessions whereby issues raised in the context of this letter are to be discussed. Please confirm this request, and that the representations made to the Preferred Options Core Strategy will be taken into account alongside the current representations, by way of return to this letter.

Icen Projects, on behalf of Colonnade Land LLP trusts that the Council will find these representations to be constructive and helpful in taking forward the Core Strategy. Should you wish to discuss any aspect of these representations further, please do not hesitate to contact us.

Summary:

As set out in the representations to the Preferred Options Core Strategy, the land at Three Ashes Farm provides an excellent opportunity to deliver employment growth in the short term and may be a suitable site for the 'Eco-Innovation Centre' that is being promoted by the Council. Its identification as a suitable location for strategic employment growth, or the provision of an Eco-Innovation Centre, would accord with the general principles of the policies contained within Chapter 11.

The identification of Purdeys Industrial Estate as fit for purpose (in paragraph 11.32 and the Council's 2008 Employment Land Study 2008) and therefore it should be maintained and if possible expanded, is welcomed and Colonnade considers that Three Ashes Farm could deliver this expansion, providing a natural extension to Purdeys Industrial Estate and being strategically located close to the Airport.

Three Ashes would address the negative impacts that the nearby residential area experiences from the existing Industrial Estate by providing a buffer between established uses and the residential area with less intensive employment activities. The highways analysis that has been carried out has suggested that it would not have an adverse impact on roads and congestion. Furthermore, there are very few opportunities for businesses to expand and Three Ashes could provide this opportunity.

CHAPTER 11 Existing Employment Land, 11.32

Respondent: Mr David Dare [12098]

1, Woodstock Crescent
Hockley Essex
SS5 4XG
UK
01702 205813

Agent: N/A

Full Text: Highway & Traffic Implications

1. Proposals for moving employment to out of town locations, at either end of the district, with no existing public transport links, are contrary to government policy PPG4. It also contravenes the Core Strategy's stated aims of reducing carbon emissions; reliance on car transport and providing "an integrated network of cycle paths".

The District of Rochford is predominately spread on a West/East axis along the railway line. Hockley is located in the middle of the district and the two estates are adjacent to the railway station. Bus services are poor with just 3* an hour (following a recent 50% reduction in services) and the operator has admitted they cannot compete with the railway making improvements to new sites away from major centres unlikely. (* one of the 3 services is paid for by ECC on a 6 mth trial and may be terminated in the new year).

However, the Core Strategy proposes to relocate these two estates to a greenfield site near the airport. This site is 2-3 miles from the nearest railway station and there are currently no bus services to the area. As a result, RDC are proposing to upgrade the nearest road to a dual-carriageway, although the main connecting road (the B1013), which runs through Hockley, will remain single-carriageway and is already at 72% of capacity (ECC Highways stats). This is despite extra traffic expected in the area as a result of the Joint Area Action Plan (JAAP) which proposes considerable growth at neighbouring Southend Airport, as well as the new industrial estate.

The site selected for the new industrial estate also contravenes PPS4 which states;

* (EC7.3C) "out-of-centre sites, with preference given to sites which are or will be well served by a choice of means of transport and which are close to the centre and have a high likelihood of forming links with the centre. There is no existing public transport and no obvious likelihood of forming links with any existing centres.

* EC7.5 1 "whether the site is or will be accessible and well served by a choice of means of transport, especially public transport, walking and cycling, as well as by car". Its remote location. Accessed by the narrow, busy B1013 is not suitable for access by cycle or on foot.

It also contravenes PPS1 (27 vii) "Reduce the need to travel and encourage accessible public transport provision to secure more sustainable patterns of transport development. Planning should actively manage patterns of urban growth to make the fullest use of public transport and focus development in existing centres and near to major public transport interchanges".

The Core Strategy also contravenes its own policy T1 and is unsound.

Summary:

Proposals for moving employment to out of town locations, at either end of the district, with no existing public transport links, are contrary to government policy PPG4 & PPS1. It also contravenes the Core Strategy's stated aims of reducing carbon emissions; reliance on car transport and providing "an integrated network of cycle paths".

The Core Strategy also contravenes its own policy T1 and is unsound.

2. The Transport Evidence Base has not been re-evaluated following the decision to impose extra housing on the Eldon Way & Foundry Industrial Estates. ECC Highways have confirmed that the B1013 is running at 72% of its maximum theoretical capacity) and the effect of extra housing in Hockley (as well as Hawkwell) has not been re-evaluated and it is unclear what improvements will be required and whether they can be physically achieved.

Thus the proposals are not founded on a robust and credible evidence base and are unsound

3. RDC are proposing to scatter housing across the district in around 12 or sites but no detailed consideration has been given to the implications for highways across the District. The "Core Strategy" is not a strategy but simply a collection of disparate sites. Many roads across the District are at or near capacity but no modelling has been undertaken to determine the impacts or the funding required to upgrade them. At the Central Area Committee on 25 June 2009, RDC stated (in response to a question):

"Rochford Council is not the highway authority, but is working closely with Essex County Council to identify highway infrastructure requirements. Highway infrastructure improvements will be set out in the Core Strategy and other subsequent Development Plan Documents as required. These will be fed into the next version of the Essex Local

16289 Object

CHAPTER 11 Existing Employment Land, 11.32

Transport Plan, which is effectively a bidding document for funds to implement highway infrastructure improvements, schemes to tackle congestion, etc.

The District Council is working closely with the Essex County Council to ensure that highway infrastructure identified in the Core Strategy can be delivered."

It is clear that (i) the combined impact of scattering houses across the District and (ii) relocating Eldon Way/Foundry Industrial Estates to the very edge of the District with no public transport services will exacerbate existing problems. It is also clear that the extent of improvements required is both unknown and not funded and the proposal is unsound.

Summary:

RDC are proposing to scatter housing across the district in around 12 or sites but no detailed consideration has been given to the implications for highways across the District. Many roads across the District are at or near capacity but no modelling has been undertaken to determine the impacts

It is clear that (i) the combined impact of scattering houses across the District and (ii) relocating Eldon Way/Foundry Industrial Estates with no public transport services will exacerbate existing problems. It is clear that the extent of improvements required is both unknown and not funded and the proposal is unsound.

4. PPS12 4.9 states "The infrastructure planning process should identify, as far as possible: infrastructure needs and costs". Neither needs nor, especially, costs have been identified and the Core Strategy is therefore unsound.

The district's highways suffer from years of under investment and over use. The Core Strategy proposes to fund infrastructure improvements through use of Standard Charges. However, no detail is provided and no attempt made to identify the likely scale of such charges. It is therefore unclear if use of Standard Charges is financially viable.

Policy T2 provides a list of required highway improvements. The list contains most of the more major roads in the District including Rectory Lane, which has a single track, traffic light controlled railway bridge. 1200 dwellings are proposed for the northern end of Rectory Road and a further 175 at the southern end. The cost of addressing the railway bridge bottleneck will be significant but is not mentioned.

No attempt is made to either cost these charges or explain how improvements not linked to any one specific development will be paid for (eg B1013; Ashingdon Road; a network of walking, cycling, bridleways).

The concept of paying for improvements through use of Standard Charges is totally unproven and unsound.

Summary:

PPS12 4.9 states "The infrastructure planning process should identify, as far as possible: infrastructure needs and costs". Neither needs nor, especially, costs have been identified and the Core Strategy is therefore unsound.

The Core Strategy proposes to fund infrastructure improvements through use of Standard Charges. However, no detail is provided and no attempt made to identify the likely scale of such charges. It is therefore unclear if use of Standard Charges is financially viable.

5. SERT is put forward as a solution to reducing car use but it will only skirt the edge of the district and the Core Strategy acknowledges there is only "potential" to do so in the future. SERT is not realistic or reliable a solution and the proposal is therefore unsound.

6. Previous consultations ignored by RDC:

* The Hockley Parish Plan (dated 2007), clearly states that residents are strongly against any large scale housing development in Hockley, but if there has to be additional housing, then there should be no loss of greenbelt or open spaces, and no large housing estate developments. It was also stated that any developments must be matched by the appropriate levels of infrastructure.

* The proposals also ignore the 95% rejection rate of respondents to RDC's own Hockley Area Plan (HAAP) Consultation (2009), which included specific proposals for Eldon Way (although HAAP did not even mention the adjoining Foundry Industrial Estate). Why have a consultation and ignore it?

Thus the proposals are not founded on a robust and credible evidence base and are unsound.

Summary:

Previous consultations ignored by RDC:

The proposals ignore the 95% rejection rate of respondents to RDC's own Hockley Area Plan (HAAP) Consultation (2009), which included specific proposals for Eldon Way (although HAAP did not even mention the adjoining Foundry Industrial Estate). Why have a consultation and ignore it?

16289 Object

CHAPTER 11 Existing Employment Land, 11.32

Thus the proposals are not founded on a robust and credible evidence base and are unsound

7. RDC have not consulted on the very specific proposals to relocate the Eldon Way and Foundry Industrial Estates

* The previous CS Strategy stated "we will look at opportunities for more valuable and appropriate uses of the industrial land" with absolutely no consultation at all on concept of moving existing EW businesses entirely

* the Foundry Industrial Estate has never even been previously mentioned in any plan version; A recent amendment to the Core Strategy states this omission was due to a typing error!

* The Urban Capacity study stated a "low probability" of housing and did not even mention the Foundry Estate

Thus the proposals are they are not founded on a robust and credible evidence base and are unsound.

Summary:

RDC have not consulted on the very specific proposals to relocate the Eldon Way and Foundry Industrial Estates

The previous CS Strategy stated "we will look at opportunities for more valuable and appropriate uses of the industrial land" with absolutely no consultation at all on concept of moving existing EW businesses entirely

the Foundry Industrial Estate has never even been previously mentioned;

The Urban Capacity study stated a "low probability" of housing and did not even mention the Foundry Estate

Thus the proposals are they are not founded on a robust and credible evidence base and are unsound.

8. Eldon Way and Foundry Industrial Estates form a significant part of the ongoing Hockley Area Action Plan (HAAP) consultation but the Core Strategy proposals pre-empt the next stage of the HAAP consultation.

Neither the Core Strategy nor HAAP define its status relevant to the other plan and subsequent priorities. Why is there no cross-referencing between concurrent plans affecting the exact same piece of land?

There are also inconsistencies between the Core Strategy & HAAP regarding the description of proposed uses for the two industrial estates. The Core Strategy refers to Leisure, Commercial and Residential whilst HAAP mentions a "village green, introducing a significant area of public open space". There is not sufficient space for both and the Core Strategy is again pre-empting the ongoing HAAP.

If a decision is taken now, as part of the Core Strategy, to relocate all the existing businesses on the two estates, it will set a legal precedent which HAAP will need to follow and renders the next stage of HAAP virtually redundant. Particularly given the 95% rejection rate of respondents to the previous round of HAAP such an approach is entirely undemocratic and unsound.

Summary:

The Core Strategy proposals pre-empt the next stage of the HAAP consultation and neither defines its status relevant to the other plan and subsequent priorities.

There are also inconsistencies between the Core Strategy & HAAP.

If a decision is taken as part of the Core Strategy, to relocate all the existing businesses on the two estates, it will set a legal precedent which HAAP will need to follow and renders the next stage of HAAP virtually redundant. Particularly given the 95% rejection rate of respondents to the previous round of HAAP such an approach is entirely undemocratic and unsound.

9. PPS12, 4.6, states that Cores Strategies should be flexible and "should be able to show how they will handle contingencies". Several large planning applications have already been submitted to RDC proposing developments outside the Core Strategy which does not indicate how such applications will be handled and does not comply with PPS12. Neither have RDC been able to advise residents how such changes will be made and the strategy is unsound.

10. THE Core Strategy misrepresents the findings of The Retail & Leisure Study (R&LS) 2008.

The Core Strategy states (12.38) "The Retail & Leisure Study indicates Hockley has great potential. Hockley has been identified as having a need for additional convenience floorspace".

Whereas, the R&LS actually states:

1) (10.26) "the scale of need does not lend itself to a foodstore capable of retaining a significant proportion of main food

Core Strategy Submission Document

16289 Object

CHAPTER 11 Existing Employment Land, 11.32

shopping expenditure.

2) (10.28) "There is no immediate capacity for additional floor space."

3) (10.29) "we recommend that focus be maintained on developing Hockley's

existing strengths, rather than retail expansion"

4) 10.31 "The current nature of Hockley does not lend itself to classification as a 'town centre' as defined by PPS6. Moveover, we have identified that it is a very small catchment population. Accordingly, the Council may wish to consider reclassifying Hockley from a town centre to a district centre".

The Core Strategy is inaccurate, misleading and unsound.

Summary:

The Core Strategy misrepresents the findings of The Retail & Leisure Study (R&LS) 2008. The Core Strategy states "The Retail & Leisure Study states Hockley has great potential and has a need for additional convenience floorspace". Whereas, the R&LS states: 1) "does not lend itself to a foodstore capable of retaining a significant proportion of main food shopping expenditure. 2) "There is no immediate capacity for additional floor space." 3) "we recommend that focus be maintained on developing Hockley's existing strengths." 4) " the Council may wish to consider reclassifying Hockley from a town centre to a district centre".

Summary:

Previous consultations ignored by RDC:

The proposals ignore the 95% rejection rate of respondents to RDC's own Hockley Area Plan (HAAP) Consultation (2009), which included specific proposals for Eldon Way (although HAAP did not even mention the adjoining Foundry Industrial Estate). Why have a consultation and ignore it?

Thus the proposals are not founded on a robust and credible evidence base and are unsound

10 off Unsound Reasons.
1. Highway and Traffic Implications

Proposals for moving employment to out of town locations, at either end of the district, with no existing public transport links, are contrary to government policy PPG4 & PPS1. It also contravenes the Core Strategy's stated aims of reducing carbon emissions; reliance on car transport and providing "an integrated network of cycle paths".

The Core Strategy also contravenes its own policy T1 and is unsound.

2. The Transport Evidence Base has not been re-evaluated following the decision to impose extra housing on the Eldon Way & Foundry Industrial Estates. ECC Highways have confirmed that the B1013 is running at 72% of its maximum theoretical capacity) and the effect of extra housing in Hockley (as well as Hawkwell) has not been re-evaluated and it is unclear what improvements will be required and whether they can be physically achieved.

Thus the proposals are not founded on a robust and credible evidence base and are unsound

3. RDC are proposing to scatter housing across the district in around 12 or sites but no detailed consideration has been given to the implications for highways across the District. Many roads across the District are at or near capacity but no modelling has been undertaken to determine the impacts

It is clear that (i) the combined impact of scattering houses across the District and (ii) relocating Eldon Way/Foundry Industrial Estates with no public transport services will exacerbate existing problems. It is clear that the extent of improvements required is both unknown and not funded and the proposal is unsound.

4. PPS12 4.9 states "The infrastructure planning process should identify, as far as possible: infrastructure needs and costs". Neither needs nor, especially, costs have been identified and the Core Strategy is therefore unsound.

The Core Strategy proposes to fund infrastructure improvements through use of Standard Charges. However, no detail is provided and no attempt made to identify the likely scale of such charges. It is therefore unclear if use of Standard Charges is financially viable.

5. SERT is put forward as a solution to reducing car use but it will only skirt the edge of the district and the Core Strategy acknowledges there is only "potential" to do so in the future. SERT is not realistic or reliable a solution and the proposal is therefore unsound.

6. Previous consultations ignored by RDC:

The Hockley Parish Plan (dated 2007). The proposals ignore the 95% rejection rate of respondents to RDC's own Hockley Area Plan (HAAP) Consultation (2009), which included specific proposals for Eldon Way (although HAAP did not even mention the adjoining Foundry Industrial Estate). Why have a consultation and ignore it?

Thus the proposals are not founded on a robust and credible evidence base and are unsound

7. RDC not consulted on proposals to relocate the Eldon Way and Foundry Industrial Estates

EW; CS Strategy stated "we will look at opportunities for more valuable and appropriate uses of the industrial land" absolutely no consultation on concept of moving EW businesses entirely

FIE; has never even been previously mentioned in any plan version; CS states omission was due to typing error!

Urban Capacity study stated a "low probability" of housing and did not even mention the Foundry Estate

Thus proposals are not founded on a robust and credible evidence base and are unsound.

8. The Core Strategy proposals pre-empt the next stage of the HAAP consultation and neither defines its status relevant to the other plan and subsequent priorities.

Core Strategy Submission Document

16308 Object

CHAPTER 11 Existing Employment Land, 11.32

There are also inconsistencies between the Core Strategy & HAAP.

If a decision is taken as part of the Core Strategy, to relocate all the existing businesses on the two estates, it will set a legal precedent which HAAP will need to follow and renders the next stage of HAAP virtually redundant. Particularly given the 95% rejection rate of respondents to the previous round of HAAP such an approach is entirely undemocratic and unsound

9. PPS12, 4.6, states that Cores Strategies should be flexible and "should be able to show how they will handle contingencies"

Several large planning applications have already been submitted to RDC proposing developments outside the Core Strategy which

does not indicate how such applications will be handled and does not comply with PPS12. Neither have RDC been able to advise

residents how such changes will be made and the strategy is unsound.

10. The CS misrepresents the findings of The Retail & Leisure Study (R&LS) 2008.

The CS states "The R&LS states Hockley has great potential and has a need for additional convenience floorspace".

Whereas, the R&LS actually states:

- 1) "does not lend itself to a food store capable of retaining a significant proportion of main food shopping expenditure.
- 2) "there is no immediate capacity for additional floor space."
- 3) "recommend that focus be maintained on developing Hockley's existing strengths."
- 4) " the Council may wish to consider reclassifying Hockley from a town center, to a district center".

Summary:

6. Previous consultations ignored by RDC:

The Hockley Parish Plan (dated 2007). The proposals ignore the 95% rejection rate of respondents to RDC's own Hockley Area Plan (HAAP) Consultation (2009), which included specific proposals for Eldon Way (although HAAP did not even mention the adjoining Foundry Industrial Estate). Why have a consultation and ignore it?

Thus the proposals are not founded on a robust and credible evidence base and are unsound

Highway & Traffic Implications

Proposals for moving employment to out of town locations, at either end of the district, with no existing public transport links, are contrary to government policy PPG4. It also contravenes the Core Strategy's stated aims of reducing carbon emissions; reliance on car transport and providing "an integrated network of cycle paths".

The District of Rochford is predominately spread on a West/East axis along the railway line. Hockley is located in the middle of the district and the two estates are adjacent to the railway station. Bus services are poor with just 3* an hour (following a recent 50% reduction in services) and the operator has admitted they cannot compete with the railway making improvements to new sites away from major centres unlikely. (* one of the 3 services is paid for by ECC on a 6 mth trial and may be terminated in the new year).

However, the Core Strategy proposes to relocate these two estates to a greenfield site near the airport. This site is 2-3 miles from the nearest railway station and there are currently no bus services to the area. As a result, RDC are proposing to upgrade the nearest road to a dual-carriageway, although the main connecting road (the B1013), which runs through Hockley, will remain single-carriageway and is already at 72% of capacity (ECC Highways stats). This is despite extra traffic expected in the area as a result of the Joint Area Action Plan (JAAP) which proposes considerable growth at neighbouring Southend Airport, as well as the new industrial estate.

The site selected for the new industrial estate also contravenes PPS4 which states;
â€¢ (EC7.3C) "out-of-centre sites, with preference given to sites which are or will be well served by a choice of means of transport and which are close to the centre and have a high likelihood of forming links with the centre. There is no existing public transport and no obvious likelihood of forming links with any existing centres.
â€¢ EC7.5 1 "whether the site is or will be accessible and well served by a choice of means of transport, especially public transport, walking and cycling, as well as by car". Its remote location. Accessed by the narrow, busy B1013 is not suitable for access by cycle or on foot.

It also contravenes PPS1 (27 vii) "Reduce the need to travel and encourage accessible public transport provision to secure more sustainable patterns of transport development. Planning should actively manage patterns of urban growth to make the fullest use of public transport and focus development in existing centres and near to major public transport interchanges".

The Core Strategy also contravenes its own policy T1 and is unsound.

Summary:

Proposals for moving employment to out of town locations, at either end of the district, with no existing public transport links, are contrary to government policy PPG4 & PPS1. It also contravenes the Core Strategy's stated aims of reducing carbon emissions; reliance on car transport and providing "an integrated network of cycle paths".

The Core Strategy also contravenes its own policy T1 and is unsound.

The Transport Evidence Base has not been re-evaluated following the decision to impose extra housing on the Eldon Way & Foundry Industrial Estates. ECC Highways have confirmed that the B1013 is running at 72% of its maximum theoretical capacity) and the effect of extra housing in Hockley (as well as Hawkwell) has not been re-evaluated and it is unclear what improvements will be required and whether they can be physically achieved.

Thus the proposals are not founded on a robust and credible evidence base and are unsound

RDC are proposing to scatter housing across the district in around 12 or sites but no detailed consideration has been given to the implications for highways across the District. The "Core Strategy" is not a strategy but simply a collection of disparate sites. Many roads across the District are at or near capacity but no modelling has been undertaken to determine the impacts or the funding required to upgrade them. At the Central Area Committee on 25 June 2009, RDC stated (in response to a question):

"Rochford Council is not the highway authority, but is working closely with Essex County Council to identify highway infrastructure requirements. Highway infrastructure improvements will be set out in the Core Strategy and other subsequent Development Plan Documents as required. These will be fed into the next version of the Essex Local Transport Plan, which is effectively a bidding document for funds to implement highway infrastructure improvements, schemes to tackle congestion, etc.

The District Council is working closely with the Essex County Council to ensure that highway infrastructure identified in the Core Strategy can be delivered."

It is clear that (i) the combined impact of scattering houses across the District and (ii) relocating Eldon Way/Foundry Industrial Estates to the very edge of the District with no public transport services will exacerbate existing problems. It is

16445 Object

CHAPTER 11 Existing Employment Land, 11.32

also clear that the extent of improvements required is both unknown and not funded and the proposal is unsound.

Summary:

RDC are proposing to scatter housing across the district in around 12 or sites but no detailed consideration has been given to the implications for highways across the District. Many roads across the District are at or near capacity but no modelling has been undertaken to determine the impacts

It is clear that (i) the combined impact of scattering houses across the District and (ii) relocating Eldon Way/Foundry Industrial Estates with no public transport services will exacerbate existing problems. It is clear that the extent of improvements required is both unknown and not funded and the proposal is unsound.

PPS12 4.9 states "The infrastructure planning process should identify, as far as possible: infrastructure needs and costs". Neither needs nor, especially, costs have been identified and the Core Strategy is therefore unsound.

The district's highways suffer from years of under investment and over use. The Core Strategy proposes to fund infrastructure improvements through use of Standard Charges. However, no detail is provided and no attempt made to identify the likely scale of such charges. It is therefore unclear if use of Standard Charges is financially viable.

Policy T2 provides a list of required highway improvements. The list contains most of the more major roads in the District including Rectory Lane, which has a single track, traffic light controlled railway bridge. 1200 dwellings are proposed for the northern end of Rectory Road and a further 175 at the southern end. The cost of addressing the railway bridge bottleneck will be significant but is not mentioned.

No attempt is made to either cost these charges or explain how improvements not linked to any one specific development will be paid for (eg B1013; Ashingdon Road; a network of walking, cycling, bridleways).

The concept of paying for improvements through use of Standard Charges is totally unproven and unsound.

Summary:

PPS12 4.9 states "The infrastructure planning process should identify, as far as possible: infrastructure needs and costs". Neither needs nor, especially, costs have been identified and the Core Strategy is therefore unsound.

The Core Strategy proposes to fund infrastructure improvements through use of Standard Charges. However, no detail is provided and no attempt made to identify the likely scale of such charges. It is therefore unclear if use of Standard Charges is financially viable.

SERT is put forward as a solution to reducing car use but it will only skirt the edge of the district and the Core Strategy acknowledges there is only "potential" to do so in the future. SERT is not realistic or reliable a solution and the proposal is therefore unsound.

Previous consultations ignored by RDC:

â€¢ The Hockley Parish Plan (dated 2007), clearly states that residents are strongly against any large scale housing development in Hockley, but if there has to be additional housing, then there should be no loss of greenbelt or open spaces, and no large housing estate developments. It was also stated that any developments must be matched by the appropriate levels of infrastructure.

â€¢ The proposals also ignore the 95% rejection rate of respondents to RDC's own Hockley Area Plan (HAAP) Consultation (2009), which included specific proposals for Eldon Way (although HAAP did not even mention the adjoining Foundry Industrial Estate). Why have a consultation and ignore it?

Thus the proposals are not founded on a robust and credible evidence base and are unsound.

Summary:

CHAPTER 11 Existing Employment Land, 11.32

RDC have not consulted on the very specific proposals to relocate the Eldon Way and Foundry Industrial Estates
â€¢ The previous CS Strategy stated "we will look at opportunities for more valuable and appropriate uses of the industrial land" with absolutely no consultation at all on concept of moving existing EW businesses entirely
â€¢ the Foundry Industrial Estate has never even been previously mentioned;
â€¢ The Urban Capacity study stated a "low probability" of housing and did not even mention the Foundry Estate

Thus the proposals are they are not founded on a robust and credible evidence base and are unsound.

Eldon Way and Foundry Industrial Estates form a significant part of the ongoing Hockley Area Action Plan (HAAP) consultation but the Core Strategy proposals pre-empt the next stage of the HAAP consultation.

Neither the Core Strategy nor HAAP define its status relevant to the other plan and subsequent priorities. Why is there no cross-referencing between concurrent plans affecting the exact same piece of land?

There are also inconsistencies between the Core Strategy & HAAP regarding the description of proposed uses for the two industrial estates. The Core Strategy refers to Leisure, Commercial and Residential whilst HAAP mentions a "village green, introducing a significant area of public open space". There is not sufficient space for both and the Core Strategy is again pre-empting the ongoing HAAP.

If a decision is taken now, as part of the Core Strategy, to relocate all the existing businesses on the two estates, it will set a legal precedent which HAAP will need to follow and renders the next stage of HAAP virtually redundant. Particularly given the 95% rejection rate of respondents to the previous round of HAAP such an approach is entirely undemocratic and unsound.

Summary:

The Core Strategy proposals pre-empt the next stage of the HAAP consultation and neither defines its status relevant to the other plan and subsequent priorities.

There are also inconsistencies between the Core Strategy & HAAP.

If a decision is taken as part of the Core Strategy, to relocate all the existing businesses on the two estates, it will set a legal precedent which HAAP will need to follow and renders the next stage of HAAP virtually redundant. Particularly given the 95% rejection rate of respondents to the previous round of HAAP such an approach is entirely undemocratic and unsound.

PPS12, 4.6, states that Cores Strategies should be flexible and "should be able to show how they will handle contingencies". Several large planning applications have already been submitted to RDC proposing developments outside the Core Strategy which does not indicate how such applications will be handled and does not comply with PPS12. Neither have RDC been able to advise residents how such changes will be made and the strategy is unsound.

THE Core Strategy misrepresents the findings of The Retail & Leisure Study (R&LS) 2008.

The Core Strategy states (12.38) "The Retail & Leisure Study indicates Hockley has great potential. Hockley has been identified as having a need for additional convenience floorspace".

Whereas, the R&LS actually states:

- 1) (10.26) "the scale of need does not lend itself to a foodstore capable of retaining a significant proportion of main food shopping expenditure.
 - 2) (10.28) "There is no immediate capacity for additional floor space."
 - 3) (10.29) "we recommend that focus be maintained on developing Hockley's existing strengths, rather than retail expansion"
 - 4) 10.31 "The current nature of Hockley does not lend itself to classification as a 'town centre' as defined by PPS6. Moreover, we have identified that it is a very small catchment population. Accordingly, the Council may wish to consider reclassifying Hockley from a town centre to a district centre".
- The Core Strategy is inaccurate, misleading and unsound.

Objections to RDC's Core Strategy Submission DPD

Reason Unsound

1. Highway & Traffic Implications

Proposals for moving employment to out of town locations, at either end of the district, with no existing public transport links, are contrary to government policy PPG4. It also contravenes the Core Strategy's stated aims of reducing carbon emissions; reliance on car transport and providing "an integrated network of cycle paths".

The District of Rochford is predominately spread on a West/East axis along the railway line. Hockley is located in the middle of the district and the two estates are adjacent to the railway station. Bus service are poor with just 3* an hour (following a recent 50% reduction in services) and the operator has admitted they cannot compete with the railway making improvements to new sites away from major centres unlikely. (* one of the 3 services is paid for by ECC on a 6 mth trial and may be terminated in the new year).

However, the Core Strategy proposes to relocate these two estates to a greenfield site near the airport. This site is 2-3 miles from the nearest railway station and there are currently no bus services to the area. As a result, RDC are proposing to upgrade the nearest road to a dual-carriageway, although the main connecting road (the B1013), which runs through Hockley, will remain single-carriageway and is already at 72% of capacity (ECC Highways stats). This is despite extra traffic expected in the area as a result of the Joint Area Action Plan (JAAP) which proposes considerable growth at neighbouring Southend Airport, as well as the new industrial estate.

The site selected for the new industrial estate also contravenes PPS4 which states:

(EC7.3C) "out-of-centre site, with preference given to sites which are or will be well served by a choice of means of transport and which are close to the centre and have a high likelihood of forming links with the centre. There is no existing public transport and no obvious likelihood of forming links with any existing centres.

EC7.5 1 "whether the site is or will be accessible and well served by a choice of means of transport, especially public transport, walking and cycling, as well as by car". Its remote location. Accessed by the narrow, busy B1013 is not suitable for access by cycle or on foot.

It also contravenes PPS1 (27 vii) "Reduce the need to travel and encourage accessible public transport provision to secure more sustainable patterns of transport development. Planning should actively manage patterns of urban growth to make the fullest use of public transport and focus development in existing centres and near to major public transport interchanges".

The Core Strategy also contravenes its own policy T1 and is unsound.

2. The Transport Evidence Base has not been re-evaluated following the decision to impose extra housing on the Eldon Way & Foundry Industrial Estates. ECC Highways have confirmed that the B1013 is running at 72% of its maximum theoretical capacity) and the effect of extra housing in Hockley (as well as Hawkwell) has not been re-evaluated and it is unclear what improvements will be required and whether they can be physically achieved.

3. RDC are proposing to scatter housing across the district in around 12 or sites but no detailed consideration has been given to the implications for highways across the District. The "Core Strategy" is not a strategy but simply a collection of disparate sites. Many roads across the District are at or near capacity but no modelling has been undertaken to determine the impacts or the funding required to upgrade them. At the Central Area Committee on 25 June 2009, RDC stated (in response to a question):

"Rochford Council is not the highway authority, but is working closely with Essex County Council to identify highway infrastructure requirements. Highway infrastructure improvements will be set out in the Core Strategy and other subsequent Development Plan Documents as required. These will be fed into the next version of the Essex Local Transport Plan, which is effectively a bidding document for funds to implement highway infrastructure improvements, schemes to tackle congestion, etc.

The District Council is working closely with the Essex County Council to ensure that highway infrastructure identified in the Core Strategy can be delivered."

16490 Object

CHAPTER 11 Existing Employment Land, 11.32

It is clear that (i) the combined impact of scattering houses across the District and (ii) relocating Eldon Way/Foundry Industrial Estates to the very edge of the District with no public transport services will exacerbate existing problems. It is also clear that the extent of improvements required is both unknown and not funded and the proposal is unsound.

4. PPS12 4.9 states "The infrastructure planning process should identify, as far as possible: infrastructure needs and costs". Neither needs not, especially, costs have been identified and the Core Strategy is therefore unsound.

The district's highways suffer from years of under investment and over use. The Core Strategy proposes to fund infrastructure improvements through use of Standard Charges. However, no detail is provided and no attempt made to identify the likely scale of such charges. Thus it is unclear if use of Standard Charges is financially viable.

Policy T2 provides a list of required highway improvements. The list contains most of the more major roads in the District including Rectory Lane, which has a single track, traffic light controlled railway bridge. 1200 dwellings are proposed for the northern end of Rectory Road and a further 175 at the southern end. The cost of address the railway bridge bottleneck will be significant but is not mentioned.

No attempt is made to either cost these charges or explain how improvements not linked to any one specific development will be paid for (eg B1013; Ashingdon Road; a network of walking, cycling, bridleways).

The concept of paying for improvements through use of Standard Charges is totally unproven and unsound.

5. SERT is put forward as a solution to reducing car use but it will only skirt the edge of the district and the Core Strategy acknowledges there is only "potential" to do so in the future. SERT is not realistic or reliable a solution and the proposal is therefore unsound.

6. Previous consultations ignored by RDC:

The Hockley Parish Plan (dated 2007), clearly states that residents are strongly against any large scale housing development in Hockley, but if there has to be additional housing, then there should be no loss of greenbelt or open spaces, and no large housing estate developments. It was also stated that any developments must be matched by the appropriate levels of infrastructure.

The proposals also ignore the 95% rejection rate of respondents to RDC's own Hockley Area Plan (HAAP) Consultation (2009), which included specific proposals for Eldon Way (although HAAP did not even mention the adjoining Foundry Industrial Estate). Why have a consultation and ignore it?

7. RDC have not consulted on the very specific proposals to relocate the Eldon Way and Foundry Industrial Estates

The previous CS Strategy stated "we will look at opportunities for more valuable and appropriate uses of the industrial land" with absolutely no consultation at all on concept of moving existing EW businesses entirely

The Foundry Industrial Estates has never even been previously mentioned in any plan version; A recent amendment to the Core Strategy acknowledges this omission was due to a typing error!

The Urban Capacity study stated a "low probability" of housing and did not even mention the Foundry Estate

Thus the proposals are they are not founded on a robust and credible evidence base and are unsound.

8. Eldon Way and Foundry Industrial Estates form a significant part of the ongoing HAAP consultation but the Core Strategy proposals pre-empt the next stage of the HAAP consultation.

Neither the Core Strategy or Hockley Area Action Plan (HAAP) defines its status relevant to the other plan and subsequent priorities. Why is there no cross-referencing between concurrent plans affecting the exact same piece of land?

There are also inconsistencies between the Core Strategy & HAAP regarding the description of proposed uses for the two industrial estates. The Core Strategy refers to Leisure, Commercial and Residential whilst HAAP mentions a "village green, introducing a significant area of public open space". There is not sufficient space for both and the Core Strategy is again pre-empting the ongoing HAAP.

If a decision is taken now, as part of the Core Strategy, to relocate all the existing businesses on the two estates, it will set a legal precedent which HAAP will need to follow and renders the next stage of HAAP virtually redundant. Particularly given the 95% rejection rate of respondents to the previous round of HAAP such an approach is entirely undemocratic and unsound.

9. PPS12, 4.6, states that Cores Strategies show be flexible and "should be able to show how they will handle contingencies". Neither have RDC been able to advise residents how such changes will be made and the strategy is unsound.

10. The Core Strategy misrepresent the findings of The Retail & Leisure Study (R&LS) 2008.

The Core Strategy states (12.38) "The Retail & Leisure Study indicates Hockley has great potential. Hockley has been identified as having a need for additional convenience floorspace".

Whereas, the R&LS actually states:

1) (10.26) "the scale of need does not lend itself to a foodstore capable of retaining a significant proportion of main food shopping expenditure.

2) (10.28) "There is no immediate capacity for additional floor space."

3) (10.29) "we recommend that focus be maintained on developing Hockley's existing strengths, rather than retail expansion".

4) 10.31 "The current nature of Hockley does not lend itself to classification as a 'town centre' as defined by PPS6.

Core Strategy Submission Document

16532 Object

CHAPTER 11 Existing Employment Land, 11.32

Moreover, we have identified that it is a very small catchment population. Accordingly, the Council may wish to consider reclassifying Hockley from a town centre to a district centre".

The Core Strategy is inaccurate, misleading and unsound.

Summary:

The Core Strategy misrepresents the findings of The Retail & Leisure Study (R&LS) 2008. The Core Strategy states "The Retail & Leisure Study states Hockley has great potential and has a need for additional convenience floorspace". Whereas, the R&LS states: 1) "does not lend itself to a foodstore capable of retaining a significant proportion of main food shopping expenditure. 2) "There is no immediate capacity for additional space." 3) "we recommend that focus be maintained on developing Hockley's existing strengths." 4) "the Council may wish to consider reclassifying Hockley from a town centre to a district centre.

Summary: Previous consultations ignored by RDC:

The proposals ignore the 95% rejection rate of respondents to RDC's own Hockley Area Plan (HAAP) Consultation (2009), which included specific proposals for Eldon Way (although HAAP did not even mention the adjoining Foundry Industrial Estate). Why have a consultation and ignore it?

Thus the proposals are not founded on a robust and credible evidence base and are unsound.

Full Text:

1. Highway & Traffic Implications

Proposals for moving employment to out of town locations, at either end of the district, with no existing public transport links, are contrary to government policy PPG4. It also contravenes the Core Strategy's stated aims of reducing carbon emissions; reliance on car transport and providing "an integrated network of cycle paths".

The District of Rochford is predominately spread on a West/East axis along the railway line. Hockley is located in the middle of the district and the two estates are adjacent to the railway station. Bus service are poor with just 3* an hour (following a recent 50% reduction in services) and the operator has admitted they cannot compete with the railway making improvements to new sites away from major centres unlikely. (* one of the 3 services is paid for by ECC on a 6 mth trial and may be terminated in the new year).

However, the Core Strategy proposes to relocate these two estates to a greenfield site near the airport. This site is 2-3 miles from the nearest railway station and there are currently no bus services to the area. As a result, RDC are proposing to upgrade the nearest road to a dual-carriageway, although the main connecting road (the B1013), which runs through Hockley, will remain single-carriageway and is already at 72% of capacity (ECC Highways stats). This is despite extra traffic expected in the area as a result of the Joint Area Action Plan (JAAP) which proposes considerable growth at neighbouring Southend Airport, as well as the new industrial estate.

The site selected for the new industrial estate also contravenes PPS4 which states:

(EC7.3C) "out-of-centre site, with preference given to sites which are or will be well served by a choice of means of transport and which are close to the centre and have a high likelihood of forming links with the centre. There is no existing public transport and no obvious likelihood of forming links with any existing centres.

EC7.5 1 "whether the site is or will be accessible and well served by a choice of means of transport, especially public transport, walking and cycling, as well as by car". Its remote location. Accessed by the narrow, busy B1013 is not suitable for access by cycle or on foot.

It also contravenes PPS1 (27 vii) "Reduce the need to travel and encourage accessible public transport provision to secure more sustainable patterns of transport development. Planning should actively manage patterns of urban growth to make the fullest use of public transport and focus development in existing centres and near to major public transport interchanges".

Summary:

Proposals for moving employment to of town locations, at either end of the district, with no existing public transport inks, are contrary to government policy PPG4 & PPS1. It also contravenes the Core Strategy's stated aims of reducing carbon emissions; reliance on car transport and providing "an integrated network of cycle paths".

The Core Strategy also contravenes its own policy T1 and is unsound.

2. The Transport Evidence Base has not been re-evaluated following the decision to impose extra housing on the Eldon Way & Foundry Industrial Estates. ECC Highways have confirmed that the B1013 is running at 72% of its maximum theoretical capacity) and the effect of extra housing in Hockley (as well as Hawkwell) has not been re-evaluated and it is unclear what improvements will be required and whether they can be physically achieved.

Thus the proposals are not founded on a robust and credible evidence base and are unsound.

3. RCD are proposing to scatter housing across the district in around 12 or sites but no detailed consideration has been given to the implications for highways across the District. The "Core Strategy" is not a strategy but simply a collection of disparate sites. Many roads across the District are at or near capacity but no modelling has been undertaken to determine the impacts or the funding required to upgrade them. At the Central Area Committee on 25 June 2009, RDC stated (in response to a question):

"Rochford Council is not the highway authority, but is working closely with Essex County Council to identify highway infrastructure requirements. Highway infrastructure improvements will be set out in the Core Strategy and other subsequent Development Plan Documents as required. These will be fed into the next version of the Essex Local Transport Plan, which is effectively a bidding document for funds to implement highway infrastructure improvements, schemes to tackle congestion, etc.

The District Council is working closely with the Essex County Council to ensure that highway infrastructure identified in

16550 Object

CHAPTER 11 Existing Employment Land, 11.32

the Core Strategy can be delivered."

It is clear that (i) the combined impact of scattering houses across the District and (ii) relocating Eldon Way/Foundry Industrial Estates to the very edge of the District with no public transport services will exacerbate existing problems. It is also clear that the extent of improvements required is both unknown and not funded and the proposal is unsound.

Summary:

RDC are proposing to scatter housing across the district in around 12 or sites but no detailed consideration has been given to the implications for highways across the District. Many roads across the District are at or near capacity but no modelling has been undertaken to determine the impacts.

It is clear that (i) the combined impact of scattering houses across the District and (ii) relocating Eldon Way/Foundry Industrial Estates with no public transport services will exacerbate existing problems. It is clear that the extent of improvements required is both unknown and not funded and the proposal is unsound.

4. PPS12 4.9 states "The infrastructure planning process should identify, as far as possible: infrastructure needs and costs". Neither needs not, especially, costs have been identified and the Core Strategy is therefore unsound.

The district's highways suffer from years of under investment and over use. The Core Strategy proposes to fund infrastructure improvements through use of Standard Charges. However, no detail is provided and no attempt made to identify the likely scale of such charges. Thus it is unclear if use of Standard Charges is financially viable.

Policy T2 provides a list of required highway improvements. The list contains most of the more major roads in the District including Rectory Lane, which has a single track, traffic light controlled railway bridge. 1200 dwellings are proposed for the northern end of Rectory Road and a further 175 at the southern end. The cost of address the railway bridge bottleneck will be significant but is not mentioned.

No attempt is made to either cost these charges or explain how improvements not linked to any one specific development will be paid for (eg B1013; Ashingdon Road; a network of walking, cycling, bridleways).

The concept of paying for improvements through use of Standard Charges is totally unproven and unsound.

Summary:

PPS12 4.9 states "The infrastructure planning process should identify, as far as possible: infrastructure needs and costs". Neither needs nor, especially, costs have been identified and the Core Strategy is therefore unsound.

The Core Strategy proposes to fund infrastructure improvements through use of Standard Charges. However, no detail is provided and no attempt made to identify the likely scale of such charges. It is therefore unclear if use of Standard Charges is financially viable.

5. SERT is put forward as a solution to reducing car use but it will only skirt the edge of the district and the Core Strategy acknowledges there is only "potential" to do so in the future. SERT is not realistic or reliable a solution and the proposal is therefore unsound.

6. Previous consultations ignored by RDC:

The Hockley Parish Plan (dated 2007), clearly states that residents are strongly against any large scale housing development in Hockley, but if there has to be additional housing, then there should be no loss of greenbelt or open spaces, and no large housing estate developments. It was also stated that any developments must be matched by the appropriate levels of infrastructure.

The proposals also ignore the 95% rejection rate of respondents to RDC's own Hockley Area Plan (HAAP) Consultation (2009), which included specific proposals for Eldon Way (although HAAP did not even mention the adjoining Foundry Industrial Estate). Why have a consultation and ignore it?

Thus the proposals are not founded on a robust and credible evidence base and are unsound.

Summary:

Previous consultations ignored by RDC:

The proposals ignore the 95% rejection rate of respondents to RDC's own Hockley Area Plan (HAAP) Consultation (2009), which included specific proposals for Eldon Way (although HAAP did not even mention the adjoining Foundry Industrial Estate). Why have a consultation and ignore it?

Thus the proposals are not founded on a robust and credible evidence base and are unsound.

16550 Object

CHAPTER 11 Existing Employment Land, 11.32

7. RDC have not consulted on the very specific proposals to relocate the Eldon Way and Foundry Industrial Estates.

The previous CS Strategy stated "we will look at opportunities for more valuable and appropriate uses of the industrial land" with absolutely no consultation at all on concept of moving existing EW businesses entirely.

The Foundry Industrial Estates has never even been previously mentioned in any plan version; A recent amendment to the Core Strategy acknowledges this omission was due to a typing error!

The Urban Capacity study stated a "low probability" of housing and did not even mention the Foundry Estate

Thus the proposals are they are not founded on a robust and credible evidence base and are unsound.

Summary:

RDC have not consulted on the very specific proposals to relocate the Eldon Way and Foundry Industrial Estates.

The previous CS Strategy stated "we will look at opportunities for more valuable and appropriate uses of the industrial land" with absolutely no consultation at all on concept of moving existing FW businesses entirely.

The Foundry Industrial Estate has never even been previously mentioned.

The Urban Capacity study stated a "low probability" of housing and did not even mention the Foundry Estate.

Thus the proposals are they are not founded on a robust and credible evidence base and are unsound.

8. Eldon Way and Foundry Industrial Estates form a significant part of the ongoing HAAP consultation but the Core Strategy proposals pre-empt the next stage of the HAAP consultation.

Neither the Core Strategy or Hockley Area Action Plan (HAAP) defines its status relevant to the other plan and subsequent priorities. Why is there no cross-referencing between concurrent plans affecting the exact same piece of land?

There are also inconsistencies between the Core Strategy & HAAP regarding the description of proposed uses for the two industrial estates. The Core Strategy refers to Leisure, Commercial and Residential whilst HAAP mentions a "village green, introducing a significant area of public open space". There is not sufficient space for both and the Core Strategy is again pre-empting the ongoing HAAP.

If a decision is taken now, as part of the Core Strategy, to relocate all the existing businesses on the two estates, it will set a legal precedent which HAAP will need to follow and renders the next stage of HAAP virtually redundant. Particularly given the 95% rejection rate of respondents to the previous round of HAAP such an approach is entirely undemocratic and unsound.

Summary

The Core Strategy proposals pre-empt the next stage of the HAAP consultation and neither defines its status relevant to the other plan and subsequent priorities.

There are also inconsistencies between the Core Strategy & HAAP.

If a decision is taken as part of the Core Strategy, to relocate all the existing businesses on the two estates, it will set a legal precedent which HAAP will need to follow and renders the next stage of HAAP virtually redundant. Particularly given the 95% rejection rate of respondents to the previous round of HAAP such an approach is entirely undemocratic and unsound.

9. PPS12, 4.6, states that Cores Strategies show be flexible and "should be able to show how they will handle contingencies". Several large planning applications have already been submitted to RDC proposing developments outside the Core Strategy which do not indicate how such applications will be handled and does not comply with PPS12. Neither have RDC been able to advise residents how such changes will be made and the strategy is unsound.

10. The Core Strategy misrepresent the findings of The Retail & Leisure Study (R&LS) 2008.

The Core Strategy states (12.38) "The Retail & Leisure Study indicates Hockley has great potential. Hockley has been identified as having a need for additional convenience floorspace".

Whereas, the R&LS actually states:

1) (10.26) "the scale of need does not lend itself to a foodstore capable of retaining a significant proportion of main food shopping expenditure.

Core Strategy Submission Document

Highway & Traffic Implications

Proposals for moving employment to out of town locations, at either end of the district, with no existing public transport links, are contrary to government policy PPG4. It also contravenes the Core Strategy's stated aims of reducing carbon emissions; reliance on car transport and providing "an integrated network of cycle paths".

The District of Rochford is predominately spread on a West/East axis along the railway line. Hockley is located in the middle of the district and the two estates are adjacent to the railway station. Bus services are poor with just 3* an hour (following a recent 50% reduction in services) and the operator has admitted they cannot compete with the railway making improvements to new sites away from major centres unlikely. (* one of the 3 services is paid for by ECC on a 6 mth trial and may be terminated in the new year).

However, the Core Strategy proposes to relocate these two estates to a greenfield site near the airport. This site is 2-3 miles from the nearest railway station and there are currently no bus services to the area. As a result, RDC are proposing to upgrade the nearest road to a dual-carriageway, although the main connecting road (the B1013), which runs through Hockley, will remain single-carriageway and is already at 72% of capacity (ECC Highways stats). This is despite extra traffic expected in the area as a result of the Joint Area Action Plan (JAAP) which proposes considerable growth at neighboring Southend Airport, as well as the new industrial estate.

The site selected for the new industrial estate also contravenes PPS4 which states;
â€¢ (EC7.3C) "out-of-centre sites, with preference given to sites which are or will be well served by a choice of means of transport and which are close to the centre and have a high likelihood of forming links with the centre. There is no existing public transport and no obvious likelihood of forming links with any existing centres.

â€¢ EC7.5 1 "whether the site is or will be accessible and well served by a choice of means of transport, especially public transport, walking and cycling, as well as by car". Its remote location. Accessed by the narrow, busy B1013 is not suitable for access by cycle or on foot.

It also contravenes PPS1 (27 vii) "Reduce the need to travel and encourage accessible public transport provision to secure more sustainable patterns of transport development. Planning should actively manage patterns of urban growth to make the fullest use of public transport and focus development in existing centres and near to major public transport interchanges".

The Core Strategy also contravenes its own policy T1 and is unsound.

Summary:

Proposals for moving employment to out of town locations, at either end of the district, with no existing public transport links, are contrary to government policy PPG4 & PPS1. It also contravenes the Core Strategy's stated aims of reducing carbon emissions; reliance on car transport and providing "an integrated network of cycle paths".

The Core Strategy also contravenes its own policy T1 and is unsound.

The Transport Evidence Base has not been re-evaluated following the decision to impose extra housing on the Eldon Way & Foundry Industrial Estates. ECC Highways have confirmed that the B1013 is running at 72% of its maximum theoretical capacity) and the effect of extra housing in Hockley (as well as Hawkwell) has not been re-evaluated and it is unclear what improvements will be required and whether they can be physically achieved.

Thus the proposals are not founded on a robust and credible evidence base and are unsound

RDC are proposing to scatter housing across the district in around 12 or sites but no detailed consideration has been given to the implications for highways across the District. The "Core Strategy" is not a strategy but simply a collection of disparate sites. Many roads across the District are at or near capacity but no modelling has been undertaken to determine the impacts or the funding required to upgrade them. At the Central Area Committee on 25 June 2009, RDC stated (in response to a question):

"Rochford Council is not the highway authority, but is working closely with Essex County Council to identify highway infrastructure requirements. Highway infrastructure improvements will be set out in the Core Strategy and other subsequent Development Plan Documents as required. These will be fed into the next version of the Essex Local Transport Plan, which is effectively a bidding document for funds to implement highway infrastructure improvements, schemes to tackle congestion, etc.

The District Council is working closely with the Essex County Council to ensure that highway infrastructure identified in the Core Strategy can be delivered."

It is clear that (i) the combined impact of scattering houses across the District and (ii) relocating Eldon Way/Foundry Industrial Estates to the very edge of the District with no public transport services will exacerbate existing problems. It is also clear that the extent of improvements required is both unknown and not funded and the proposal is unsound.

16600 Object

CHAPTER 11 Existing Employment Land, 11.32

Summary:

RDC are proposing to scatter housing across the district in around 12 or sites but no detailed consideration has been given to the implications for highways across the District. Many roads across the District are at or near capacity but no modeling has been undertaken to determine the impacts

It is clear that (i) the combined impact of scattering houses across the District and (ii) relocating Eldon Way/Foundry Industrial Estates with no public transport services will exacerbate existing problems. It is clear that the extent of improvements required is both unknown and not funded and the proposal is unsound.

PPS12 4.9 states "The infrastructure planning process should identify, as far as possible: infrastructure needs and costs". Neither needs nor, especially, costs have been identified and the Core Strategy is therefore unsound.

The district's highways suffer from years of under investment and over use. The Core Strategy proposes to fund infrastructure improvements through use of Standard Charges. However, no detail is provided and no attempt made to identify the likely scale of such charges. It is therefore unclear if use of Standard Charges is financially viable.

Policy T2 provides a list of required highway improvements. The list contains most of the more major roads in the District including Rectory Lane, which has a single track, traffic light controlled railway bridge. 1200 dwellings are proposed for the northern end of Rectory Road and a further 175 at the southern end. The cost of addressing the railway bridge bottleneck will be significant but is not mentioned.

No attempt is made to either cost these charges or explain how improvements not linked to any one specific development will be paid for (eg B1013; Ashingdon Road; a network of walking, cycling, bridleways).

The concept of paying for improvements through use of Standard Charges is totally unproven and unsound.

Summary:

PPS12 4.9 states "The infrastructure planning process should identify, as far as possible: infrastructure needs and costs". Neither needs nor, especially, costs have been identified and the Core Strategy is therefore unsound.

The Core Strategy proposes to fund infrastructure improvements through use of Standard Charges. However, no detail is provided and no attempt made to identify the likely scale of such charges. It is therefore unclear if use of Standard Charges is financially viable.

SERT is put forward as a solution to reducing car use but it will only skirt the edge of the district and the Core Strategy acknowledges there is only "potential" to do so in the future. SERT is not realistic or reliable a solution and the proposal is therefore unsound.

Previous consultations ignored by RDC:

• The Hockley Parish Plan (dated 2007), clearly states that residents are strongly against any large scale housing development in Hockley, but if there has to be additional housing, then there should be no loss of greenbelt or open spaces, and no large housing estate developments. It was also stated that any developments must be matched by the appropriate levels of infrastructure.

• The proposals also ignore the 95% rejection rate of respondents to RDC's own Hockley Area Plan (HAAP) Consultation (2009), which included specific proposals for Eldon Way (although HAAP did not even mention the adjoining Foundry Industrial Estate). Why have a consultation and ignore it?

Thus the proposals are not founded on a robust and credible evidence base and are unsound.

Summary:

Previous consultations ignored by RDC:

The proposals ignore the 95% rejection rate of respondents to RDC's own Hockley Area Plan (HAAP) Consultation (2009), which included specific proposals for Eldon Way (although HAAP did not even mention the adjoining Foundry Industrial Estate). Why have a consultation and ignore it?

Thus the proposals are not founded on a robust and credible evidence base and are unsound

RDC have not consulted on the very specific proposals to relocate the Eldon Way and Foundry Industrial Estates

• The previous CS Strategy stated "we will look at opportunities for more valuable and appropriate uses of the industrial land" with absolutely no consultation at all on concept of moving existing EW businesses entirely

• the Foundry Industrial Estate has never even been previously mentioned in any plan version; A recent amendment to the Core Strategy states this omission was due to a typing error!

• The Urban Capacity study stated a "low probability" of housing and did not even mention the Foundry Estate

Thus the proposals are they are not founded on a robust and credible evidence base and are unsound.

Summary:

RDC have not consulted on the very specific proposals to relocate the Eldon Way and Foundry Industrial Estates

• The previous CS Strategy stated "we will look at opportunities for more valuable and appropriate uses of the industrial land" with absolutely no consultation at all on concept of moving existing EW businesses entirely

Core Strategy Submission Document

16600 Object

CHAPTER 11 Existing Employment Land, 11.32

â€¢ the Foundry Industrial Estate has never even been previously mentioned;
â€¢ The Urban Capacity study stated a "low probability" of housing and did not even mention the Foundry Estate

Thus the proposals are they are not founded on a robust and credible evidence base and are unsound.

Eldon Way and Foundry Industrial Estates form a significant part of the ongoing Hockley Area Action Plan (HAAP) consultation but the Core Strategy proposals pre-empt the next stage of the HAAP consultation.

Neither the Core Strategy nor HAAP define its status relevant to the other plan and subsequent priorities. Why is there no cross-referencing between concurrent plans affecting the exact same piece of land?

There are also inconsistencies between the Core Strategy & HAAP regarding the description of proposed uses for the two industrial estates. The Core Strategy refers to Leisure, Commercial and Residential whilst HAAP mentions a "village green, introducing a significant area of public open space". There is not sufficient space for both and the Core Strategy is again pre-empting the ongoing HAAP.

If a decision is taken now, as part of the Core Strategy, to relocate all the existing businesses on the two estates, it will set a legal precedent which HAAP will need to follow and renders the next stage of HAAP virtually redundant. Particularly given the 95% rejection rate of respondents to the previous round of HAAP such an approach is entirely undemocratic and unsound.

Summary:

The Core Strategy proposals pre-empt the next stage of the HAAP consultation and neither defines its status relevant to the other plan and subsequent priorities.

There are also inconsistencies between the Core Strategy & HAAP.

If a decision is taken as part of the Core Strategy, to relocate all the existing businesses on the two estates, it will set a legal precedent which HAAP will need to follow and renders the next stage of HAAP virtually redundant. Particularly given the 95% rejection rate of respondents to the previous round of HAAP such an approach is entirely undemocratic and unsound.

PPS12, 4.6, states that Cores Strategies should be flexible and "should be able to show how they will handle contingencies". Several large planning applications have already been submitted to RDC proposing developments outside the Core Strategy which does not indicate how such applications will be handled and does not comply with PPS12. Neither have RDC been able to advise residents how such changes will be made and the strategy is unsound.

THE Core Strategy misrepresents the findings of The Retail & Leisure Study (R&LS) 2008.

The Core Strategy states (12.38) "The Retail & Leisure Study indicates Hockley has great potential. Hockley has been identified as having a need for additional convenience floorspace".

Whereas, the R&LS actually states:

- 1) (10.26) "the scale of need does not lend itself to a foodstore capable of retaining a significant proportion of main food shopping expenditure.
 - 2) (10.28) "There is no immediate capacity for additional floor space."
 - 3) (10.29) "we recommend that focus be maintained on developing Hockley's existing strengths, rather than retail expansion"
 - 4) 10.31 "The current nature of Hockley does not lend itself to classification as a 'town centre' as defined by PPS6. Moreover, we have identified that it is a very small catchment population. Accordingly, the Council may wish to consider reclassifying Hockley from a town centre to a district centre".
- The Core Strategy is inaccurate, misleading and unsound.

Summary:

The Core Strategy misrepresents the findings of The Retail & Leisure Study (R&LS) 2008. The Core Strategy states "The Retail & Leisure Study states Hockley has great potential and has a need for additional convenience floorspace". Whereas, the R&LS states: 1) "does not lend itself to a foodstore capable of retaining a significant proportion of main food shopping expenditure. 2) "There is no immediate capacity for additional floor space." 3) "we recommend that focus be maintained on developing Hockley's existing strengths." 4) " the Council may wish to consider reclassifying Hockley from a town centre to a district centre".

Summary:

Summary:

Previous consultations ignored by RDC:

The proposals ignore the 95% rejection rate of respondents to RDC's own Hockley Area Plan (HAAP) Consultation (2009), which included specific proposals for Eldon Way (although HAAP did not even mention the adjoining Foundry Industrial Estate). Why have a consultation and ignore it?

Thus the proposals are not founded on a robust and credible evidence base and are unsound

CHAPTER 11 Existing Employment Land, 11.32

Respondent: Ms G Yeadell [7834]

6 Southend Road
Hockley
Essex
SS5 4QQ
01702 205450

Agent: N/A

Full Text: Para 4.8 States sustainability underlines any decisions on housing location, primarily: current and future deliverability of infrastructure, eg roads, services, public transport, health.

Policy H1

Para.4.14 Some employment sites are considered more suitable for other uses (eg housing) including Eldon Way/Foundry, Hockley. This is all open to question.

Hockley-re Eldon Way/Foundry

In CS Preferred Options 2008 policy H2 you discarded N.E.Hockley as a housing option - whilst close to centre, station, "impact on highway network from traffic heading through Hockley..along Ashingdon Road..renders location unviable". Clearly the same principle applied to Eldon Way/Foundry for the same reasons.

Response to C.S Preferred Options 2008 and HAAP 2009

June 2009 issue C S Submission issue says Eldon Way will be used for housing, whereas Sept.2009 issue says "alternative uses, including residential.." to be decided by HAAP (Issues consultation done, Pref.Options issue awaited, but judging from JAAP Pref.Options decision - namely biggest option chosen against overriding opposition, it will be housing).

Need to be logical and even-handed in proposals

Health services GP surgeries are full and a PCT health centre will not occur in the foreseeable economic climate.

Ch.10: Highways and Transport

Policy T1, T2 RDC proposes working with ECC Highways, developers, but admits it has no authority, responsibility here. RDC will seek developer contributions, but this is neither detailed nor costed in CS Submission nor HAAP, and contravenes PPS 12.3 para.4.93 which states "The infrastructure planning process should identify as far as possible infrastructure needs and costs". Idea of paying for road & transport improvements through Standard Charges is unproven and unsound.

Establish likely level of Standard Charges. Accept you cannot turn district into motorways with wholesale demolition.

In neither CS Submission nor HAAP is there any highways improvement, except idea to replace Spa roundabout with traffic lights and 1 way system up Southend Road and Hockley Rise.

Para.10.5 "..highway improvements serving new developments..in a timely manner..ensuring developments delivered alongside necessary infrastructure".

These improvements cannot possibly be delivered. It should be realised: B1013 (Southend Rd), Rectory Road Hawkwell, Ashingdon, West Rochford - all in area proposed for large new developments are former winding, narrow country roads, tarmacked over for motorised traffic. Large housing increments are unsustainable off these roads, which cannot be altered without much destruction.

Reply to CS Pref. Options 2008 & HAAP Issues/Options 2009

Policy T3, CLT1 Appendix CLT1 Public transport RDC admits this is in the private sector. In Hockley, operator has cut No7 service to 1 per hour from Ashingdon Schools, claiming it is unviable beyond. This is unlikely to change as Hockley is car dependant. No8 bus through Hawkwell is cut to 1 per hour to Rayleigh, for same reason as No7. Proposed planning agreements with developers can't run: eg, a community centre or classroom given by a developer remains once he has moved on - how can that apply for an on-going bus service?

Reply to Infrastructure Transport in CS Pref. Opts. 2008 and to HAAP Issues Opts. 2009.

Ch.11 Economic development

Policy ED3 Core Strategy preferred Options 2008 hinted at possible housing in Eldon Way site. June 2009 Submission version, without consultation, said Eldon Way would be housing (map included Foundry, not the text). September 2009 Submission said redevelopment would be in HAAP (which apart from the Issues/Options version, is unfinished. Judging from results of JAAP Preferred Options where biggest option is chosen, though most respondents were against it, site will be housing, without consultation.

Core Strategy Submission Document

O - 16720 - 7834 - Existing Employment Land, 11.32 - i

16720 Object

CHAPTER 11 Existing Employment Land, 11.32

Para.1.25, Para.11.32 Note CH.1 Introduction to CS Submission 2009 para.1.25 East England Plan requires 3000 additional jobs, presumably to 2021. Revised Southend Airport is expected to drive Economic development. But at para. 11.32 Eldon Way-Foundry estate is planned to be more suitably utilized. "...alternative land will be required to accommodated employment uses so displaced" - ie jobs sent to eg new site near Southend Airport - not new jobs.

Reply to HAAP Issues Options 2009

Remove compulsory relocation

Policy ED4 Policy states Council will allocate 18ha of land to make up for de-allocations in ED3 - that proves point above.

Proposals for moving employment to out of town locations with no existing transport links are contrary to government policies PPG4, PPS1 and PPS4 and Core Strategy Policy T1.

Evidence Base is ignored by contravening Hockley Parish Plan 2007 and ignoring residents' views on HAAP Issues/Options. Next stage of HAAP Preferred Options is pre-empted and rendered irrelevant. Core Strategy plans to relocate Eldon Way Foundry estate to Greenfield site with no nearby bus or railway. RDC plans to upgrade the nearest road to dual carriageway, though the connecting B1013 (through Hockley) will stay single, said by ECC Highways statistics to be 72% capacity. Airport bosses and council cannot suggest there will be no traffic growth from JAAP and new industrial site.

Reply to Hockley Parish Plan 2007. HAAP Issues 2009

Move to new industrial site near airport contravenes PPS4:

- EC7.3C "out of centre sites, with preference given to sites...well served by choice of...transport and...close to centre and...high likelihood of forming links with centre". There is no current public transport and links with centres is unlikely".

- EC 7.5.1 "whether the site is or will be accessible and well served by choice of transport, public transport, walking and cycling, as well as by car...". Remote location, narrow busy B1013 makes the site unsuitable for access by cycle or on foot.

It also contravenes PPS1 (27vii)... "reduce need to travel, encourage accessible public transport provision to secure more sustainable patterns of transport...Planning should actively manage patterns of urban growth to make fullest use of public transport and focus development in existing centres, near to major public transport interchanges". Core Strategy undermines its own policy Transport and Highways policy T1 and is unsound.

Although shown on accompanying drawing in earlier versions, there was no prior textual mention of Foundry industrial estate (next to Eldon Way) for redevelopment until current CS 2009 Submission. This was stated to be a typing error, but does not inspire confidence in reliability of drafting.

Revise both 2009 Core Strategy and 2009 HAAP Issues/options

Chapter 12: Retail/Town centres

The Core Strategy misrepresents findings of the Retail and Leisure Study 2008.

Para.12.38 The Core Strategy states (para.12.38) "The Retail & Leisure Study indicates Hockley has great potential. Hockley has been identified as having a need for additional convenience floorspace."

Whereas the R&LS actually states:

1) (10.26) "the scale of need does not lend itself to a foodstore capable of retaining a significant proportion of main food shopping expenditure".

2) (10.28) "There is no immediate capacity for additional floorspace".

3) (10.29) "we recommend focus be maintained on developing Hockley's existing strengths, rather than retail expansion"

4) 10.31 "the current nature of Hockley does not lend itself to classification as a 'town centre' as defined by PPS6. Moreover, we have identified that it has a very small catchment population. Accordingly, the council may wish to consider reclassifying Hockley from a town centre to a district centre".

Defer whole of proposals for Hockley town centre to Hockley Area Action Plan.

The Council will work with landowners and its partners to deliver the HAAP.

Remove threat of compulsory purchase orders.

Core Strategy Submission Document

O - 16720 - 7834 - Existing Employment Land, 11.32 - i

16720 Object

CHAPTER 11 Existing Employment Land, 11.32

One doesn't perceive impartiality when the Planning Director replies to local HAAP survey with "The affluent people of Hockley are entitled to famous name shops".

Chapter 5: Character of Place and Local Lists

Para.5.4 "Rochford district has unique character..stems from traditional buildings..still dominate towns and villages".

Para.5.17 "Council believes many buildings..are of local distinctiveness..part of..cherished local scene".

This only applies to favoured places: Rochford, Rayleigh, greenbelt villages. Many Hockley conservable items have been systemically removed for supposedly lucrative development in face of widespread protect. This is for supposed need for housing. In fact heritage items have been replaced by dwellings most cannot afford, and/or are hard to sell due to unsuitability of massing and siting. Many other homes are jeopardised by this practice.

HAAP issues 2009. Core Strategy 2006, 2007,2008, SCI.2006

Fewer 'vested interests', more even handedness. No more pressing people out of businesses, homes for expediency.

A CPRE Fieldwork issue extolled Local Lists, citing refusal of 16 flats to replace character house, not on local list. Inspector said house, façade made a contribution to area character, even if English heritage decided it didn't warrant listing. Council worked to get the house grade listed and even made adjacent area conservation one.

Hockley had one such on a "significant site" faced with 13 flats. Ward Member omitted house from refusal proposal, so house could be demolished. RDC dropped Local List ahead of appeal: "Government frowned on such Lists" (Other LAs, unaware of supposed directive retained theirs. After demolition RDC restored Local Lists, saying Government now support them. When Inspector queried the complaint, the then policy officer said "just politics, lot of local interest, nothing of character in the area[!]. (A dozen such items had been removed). Some "distinctive" Hockley buildings are still condemned (in Greensward Lane.; others threatened (Spa Road). Whereas a modest hue and cry in Rayleigh will usually result in a building being saved.

Conclusion

Core Strategy Submission DPD is basically unsound in many respects

Incomplete information. Amongst others, it refers to Hockley AAP, the first stage of which is complete, but not other three. Rochford AAP first stage has been published in arrears of Core Strategy Submission. Rayleigh AAP is still awaited. Precise housing sites are absent, as Urban Capacity Study 2007 has been superseded by Strategic Housing Land Availability Assessment, not yet published. Traders, residents, are thus responding to Core Strategy Submission with incomplete information.

Lack of community involvement. Chapter 1, Introduction, para. 1.11 "Community involvement is an essential part of the plan making process".

In Statement of Community Involvement 2006 Rochford RDC "recognises need to enable people to have their voices heard".

Re Public Meetings: "Consideration will be had to timing and venue to ensure meeting is as accessible as possible".

Take Hockley Area Action Plan as an example of the opposite of all this:- Presentation of document was at Hullbridge, 7.30pm. It was also discussed with JAAP at Rochford Freight House (for traders only) at 7am, without publicity. Excuse made: HAAP on RDC website, which none will seek unless knowing it is there. Rochford District Matters newsheet had minute articles on p.3, half way through consultation period. Another excuse: a 2nd presentation by Hockley Residents Association with planning officer present: only because of complaints, and it is not the HRA's responsibility to RDC's job. Due to unavoidable haste of calling meeting, few knew and only 50 were present.

In Core Strategy Submission Hockley Parish Plan has been ignored. Proposals also ignore 95% rejection rate response to HAAP 2009, which included proposals for Eldon Way employment site.

Unfettered right of developers to carry on as if Core Strategy didn't exist. In PPS 12, Ch.4.6 states: "Core Strategies should be flexible and able to show how they handle contingencies". Several large planning applications have been submitted proposing developments outside the Core Strategy which does not indicate how such applications will be handled and does not comply with PPS 12.

Where are we? Finally, at Chapter 1, Introduction, para. 1.24: "the Core Strategy will have to be reviewed in the event of a new Local Area Agreement, post-2011, setting different priorities". So what purpose does all this work serve? So we have hardly finished this exercise, before it all starts again?

Summary:

Para.1.25, Para.11.32 Note CH.1 Introduction to CS Submission 2009 para.1.25 East England Plan requires 3000 additional jobs, presumably to 2021. Revised Southend Airport is expected to drive Economic development. But at para. 11.32 Eldon Way-Foundry estate is planned to be more suitably utilized. "...alternative land will be required to

Chapter 4: Housing

Para 4.8 States sustainability underlines any decisions on housing location, primarily: current and future deliverability of infrastructure, eg roads, services, public transport, health.

Policy H1, Para.4.14 Some employment sites are considered more suitable for other uses (eg housing) including Eldon Way/Foundry, Hockley. This is all open to question.

Hockley-re Eldon Way/Foundry

In CS Preferred Options 2008 policy H2

N.E.Hockley was discarded as a housing option - whilst close to centre, station, "impact on highway network from traffic heading through Hockley...along Ashingdon Road..renders location unviable". Clearly the same principle applied to Eldon Way/Foundry for the same reasons.

Need to be logical and even-handed in proposals

June 2009 issue C S Submission issue says Eldon Way will be used for housing, whereas Sept.2009 issue says "alternative uses, including residential.." to be decided by HAAP (Issues consultation done, Pref.Options issue awaited, but judging from JAAP Pref.Options decision - namely biggest option chosen against overriding opposition, it will be housing).

Policy H1, T1 Proposals for moving employment to out of town locations, at either end of the district, with no existing public transport links, are contrary to government policy PPG14 & PPS1. it also contravenes the Core Strategy's stated aims of reducing carbon emissions; reliance on car transport and providing "an integrated network of cycle paths",

The Core Strategy also contravenes its own policy T1 and is unsound.

Health services GP surgeries are full and a PCT health centre will not occur in the foreseeable economic climate.

Ch.10: Highways and Transport

Policy T1, T2 RDC proposes working with ECC Highways, developers, but admits it has no authority, responsibility here. RDC will seek developer contributions, but this is neither detailed nor costed in CS Submission nor HAAP, and contravenes PPS 12.3 para.4.93 which states "The infrastructure planning process should identify as far as possible infrastructure needs and costs". Idea of paying for road & transport improvements through Standard Charges is unproven and unsound.

Establish like motorways with wholesale demolition.

In neither CS Submission nor HAAP is there any highways improvement, except idea to replace Spa roundabout with traffic lights and 1 way system up Southend Road and Hockley Rise.

RDC are proposing to scatter housing across the district in around 12 or sites but no detailed consideration has been given to the implications for highways across the District. Many roads across the District are at or near capacity but no modelling has been undertaken to determine the impacts.

It is clear that (i) the combined impact of scattering houses across the District and (ii) relocating Eldon Way/Foundry Industrial Estates with no public transport services will exacerbate existing problems. It is clear that the extent of improvements required is both unknown and not funded and the proposal is unsound.

Para.10.5

Policy T3, CLT1 Appendix CLT1

T1 & T2 "...highway improvements serving new developments..in a timely manner..ensuring developments delivered alongside necessary infrastructure".

These improvements cannot possibly be delivered. It should be realised: B1013 (Southend Rd), Rectory Road Hawkwell, Ashingdon, West Rochford - all in area proposed for large new developments are former winding, narrow country roads, tarmacked over for motorised traffic. Large housing increments are unsustainable off these roads, which

Core Strategy Submission Document

CHAPTER 11 Existing Employment Land, 11.32

cannot be altered without much destruction.

Public transport RDC admits this is in the private sector. In Hockley, operator has cut No 7 service to one per hour from Ashingdon Schools, claiming it is unviable beyond. This is unlikely to change as Hockley is car dependant. No 8 bus through Hawkwell is cut to one per hour to Rayleigh, for same reason as No 7. Proposed planning agreements with developers can't run: e.g., a community centre or classroom given by a developer remains once he has moved on - how can that apply for an on-going bus service?

Ch.11 Economic development

Policy ED3 Core Strategy preferred Options 2008 hinted at possible housing in Eldon Way site. June 2009 Submission version, without consultation, said Eldon Way would be housing (map included Foundry, not the text). September 2009 Submission said redevelopment would be in HAAP (which apart from the Issues/Options version, is unfinished. Judging from results of JAAP Preferred Options where biggest option is chosen, though most respondents were against it, site will be housing, without consultation.

Para.1.25 Para.11.32

Policy ED4 T1 & T2 Note CH.1 Introduction to CS Submission 2009 para.1.25 East England Plan requires 3000 additional jobs, presumably to 2021. Revised Southend Airport is expected to drive Economic development. But at para. 11.32 Eldon Way-Foundry estate is planned to be more suitably utilized. "...alternative land will be required to accommodated employment uses so displaced" - ie jobs sent to eg new site near Southend Airport - not new jobs.

Remove compulsory relocation

Policy states Council will allocate 18ha of land to make up for de-allocations in ED3 - that proves point above.

Proposals for moving employment to out of town locations with no existing transport links are contrary to government policies PPG4, PPS1 and PPS4 and Core Strategy Policy T1.

Evidence Base is ignored by contravening Hockley Parish Plan 2007 and ignoring residents' views on HAAP Issues/Options. Next stage of HAAP Preferred Options is pre-empted and rendered irrelevant.

Core Strategy plans to relocate Eldon Way Foundry estate to Greenfield site with no nearby bus or railway. RDC plans to upgrade the nearest road to dual carriageway, though the connecting B1013 (through Hockley) will stay single, said by ECC Highways statistics to be 72% capacity. Airport bosses and council cannot suggest there will be no traffic growth from JAAP and new industrial site.

Revise both 2009 Core Strategy and 2009 HAAP Issues/options

Move to new industrial site near airport contravenes PPS4:

EC7.3C "out of centre sites, with preference given to sites..well served by choice of..transport and..close to centre and..high likelihood of forming links with centre". There is no current public transport and links with centres is unlikely".

EC 7.5.1 "whether the site is or will be accessible and well served by choice of transport, public transport, walking and cycling, as well as by car..". Remote location, narrow busy B1013 makes the site unsuitable for access by cycle or on foot.

It also contravenes PPS1 (27vii).. "reduce need to travel, encourage accessible public transport provision to secure more sustainable patterns of transport..Planning should actively manage patterns of urban growth to make fullest use of public transport and focus development in existing centres, near to major public transport interchanges". Core Strategy undermines its own policy Transport and Highways policy T1 and is unsound.

H1 & RTC6 Although shown on accompanying drawing in earlier versions, there was no prior textual mention of Foundry industrial estate (next to Eldon Way) for redevelopment until current CS 2009 Submission. In recent amendment to the CS this was stated to be due to a typing error!

Chapter 12: Retail/Town centres

The Core Strategy misrepresents findings of the Retail and Leisure Study 2008.

Defer whole of proposals for Hockley town centre to Hockley Area Action Plan.

Para.12.38 H1 & RTC6 The Core Strategy states (para.12.38) "The Retail & Leisure Study indicates Hockley has great potential. Hockley has been identified as having a need for additional convenience floorspace."

Whereas the R&LS actually states:

1) (10.26) "the scale of need does not lend itself to a foodstore capable of retaining a significant proportion of main food

Core Strategy Submission Document

O - 16754 - 14229 - Existing Employment Land, 11.32 - i, iii

16754 Object

CHAPTER 11 Existing Employment Land, 11.32

shopping expenditure".

2) (10.28) "There is no immediate capacity for additional floorspace".

3) (10.29) "we recommend focus be maintained on developing Hockley's existing strengths, rather than retail expansion"

4) 10.31 "the current nature of Hockley does not lend itself to classification as a 'town centre' as defined by PPS6. Moreover, we have identified that it has a very small catchment population. Accordingly, the council may wish to consider reclassifying Hockley from a town centre to a district centre".

Remove threat of compulsory purchase orders.

The Council will work with landowners and its partners to deliver the HAAP.

Chapter 5: Character of Place and Local Lists

Para.5.4 "Rochford district has unique character..stems from traditional buildings..still dominate towns and villages".

Para.5.17 "Council believes many buildings..are of local distinctiveness..part of..cherished local scene".

This only appears to apply to certain places: Rochford, Rayleigh, greenbelt villages. Many Hockley conservable items have been systemically removed for supposedly lucrative development in face of widespread protect. This is for supposed need for housing. In fact heritage items have been replaced by dwellings most cannot afford, and/or are hard to sell due to unsuitability of massing and siting. Many other homes are jeopardised by this practice.

Conclusion

Core Strategy Submission DPD is basically unsound in many respects:

Incomplete information. Amongst others, it refers to Hockley AAP, the first stage of which is complete, but not other three. Rochford AAP first stage has been published in arrears of Core Strategy Submission. Rayleigh AAP is still awaited. Precise housing sites are absent, as Urban Capacity Study 2007 has been superseded by Strategic Housing Land Availability Assessment, not yet published. Traders, residents, are thus responding to Core Strategy Submission with incomplete information.

Lack of community involvement. Chapter 1, Introduction, para. 1.11 "Community involvement is an essential part of the plan making process". In Statement of Community Involvement 2006 Rochford RDC "recognises need to enable people..to have their voices heard".

Re Public Meetings: "Consideration will be had to timing and venue to ensure meeting is as accessible as possible".

Hockley Area Action Plan as an example of the opposite of all this:- Presentation of document was at Hullbridge, 7.30 p.m. It was also discussed with JAAP at Rochford Freight House (for traders only) at 7 a.m., without publicity. Excuse made: HAAP on RDC website, which none will seek unless knowing it is there. Rochford District Matters newssheet had minute articles on p.3, half way through consultation period. Another excuse: a second presentation by Hockley Residents Association with planning officer present: only because of complaints, and it is not the HRA's responsibility to RDC's job. Due to unavoidable haste of calling meeting, few knew and only 50 were present.

In Core Strategy Submission Hockley Parish Plan has been ignored. Proposals also ignore 95% rejection rate response to HAAP 2009, which included proposals for Eldon Way employment site.

Unfettered right of developers to carry on as if Core Strategy didn't exist. In PPS 12, Ch.4.6 states: "Core Strategies should be flexible and able to show how they handle contingencies". Several large planning applications have been submitted proposing developments outside the Core Strategy which does not indicate how such applications will be handled and does not comply with PPS 12.

Where are we? Finally, at Chapter 1, Introduction, para. 1.24: "the Core Strategy will have to be reviewed in the event of a new Local Area Agreement, post-2011, setting different priorities". So what purpose does all this work serve? So we have hardly finished this exercise, before it all starts again?

Summary:

Note CH.1 Introduction to CS Submission 2009 para.1.25 East England Plan requires 3000 additional jobs, presumably to 2021. Revised Southend Airport is expected to drive Economic development. But at para. 11.32 Eldon Way-Foundry estate is planned to be more suitably utilized. "...alternative land will be required to accommodated employment uses so displaced" - ie jobs sent to eg new site near Southend Airport - not new jobs.

Full Text: The proposed re-allocation of the existing employment uses identified in the DPD is unsound. Having undertaken an assessment of their suitability and deliverability for residential or alternative uses, the sites at Hockley, Rawreth and Wakering are occupied by multiple users which would be difficult to relocate. Rawreth is characterised by a number of heavy industrial users which is likely to have caused significant contamination, which may prove unviable to remediate. Stambridge Mills whilst vacant, is highly unsustainable for a residential use, and is within Flood Risk Zone 3b, and therefore unlikely to pass the Exceptions Test.

Summary: The proposed re-allocation of the existing employment uses identified in the DPD is unsound. Having undertaken an assessment of their suitability and deliverability for residential or alternative uses, the sites at Hockley, Rawreth and Wakering are occupied by multiple users which would be difficult to relocate. Full Text: Previous consultations and public opinion ignored by RDC and HAAP pre-empted:
As well as ignoring the Parish Plan and the 95% rejection rate of the HAAP proposals, the Core Strategy proposals pre-empt the next round of the HAAP.

Public opinion in Hockley is strongly against both the HAAP and Core Strategy proposals for Hockley Village Centre. A survey undertaken in October 2009 had 972 responses (over 20% of households) and the key results were:
- shops: only 5% in favour of major redevelopment (43% supported moderate redevelopment and 52% only wanted minor improvements)
- Eldon Way & Foundry Industrial Estates: just 13% wanted major change with a youth centre suggested as the most popular improvement.
- Roads: nearly 2/3rds wanted to retain a roundabout at the Spa Junction instead of traffic lights proposed by RDC.

Thus the proposals are not founded on a robust and credible evidence base and are unsound.

Summary: Previous consultations ignored by RDC and HAAP pre-empted:
The proposals ignore both the Parish Plan and the 95% rejection rate of respondents to RDC's own HAAP Consultation (2009), which included specific proposals for Eldon Way (but did not even mention the Foundry Industrial Estate). A survey completed by 972 residents in October 2009 also confirmed the public's rejection with only 5% in favour of redeveloping the shops and only 13% supporting redevelopment of the industrial estate.
Thus the proposals are not founded on a robust and credible evidence base and are unsound.

Full Text: As we have suggested in our representations regarding Housing, we question the ability to deliver all of the 4 employment sites identified for redevelopment in the Core Strategy (within the plan period). This is particularly the case for the Rawreth Lane Industrial Estate, Rayleigh.

We have serious doubts that the Rawreth Industrial Estate (identified for 220 units 2017/18 to 2019/20) will come forward for residential development. As we understand it, there are a considerable number of different landownerships involved. There are also many different tenants/occupiers. This suggests that land assembly, to enable a comprehensive development (the only way, we suggest, that development of this estate could take place) will be more than problematic and will take a considerable number of years to achieve (if at all). Even if other/an alternative site/land is identified for the possible relocation of existing occupiers, there is no guarantee that occupiers would want to relocate, with the possibility of incurring greater costs in new premises. Occupiers may be happy to stay where they are unless they wish to expand or upgrade premises.

We also think that there could be serious contamination issues at this site, further affecting delivery of a housing scheme/affecting development costs.

We are not aware that the council would have the will or the finances to undertake compulsory purchase to enable the sites redevelopment.

We are not aware that the council has contacted all or any of these landowners or occupiers to ascertain the potential to assemble land and deliver the redevelopment of this site.

Whilst we understand that the site gives rise to amenity nuisance to local residents, we are surprised that the council want to redevelop a successful commercial site that provides many jobs. The Employment Land Study (Oct 08) clearly states that buildings on this site are generally of good quality and that there is no vacant land or buildings at the time of survey. This indicates much success, and its proposed redevelopment could therefore result in the loss of important jobs.

This is just one example where we believe delivery of housing numbers on brownfield sites will be affected by land assembly or other constraints.

The council needs to demonstrate how they intend to deliver the 4 redevelopment sites identified in this policy, and put forward evidence they believe shows that such redevelopment can take place. If there are serious questions over delivery, such sites should not be identified for redevelopment. In any case, we question the wisdom of the identification of the Rawreth Lane site as it provides jobs and is well used, perhaps a site that complies with the first statement of the first part of Policy ED3. In the current climate, this seems an inappropriate strategy, as existing jobs should be retained rather than run the risk of losing existing employment opportunities.

Summary: We argue that there are serious delivery issues with some of the redevelopment sites identified in this policy, particularly the Rawreth lane industrial site. To ensure housing numbers are delivered/housing targets will be met and ensure the plan is flexible, we argue that the council should:

- (a) Bring forward one/some of the greenfield sites identified for 2015 onwards
- (b) Ensure that there is the ability to provide additional housing numbers at one or more of the identified Greenfield sites.
- (c) The Rawreth Lane Industrial estate be dropped from this policy/not allocated for residential development.

Change to Plan

As put forward in our representations to Policies H1 and H2 of the Core Strategy, we believe that as these employment redevelopment sites can not be relied upon to deliver housing within the plan period. We suggest that either the sites are dropped because of the serious constraints in delivery, or that if they remain identified, greater flexibility should be built into the Core Strategy to cover the likelihood that some of these sites (particularly Rawreth Lane) do not come forward in the time periods specified. To achieve this flexibility, there is a direct implication for the identified Greenfield sites. The plan should:

- (a) Bring forward those greenfield sites identified for 2015 onwards to provide some certainty that national/regional housing targets and annual build rates/5 year land supply can be met/achieved.
- (b) Ensure that there is the ability to provide additional housing numbers at one or more of the identified Greenfield sites. Housing numbers specified in Policy H2 should be minimums in any case, and a statement should be added to that

Core Strategy Submission Document

O - 16229 - 8650 - Policy ED3 - Existing Employment Land - i, ii

16229 Object

CHAPTER 11 Policy ED3 - Existing Employment Land

policy which says something along the lines that "there may be a possible requirement for greater housing numbers on some sites should other sources of housing, such as that on identified appropriate brownfield sites, not come forward as anticipated".

OR

(c) As we suggest, the Rawreth Lane site will be particularly difficult to deliver. Whether it is dropped from this policy, or retained, an appropriate strategy would be to allocate additional housing numbers on the land we promote, north of London Road, Rayleigh, to cover the possibility of failing to deliver housing on the Rawreth Lane site/in Rayleigh. We believe that the land we promote can accommodate a greater number of housing units than that specified in Policy H2. We cover this matter further in our representations to Policy H2.

We believe these approaches to be sensible and flexible. This will allow for appropriate flexibility in the plan, and we contest would make the plan sound.

This strategy would not, we believe, prejudice the aim of developing brownfield or previously developed land as such land will come forward as a result of interest in such sites/the market, notwithstanding the development of Greenfield sites.

Full Text:

In order to meet the 3,000 new jobs required in the RSS, additional employment sites will be required, as the supply of employment land within the District is tight, any new sites will be require the release of Green Belt land. As these sites will be outside of the existing urban areas, it is unlikely that these sites will be in as sustainable locations as the existing employment sites.

The Employment Land Study recommends that any de-allocations of employment land be compensated for by the allocation of circa 18 hectares of land for new employment sites in the District.

The idea of not releasing land for residential and then releasing it for employment purposes is a contradiction, as it still requires the release of Green Belt.

With regards the site at Stambridge Mill, it is considered that this site should be safeguarded for light industrial use, instead of being redeveloped for housing; particularly, as this site is subject to a high risk of flood risk (Zone 3), and its redevelopment for residential would replace a less vulnerable use (employment) being replaced with a more vulnerable use (residential).

Reword first two paragraphs of the policy:

'Existing employment sites, which are sustainable, will be protected to ensure that they continue to provide employment generated opportunities, including the redevelopment for other employment uses.

As part of the review of existing employment sites, the Council will consider the reallocation of land at Star Land Industrial Estate, Eldon Way/ Foundry Industrial Estate and Rawreth Industrial Estate for appropriate uses, which should include a proportion of employment uses. Land capable of accommodating the business and industries that currently occupy these sites but would not be appropriate to be incorporated into their redevelopment will be allocated in new locations in accordance with Policy ED4.'

Summary:

In order to meet the 3,000 new jobs required in the RSS, additional employment sites will be required, as the supply of employment land within the District is tight, any new sites will be require the release of Green Belt land. Full Text: Re: Core Strategy for Hockley Redevelopment

I object to the Core Strategy for the following reasons;

You are ignoring the views of the local residents, who have overwhelmingly stated via the Hockley Parish Plan that they do not want any large-scale housing development in Hockley, but if there has to be some additional housing, there must be no loss of greenbelt or open spaces and any developments must be matched by the appropriate levels of infrastructure.

Our village needs improvements to build on what we have now rather than a long drawn out proposal, which, by the time it is agreed and completed will have seen Hockley become just a huge housing estate without a thriving centre, because many local businesses will have disappeared due to the dreadfully inadequate transport links.

Our roads simply cannot cope with the existing traffic volumes let alone the massive increase in traffic, which will result from the relocation of businesses and numerous housing developments.

Our village is surrounded by some of the most beautiful countryside in the district which we do not want to see disappear forever.

Listed below are some of the technical points as to why I object to the Core Strategy and why I believe it to be inaccurate, misleading and unsound.
